

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Air Quality	Andrea Lambert	Response-00357	Added traffic will add to pollution from the number of vehicles using it
1.3	Acorn Way, Derby	Air Quality	Ashley	Response-00426	The congestion around the area will cause pollution to the local wildlife
1.3	Acorn Way, Derby	Air Quality	ASHLEY STOWER	Response-01183	Air Quality will be affected considerably with 600 new homes there will be probably at least one / two per house up to four so realistically between 1200 - 200 cars & new car movements. This will effect air quality & living conditions considerably , increased congestion will lead to poor air quality & reduced health.
1.3	Acorn Way, Derby	Air Quality	Brendan Horgan	Response-00610	Standing traffic due to congestion at school times
1.3	Acorn Way, Derby	Air Quality	Carl	Response-00386	Yet more pollution when vehicles are sat waiting at either end of acorn way
1.3	Acorn Way, Derby	Air Quality	Chris copley	Response-01246	The air quality will undoubtedly be affected, we have a school, a nursing home and a large school in the exact area. The drop in air quality will have a negative impact on these people's, health as they are also the most vulnerable to these effects
1.3	Acorn Way, Derby	Air Quality	Clare Tomlinson	Response-00423	Currently, air quality appears to be good - this would be significantly reduced by increased vehicular activity and removal of green space.
1.3	Acorn Way, Derby	Air Quality	Danielle Andrews	Response-01244	The level of proposed housing feels extremely large for the area. With an extra 1000 plus people, there is likely to be a similar quantity of cars which the road isn't designed for.
1.3	Acorn Way, Derby	Air Quality	David Massey	Response-00575	No mention is made of reduction in air quality which will clearly be reduced by added traffic, added bonfires, added wood burner users etc
1.3	Acorn Way, Derby	Air Quality	David Rees	Response-00566	It is obvious that both during the building phase and steady-state, the significant increase in vehicular traffic on Morley Road must reduce the air quality for its residents.
1.3	Acorn Way, Derby	Air Quality	Donna Pearson	Response-00441	Adding more congestion to the area at rush hours is!ll be detrimental to peoples health..
1.3	Acorn Way, Derby	Air Quality	Edward James Gregory	Response-00727	Acorn way is very busy, with bad visibility and drainage, and the site of many accidents. Further development will increase congestion, usage and reduce air quality. There are no busses, road is too dangerous for cycling so everyone will use cars increasing pollution
			Gary Murfin	Response-00373	Based on each new home owner having at least one car, maybe more air quality will suffer
1.3	Acorn Way, Derby	Air Quality	Gillian stillwell	Response-01364	The excessive traffic at school start and finish times added to the extra traffic that will be inevitable will of course decrease air quality
1.3	Acorn Way, Derby	Air Quality	Glynn Booker	Response-00394	Currently the natural flora has a chance to absorb the amount of carbon produced, the additional concrete and tarmac will mean less carbon absorption especially with the increase in traffic.
1.3	Acorn Way, Derby	Air Quality	Helen Walker	Response-00333	More traffic more air pollution and the air quality is just going to get worse more standing traffic
1.3	Acorn Way, Derby	Air Quality	Iain Campbell	Response-01179	With a potential of 1100 cars and an increase of buses this will effect the air quality!
1.3	Acorn Way, Derby	Air Quality	James Bellaby	Response-00340	More cars less quality. More houses more heat generated in that area. Less greenery less oxygen.
1.3	Acorn Way, Derby	Air Quality	Jane Pitwood	Response-01366	Increasing the amount of traffic can only reduce the air quality, particularly as the building of properties in the area will reduce the amount of green space. Maintaining areas of green space is essential in helping to reduce carbon emissions.
1.3	Acorn Way, Derby	Air Quality	Karl Barlow	Response-00756	It's not going to help. The houses will be near Acorn Way, so not ideal.
1.3	Acorn Way, Derby	Air Quality	Laura	Response-00387	Subject: Objection to Planning for 550 Houses on Acorn Way and 160 Houses on Breadsall Hilltop Dear Sir/Madam, I am writing to formally object to the planning for 550 houses on Acorn Way and a further 160 houses on Breadsall Hilltop in Derby. I believe these developments are unsustainable and will have a significantly detrimental impact on the existing community and infrastructure. My objections are based on the following key concerns: 1. Misrepresentation of Target Residents and Increased Traffic: The proposal claims the development on Acorn Way will serve people who wish to live in Ilkeston, Long Eaton and Sandiacre, which is a fantasy. They are 20+ minutes away. The inevitable consequence of these 710 new households will be a substantial increase in traffic. Derby has high pollution levels and this will increase traffic further. 2. Over-Subscription of Local Schools: The schools in the areas surrounding both Acorn Way and Breadsall Hilltop are already over subscribed. The addition of these 710 houses will place an unsustainable burden on these educational facilities. 3. Over-Subscription of Local GP Surgeries: The GP surgeries in the areas surrounding both Acorn Way and Breadsall Hilltop are already over subscribed. The addition of these 710 houses will place an unsustainable burden on these healthcare services. 4. Increased Flood Risk at Breadsall Hilltop: In recent inclement weather, Breadsall village has flooded. Building 160 houses on the land at Breadsall Hilltop will cause further run off and increase the flood risk to Breadsall village and surrounding areas. In conclusion, I strongly believe that these planning applications for 550 houses on Acorn Way and 160 houses on Breadsall Hilltop are ill-conceived and fail to adequately consider the significant negative impacts they will have on the existing community and infrastructure of Derby. I urge the planning authority to reject these applications. A development of this scale in these locations is unsustainable and will severely compromise the quality of life for current and future residents of Derby. Yours faithfully, Mrs Lincoln
1.3	Acorn Way, Derby	Air Quality	Lewis	Response-00533	Will have negative impact on air quality.
1.3	Acorn Way, Derby	Air Quality	Liz Lockwood	Response-00464	Any increase in cars on Acorn Way will affect the air quality on the road and on the development
1.3	Acorn Way, Derby	Air Quality	Lou Davis	Response-00336	The green wedge between Oakwood and Spondon allows for some element of reduction in the pollution from the road use.
1.3	Acorn Way, Derby	Air Quality	Lucy Skeet	Response-00388	This will affect the air quality negatively of course
1.3	Acorn Way, Derby	Air Quality	Mandy Cooling	Response-00313	Destroying natural habitat will continue to wreak unknown hazard to the environment at a time it is so perilous - including destroying air quality
1.3	Acorn Way, Derby	Air Quality	Mandy Dickens	Response-00425	Due to the additional traffic, which will be at a standstill, the exhaust fumes will add to the already bad air pollution in that area
1.3	Acorn Way, Derby	Air Quality	Mark potter	Response-00378	Oakwood has already had around 500 houses already build on it with 5 years adding more pollution to the area and you want to add another 550 off acorn way and 180 more off bishops drive adding more pollution to an already populated area let alone the noise pollution

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
	Acorn Way, Derby	Air Quality	Mathew Lennox-Quinn	Response-01363	Goes without saying removing open fields will make air quality worse and flooding
1.3	Acorn Way, Derby	Air Quality	Nat	Response-00155	Increased pollution due to more vehicles in the area
1.3	Acorn Way, Derby	Air Quality	Natalie Peake	Response-00794	The increase in vehicle numbers will result in higher air pollution levels, particularly impacting children and young people walking to and from school each day, as well as local residents. The combination of increased congestion and pollution will have a devastating effect on road safety and air quality?both of which are critical to the wellbeing of the community.
1.3	Acorn Way, Derby	Air Quality	Nathan Latymer	Response-00363	The traffic and pollution in this area is awful as it is, with no need for it to be made any worse by adding loads of houses, especially at the island between Acorn Way and Raynesway.
1.3	Acorn Way, Derby	Air Quality	Nick & Jacqui McCrorie	Response-01361	Increased traffic in the area will worsen air pollution
1.3	Acorn Way, Derby	Air Quality	Nick Charles	Response-01370	According to Plant Life, approximately 68 tons of carbon per hectare (t C ha) is sequestered in neutral grassland per year, in the soil and roots of grass, which remains locked away in the undisturbed soil. And of course, as part of the process of photosynthesis, those grasses help produce the oxygen that we all breathe. The site of approx., 24 ha therefore contains over 1,630 tons of carbon, most of which will be released into the atmosphere, if building is allowed to go ahead. Air quality will be reduced by removing the trees and grass which absorb carbon and the particulates from vehicles, queuing with their engines running at peak times. (See Road Safety and Traffic Congestion above)
1.3	Acorn Way, Derby	Air Quality	Nicki Harries	Response-00541	More cars, more pollution in what should be a lovely area to live
1.3	Acorn Way, Derby	Air Quality	Nicola Oliver	Response-00434	More traffic will increase air pollution and affect people?s health
1.3	Acorn Way, Derby	Air Quality	Oakwood Ward Councillors Eyre, Muthall and Trehwella	Response-01358	The comments in our previous objection remain relevant.
1.3	Acorn Way, Derby	Air Quality	Paul Burge	Response-00289	With the congestion this development brings poorer air quality is bound to follow.
1.3	Acorn Way, Derby	Air Quality	Peter Marshall	Response-00526	The development will significantly increase local traffic, leading to higher emissions and poorer air quality. This poses a serious risk to public health.
1.3	Acorn Way, Derby	Air Quality	Rachael Hinckley	Response-01166	With a potential of 1100 cars this will effect the air quality
			Robert Collis	Response-00355	The increase traffic flow which will increase standing traffic will have a negative effect on the air quality for all
1.3	Acorn Way, Derby	Air Quality	Scarlett Hamblin	Response-00395	Global warming is an ever increasing problem and by increasing the number of cars and housing it is increasing the global warming contribution. We can do without these houses. We need green spaces to allow the earth to recover from the effects of climate change.
1.3	Acorn Way, Derby	Air Quality	Sharon Coward	Response-00360	Increased traffic will negatively impact the air quality.
1.3	Acorn Way, Derby	Air Quality	Tanya Caldbeck	Response-00919	To many fumes from more housing in area
1.3	Acorn Way, Derby	Bus Services	Andrea Lambert	Response-00357	Oakwood has limited bus services and the building of more houses will make the matter worse.
1.3	Acorn Way, Derby	Bus Services	Arthur Boulton	Response-01097	There will be no improvement in public transport
1.3	Acorn Way, Derby	Bus Services	Ashley	Response-00426	Morley Road is a bus road however it is already a problem as the roads are not wide enough
1.3	Acorn Way, Derby	Bus Services	Carl	Response-00386	More buses required more pollution
1.3	Acorn Way, Derby	Bus Services	Clare Tomlinson	Response-00423	Are not adequate There is a bus with limited operating times on Morley Road - this does not run on a Sunday.
1.3	Acorn Way, Derby	Bus Services	Courtney Hodges	Response-00403	As our buses have recently been changed, having more houses added will mean the bus services are more busy and will take longer to get into town. This will result in people driving to work, instead of getting the bus
1.3	Acorn Way, Derby	Bus Services	Danielle Andrews	Response-01244	The bus service already is adequate on this route, this service isn?t excessively used and extra funding should go towards retaining biodiversity and green space around housing
1.3	Acorn Way, Derby	Bus Services	David Massey	Response-00575	Whilst improved bus service would be welcome the reality is that these homes will all have two cars and won't use the buses, particularly when the bus service will just be wound down
1.3	Acorn Way, Derby	Bus Services	David Rees	Response-00566	The amended wording ?Financial contributions to increase the frequency of improve bus services and bus halts along Morley Road? is suspicious. The problem with current bus services along Morley Road [Route 32] is that the buses run only hourly. The quality of buses is not an issue, but the frequency is. ?Improve bus services? could just mean new seats on the existing buses! No, this wording is too loose and will not do; one could drive a double-decker bus though these words [excuse the pun]. The original wording ?increase the frequency of bus services? should be retained, together with ?and improve bus halts?. Furthermore, ?Financial contributions? is too loose: how much and for how long needs to be scoped.
1.3	Acorn Way, Derby	Bus Services	Douglas Chambers	Response-01235	Further delays caused by and to buses and passengers will severely handicap particularly the elderly who rely upon the service.
1.3	Acorn Way, Derby	Bus Services	Edward James Gregory	Response-00727	There are no buses here so they cannot be used! This will require all residents to use their own cars and cycling is too dangerous
1.3	Acorn Way, Derby	Bus Services	Gary Murfin	Response-00373	I'm just reading the comments about bus services, there obviously will have to be more bus?s and routes, also I can?t understand why the bus routes through Danebridge crescent are affected, which is near where I live
1.3	Acorn Way, Derby	Bus Services	Glynn Booker	Response-00394	Busses going to town don't have suitable paths and safe crossing for children. Busses have been reduced in number so unless these are being increased then mist people will elect to use cars instead.
1.3	Acorn Way, Derby	Bus Services	Helen Walker	Response-00333	What buses no buses go down Acorn Way !
1.3	Acorn Way, Derby	Bus Services	James Hope	Response-00548	Morley Road is currently only served by one bus each way per hour, the Black Cat service between Derby and Mansfield. A financial contribution to support additional services per hour, either a more frequent Black Cat service or an alternative service to Derby, will be required to make public transport use a viable option for the residents of the new development
1.3	Acorn Way, Derby	Bus Services	Jane Pitwood	Response-01366	I don't understand how improving bus services on Danebridge Crescent will help with people using public transport in the Acorn Way area!
1.3	Acorn Way, Derby	Bus Services	Janette Glenn	Response-00421	There are no bus services serving Acorn Way and only the Black Cat serving Morley Road. Residents are therefore likely to use their cars and add to existing pollution and congestion.
1.3	Acorn Way, Derby	Bus Services	Karl Barlow	Response-00756	There are already good bus services. The buses will just be snarled up in all the extra traffic, so this can only be negative.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Bus Services	Kelsey Strachan	Response-00377	Bus service is non existent on Morley Road and other Oakwood services especially infrequent or far from Morely road. Increasing them through investment supposedly expected from this development will be short term and quickly useless. Morley road is too narrow to accommodate regular buses as evidenced by the commotion one bus going down there causes due to cars parked on the road already.
1.3	Acorn Way, Derby	Bus Services	Liz Lockwood	Response-00464	There are no bus services on Acorn Way . The proposals are for people to join bus services that serve Morley Road and Oakwood. Morley road is only served by a small no of services which do not run late at night or have a regular frequency How would people access these services - there are no pavements on Acorn Way . Any route for through the proposed estate would be a long walk.
1.3	Acorn Way, Derby	Bus Services	Lou Davis	Response-00336	The bus service along Morley Road is infrequent and not suitable for the additional impact of 500 additional houses. Local public transport is not adequate immediately adjacent to this proposed development.
1.3	Acorn Way, Derby	Bus Services	Mark potter	Response-00378	I believe There is no bus route that goes down acorn way so agin it?s not easley accessible and people will be driving there cars on acorn way making an already fast congested and dangerous road even more dangerous absolute madness agin
1.3	Acorn Way, Derby	Bus Services	Mathew Lennox-Quinn	Response-01363	Bus service pointless
1.3	Acorn Way, Derby	Bus Services	Nick Charles	Response-01370	There is only one bus per hour that runs along Morley Road (32), between Derby city centre and Ilkeston and it does not run in the evening or on Sundays. And since the change to the timetables, the 26 service is now a half hour service as well. The ?Financial contributions to improve bus services and bus halts along Morley Road? is a ridiculous statement, as there are already enough bus stops, but not enough buses for a development of this size. The government is encouraging new housing estates to be built where there is plenty of public transport, so as not to make them car dependent, however this will not be the case here.
1.3	Acorn Way, Derby	Bus Services	Oakwood Ward Councillors Eyre, Mulhall and Trehwella	Response-01358	We believe the comments in our previous objection remain relevant. We fail to believe that improvements to bus halts, and the service provided, without seeking to improve the frequency or add additional routes, will not result in increased bus use. Whilst funding for a Danebridge Crescent service would be welcomed, after services were reduced and amended, we do not believe it would be of much benefit to residents who would reside on this land.
1.3	Acorn Way, Derby	Bus Services	Paul Burge	Response-00289	Bus services have already been reduced and at busy periods getting passed the school exit is impossible.
1.3	Acorn Way, Derby	Bus Services	Rebecca Styles-Jones	Response-00372	Buses struggle on Danebridge Crescent with a large van parked at the top making it difficult to get in/out. We do not need more buses on this route.
1.3	Acorn Way, Derby	Bus Services	Robert Collis	Response-00355	These are already being reduced and infrequent an increase in footfall will not help this situation, currently there are no buses on accom way
1.3	Acorn Way, Derby	Bus Services	Scarlett Hamblin	Response-00395	Bus services will need to be added to allow for the extra population. This will have knock on effects to both the traffic congestion and also the green house gases that are released from the buses yet again having a negative impact on the surrounding countryside.
1.3	Acorn Way, Derby	Bus Services	Sharon Coward	Response-00360	Insufficient bus services already so without major monetary input to improve this it will have a negative effect.
1.3	Acorn Way, Derby	Flooding / Drainage	Andrea Lambert	Response-00357	Acorn Way is prone to flooding in heavy rain and the road has been closed due to this on numerous occasions. Building more houses and all the extra traffic that will create will make getting out of Oakwood a nightmare
1.3	Acorn Way, Derby	Flooding / Drainage	Andrea Wightman	Response-00358	Flooding on Acorn Way has got worse over the years. The road has been closed on numerous occasions over the past couple of years and with this development will only get worse
1.3	Acorn Way, Derby	Flooding / Drainage	Arthur Boulton	Response-01097	Acorn way already has flooding issues this development will only make it worse
1.3	Acorn Way, Derby	Flooding / Drainage	Ashley	Response-00426	You need to take a real look at acorn way it?s been flooded so many time over the past 2 years
1.3	Acorn Way, Derby	Flooding / Drainage	Brendan Horgan	Response-00610	The area (especial outside the school) floods regularly. The houses to the right of the main entrance to the school have flooded due to inadequate highway drainage. There is a serious drainage issue at Deborah Drive, with floods of up to 300mm across the carriageway. The highway drainage system on Morley Road is inadequate and not fit for purpose.
1.3	Acorn Way, Derby	Flooding / Drainage	Callum Rhodes	Response-00371	Acorn way has flooded under every moderate of heavy rainfall over the last two years and has to be repeatedly closed for safety. In addition Breadsall village has flooded repeatedly over the years. This will only exasperate issues.
1.3	Acorn Way, Derby	Flooding / Drainage	Carl	Response-00386	Acorn way is already a road that floods in 2 areas that causes major disruption
1.3	Acorn Way, Derby	Flooding / Drainage	Cheryl Wilde	Response-00328	Acorn Way is notorious for flooding and has often been closed due to flooding. Surely another 550 homes will make this situation worse.
1.3	Acorn Way, Derby	Flooding / Drainage	Chris copley	Response-01246	Often after heavy rain Morley Road sees a lot of run off, the drains can currently only just handle this, more properties would cause a problem here
1.3	Acorn Way, Derby	Flooding / Drainage	Clare Tomlinson	Response-00423	Acorn Way floods regularly - and the road has been closed on many occasions. It is planning policy not to allow householders to pave over garden space due to the reduction in drainage of surface water - building on a large area will increase exponentially the amount of run off. A case in point is Breadsall Village which has flooded more often since the building of the Persimmon Lime Tree Court Estate - another blot on the landscape.
1.3	Acorn Way, Derby	Flooding / Drainage	Courtney Hodges	Response-00403	The fields flood when it rains in huge amounts, including spilling onto the road which results in the road closing. Adding houses onto the fields will only increase this flood risk
1.3	Acorn Way, Derby	Flooding / Drainage	Danielle Andrews	Response-01244	Derby is already an area that struggles with flooding. Removing all green land will increase risk in the area
1.3	Acorn Way, Derby	Flooding / Drainage	David Massey	Response-00575	We live next to the brook. More houses will reduce run off and cause flooding. The brook barely survives heavy rainfall and the environment agency lists the possibility of flooding. Once the houses are built no-one will be able to be held responsible. Flood prevention will be inadequate and the existing home owners downstream will pay the penalty

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Flooding / Drainage	David Rees	Response-00566	My concern here is with Morley Road, south of the Acorn Way roundabout. The recent heavy rains once again highlighted the problem of existing rain run-off, from the field proposed for development, onto Morley Road. The field elevation is up to 2-3m above that of Morley Road and the run-off from the field results in a shallow, fast-running river down the gradient [north to south] of Morley Road that pools further down the road where the gradient becomes level for approx 200m before the gradient continues. One must assume that the run-off from a housing development would be significantly higher than that from a field. The existing drainage is inadequate and, therefore, without a significant upgrade to the current drainage system and specific run-off mitigation constructions on the proposed development, the flood risk WILL increase. The cost of the necessary upgrade to the current drainage system must fall to Erewash Borough Council and/or the developer.
1.3	Acorn Way, Derby	Flooding / Drainage	Donna Pearson	Response-00441	Acorn way Morley road are subjugated to flooding every time it rains.To build on that would be a mistake as the houses already on Morley road could be subj cr to flooding
1.3	Acorn Way, Derby	Flooding / Drainage	Douglas Hunt	Response-00353	There is already a major flooding issue at the lower end if Morley Road and the disruption to natural drainage and additional run of from the development will exacerbate that issue without the provision of additional drainage infrastructure
1.3	Acorn Way, Derby	Flooding / Drainage	Edward James Gregory	Response-00727	Area is prone to flooding and surface water run off onto the badly designed Acorn Way
1.3	Acorn Way, Derby	Flooding / Drainage	Emma Daniels	Response-00349	Acorn way never used to flood but ever since the new homes the last couple of years have been terrible, how are new homes going to help this?
1.3	Acorn Way, Derby	Flooding / Drainage	Gary Murfin	Response-00373	There has always been flooding on Acorn way quite often over the years making it impassable, how will be stopped
1.3	Acorn Way, Derby	Flooding / Drainage	Gemma	Response-00380	Our garden floods now due to the changes to the road - removing green land and trees to absorb the excess water has a knock on everywhere
1.3	Acorn Way, Derby	Flooding / Drainage		Response-00384	Acorn way is known for flooding, falling trees, and ice. Adding houses onto it would just increase flooding for a start
1.3	Acorn Way, Derby	Flooding / Drainage	Glynn Booker	Response-00394	The proposed land is what I understand an absorption belt, without it houses lower down Morely road will be at risk of flooding.
1.3	Acorn Way, Derby	Flooding / Drainage	Helen Walker	Response-00333	Acorn way floods ! Has done and always will do and even more so if more houses are built the two councils need to work together to make this road a safer place, nothing has really changed since the join glad does down there many years ago when it had rained hard and was flooded, less trees etc and you will get more water and floods
1.3	Acorn Way, Derby	Flooding / Drainage	Iain Campbell	Response-01179	The fields soak up the rain avoiding floods, this site has a potential to cause flooding in the area which you are wanting to create 550 homes next to Morley Road which already has water drainage issues under heavy rain
1.3	Acorn Way, Derby	Flooding / Drainage	James Bellaby	Response-00340	The area already floods heavily when it rains, it causes the road to be shut down for most of the day. Extra cars on the road will be a nightmare.
1.3	Acorn Way, Derby	Flooding / Drainage	James Hope	Response-00548	As Acorn way is a site with steep inclines, the resultant increased run-off of rain water will drain quickly down to Acorn Way in the East and Morley Road in the West. Both recipient areas currently have flooding issues, with that on Acorn way already having resulted in a number of accidents and one death showing the current limitations of the Acorn Way drainage infrastructure
1.3	Acorn Way, Derby	Flooding / Drainage	Jane Pitwood	Response-01366	Acorn Way often floods with heavy rainfall, when the current open fields become waterlogged. Building properties and tarmacing over the areas of natural drainage can surely only exacerbate the problem
1.3	Acorn Way, Derby	Flooding / Drainage	Jason Reader	Response-00321	No information on flood alleviation
1.3	Acorn Way, Derby	Flooding / Drainage	Jeanette Kent	Response-00400	This road regularly floods during moderate to heavy rainfall. This is getting worse and will no be improved by even more housing having the water running off from them. Fields help to drain water, concrete does not, fact
1.3	Acorn Way, Derby	Flooding / Drainage	Karen Webster	Response-00419	Even with the drainage improvements, acorn way, which is already a major road is closed due to flooding. Turning fields into houses will only make this worse.
1.3	Acorn Way, Derby	Flooding / Drainage	Karl Barlow	Response-00756	Morley Road is already flooding regularly. All the houses on Morly Road from the farm down to the cut-through have flooded back gardens each tiome it rains. We have seen further flooding down the hill and the extra run off will make flooding a really big issue. Speak to the Garage about flooding.
1.3	Acorn Way, Derby	Flooding / Drainage	Kelsey Strachan	Response-00377	Acorn Way regularly floods during heavy rain and as of recent years has become far worse due to lack of plants in the east fields of acorn Way. Reducing the vegetation on the west side for this development will just compound the issue, likely resulting in full closure of acorn Way in certain periods, adding to the burden of Morley Road being the only alternative. Morley Road will also suffer as the development would be on a hill above and water would run down into Morley road, who's drain already don't cope with heavy rainfall. Will probably increase everyone locals house insurance due to increased flood risk. Placing the burden on current residents once again for developers to swoop in make a fortune and leave the neighbours with all the negatives and no compensation.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Flooding / Drainage	Laura	Response-00387	Subject: Objection to Planning for 550 Houses on Acorn Way and 160 Houses on Breadsall Hilltop Dear Sir/Madam, I am writing to formally object to the planning for 550 houses on Acorn Way and a further 160 houses on Breadsall Hilltop in Derby. I believe these developments are unsustainable and will have a significantly detrimental impact on the existing community and infrastructure. My objections are based on the following key concerns: 1. Misrepresentation of Target Residents and Increased Traffic: The proposal claims the development on Acorn Way will serve people who wish to live in Ilkeston, Long Eaton and Sandiacre, which is a fantasy. They are 20+ minutes away. The inevitable consequence of these 710 new households will be a substantial increase in traffic. Derby has high pollution levels and this will increase traffic further. 2. Over-Subscription of Local Schools: The schools in the areas surrounding both Acorn Way and Breadsall Hilltop are already over subscribed. The addition of these 710 houses will place an unsustainable burden on these educational facilities. 3. Over-Subscription of Local GP Surgeries: The GP surgeries in the areas surrounding both Acorn Way and Breadsall Hilltop are already over subscribed. The addition of these 710 houses will place an unsustainable burden on these healthcare services. 4. Increased Flood Risk at Breadsall Hilltop: In recent inclement weather, Breadsall village has flooded. Building 160 houses on the land at Breadsall Hilltop will cause further run off and increase the flood risk to Breadsall village and surrounding areas. In conclusion, I strongly believe that these planning applications for 550 houses on Acorn Way and 160 houses on Breadsall Hilltop are ill-conceived and fail to adequately consider the significant negative impacts they will have on the existing community and infrastructure of Derby. I urge the planning authority to reject these applications. A development of this scale in these locations is unsustainable and will severely compromise the quality of life for current and future residents of Derby. Yours faithfully, Mrs Lincoln
1.3	Acorn Way, Derby	Flooding / Drainage	Liz Lockwood	Response-00464	This development will increase the flood risk on both Morley Road and Acorn way as there will be more water runoff from roads and pavements drives etc in place of the fields etc. Acorn Way has been closed on a number of occasions due to flood water making the road impassible esp on the Erewash owned parts. This had caused traffic congestion in Oakwood as traffic must use Morley Road or the estate roads
			Lorna Coope	Response-00365	Acorn way regularly floods with heavy rainfall and causes chaos with traffic.
1.3	Acorn Way, Derby	Flooding / Drainage	Lou Davis	Response-00336	Acorn Way has been subject to multiple road closures in recent years due to flooding. This has caused significant disruption to local residents. Morley Road often has water running down the side like a River - and this is when the fields absorb some of the water. Building houses would significantly increase this risk
1.3	Acorn Way, Derby	Flooding / Drainage	Mark potter	Response-00378	Acorn way floods regular in winter months so adding more concrete to the fields is going to cause more flooding and acorn way will become a very dangerous road in the winter months even more than it is now, again another brain dead decision
1.3	Acorn Way, Derby	Flooding / Drainage	Mathew Lennox-Quinn	Response-01363	Read the news this area floods, acorn way closed several times over the years. And removing grassy area to tarmac will only make things worse. Only been in the press about making it law not to tarmac or concrete your garden. So let's building more to flood more
			Nat	Response-00155	The road has been liable to flooding in the last couple of years
1.3	Acorn Way, Derby	Flooding / Drainage	Natalie Peake	Response-00794	Morley Road already suffers significant flooding each year, and building on this land?part of the natural floodplain?would worsen the problem due to reduced drainage and natural water absorption. Water runs all along Morley road even after light rainfall and it has been scientifically proven that rainfall is becoming heavier - a trend linked to climate change. Specifically, climate change is estimated to have contributed to about a 15% increase in the amount of total rainfall with extreme rainfall events becoming more intense and frequent. Building on this green belt land and removing hedgerows and flood plain will have a catastrophic effect on flooding and lack of maintained drainage systems in place above what was the former canal.
1.3	Acorn Way, Derby	Flooding / Drainage	Neville Chatterton	Response-01078	Flooding in Acorn way is already a problem. The sloping roads and surrounding land already creates severe flooding and this development will cause extra problems.
1.3	Acorn Way, Derby	Flooding / Drainage	Nick Charles	Response-01370	The proposed area of 24.0 hectares is mainly grass, with surrounding trees, so that most of the rain that falls on the land is currently absorbed. It is also basically a ridge, with the land falling away on three sides to Morley Road, Acorn Way and Lees Brook Academy. In October two years ago, the amount of rain that fell here in Oakwood was 202 mm, approx. one third of the expected annual rainfall for Derby and nearly four times as much as the expected October total. This equates to 5,263,180 litres on the site (1 mm of rain on 1 square metre, produces 1 litre) equivalent to just over 2 Olympic sized swimming pools. However, when the land has been built on, only about 30% of rainfall will be absorbed and the rest will have to be drained and this would have been approx. 3,684,226.00 litres, or nearly 1.5 Olympic sized swimming pools. And with climate change, this sort of severe weather is likely to happen many more times in the future. Even a little rain causes water to rush down Morley Road, and I greatly fear that whatever mitigation you put in place, it will not be enough to avert severe flooding to the local surrounding area. The drains we have can only just cope with the current rainfall, but I have seen no indication that you propose to upgrade them.
			Oakwood Ward Councillors Eyre, Mulhall and Trehwella	Response-01358	The comments in our previous objection remain relevant.
1.3	Acorn Way, Derby	Flooding / Drainage	Paul Burge	Response-00289	Heavy rain currently turns Morley rd into a river, add that to the run off from this estate will create havoc for Morley rd residents.
1.3	Acorn Way, Derby	Flooding / Drainage	Peter Marshall	Response-00526	Increased development and impermeable surfaces could exacerbate local flooding risks, especially if existing drainage infrastructure is not improved.
1.3	Acorn Way, Derby	Flooding / Drainage	Rachael Hinckley	Response-01166	The fields soak up the rain avoiding floods, this site has a potential to cause flooding in the area which is wanting to create 550 homes
1.3	Acorn Way, Derby	Flooding / Drainage	Rebecca Styles-Jones	Response-00372	Since the development Breadsall Hilltop we have seen more and more flooding in Breadsall and Oakwood. Taking away this land will just add to more flooding and existing properties being at risk.
1.3	Acorn Way, Derby	Flooding / Drainage	Robert Collis	Response-00355	This has already been mention in the road safety but how will the water drain away from areas which are currently open land the waste water system needs upgrading to take away the water

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Flooding / Drainage	Scarlett Hamblin	Response-00395	In recent years the flooding situation has become worse and worse with the increased concrete the surface water has nowhere to go except to gather and flood. By increasing the amount of concrete, tarmac and housing it is just increasing the flood risk tenfold.
1.3	Acorn Way, Derby	Flooding / Drainage	Sharon Coward	Response-00360	The lose of farm land to housing will cause increased flooding in an area that already is severely affected by flooding. Acorn way is a major route in & out of oakwood & is often flooding during heavy rain. More housing adjacent to it will only increase the risk of flooding & have a negative impact on the residents of oakwood & surrounding areas.
1.3	Acorn Way, Derby	Flooding / Drainage	Tanya Caldbeck	Response-00919	This area suffers from regular flooding and will become more dangerous with more building built
1.3	Acorn Way, Derby	Flooding / Drainage	Tom King	Response-00735	Road already hight susceptible to flooding and is often closed. Adding such a large volume of houses will massively increase the issues seen
1.3	Acorn Way, Derby	Green Belt	Andrea Lambert	Response-00357	If housing keeps being built we'll have no green belt left to enjoy
1.3	Acorn Way, Derby	Green Belt	Ashley	Response-00426	You are ruining another lovely part of Derby
1.3	Acorn Way, Derby	Green Belt	ASHLEY STOWER	Response-01183	We should preserve the green belt , there is plenty of opportunities for brown field redevelopment. It increases congestion, increases anti-social behaviour, takes away the well being rights of current residents , add stress to current residents through building. However it is cheap for greedy developers to build on. Erewash council has in effect put the problem on Derby City Council why cant these houses be built at Ilkeston or Long Eaton? they are just pushing to the edge of their area & giving others a problem.
1.3	Acorn Way, Derby	Green Belt	Carl	Response-00386	Leave it allown
1.3	Acorn Way, Derby	Green Belt	Chris copley	Response-01246	I feel the green belt should be protected, this area is valuables for local children and residents and for many people in the areas is the only area of green belt they can access
1.3	Acorn Way, Derby	Green Belt	Clare Tomlinson	Response-00423	There are no justifications for building on green fields when sufficient brown field sites exist. Green belt is important both to distinguish between different areas but also to provide a resource for local residents and to protect and encourage wildlife,
1.3	Acorn Way, Derby	Green Belt	Danielle Andrews	Response-01244	We purchased a home knowing we would have access to public footpaths through fields and that this was green belt land. How easily green belt is removed calls into question whether this is truly protected land. To not preserve any of the land on this side of acorn way is a travesty. Even a reserved section like chaddesden wood would benefit the new housing estates and preserve green land
1.3	Acorn Way, Derby	Green Belt	David Rees	Response-00566	The proposed development is on Green Belt land; the diagram shown in the initial pages of the on-line objection submission document conveniently ? and incorrectly ? indicates that this area is NOT Green Belt?...dishonourable again. The Erewash Borough Council [EBC] document ?Green Belt Technical Paper, Erewash Borough Council, September 2023, states as rationale for using Green Belt land at SGA1 ?Site extends the conurbation of Derby. Release of this area of Green Belt forms a logical extension to Oakwood and would not compromise the historic setting of any rural villages?. Paragraph 140 of the NPPF states that Green Belt boundaries should only be altered where EXCEPTIONAL CIRCUMSTANCES ARE FULLY EVIDENCED AND JUSTIFIED??? . It would appear from the evidence that the only rationale offered by EBC for using this Green Belt land for housing is to tick off 550 of its new-housing target: hardly ?exceptional circumstances?! If Green Belt is to be encroached, far better to use this area for a solar panel array, which would at least retain the spirit of ?Green?, given the climate crisis.
1.3	Acorn Way, Derby	Green Belt	Donna Pearson	Response-00441	One of the main reasons we bought a house looking on to green belt was for the feeling of being in the countryside and being able to enjoy the wild life. Green belt is impotent for the environment ams should definitely not be built on.
1.3	Acorn Way, Derby	Green Belt	Douglas Hunt	Response-00353	EBC have not provided sufficient reasoning to justify building on green belt when there is more than adequate brown belt available to meet their targets
1.3	Acorn Way, Derby	Green Belt	Edward James Gregory	Response-00727	Should be protected and development should be in the centre of Erewash, not on the edge of other areas
1.3	Acorn Way, Derby	Green Belt	Glynn Booker	Response-00394	We shouldn't be building on green belt and when there is still brown belt land available. We must consider how we reduce our carbon not increase it without a reduction plan in place.
1.3	Acorn Way, Derby	Green Belt	Helen Walker	Response-00333	Building on green belt when there are lots of empty properties which can be used as places to live if they were renovated and would make areas look nicer places than creating concrete jungles of houses upon house
1.3	Acorn Way, Derby	Green Belt	Iain Campbell	Response-01179	What happened to protecting the environment, is this no longer a priority
1.3	Acorn Way, Derby	Green Belt	James Bellaby	Response-00340	Less habitat for wildlife
1.3	Acorn Way, Derby	Green Belt	Jane Pitwood	Response-01366	Once the green belt is destroyed by building it will be gone for ever. No amount of landscaping can compensate for that.
1.3	Acorn Way, Derby	Green Belt	Jason Reader	Response-00321	Building on green belt.
1.3	Acorn Way, Derby	Green Belt	Jeanette Kent	Response-00400	The green belt is a very important area for wildlife and should not, upon any condition be built upon. The wildlife is already in mass decline and the building on green belt should be stopped immediately. We need our green belts for the wildlife and as a recreational area. STOP BUILDING ON THEM, THERE IS NOT JUSTIFICATION.
1.3	Acorn Way, Derby	Green Belt	Karl Barlow	Response-00756	Why build on the greenbelt and erode the green spaces of Oakwood further. Derby City already has the worst ration for green spaces, so we really need to get rid of what litytle we have left!
1.3	Acorn Way, Derby	Green Belt	Kevin Palmer	Response-01895	I objected previously to the allocation of Acorn Way for similar reasons i.e. the land is in the Green Belt and development should not be allowed unless there are special circumstances. It would extend the urban area.
1.3	Acorn Way, Derby	Green Belt	Lewis	Response-00533	The beautiful fields and nice walks will be destroyed
1.3	Acorn Way, Derby	Green Belt	Liz Lockwood	Response-00464	This area was originally designated at Green Wedge to maintain a distinction between Chaddesden and Oakwood. The loss of green belt land is enormous and has an effect on people and the wildlife that currently lives on this area .
1.3	Acorn Way, Derby	Green Belt	Lou Davis	Response-00336	Building in this area would lead to a merging of the distinct communities of Spondon, Oakwood and Chaddesden. It is vital to maintain green space/green belt and green wedge - not least because of the benefits for residents but also for biodiversity.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Green Belt	Mandy Cooling	Response-00313	I cannot believe that there is even a proposal to destroy such a massive area of natural habitat. This development will in effect join up Oakwood with Chaddesden and other developments towards Breadsall Village and Hilltop to create a massive conurbation with no natural habitat, causing no doubt untold damage to all natural resources
1.3	Acorn Way, Derby	Green Belt	Mandy Dickens	Response-00425	This land has a wide range of native wildlife flora and fauna. A lot of which is in danger of becoming extinct. We need our greenbelt sites for this very reason
1.3	Acorn Way, Derby	Green Belt	Mark Potter	Response-00378	Use all the brown belt land first before taking up the green belt it's an absolute joke that people don't follow the rules and can be bought off for green belt instead of telling them to move on
1.3	Acorn Way, Derby	Green Belt	Mathew Lennox-Quinn	Response-01363	Is there such a thing nowadays?
1.3	Acorn Way, Derby	Green Belt	Melanie Arnold	Response-00573	Proposed housing will encroach on to green belt land, adding to pollution from more traffic and construction work when building the houses.
1.3	Acorn Way, Derby	Green Belt	Nick Charles	Response-01370	In a time of potential food insecurity, it seems a very short-sighted decision to take productive farmland out of use. In previous years the fields where you are proposing to build were used to raise hundreds of lambs and have also produced several cuts of silage for winter feeding.
1.3	Acorn Way, Derby	Green Belt	Nicola Oliver	Response-00434	Green belt! The clue is in the name. Don't the government get it? Green! Green needs to be left as being green! Disgusting that the government are allowing green to be changed to grey just so councils can build on it! Corrupt! I wonder if money is involved to change it to grey?
1.3	Acorn Way, Derby	Green Belt	Oakwood Ward Councillors Eyre, Muthall and Trehwella	Response-01358	Having seen nothing to the contrary, we conclude that the comments in our previous objection remain relevant.
1.3	Acorn Way, Derby	Green Belt	Paul Burge	Response-00289	We moved onto Morley rd 40yrs ago because it wasn't estate bound. We always had a view across open countryside and this plan will destroy that.
1.3	Acorn Way, Derby	Green Belt	Pauline Shephard	Response-00483	While we appreciate more housing is needed, careful thought should be put into where best this should be, not continually taking green spaces, but re-developing derelict and other sites. Enough is enough for the Oakwood area.
1.3	Acorn Way, Derby	Green Belt	Peter Marshall	Response-00526	The proposed development lies within or adjacent to designated green belt land. This land is intended to prevent urban sprawl, protect natural landscapes, and preserve open space for agriculture, recreation, and biodiversity. Approving development here would set a dangerous precedent, permanently damaging the character and integrity of the green belt and undermining long-standing planning policies.
1.3	Acorn Way, Derby	Green Belt	Robert Mee	Response-01579	My main reason for objecting to these developments is that I do not believe that the criteria set out in the NPPF has been met justifying any encroachment into the Green Belt at this time. The Core Strategy and this Amendment are developed in order to meet the housing targets allocated to the council by central government. I do not believe that the number of houses required by government constitutes, in itself, the 'exceptional circumstances' which are required under the Framework. This is particularly so in view of there being no published objective basis for the numbers allocated to each authority. The term 'exceptional circumstances' does include 'instances where an authority cannot meet its identified need for homes'. The waiting list for social housing in the general area might suggest that this is the case, but I do not accept that these plans will go far to address this issue. The vast majority of the planned housing allocations are not even for affordable housing, let alone social housing. Additionally, I do not remember seeing evidence that Erewash has specifically quantified local (i.e. Erewash) housing needs. I also do not believe that much, if any, of the Green Belt selected for development would fit the definition of 'Grey Belt'. As a concept, I can support the idea of Grey Belt as originally reported, i.e. pieces of land within the Green Belt which have previously been developed. Indeed, I can think of a few locally, though they are all fairly small. I find the arguments that I have heard over distances between the edge of Derby and the edge of other towns, and how these distances will still be maintained, extremely spurious. The Green Belt in its entirety exists to prevent Nottingham and Derby from merging. While building on any of these sites does not immediately make the two cities any closer to each other, it does reduce the green space between the two cities, which is precisely what the Green Belt was established to prevent. The Green Belt is a regional initiative, covering two counties and several local authorities. With Erewash having such a high proportion of its land earmarked as Green Belt it is incumbent on the region as a whole to find a solution to the housing shortage, rather than to expect our authority to have to sacrifice its green spaces. This is probably the worst of all the sites (along with Spondon Wood, for which planning permission has already been given), since this site does have the direct effect of enlarging the Derby conurbation which will encroach further into the countryside.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Green Belt	Robert Mee	Response-01508	My main reason for objecting to these developments is that I do not believe that the criteria set out in the NPPF has been met justifying any encroachment into the Green Belt at this time. The Core Strategy and this Amendment are developed in order to meet the housing targets allocated to the council by central government. I do not believe that the number of houses required by government constitutes, in itself, the ?exceptional circumstances? which are required under the Framework. This is particularly so in view of there being no published objective basis for the numbers allocated to each authority. The term ?exceptional circumstances? does include ?instances where an authority cannot meet its identified need for homes?. The waiting list for social housing in the general area might suggest that this is the case, but I do not accept that these plans will go far to address this issue ? the vast majority of the planned housing allocations are not even for affordable housing, let alone social housing. Additionally, I do not remember seeing evidence that Erewash has specifically quantified local (i.e. Erewash) housing needs. I also do not believe that much, if any, of the Green Belt selected for development would fit the definition of ?Grey Belt?. As a concept, I can support the idea of Grey Belt as originally reported, i.e. pieces of land within the Green Belt which have previously been developed ? indeed, I can think of a few locally, though they are all fairly small. I find the arguments that I have heard over distances between the edge of Derby and the edge of other towns, and how these distances will still be maintained, extremely spurious. The Green Belt in its entirety exists to prevent Nottingham and Derby from merging ? while building on any of these sites does not immediately make the two cities any closer to each other, it does reduce the green space between the two cities, which is precisely what the Green Belt was established to prevent. This is probably the worst of all the sites (along with Spondon Wood, for which planning permission has already been given), since this site does have the direct effect of enlarging the Derby conurbation which will encroach further into the countryside.
1.3	Acorn Way, Derby	Green Belt	Sara Cotton	Response-00368	Don't build on our green land
1.3	Acorn Way, Derby	Green Belt	Scarlett Hamblin	Response-00395	We need to stay green! We already have an unbelievable amount of houses with plenty of vacancy properties. We do not need more housing built on green areas!
1.3	Acorn Way, Derby	Green Belt	Shaun Cavanagh	Response-00416	Impact on greenbelt.
1.3	Acorn Way, Derby	Green Belt	Tanya Caldbeck	Response-00919	Illegal and should stay that way. Should not be able to change laws to suit.
1.3	Acorn Way, Derby	Healthcare Facilities	Andrea Lambert	Response-00357	Not enough health care facilities without adding to the problem
1.3	Acorn Way, Derby	Healthcare Facilities	Andrea Wightman	Response-00358	There are no suitable local health services. Dr's are impossible to access without over 1000 more patients. There is no nhs dentist available.
1.3	Acorn Way, Derby	Healthcare Facilities	Arthur Boulton	Response-01097	Where are the improvements to the already overworked dental, medical and education facilities
1.3	Acorn Way, Derby	Healthcare Facilities	Ashley	Response-00426	Already at stretch need a new surgery
1.3	Acorn Way, Derby	Healthcare Facilities	ASHLEY STOWER	Response-01183	It is impossible to get an appointment at Oakwood Lister House now , where are another 2000 + people going to get their health provided for & if it is not within the local capability it means more congestion.
1.3	Acorn Way, Derby	Healthcare Facilities	Brendan Horgan	Response-00610	Medical centres already over subscribed
1.3	Acorn Way, Derby	Healthcare Facilities	Callum Rhodes	Response-00371	Oakwood already struggles to provide GP appointments and has no NHS dentists in the area anymore. Further houses in Erewash not even providing these services unfairly penalise oakwood without providing them the associated council taxes.
1.3	Acorn Way, Derby	Healthcare Facilities	Cameron Coope	Response-00367	GP and Dentist places around the area are already few and far between
1.3	Acorn Way, Derby	Healthcare Facilities	Carl	Response-00386	Unable to get a appointment now so that will get worse which will have a major impact on people's well-being
1.3	Acorn Way, Derby	Healthcare Facilities	Cheryl Wilde	Response-00328	It is hard enough to get a doctors appointment as it is in Oakwood/ Chaddesden surgeries. The facilities available cannot possibly support another 550 homes.
1.3	Acorn Way, Derby	Healthcare Facilities	Chloe	Response-00508	Health care is already struggling are you gonna build more hospitals? You guys aren't the one running round in it what about us nurse who are struggling are you gonna hire more people and increase our wages for the stuff we put ourselves through??
1.3	Acorn Way, Derby	Healthcare Facilities	Chris copley	Response-01246	The local doctors are already full, I have to drive to a nearby village to get an appointment. There are also a lot of elderly residents in that area that need extra care
1.3	Acorn Way, Derby	Healthcare Facilities	Clare Tomlinson	Response-00423	It is well both impossible to obtain a gp appointment and the health centre is oversubscribed capacity. There are no NHS dentists in the local area. The journey to the local hospital is lengthy
1.3	Acorn Way, Derby	Healthcare Facilities	Courtney Hodges	Response-00403	Same as the schools, having 2 doctors surgeries which we cannot get an on the day appointment, adding more people will make this even worse than it already is
1.3	Acorn Way, Derby	Healthcare Facilities	Danielle Andrews	Response-01244	Chaddesden park medical is an incredibly busy practice. It can take hundreds of attempts to get through in a morning and appointments are incredibly limited. I will often drive to borrowwash for appointments as chaddesden practice has overflowed. I don't believe the service can handle so many extra people
1.3	Acorn Way, Derby	Healthcare Facilities	David Massey	Response-00575	There is absolutely not enough healthcare locally to support 550 homes. Getting into the doctor's is difficult. Dentist impossible. Ours are both in Borrowwash
1.3	Acorn Way, Derby	Healthcare Facilities	David Rees	Response-00566	550 dwellings in the proposed development would contain circa 1200 people. Clearly, this number of people would not be able to be provided with the required healthcare facilities from the current healthcare resources in Oakwood and Chaddesden, so for Erewash Borough Council [EBC] to expect Derby City Council [and its council tax payers] to pick up the costs for healthcare facilities of an additional circa 1200 people, whilst EBC enjoys the council tax of these people, is at best naive and, at worst, disgracefully dishonourable. I was unable to find any coverage of this in the previous issue of EBC's documentation and so I assume that EBC is not offering anything. ECB must provide all necessary school facilities for its own residents.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Healthcare Facilities	Donna Pearson	Response-00441	The people of Oakwood and Chaddesden already struggle to be seen by there Dr.Over populating the area is going to cause even more distress to the situation.
1.3	Acorn Way, Derby	Healthcare Facilities	Douglas Hunt	Response-00353	Health care facilities in the locality are close to maximum capacity and the additional population will degrade local health care if additional infrastructure is not provided
1.3	Acorn Way, Derby	Healthcare Facilities	Edward James Gregory	Response-00727	Doctors and dentists are already oversubscribed. Erewash does not provide these in this area, so the development should not be considered
1.3	Acorn Way, Derby	Healthcare Facilities	Emma Daniels	Response-00349	Another 550 homes and no mention of extra healthcare facilities. Drs/dentist already struggling and cannot meet demand. Groups of teenagers hanging around and vandalising our parks because of nowhere to go, what happened to youth clubs?
1.3	Acorn Way, Derby	Healthcare Facilities	Gary Murfin	Response-00373	Park Medical and Lister house surgeries are already a full capacity and struggle, it?s already hard to get a appointment quickly, this is a pretty major issue already
			Gemma	Response-00380	Cannot get appointments now so adding more houses- are more doctors local amenities being added to?
1.3	Acorn Way, Derby	Healthcare Facilities	Gillian stillwell	Response-01364	Impossible to get appts in several doctors surgeries now. So adding hundreds of new houses will be disastrous.
1.3	Acorn Way, Derby	Healthcare Facilities	Glynn Booker	Response-00394	It is hard enough getting a doctors or dentist appointment as it is without an additional 1000+ people adding to that pressure, we need more healthcare facilities not less!
1.3	Acorn Way, Derby	Healthcare Facilities	Helen Walker	Response-00333	Again the local docs and health facilities will not be able to cope with extra patients again it won?t be Erewash Docs etc it will be City ones which will have cope
1.3	Acorn Way, Derby	Healthcare Facilities	Iain Campbell	Response-01179	This will impact the service (doctors, dentists etc ) in the area to a poor standard, making it even harder to get urgent face to face appointments!
1.3	Acorn Way, Derby	Healthcare Facilities	JACQUELINE LOUISE KELLY	Response-00327	It is almost impossible to get a doctors appointment, the surgeries are so busy - the other day I was on hold several times for a total of over an hour and half, only to be cut off three times when I reached caller number one, another 550 families trying to access the same facilities will overburden the system completely
			James Birks	Response-00574	Doctors already are full and appointments are difficult to get
1.3	Acorn Way, Derby	Healthcare Facilities	James Hope	Response-00548	The walking distances to Health facilities are impractical for a large proportion of the population. Consequently the reliance on these facilities would inevitably require the use of either a bus service or motor vehicles. This would not support the EBC commitment to reduce the number of motor vehicle journeys and encourage alternative modes of transport. Thus the new Acornway development population would not necessarily see an easing in access to health services but those reliant on bus transport and walking would see an increase in difficulty when compared to some alternative development locations. The current Doctor and Chemist facilities are already struggling to meet Service Level criteria. The addition of 550 homes will place significant pressure on these facilities to deliver a sustainable service.
			James Muldoon	Response-00338	Not enough in the area currently and absolutely no chance the people in these home will use services further away.
1.3	Acorn Way, Derby	Healthcare Facilities	Jane Pitwood	Response-01366	Again, local health facilities are already over subscribed, but there is no proposed provision to include additional facilities within the plans. Why not?
1.3	Acorn Way, Derby	Healthcare Facilities	Janette Glenn	Response-00421	Existing GP practices are already under pressure and often cannot provide appointments for existing residents. The new development would make the existing situation even worse.
1.3	Acorn Way, Derby	Healthcare Facilities	Jeanette Kent	Response-00400	We cannot get a doctors appointment now, god knows what would happen with even more people wanting to sign on with our local services
1.3	Acorn Way, Derby	Healthcare Facilities	Karen Webster	Response-00419	You cannot get a GP appointment now, pharmacy?s are struggling with time to fill prescriptions, how are they going to cope with the additional houses, they won?t. There are totally insufficient GP, Dentists to cope with any more houses.
1.3	Acorn Way, Derby	Healthcare Facilities	Karl Barlow	Response-00756	There are NO dentist places, the Doctor surgery is full. It is simply untruthful to say that there is capacity. Again, the other new developments will have primacy on places as these will be in Derby City and not Erewash. Maybe build nearer to Erewash facilities - in Breaston or Long Eaton?
1.3	Acorn Way, Derby	Healthcare Facilities	Kelsey Strachan	Response-00377	Impossible to get appointments already for a number of reasons at the small amount of places available. Adding hundreds more people just increases the already huge burden on the small amounts of facilities

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Healthcare Facilities	Laura	Response-00387	Subject: Objection to Planning for 550 Houses on Acorn Way and 160 Houses on Breadsall Hilltop Dear Sir/Madam, I am writing to formally object to the planning for 550 houses on Acorn Way and a further 160 houses on Breadsall Hilltop in Derby. I believe these developments are unsustainable and will have a significantly detrimental impact on the existing community and infrastructure. My objections are based on the following key concerns: 1. Misrepresentation of Target Residents and Increased Traffic: The proposal claims the development on Acorn Way will serve people who wish to live in Ilkeston, Long Eaton and Sandiacre, which is a fantasy. They are 20+ minutes away. The inevitable consequence of these 710 new households will be a substantial increase in traffic. Derby has high pollution levels and this will increase traffic further. 2. Over-Subscription of Local Schools: The schools in the areas surrounding both Acorn Way and Breadsall Hilltop are already over subscribed. The addition of these 710 houses will place an unsustainable burden on these educational facilities. 3. Over-Subscription of Local GP Surgeries: The GP surgeries in the areas surrounding both Acorn Way and Breadsall Hilltop are already over subscribed. The addition of these 710 houses will place an unsustainable burden on these healthcare services. 4. Increased Flood Risk at Breadsall Hilltop: In recent inclement weather, Breadsall village has flooded. Building 160 houses on the land at Breadsall Hilltop will cause further run off and increase the flood risk to Breadsall village and surrounding areas. In conclusion, I strongly believe that these planning applications for 550 houses on Acorn Way and 160 houses on Breadsall Hilltop are ill-conceived and fail to adequately consider the significant negative impacts they will have on the existing community and infrastructure of Derby. I urge the planning authority to reject these applications. A development of this scale in these locations is unsustainable and will severely compromise the quality of life for current and future residents of Derby. Yours faithfully, Mrs Lincoln
1.3	Acorn Way, Derby	Healthcare Facilities	Lewis	Response-00533	Already waiting 3 weeks to get a GP appointment! And that's with having to queue outside the door at 8 in the morning. Not enough services for the current population of oakwood let alone another 500 houses
1.3	Acorn Way, Derby	Healthcare Facilities	Liz Lockwood	Response-00464	There are two doctors on Oakwood and both are not taking any new patients - It is nearly impossible to access a GP here. Both of the surgeries are satellite surgeries for ones in Chaddesden and Derby City Centre so would not be expanded to take on new patients. There has been extra demand from the Durose Estate and Lime Lane Estates both of which are due to be enlarged by Erewash council. Where are the facilities in erewash that these people could use instead of pushing them on to Derby's facilities? Similarly there is 1 dentist on Oakwood which is private and not taking on new private or NHS patients
1.3	Acorn Way, Derby	Healthcare Facilities	Lou Davis	Response-00336	All of the local Dr's surgeries are at the limit of their ability to provide healthcare services to residents - an additional 1500-2000 residents (plus) would strain a service which is struggling to cope with- it is impossible to get an appointment at this time without additional patients. There are no local dentists offering NHS services.
1.3	Acorn Way, Derby	Healthcare Facilities	Lucy Skeet	Response-00388	Simply not enough!! It's hard enough to get medical appointments as it is, without the addition of more people. It's not sustainable and will cause further struggles for the NHS
1.3	Acorn Way, Derby	Healthcare Facilities	Mandy Cooling	Response-00313	I couldn't see any plans for critical infrastructure to support the influx of hundreds more residents such as plans for doctors? surgeries (which are already groaning under the weight of thousands of patients), schools etc
1.3	Acorn Way, Derby	Healthcare Facilities	Mandy Dickens	Response-00425	The doctors surgeries are already at full capacity any additional patients will not be able to be accommodated
1.3	Acorn Way, Derby	Healthcare Facilities	Mark potter	Response-00378	Oakwood doctors and dentist is a nightmare to get into already and it's made harder with the houses already been build in Oakwood let alone 550 more off acorn way and a further 160 at the bottom of bishops drive, Oakwood needs more doctors and dentist if people keep building houses
1.3	Acorn Way, Derby	Healthcare Facilities	Mathew Lennox-Quinn	Response-01363	Can't even get a GP appointment now without adding more
1.3	Acorn Way, Derby	Healthcare Facilities	Melanie Arnold	Response-00573	Doctors in the area are nearly up to full capacity.
1.3	Acorn Way, Derby	Healthcare Facilities	Mr Stephen Langton	Response-00024	There is a clear principle that developments within Erewash borough should not be relying upon and using Healthcare facilities supplied and funded by the adjacent Derby City Council. Now that EBC have started to recognise this principle with the allocation of sites adjacent to existing settlements within the Erewash borough, the Acorn Way and all other proposed sites abutting Derby city conurbation should be withdrawn.
1.3	Acorn Way, Derby	Healthcare Facilities	Natalie Peake	Response-00794	I am deeply concerned about the strain this development would place on the already overstretched local infrastructure? particularly in relation to healthcare services. There is currently a well-documented shortage of NHS dentists and GP practices in the area. Local residents already face significant difficulties registering with NHS dentists, and many are unable to secure timely appointments with local GP surgeries. As a result, an increasing number of residents are being forced to rely on the walk-in centre in Derby City Centre, which is both impractical and unsustainable for ongoing healthcare needs. The addition of new homes without a corresponding expansion of essential health services will only exacerbate these problems, leading to longer waiting times, reduced quality of care, and increased pressure on emergency services.
1.3	Acorn Way, Derby	Healthcare Facilities	Nathan Latymer	Response-00363	I already struggle to get an appointment at my local (Oakwood) GP, so the addition of loads of houses will only make this worse
1.3	Acorn Way, Derby	Healthcare Facilities	Neville Chatterton	Response-01078	Health care facilities in this area are already very poor and it is very difficult to get appointments
1.3	Acorn Way, Derby	Healthcare Facilities	Nick & Jacqui McCrorie	Response-01361	It is already extremely difficult to obtain a GP appointment in Oakwood. There is no mention in the proposal of any additional medical practices and therefore what is already difficult will become impossible.
1.3	Acorn Way, Derby	Healthcare Facilities	Nick Charles	Response-01370	I am greatly concerned that no provision has been made in your documents for additional doctors? surgeries, dentists or medical facilities. At present it is extremely difficult to obtain an appointment at our local Medical Practice and with the addition of an extra 1,400 ? 1,800 residents, things will become even more onerous.
1.3	Acorn Way, Derby	Healthcare Facilities	Nicola Olver	Response-00434	Doctors are struggling to take on more patients - developers say they will contribute money for expansion but will they pay for more Doctors to be trained and their salaries? I don't think so
1.3	Acorn Way, Derby	Healthcare Facilities	Oakwood Ward Councillors Eyre, Mulhall and Trehwella	Response-01358	The comments in our previous objection remain relevant.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Healthcare Facilities	Paul Burge	Response-00289	The current situation within Oakwood is bad enough. People cannot get Doctors or Dentist appointments as it currently stands. To place this development on top of this is ludicrous.
			Pauline Shephard	Response-00483	Try getting a doctor?s appointment in this area. It gets worse and worse with increased population in the area
1.3	Acorn Way, Derby	Healthcare Facilities	Paul Roe	Response-00330	Cannot get GP appointments as it is and residents will want nearest GP service to them which is in Derby city area not yours
1.3	Acorn Way, Derby	Healthcare Facilities	Peter Marshall	Response-00526	Access to healthcare is becoming increasingly difficult, with long waiting times for GP appointments and overstretched services at local clinics and hospitals. Adding hundreds of new residents would only worsen this situation.
1.3	Acorn Way, Derby	Healthcare Facilities	Peter Williamson	Response-01458	There are no additional healthcare provisions for those who move here
1.3	Acorn Way, Derby	Healthcare Facilities	Rebecca Styles-Jones	Response-00372	We cannot get appointments at local doctors or get through on the phone even. Another 3,000+ people including children will stand absolutely no chance! Not enough infrastructure.
1.3	Acorn Way, Derby	Healthcare Facilities	Robert Collis	Response-00355	Cannot get an NHS dentist or doctors appointment now so what facilities will be provided to facilitate the increase in population
			Sara Cotton	Response-00368	Our doctors are over subscribed and it's difficult to get appointments
1.3	Acorn Way, Derby	Healthcare Facilities	Sarah Smyth	Response-00375	GPs already oversubscribed and you cannot get through on phone nevermind get an appointment. Where will these new residents go? Not an nhs dentist in sight as it is
			Sarah willis	Response-00345	Lack of doctors, dentists to support current community let alone the addition of further population to the area.
1.3	Acorn Way, Derby	Healthcare Facilities	Scarlett Hamblin	Response-00395	Trying to get a doctors appointment is already near impossible! I have to make repeated phone calls to try and speak to the doctors let alone actually get an appointment . By increasing the number of people accessing these services it will increase the difficulty yet again.
1.3	Acorn Way, Derby	Healthcare Facilities	Sharon Coward	Response-00360	The impact on already pressured health care services will be negative & severely affect the surrounding areas which are not part of Erewash.
1.3	Acorn Way, Derby	Healthcare Facilities	Sue Smith	Response-00376	Our local doctors surgeries and dentists are already at full capacity!!! Building new houses will put a huge strain on these services.
1.3	Acorn Way, Derby	Healthcare Facilities	Tanya Caldbeck	Response-00919	No GP spaces and no capacity. Will cause further pressure and issues in getting appointments
1.3	Acorn Way, Derby	Healthcare Facilities	Tom King	Response-00735	Local GPs already overwhelmed and over subscribed
1.3	Acorn Way, Derby	Healthcare Facilities	William Gregory	Response-00411	Doctors are over whelmed already , current residents in the area cannot get appointments, and if your luck enough to get an appointment it can be weeks before you see a Doctor.
1.3	Acorn Way, Derby	Landscape	Ashley	Response-00426	Build bungalows if anything reduce the height so the views are not completly ruined
1.3	Acorn Way, Derby	Landscape	ASHLEY STOWER	Response-01183	It is a mixed green residential landscape the whole area would suffer from this excess building, what about drainage Morley road often floods? etc
1.3	Acorn Way, Derby	Landscape	Carl	Response-00386	New housing estates always look a mess compared with open fields
1.3	Acorn Way, Derby	Landscape	Cheryl Wilde	Response-00328	Oakwood is losing so much green space with the new developments at the bottom of Bishops Drive and the Persimmon estate by the side of Mansfield Road/Lime Lane plus the proposal for 150 new houses by Chaddesden Wood. Another 550 homes off Acorn Way is ridiculous.
1.3	Acorn Way, Derby	Landscape	Chloe	Response-00508	Beautiful land gone you gonna find anymore to make up for it
1.3	Acorn Way, Derby	Landscape	Chris copley	Response-01246	The landscape will undoubtedly be badly affected, the area is currently outstandingly beautiful and is accessible by people who cannot afforded cars or transport. To remove this option for people would be terrible
1.3	Acorn Way, Derby	Landscape	Clare Tomlinson	Response-00423	This may not be a typical beauty spot - but the green hills are a visual stimulant to local residents
1.3	Acorn Way, Derby	Landscape	Donna Pearson	Response-00441	The view at the moment is stunning and the walk are good for people?s mental health
1.3	Acorn Way, Derby	Landscape	Edward James Gregory	Response-00727	it is a natural green separation between different housing areas, and should not be degraded by poor quality housing on unsuiatble sites
			Glynn Booker	Response-00394	What are the considerations going to be to the Biodiversity how are you considering Biodiversity Net Gain?
1.3	Acorn Way, Derby	Landscape	Helen Walker	Response-00333	What landscape you are totally destroying it, concrete jungles are been created, there are no landscapes where you can see green fields anymore
1.3	Acorn Way, Derby	Landscape	Iain Campbell	Response-01179	We chose to move here because of the quiet location, building houses will effect everyone this area.
1.3	Acorn Way, Derby	Landscape	Jeanette Kent	Response-00400	This is a valued area of green within an urban area, once built upon the landscape will never be the same again and the constant building needs to stop. We need fields etc to provide grazing for farms etc.
1.3	Acorn Way, Derby	Landscape	Karl Barlow	Response-00756	This will destroy the view from my house. I love seeing the oak tree and countryside. All I will be able to see are ugly cheaply built houses on the hill, dominating Oakwood.
1.3	Acorn Way, Derby	Landscape	Kelsey Strachan	Response-00377	Destroys the view for residents who have lived in Oakwood for years to give that view to new builds so developers can charge a markup on landscape they don't own. View from Morley will be oppressive as the development will sit higher than Morley road so will be penned in from either side.
1.3	Acorn Way, Derby	Landscape	Lewis	Response-00533	The views over the fields will be ruined / non existent. Go build somewhere else
1.3	Acorn Way, Derby	Landscape	Liz Lockwood	Response-00464	All you will be able see is houses - there is little in the propal to say how the site will be landscaped
1.3	Acorn Way, Derby	Landscape	Lou Davis	Response-00336	The hills and fields of this area - with the trees and hedgerows are a valuable addition to the local area - it is an attractive view which would be spoilt if this proposal goes ahead.
1.3	Acorn Way, Derby	Landscape	Lucy Skeet	Response-00388	It?s going to ruin the landscape even further! There are too many houses ruining our countryside and it is so depressing. Just a ridiculous idea
1.3	Acorn Way, Derby	Landscape	Mark potter	Response-00378	All theses houses are destroying the landscape of Oakwood all the fields are being taken up trees/hedge's destroyed and removed when Oakwood was know for its nice pictures surroundings and quality houses not any more it?s being destroyed

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Landscape	Natalie Peake	Response-00794	This area is a cherished and well-used green space by the local community for walking, dog exercise, and enjoying nature. The well-trodden path runs from Morley Road is frequently used by residents seeking tranquility and outdoor recreation. This space serves as a vital community asset and an important refuge for wildlife. This proposed development is not only a threat to local wildlife and environmental health, but it also diminishes a valued green space that supports physical and mental well-being for residents.
1.3	Acorn Way, Derby	Landscape	Nick Charles	Response-01370	No comments, as plans for the development are unavailable at the moment.
1.3	Acorn Way, Derby	Landscape	Nicki Harries	Response-00541	Oakwood and nearby has lovely trees and the wood. Please don't build anymore. You'll be destroying lovely walking and areas for people to get connected to the countryside
1.3	Acorn Way, Derby	Landscape	Paul Burge	Response-00289	Any building on this land will be a detriment to the landscape.
1.3	Acorn Way, Derby	Landscape	Peter Marshall	Response-00526	This development would permanently alter the landscape, diminishing the area's natural beauty, visual amenity, and overall quality of life for existing residents.
1.3	Acorn Way, Derby	Landscape	Rachael Hinkley	Response-01166	This would effect the landscape by making what is a beautiful area to live in now to a eyesore of new built homes
1.3	Acorn Way, Derby	Landscape	Robert Collis	Response-00355	Acorn way is a border between an estate and open country side and needs to remain so
1.3	Acorn Way, Derby	Landscape	Scarlett Hamblin	Response-00395	We have little snippets of green at the moment which break up the monotony of housing estates. We do not want to lose these little pockets of greenery by adding more houses to the landscape.
1.3	Acorn Way, Derby	Landscape	Sharon Coward	Response-00360	It will severely affect the landscape for existing residents in the area in a negative way.
1.3	Acorn Way, Derby	Number of Houses	Andrea Wightman	Response-00358	A ridiculous amount of houses, that are not needed in this area
1.3	Acorn Way, Derby	Number of Houses	Ashley	Response-00426	You need to build more bungalows the benefits would be that older people in Oakwood would downsize to the bungalow freeing up the other properties ..
1.3	Acorn Way, Derby	Number of Houses	ASHLEY STOWER	Response-01183	Far too many , 600 would mean approximately 2000 new people in an already congested area. It is impossible to navigate via Lees Brook school at opening / closing time. Acorn Way queues back each morning it would be an absolute disaster.
1.3	Acorn Way, Derby	Number of Houses	Cameron Coope	Response-00367	Not enough amenities already in the area
1.3	Acorn Way, Derby	Number of Houses	Carl	Response-00386	1 is to many in a area that is already stretched
1.3	Acorn Way, Derby	Number of Houses	Cheryl Wilde	Response-00328	550 new houses is far too many. We just don't have the infrastructure and the facilities to support this.
1.3	Acorn Way, Derby	Number of Houses	Chris copley	Response-01246	The quantity is too much, the local roads can't handle such an increase
1.3	Acorn Way, Derby	Number of Houses	Clare Tomlinson	Response-00423	This number represents over development of a site which should remain as a green wedge between the local suburban areas.
1.3	Acorn Way, Derby	Number of Houses	Danielle Andrews	Response-01244	This is my greatest concern. Removing all of the green space on the Morley Road side of acorn way and filling it to maximum capacity will put a strain on roads, schooling, doctors and reduce biodiversity and the ability to enjoy green space. Some of this land should be preserved. 550 homes is huge surge in population in an area that is already very busy and will remove the last of the large green space
1.3	Acorn Way, Derby	Number of Houses	David Massey	Response-00575	When the application was put in for the brook farm it was for far fewer houses with access to Acorn way. Now it seems more houses with access to a smaller road is the plan
1.3	Acorn Way, Derby	Number of Houses	David Rees	Response-00566	My vote would be for zero houses.
1.3	Acorn Way, Derby	Number of Houses	Donna Pearson	Response-00441	Any number is to high.
1.3	Acorn Way, Derby	Number of Houses	Edward James Gregory	Response-00727	too many on the edge of Erewash, consider proposals in the centre of Erewash
1.3	Acorn Way, Derby	Number of Houses	Emma Daniels	Response-00349	Too many houses again and no mention of extra facilities
1.3	Acorn Way, Derby	Number of Houses	Gary Murfin	Response-00373	Again Oakwood is always a very big estate and it's not a great idea to build more houses on the edge of it especially as the council tax will be going to the Erewash council, it obvious the housing is being built as close to the Derby border as possible
1.3	Acorn Way, Derby	Number of Houses	Glynn Booker	Response-00394	Reducing the number of houses from 600 to 500 will not make any difference if the infrastructure is not being put in place to cope with any number of additional families.
1.3	Acorn Way, Derby	Number of Houses	Iain Campbell	Response-01179	550 is a lot of houses within that area, this could possibly increase crime, which at the moment is very low
1.3	Acorn Way, Derby	Number of Houses	Jane Pitwood	Response-01366	The type and number of proposed properties is not relevant and is not proportional to the facilities currently in the area. It cannot help alleviate housing needs in the Long Eaton/Sandiacre areas of Erewash, it is nowhere close enough to these places to be of benefit to those wishing to live in those areas.
1.3	Acorn Way, Derby	Number of Houses	Jeanette Kent	Response-00400	No number of houses should be built here, this is a green wedge between Derby and Amber Valley Councils, this should remain a green wedge and not built upon to satisfy housing numbers. Use your own brown field sites first
1.3	Acorn Way, Derby	Number of Houses	Karl Barlow	Response-00756	This proposal is for far too many houses and vastly underestimates the number of cars it will bring. The foot path across the fields is very well used, as is the bridleway. There are few shops or facilities and there are already other massive building proposals in place - all claiming the same apparent capacity in facilities. There should be no more than a 100 houses, if that many!
1.3	Acorn Way, Derby	Number of Houses	Liz Lockwood	Response-00464	another 550 - 600 houses in the area just adds to the urban sprawl around Chaddesden Oakwood and Spondon. There are very few details in the proposal on the type or size of houses so unable to comment further
1.3	Acorn Way, Derby	Number of Houses	Lou Davis	Response-00336	550 houses is a large number for a site in this position. It would obliterate any green space and would be a blot on the landscape.
1.3	Acorn Way, Derby	Number of Houses	Mandy Cooling	Response-00313	This is a massive development and seems far too large for the environment, infrastructure and surrounding areas
1.3	Acorn Way, Derby	Number of Houses	Mark potter	Response-00378	Again I'm saying the same stuff theres too many houses already been build in Oakwood it needs no more so stop
1.3	Acorn Way, Derby	Number of Houses	Mathew Lennox-Quinn	Response-01363	That's right bang in more houses to flood area more
1.3	Acorn Way, Derby	Number of Houses	Nat	Response-00155	Oakwood and Chaddesden are already built up areas
1.3	Acorn Way, Derby	Number of Houses	Nick & Jacqui McCrorie	Response-01361	With the two other large developments in recent years at Hilltop and Mansfield Road, the ratio of residents vs infrastructure facilities is already overbalanced. This includes schools, medical facilities, community sports etc.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Number of Houses	Nick Charles	Response-01370	550 Houses, the majority of which will probably be large, will add almost 2,000 people to the area. This is unfeasible, given the lack of services, no additional shops, no additional doctors and dentists, no additional school places or community services.
			Oakwood Ward Councillors Eyre, Mulhall and Trehwella	Response-01358	We are pleased to see a reduction from 600 houses to 550 houses, though still believe the development is inappropriate.
1.3	Acorn Way, Derby	Number of Houses	Paul Burge	Response-00289	Any built on green belt is too many.
1.3	Acorn Way, Derby	Number of Houses	Peter Marshall	Response-00526	While I acknowledge the need for new housing, I have serious concerns about the suitability and impact of this development and number of properties being proposed.
1.3	Acorn Way, Derby	Number of Houses	Rebecca Styles-Jones	Response-00372	Already thousands in this area with mainly one road in and one road out, this is a ridiculous location for 100s more.
1.3	Acorn Way, Derby	Number of Houses	Sarah willis	Response-00345	Lack of facilities to support additional home owners to the area, nothing in the plans to address the personal needs that these significant increased community numbers would require.
1.3	Acorn Way, Derby	Number of Houses	Scarlett Hamblin	Response-00395	550 houses is not needed! We already have two new housing estates that have encroached into the local area. There needs to be a limit to the amount of damage these housing developments cause.
			Simon Kittridge	Response-00584	Far too many houses to built on green land already !!
1.3	Acorn Way, Derby	Number of Houses	Sue Smith	Response-00376	The number of new houses that should be built on Acorn Way is Zero!!!!
1.3	Acorn Way, Derby	Other	Arthur Boulton	Response-01097	It would seem to me that the developer is making an enormous impact on the area and giving very little back to the local community and making an enormous profit at the expense of the local community
1.3	Acorn Way, Derby	Other	ASHLEY STOWER	Response-01183	This is a disgraceful plan & those putting it forward should be ashamed of themselves. It is not thought through properly & will bring congestion & misery to the local area.
1.3	Acorn Way, Derby	Other	Carl	Response-00386	If this goes ahead which it probably will as that is Labour for you why Erawadh and not Derby Council our area our Council tax revenue
1.3	Acorn Way, Derby	Other	Cheryl Wilde	Response-00328	So the council tax from these new 550 houses will not go to Derby City but will go to Erewash and yet it is Derby City who will be supplying the services, road maintenance, street lighting, rubbish and waste collection, education services, cleaning etc. How is that possibly considered acceptable?
1.3	Acorn Way, Derby	Other	Chris copley	Response-01246	There is no easy access to the proposed site, Morley road cannot handle and increase in traffic, and is already a noisy road, it will have a negative impact on the heath, well-being and safety of local residents
1.3	Acorn Way, Derby	Other	Clare Tomlinson	Response-00423	This area represents a valuable green space for both wildlife and local residents. This is an unacceptable proposal
1.3	Acorn Way, Derby	Other	David Rees	Response-00566	The current proposal, which would construct ?at least 2 vehicular accesses onto Morley Road access points? would create a living hell for residents on Morley Road during the construction phase of the development: numerous noisy, very large HGVs and site construction vehicles; reduced air quality; and a lot of mud on the road. Given the size of the proposed development, this disturbance in Morley Road residents' lives would be for a very long period. Mental Health would without doubt become a major issue for those residents. This problem would be solved by moving the access points to Acorn Way, which has no domestic dwellings on it and would therefore have no impact on residents. My earlier comments highlighting the non-viability of the access points being located on Morley Road would also then be solved.
1.3	Acorn Way, Derby	Other	Emma Daniels	Response-00349	Cannot keep putting up houses without proper infrastructure and facilities to support these, other areas in derby have additional schools/parks/surgeries so why is Oakwood not getting the same with all these developments that have already taken place and now wanting to build more homes is an outright disgrace
1.3	Acorn Way, Derby	Other	Gillian stillwell	Response-01364	Oakwood is one of the largest housing estates in Europe. It is already struggling to cope. Unless it can be guaranteed there will be more school places/ doctors and a better road system and public transport more houses will be a disaster
1.3	Acorn Way, Derby	Other	Helen Walker	Response-00333	This a totally crazy idea to put houses down here for so many reason but safety has to be one of the main reasons for it not happening, this road was originally built so the people of Oakwood did not have to go through Chaddesden to reduce traffic congestion and air pollution etc now you just creating that problem here now.
1.3	Acorn Way, Derby	Other	Iain Campbell	Response-01179	This is unacceptable and has a potential to have an effect on peoples Mental Health in this area. Oakwood has always been considered as a nice peaceful area which will be affected if this goes ahead!!!!
1.3	Acorn Way, Derby	Other	JACQUELINE LOUISE KELLY	Response-00327	The Council Tax paid by these new families in these houses will NOT be going to pay for the services they will actually be using
1.3	Acorn Way, Derby	Other	Jake	Response-01005	This should not be allowed to happen & I completely object!
1.3	Acorn Way, Derby	Other	James Birks	Response-00574	I don't know why I've bothered filling this in!! Somebody will have been paid a lot of money to make sure it passes! It's a disgrace to even consider the location! Let alone for 550 houses
1.3	Acorn Way, Derby	Other	James Muldoon	Response-00338	Will Derby city Council get all the council tax as it will be them who will be having to service the new homes with schools, medicine etc.
1.3	Acorn Way, Derby	Other	Janette Glenn	Response-00421	This is another cynical move by Erewash District Council to move their responsibility onto the edge of the city, nominating green field sites, which are more attractive to developers as they are cheaper to develop than brownfield ones. Brownfield sites do exist within the Erewash district. City services, which will be used by the residents in this proposed development, will not receive any council tax to help pay for them. The money will go to Erewash. It is time Erewash took full responsibility and looked at sites that are well within its boundaries and which will use its resources rather than those of another authority.
1.3	Acorn Way, Derby	Other	Jason Reader	Response-00321	People wouldn't object so much if early in the planning application process developers were held accountable for plans of schools / doctors / dentists / roads / flooding. They are always an afterthought and there is no accountability.
1.3	Acorn Way, Derby	Other	Jeanette Kent	Response-00400	We do not need Amber Valley encroaching on Oakwood, using our overstretched facilities whilst paying their taxes to Amber Valley Council. There are plenty of places within a more central Amber Valley area that can be built upon rather than so near to an, already, heavily used facilities

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Other	Karen Webster	Response-00419	Non of the ?contributions? will help with the insufficient infrastructure and the council tax will go to Erewash but the existing Derby council tax payers will suffer.
1.3	Acorn Way, Derby	Other	Karl Barlow	Response-00756	The original proposal seems to be full of poorly based assumptions and proper research has not been done, in order to push this through. This needs proper research and wider consultation. There are no Erewash houses nearby, so the views of Oakwood residents, who know this area, should be properly considered. If you want to cause chaos on the road network, effect child safety, cause flooding and disruption, continue with this project, which I can only see as being pushed as far from Council headquarters as possible.
1.3	Acorn Way, Derby	Other	Kelsey Strachan	Response-00377	It's quite clearly too small and tight an area to put a development on even a smaller one. The roads are all single lanes with high volumes of traffic which gets congested regularly currently with no alternatives possible due to layout of Oakwood. Go find a space that is undeveloped and start fresh rather than cramming it in somewhere to cut costs for a developer because they don't have to build the infrastructure to go with it as they will just ruin our current one in Oakwood for their own personal monetary gain.
1.3	Acorn Way, Derby	Other	Lou Davis	Response-00336	This area is a lovely place to walk with the fog and is well utilised. It is used for grazing and is something which should be preserved
1.3	Acorn Way, Derby	Other	Mark potter	Response-00378	Oakwood has already had enough house build on its area and surroundings, its doctors and dentist is at stretching point can't even get an appointment now let alone another 550 plus 180 houses being built, the leisure facility?s for children is discussing 1 tiny little park suitable for under 6 nothing for older kids for the already massive estate, 1 small primary school, no secondary school, shops get congested with cars and traffic already makes no sense at all to add more house and more problems to an estate that?s already big a bursting at the seems already, I think oakwood has had enough houses already build in the last 5 years it?s time to move on and build somewhere else
1.3	Acorn Way, Derby	Other	Mathew Lennox-Quinn	Response-01363	Always the same build more, say you will improve services to only do nothing apart from collect the money
	Acorn Way, Derby	Other	Nick & Jacqui McCrorie	Response-01361	Due to the current size of Oakwood with such a large volume of housing we strongly object to any additional developments!
1.3	Acorn Way, Derby	Other	Nick Charles	Response-01370	I cannot see the point of Erewash building in what is essentially Derby, except to complete their allocation of new homes. Residents will be paying their Council Tax to EBC, but all other services will be supplied by DCC. The majority of people living here will not be working in Erewash, but rather in Derby. Surely you can find more suitable land/fields closer to your existing towns.
1.3	Acorn Way, Derby	Other	Paul Burge	Response-00289	I find it disgusting that a council can develop land along side a neighbouring council and put extra pressure on their services. Knowing that that council will not gain from any rates raised from that development. If you want extra rateable income do so using your own services, not on already stretched ones. Your future home owners will be moving into an area with no school places (both primary and secondary) No doctors or dental capacity.
1.3	Acorn Way, Derby	Other	Pauline Shephard	Response-00483	For years more and more housing has been built in the area without the infrastructure being put in place first. It really should not be allowed before roads are improved greatly, schools are built, medical facilities installed and a swimming pool added to the leisure centre!! The driving force for all this development is greed and profit NOT what is best for the community and the environment.
1.3	Acorn Way, Derby	Other	Peter Marshall	Response-00526	Given the profound impact this development would have on the landscape, local community, and environment, I urge the planning authority to reject this proposal. We should protect our green spaces and landscapes, which are integral to the identity and wellbeing of our area.
1.3	Acorn Way, Derby	Other	Rebecca Styles-Jones	Response-00372	This will affect Oakwood, Chaddesden and Spondon in the main yet Council Tax will be paid to Erewash so any financial gain will not benefit this area. Not enough school places, doctors, even shops for more people. Object to this. Enough is enough, there are brown sites available that would not affect green land.
1.3	Acorn Way, Derby	Other	Rich King	Response-00383	There isn't enough amenities in that area as it is. None of the plans appeared to put anything extra in
1.3	Acorn Way, Derby	Other	Scarlett Hamblin	Response-00395	Overall, we need to stop this expansion of housing. We do not need or want any more houses. It will have a negative impact on every aspect of our community. I cannot think of one positive impact by building all these extra houses.
1.3	Acorn Way, Derby	Other	Sharon Coward	Response-00360	Totally inappropriate to build more housing on the boundary with derby city meaning people paying council tax to Erewash will be using the infrastructure & services of derby city.
1.3	Acorn Way, Derby	Road Safety	Andrea Lambert	Response-00357	Acorn Way has regular collisions without more traffic having to use the road to exit Oakwood
1.3	Acorn Way, Derby	Road Safety	Andrea Wightman	Response-00358	More traffic on acorn way will be extremely dangerous. There are no footpaths so pedestrians will have to walk on a grass verge that is not maintained or along yhe edge of a 60mph busy road
1.3	Acorn Way, Derby	Road Safety	Ashley	Response-00426	The roads are unsafe you would need a dual carriage down acorn way for this to work
1.3	Acorn Way, Derby	Road Safety	ASHLEY STOWER	Response-01183	The amount of traffic & school children leads to daily incidents of near miss, with a junction on Morley Road this will be a disaster for traffic accidents , children accidents. There will also be anti-social behaviour due to frustration parking by the school , junction an absolutely ridiculous idea.
1.3	Acorn Way, Derby	Road Safety	Brendan Horgan	Response-00610	Five schools in the vicinity
1.3	Acorn Way, Derby	Road Safety	Cameron Coope	Response-00367	A junction off of Acorn Way will lead to risk taking driving.
1.3	Acorn Way, Derby	Road Safety	Carl	Response-00386	Only one place to cross
1.3	Acorn Way, Derby	Road Safety	Cheryl Wilde	Response-00328	Acorn Way is a 60mph road reducing to 40mph approaching the traffic lights towards Raynesway. Having 550 homes worth of traffic pulling out will increase the risk of accidents.
1.3	Acorn Way, Derby	Road Safety	Chris copley	Response-01246	There is a school at the location that gets very busy especially at opening and closing times, cars already park up on the road and the children have to walk between them, increasing the traffic would exacerbate this issue and would pose a danger to the children. Furthermore there is a care home and nursery near by more traffic will slow down the emergency services getting to these places quickly

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Road Safety	Clare Tomlinson	Response-00423	Acorn Way is a national speed limit road - 60 mph single carriageway - there have been multiple accidents including fatality. The visibility is poor - the road undulates significantly and there are many blind bends. This is made worse by overgrown foliage - this road is under the responsibility of Derby and Derbyshire council - why should those residents in those councils pay to benefit multiple occupants of Erewash
1.3	Acorn Way, Derby	Road Safety	Courtney Hodges	Response-00403	Acorn Way is a fast paced road, with no pavement which is incredibly busy throughout the day. Adding more traffic onto the road will make this unsafe for pedestrians and other road users
1.3	Acorn Way, Derby	Road Safety	Danielle Andrews	Response-01244	Hundreds of children use this road daily and the traffic levels are already high. Concerns with how the extra traffic flow would exit onto Morley Road
1.3	Acorn Way, Derby	Road Safety	David Massey	Response-00575	Morely road has speed bumps to protect school children. Vastly increasing the number of vehicles is at odds with that
1.3	Acorn Way, Derby	Road Safety	David Rees	Response-00566	Morley Road south of the Acorn Way roundabout is already a very busy road; it is relatively narrow, has several bends, always has a number of cars parked on the road and has established housing on both sides of the road for most of its length down to the Wilmot Arms pub. The road has a 30mph limit, but many vehicles travel at much higher speeds despite the presence of anti-speed bumps. Road safety is therefore already a significant issue for vehicles, pedestrians and cyclists [there are no cycle paths on this road]. Road safety is most acute in the area of Lees Brook Academy; it is already at a dangerous level during peak periods and particularly during school opening/closing periods, when the road becomes virtually blocked with ?drop-off/collection? cars and school children randomly and unpredictably meander across the road. There can be no doubt whatsoever that an additional circa 800 more vehicles from the proposed 550-house development that would ingress/egress Morley Road from ?at least 2 vehicular accesses? would further reduce road safety.
1.3	Acorn Way, Derby	Road Safety	Donna Pearson	Response-00441	Morley road and acorn away are used as race tracks adding more cars to this is crazy
1.3	Acorn Way, Derby	Road Safety	Douglas Chambers	Response-01235	The potential for for approximately 1200 further children added to the present school children exiting/crossing the roads is unacceptable
1.3	Acorn Way, Derby	Road Safety	Douglas Hunt	Response-00353	Traffic congestion already makes emergency vehicle access difficult at peak times without the increase in traffic from new homes
1.3	Acorn Way, Derby	Road Safety	Edward James Gregory	Response-00727	Acorn way is very busy, with bad visibility and drainage, and the site of many accidents. Further development will increase congestion, usage, danger and surface water run off
1.3	Acorn Way, Derby	Road Safety	Emma Daniels	Response-00349	No safe places to cross the road as it is on Morley road with all the congestion. Acorn way has one set of traffic lights but it is a dangerous road and speed limit with so many accidents already on this road without the extra load adding to it
1.3	Acorn Way, Derby	Road Safety	Gary Murfin	Response-00373	Increased traffic will lead to increased road safety concerns, especially in and around schools etc
1.3	Acorn Way, Derby	Road Safety	Gillian stillwell	Response-01364	The sheer amount of traffic will be an accident waiting to happen
1.3	Acorn Way, Derby	Road Safety	Glynn Booker	Response-00394	The additional road traffic and lack if foot path on the field side is a major safety concern.
1.3	Acorn Way, Derby	Road Safety	Helen Walker	Response-00333	An accident waiting to happen if these houses are added to this road, there has already been accidents on this road and it is crazy how one half of the road is under one council and the other by a different council crazy all because of stupid boundaries!
1.3	Acorn Way, Derby	Road Safety	Iain Campbell	Response-01179	This will create more traffic, increasing the risks of RTA's as this is near a busy school, people also use this area for walking dogs.
1.3	Acorn Way, Derby	Road Safety	JACQUELINE LOUISE KELLY	Response-00327	Morley Road, Acorn Way and Nottingham Road are already overloaded with traffic, with the side roads being used as "Rat Runs" an extra 500 to 1000 plus vehicles from the extra houses will just compound the situation My own street Wilsthopre Road is used as a rat run to avoid the congestion on the main roads, and there are accidents, near miss accidents, speeding, and full on arguments and standoffs just about every single day .....how will another 1000 odd vehicles help that matter
1.3	Acorn Way, Derby	Road Safety	James Birks	Response-00574	Morley Road has access to both Leesbrook school and cavendish close junior school, adding vehicles for 550 houses will make the school route extremely dangerous
1.3	Acorn Way, Derby	Road Safety	James Hope	Response-00548	The intention for the development at Acornway to use the existing transport infrastructure would lead to a significant increase in what is currently serious traffic congestion on Morley Rd and the Acorn Way / Derby Road island. This congestion would impact the new population of Acornway as well as the existing local population. Morley Road, even without the addition of 550 homes is experiencing significant Traffic bottlenecks. The Acornway development will significantly enhance this problem particularly in the pupil route to Lees Brook school.
1.3	Acorn Way, Derby	Road Safety	Jane Pitwood	Response-01366	Acorn Way is already a road with a high incidence of accidents, both major (fortunately not the majority) and minor. Increasing traffic on this road can only make matters worse unless there is a total rethink on this route.
1.3	Acorn Way, Derby	Road Safety	Janette Glenn	Response-00421	Acorn Way is a fast 60 mph road which already struggles with traffic volume. Adding new junctions would be dangerous and exacerbate existing congestion issues at peak times.
1.3	Acorn Way, Derby	Road Safety	Jason Reader	Response-00321	No info on traffic calming for acorn way.
1.3	Acorn Way, Derby	Road Safety	Jeanette Kent	Response-00400	The dips and bends on this road frequently lead to accidents, some worse than others, with no room for overtaking, road is closed far too often due to an accident
1.3	Acorn Way, Derby	Road Safety	Jenifer Truckle	Response-00925	Cars often speed around this area, there are no speed safety measures on the top end of Morley Road and no safe pedestrian crossing areas, especially for school children walking to Leesbrook
1.3	Acorn Way, Derby	Road Safety	Karen Smith	Response-00636	Drivers drive too fast on this road and accidents are common
1.3	Acorn Way, Derby	Road Safety	Karl Barlow	Response-00756	I have seen numerous dangerous incidents on Morley Road. I am a Police Officer of over 20 years. I do not believe increasing the traffic, as this development would do, would be safe, particularly considering the school and two care homes on this stretch.
1.3	Acorn Way, Derby	Road Safety	Kelsey Strachan	Response-00377	Acorn Way is an unlit road where may drivers already drive dangerously slow due to visibility issues. Increasing distractions along that road is dangerous moreso. Morley Road hosts many school kids and pedestrians, the extra traffic is guaranteed to increase road risks as it is windy and visibility poor.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
	Acorn Way, Derby	Road Safety	Lewis	Response-00533	Too much congestion
1.3	Acorn Way, Derby	Road Safety	Liz Lockwood	Response-00464	The proposed access points are now on Morley Road - previously it was proposed that access be via Acorn way. Acorn way is currently derestricted and it would be inherently dangerous for access on to this road However Morley Road is a nightmare during term time and becomes gridlocked with parents and cars and the extra cars from this development would add to the traffic and back up into Chaddesden and Oakwood. The Oakwood Roundabout is also an issue as the traffic from Acorn Way use it as a slalom so any any traffic would cause tailbacks and possible accidents Any increase to the no of Cyclists on to this districted roadsdo not mix and it will be a hazard to both car users and cyclists if there is any increase in the no of cyclists There are no pavements at all on Acorn Way at present so it is hazardous to pedestrians although access is proposed in Morley Road there will be people who would Flooding - over the past year Acorn Way had been closed due to flooding
1.3	Acorn Way, Derby	Road Safety	Lou Davis	Response-00336	Acorn Way has experienced a number of serious incidents in recent years - including a fatality and also accidents which have closed the road for a significant time; it is a relatively narrow road with limited visibility - prone to flooding. Morley Road is traffic calmed by speed bumps but drivers accelerate between these - as a driver, a pedestrian and a cyclist - this is not a safe road.
1.3	Acorn Way, Derby	Road Safety	Mandy Cooling	Response-00313	There must be significant concerns regarding road safety by introducing such a massive development in such a location
1.3	Acorn Way, Derby	Road Safety	Mandy Dickens	Response-00425	Accessing and exiting the new proposed site would be extremely hazardous and subsequently result in accidents
1.3	Acorn Way, Derby	Road Safety	Mark potter	Response-00378	Acorn way is a quick road that gets congested already so adding more traffic down a fast poor lite road will cause more accidents and more pedestrians messing about or crossing that already busy fast road again madness that?s why there are no houses on that road
1.3	Acorn Way, Derby	Road Safety	Mathew Lennox-Quinn	Response-01363	Single carriage way with no separate cycle lane, Morley road already got traffic calming measures, and congested due to amount of housing
1.3	Acorn Way, Derby	Road Safety	Melanie Arnold	Response-00573	Morley Road already with a number of schools nurseries leading off it. More y traffic will mean more congestion and road safety to both residents and pupils.
1.3	Acorn Way, Derby	Road Safety	Natalie Peake	Response-00794	Building this many houses raises serious concerns about public safety and health. The increase in vehicle numbers will result in higher air pollution levels, particularly impacting children and young people walking to and from school each day, as well as local residents. The are no safe place for children and Residents to cross and I fear a rise in traffic related incidents due to the increase of vehicles on the surrounding roads.
1.3	Acorn Way, Derby	Road Safety	Neville Chatterton	Response-01078	Morley Road at peak periods is already chaotic when children are leaving Lees Brook academy, traffic park along length of road making it difficult to drive through. Further increases in traffic will be a nightmare scenario particularly buses, ambulances, fire engines etc.
1.3	Acorn Way, Derby	Road Safety	Nick Charles	Response-01370	See ?Traffic Congestion? above. Pedestrian access will be made worse with 550 new houses, as at present there is only a footpath on one side of the road, opposite the proposed site, the other side has a steep bank. This will make for dangerous conditions. The traffic will be greatly increased on Morley Road, which was not built for this volume of traffic and also at the Acorn Way junction with Morley Road, which at peak times is already slow moving.
1.3	Acorn Way, Derby	Road Safety	Nicki Harries	Response-00541	Already regular accidents, especially Morley Road which people use as cut through to try and avoid hold-ups else where nearby. This will make it even more dangerous
1.3	Acorn Way, Derby	Road Safety	Nicola Olver	Response-00434	Lots of children cross this road to get to schools in Spondon. More traffic will reduce the safety of our children
1.3	Acorn Way, Derby	Road Safety	Oakwood Ward Councillors Eyre, Mulhall and Trehwella	Response-01358	The comments in our previous objection remain relevant.
1.3	Acorn Way, Derby	Road Safety	Paul Burge	Response-00289	We already have speed bumps to control traffic flow but still get speeding motorists. With additional traffic from this estate this will only get worse.
1.3	Acorn Way, Derby	Road Safety	Peter Marshall	Response-00526	This scale of development is unsuitable for the area and poses a real danger to road users and pedestrians. I urge the council to reject this application.
1.3	Acorn Way, Derby	Road Safety	Robert Collis	Response-00355	The road floods quite regularly during heavy road along with the water flowing across the carriageway which is dangerous. Footpaths with exits onto major roads will no doubt be an opportunity for the footfall to take risks when crossing
1.3	Acorn Way, Derby	Road Safety	Robert Mee	Response-01579	I have significant concerns about road safety too, with everybody living in the new development needing to cross the busy Acorn Way in order to reach any facilities.
1.3	Acorn Way, Derby	Road Safety	Robert Mee	Response-01508	I have significant concerns about road safety too, with everybody living in the new development needing to cross the busy Acorn Way in order to reach any facilities.
1.3	Acorn Way, Derby	Road Safety	Scarlett Hamblin	Response-00395	Acorn way is already subject to speeding drivers by adding more this will increase the risk. As there is only one traffic light crossing it is very dangerous to add more cars.
1.3	Acorn Way, Derby	Road Safety	Sharon Coward	Response-00360	Increased traffic on already busy roads will add to the dangers of road users & pedestrians.
1.3	Acorn Way, Derby	Road Safety	Stephen oliver	Response-00391	Outrageous,too much traffic and noise goes through Oakwood already,even worse fast two surgeries in Oakwood you can?t get an appointment at anytime this will add further stress on the roads most have great potholes in them ,just see the ones near the co op in the main presink,,as a chronic asthmatic I suffer badly,more houses car pollution will increase my suffering,one other reason we now get frequent loss of electricity I am told like myself who have electric cars to charge.please build your homes elsewhere
1.3	Acorn Way, Derby	Road Safety	Sue Smith	Response-00376	More cars on the road will be more of a hazard to the local school children and other pedestrians
1.3	Acorn Way, Derby	Road Safety	Tanya Caldbeck	Response-00919	Major issue with this road with many RTAs. More traffic will cause more issues
1.3	Acorn Way, Derby	Road Safety	Tom King	Response-00735	Adding any form of junction to acorn way would be a large safety hazard due to volume of traffic

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Road Safety	William Gregory	Response-00411	With the growing number of accidents on Acorn Way and Morley Road, (not all reported) it?s clear that the increased traffic?largely due to the significant rise in new housing developments?has already overwhelmed the area. Any further addition of properties would only exacerbate the existing issues, putting further strain on already dangerous roads. Moreover, the current infrastructure is not equipped to support the growing population. Local services such as doctors? surgeries, schools, and public transport are already under significant pressure. Without meaningful investment in infrastructure and safety measures, further development would be unsustainable and detrimental to the quality of life for existing and future residents.
1.3	Acorn Way, Derby	School Capacity	Andrea Lambert	Response-00357	The current school in Oakwood can't cope with the residents it has now and parent have to travel to get children in schools out of the area. More houses will make the matter worse
1.3	Acorn Way, Derby	School Capacity	Andrea Wightman	Response-00358	Schools are full, ehat schools will the children go to, Heanor gate, kirk Hallam, stanley village primary etc... no there will be an expectation that the children are educated in Derby, our schools are full..
1.3	Acorn Way, Derby	School Capacity	Ashley	Response-00426	There is not enough school places .. we live on Morley Road in Oakwood and our children could not get into Oakwood school so it?s not difficult to work out you would need another school building ??
1.3	Acorn Way, Derby	School Capacity	ASHLEY STOWER	Response-01183	Lees Brook School is extremely busy there is unlikely to be enough places even if some are sent to West Park. Again road congestion , pollution , air quality are all effected.
1.3	Acorn Way, Derby	School Capacity	Callum Rhodes	Response-00371	The oakwood area is already at capacity for school places
1.3	Acorn Way, Derby	School Capacity	Cameron Coope	Response-00367	West Park & Lees Brook the 2 closest secondary schools are already nearly full in every year group. More families will make this worse.
1.3	Acorn Way, Derby	School Capacity	Carl	Response-00386	Already at bursting point
1.3	Acorn Way, Derby	School Capacity	Cheryl Wilde	Response-00328	There aren't enough primary school places in Oakwood for the number of houses we already have and there is no secondary school in Oakwood so where are all the children going to go to school and how will they get there.
1.3	Acorn Way, Derby	School Capacity	Chloe	Response-00508	You gonna build more schools or keep increasing g numbers in class? I don?t think you look at the bigger picture
1.3	Acorn Way, Derby	School Capacity	Clare Tomlinson	Response-00423	The local schools are oversubscribed - these schools are in the Derby City Council area and will not benefit from Erewash council tax. Although there are other schools - they are not within walking distance and this would add to traffic flow.
1.3	Acorn Way, Derby	School Capacity	Courtney Hodges	Response-00403	Living in Oakwood now, we will struggle when our child is old enough to get into the one school that Oakwood has, meaning our child will have to go to a school in Chaddesden, taking a space from another child who lives in Chaddesden
1.3	Acorn Way, Derby	School Capacity	David Massey	Response-00575	There isn't sufficient capacity in local schools for the current level of children given the class sizes are known to be too large. School times are already chaos with no clear strategy for controlling vehicles at those times. Again this seems to be at odds with protecting the children using speed bumps by increasing traffic
1.3	Acorn Way, Derby	School Capacity	David Rees	Response-00566	The deletion of ?Financial contributions towards the provision of additional pupil capacity at appropriate schools in Oakwood and Chaddesden where necessary;? is unacceptable and exposes the dishonourable approach being taken by Erewash Borough Council [EBC] on this proposed development, which would be built on EBC land, but the EBC expects Derby City Council tax payers to pay for the impact on local infrastructure and facilities such as schools, whilst EBC enjoys the income from the 550 families in terms of council tax. Assuming the current birth rate in the UK [1.57/woman], 550 dwellings could be expected to contain 550 x 1.57 = 863 children; not all dwellings will contain children, therefore a number of, say, 550 children would be a reasonable assumption. Clearly, this number of children would not be able to be accommodated in the existing schools in Oakwood and Chaddesden, so for EBC to expect Derby City council [and its council tax payers] to pick up the tab for the costs of 500 additional school places is at best naïve and, at worst, disgracefully dishonourable. EBC must provide all necessary school facilities for its own residents.
1.3	Acorn Way, Derby	School Capacity	Donna Pearson	Response-00441	As a mother of 2 children living in Oakwood I am disappointed that I could not get my children in to Oakwood school.So in order to cater for the new families you plan on brining to Oakwood i suggest you will need to build a new school!
1.3	Acorn Way, Derby	School Capacity	Douglas Hunt	Response-00353	Local schools are currently close to maximum capacity with no scope or funding to increase in size
1.3	Acorn Way, Derby	School Capacity	Edward James Gregory	Response-00727	Schools are already oversubscribed. Erewash does not provide schools in this area, so the development should not be considered
1.3	Acorn Way, Derby	School Capacity	Emma Daniels	Response-00349	Why have the provisions for extra school capacity been marked out? This is a pivotal point, how can another 550 homes be built without any additional school? Where are all the children supposed to go?
1.3	Acorn Way, Derby	School Capacity	Gary Murlin	Response-00373	More new schools will be needed, the junior school in Oakwood is already too small for the area
1.3	Acorn Way, Derby	School Capacity	Gemma	Response-00380	You continue to want to build more and more housed. But thete us no consideration of. Doctor capacity - cannot get an appointment due to the oakwood ward already bring under provided for School places - 550 house means more children and you won't contribute to extending / building a school to cater for yhe children who need places. Dentists / local shops, Are you building parks for children to play or just taking up.all the land for profit? traffic and amenities- its already impossible to get out of oakwood after 7.45. So adding even more traffic is a huge mistake. I strongly object
1.3	Acorn Way, Derby	School Capacity	Gillian stillwell	Response-01364	School places already too few, especially primary and infant places
1.3	Acorn Way, Derby	School Capacity	Glynn Booker	Response-00394	Additional pressure on schools will mean more children travelling further, All local schools are at full capacity so unless more schools are being built our children will not get the high standard of education we expect.
1.3	Acorn Way, Derby	School Capacity	Helen Walker	Response-00333	Local schools won?t cope the extra pupils and it won?t be Erewash Schools it will be City Schools which will have to cope.
1.3	Acorn Way, Derby	School Capacity	Iain Campbell	Response-01179	Morley gardens is currently a pickup area for school children, this site could cause an increase of congestion spoiling was is a quiet area. THE REASON WE MOVED HERE
1.3	Acorn Way, Derby	School Capacity	James Birks	Response-00574	The local schools are already full how can they support 550 houses

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	School Capacity	James Hope	Response-00548	The addition of 550 homes will lead to an inevitable shortfall in available schooling places. as the extension of local schools to increase pupil capacity is not viable. This will result in a large number of children having to travel a significantly greater distance to their place of schooling than is expected or desirable.
1.3	Acorn Way, Derby	School Capacity	James Muldoon	Response-00338	Not enough schools and I cannot see the majority of people driving/travelling to schools in Ilkeston.
1.3	Acorn Way, Derby	School Capacity	Jane Pitwood	Response-01366	Schools in this area are funded by Derby City Council and are already oversubscribed by children currently living in the Derby City area. I note that there is no provision for a new school (funded by Erewash) and the clause to provide additional funding to help the local schools has now been withdrawn. Where are any children moving to this proposed new development going to be educated and who will be expected to fund this?
1.3	Acorn Way, Derby	School Capacity	Jason Reader	Response-00321	Lack of info on additional school places.
1.3	Acorn Way, Derby	School Capacity	Jeanette Kent	Response-00400	Schools in the area are already over subscribed and more houses would lead to even more. Derby would be expected to find places for them in this area, not Amber Valley schools and services
1.3	Acorn Way, Derby	School Capacity	Jessica	Response-00603	There are certainly not enough schools in this area to cope with the inevitable families that will be set to live in these houses. There would need to be additional schools built to facilitate this.
1.3	Acorn Way, Derby	School Capacity	Karl Barlow	Response-00756	This is not the only development, with several others already confirmed. It is already impossible to get a primary school place in Oakwood and if this goes ahead, it should include a new primary school. Leesbrook is already full and will need to service the Derby City kids before this new development.
1.3	Acorn Way, Derby	School Capacity	Kelsey Strachan	Response-00377	Leesbrook and West Park are highly subscribed schools already, the closest alternative is a significant travel commitment for parents who have to both work nowadays. Primary schools are few in the area also. There is no site for a new school and clearly no plans either so shocking choice to add hundreds more people here.
1.3	Acorn Way, Derby	School Capacity	Laura	Response-00387	Subject: Objection to Planning for 550 Houses on Acorn Way and 160 Houses on Breadsall Hilltop Dear Sir/Madam, I am writing to formally object to the planning for 550 houses on Acorn Way and a further 160 houses on Breadsall Hilltop in Derby. I believe these developments are unsustainable and will have a significantly detrimental impact on the existing community and infrastructure. My objections are based on the following key concerns: 1. Misrepresentation of Target Residents and Increased Traffic: The proposal claims the development on Acorn Way will serve people who wish to live in Ilkeston, Long Eaton and Sandiacre, which is a fantasy. They are 20+ minutes away. The inevitable consequence of these 710 new households will be a substantial increase in traffic. Derby has high pollution levels and this will increase traffic further. 2. Over-Subscription of Local Schools: The schools in the areas surrounding both Acorn Way and Breadsall Hilltop are already over subscribed. The addition of these 710 houses will place an unsustainable burden on these educational facilities. 3. Over-Subscription of Local GP Surgeries: The GP surgeries in the areas surrounding both Acorn Way and Breadsall Hilltop are already over subscribed. The addition of these 710 houses will place an unsustainable burden on these healthcare services. 4. Increased Flood Risk at Breadsall Hilltop: In recent inclement weather, Breadsall village has flooded. Building 160 houses on the land at Breadsall Hilltop will cause further run off and increase the flood risk to Breadsall village and surrounding areas. In conclusion, I strongly believe that these planning applications for 550 houses on Acorn Way and 160 houses on Breadsall Hilltop are ill-conceived and fail to adequately consider the significant negative impacts they will have on the existing community and infrastructure of Derby. I urge the planning authority to reject these applications. A development of this scale in these locations is unsustainable and will severely compromise the quality of life for current and future residents of Derby. Yours faithfully, Mrs Lincoln
1.3	Acorn Way, Derby	School Capacity	Lewis	Response-00533	Is there even capacity at the already over filled schools for an extra 500 families ?
1.3	Acorn Way, Derby	School Capacity	Liz Lockwood	Response-00464	The financial support for schools has been deleted as per the amendment and is not acceptable. This is an Erewash development, however it is expected the Oakwood and Chaddesden schools should bear the increase in school admissions. Where is the nearest Erewash School. As far as I am aware the nearest primary School is on Oakwood and it is full, indeed the catchment area is so small that most of Oakwood is unable to use the school. Therefore it would not be able to accept pupils from this development. This means that both Oakwood and Erewash children would be competing for places in Chaddesden and Spondon schools. To note none of these schools are on bus routes so there would be an increase in traffic for drop off and collections of children
1.3	Acorn Way, Derby	School Capacity	Lorna Coope	Response-00365	The local schools are already overprescribed and occupants are having to send their children to schools further away. Not only does this contribute to traffic issues, but children are becoming isolated from being in schools in different areas to where they're living.
1.3	Acorn Way, Derby	School Capacity	Lou Davis	Response-00336	The area in question would be part of Erewash - the local schools are part of Derby City. There is already inadequate provision of school places - an additional 500 houses would add to the pressure. These schools would not be funded to meet the demand and places would need to be located elsewhere.
1.3	Acorn Way, Derby	School Capacity	Mandy Cooling	Response-00313	I couldn't see any plans for critical infrastructure to support the influx of hundreds more residents such as plans for doctors' surgeries (which are already groaning under the weight of thousands of patients), schools etc
1.3	Acorn Way, Derby	School Capacity	Mark potter	Response-00378	Oakwood has only 1 very small primary school so where will the children be going? again adding more traffic, pollution and dangers on the roads because people will have to drive to the school because none are being built for all these houses being built
1.3	Acorn Way, Derby	School Capacity	Melanie Arnold	Response-00573	Schools in the area are already over crowded. 550 new homes will put pressure on the schools.,
1.3	Acorn Way, Derby	School Capacity	Mr Stephen Langton	Response-00024	There is a clear principle that developments within Erewash borough should not be relying upon and using school facilities supplied and funded by the adjacent Derby City Council. Now that EBC have started to recognise this principle with the allocation of sites adjacent to existing settlements within the Erewash borough, the Acorn Way and all other proposed sites abutting Derby city conurbation should be withdrawn.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	School Capacity	Nick Charles	Response-01370	You state in your revised documentation that you will no longer make ?Financial contributions towards the provision of additional pupil capacity at appropriate schools in Oakwood and Chaddesden where necessary?. So how will this help with providing education to the hundreds of children who will eventually live here and will all need places to be schooled. 550 houses, is basically the same as a small village, who would have at least a village school, yet you are suggesting that you will have NO responsibility for them.
1.3	Acorn Way, Derby	School Capacity	Nicki Harries	Response-00541	How on earth will existing schools cope with the demand. Awful for young families
1.3	Acorn Way, Derby	School Capacity	Nicola Oliver	Response-00434	West Park is at full capacity now, developers say they will contribute money for expansion which is good but will they be able to find additional teachers and pay their salaries over the many years?
1.3	Acorn Way, Derby	School Capacity	Oakwood Ward Councillors Eyre, Muthall and Trehwella	Response-01358	The comments in our previous objection remain relevant. The removal of financial contributions to schooling in the immediate area will do nothing for future residents who would reside on this land, and will guarantee the schools status as car dependant. We assume this has come due to the disagreement between Erewash BC and Derby CC regarding schooling, which came from Erewash BC's continuous assumption that Derby CC would provide educational places for residents on this land, despite being repeatedly told that they would not, and despite Derbyshire CC having a duty to provide the places. We would like to know what schools financial contributions would be made towards.
1.3	Acorn Way, Derby	School Capacity	Paul Burge	Response-00289	Leesbrook school is already at full capacity and with the leaving age going to 18yrs old this will only increase.
1.3	Acorn Way, Derby	School Capacity	Pauline Shephard	Response-00483	People can't get their children into the local schools already and it has been the same for years. You can't just keep building houses without putting in the infrastructure.
1.3	Acorn Way, Derby	School Capacity	Peter Marshall	Response-00526	Local infrastructure is already under considerable pressure. In particular, nearby schools are at or near full capacity. This development would increase the number of families needing school places, potentially resulting in overcrowded classrooms, longer commutes for children, or families being forced to seek education outside the local area.
1.3	Acorn Way, Derby	School Capacity	Rachael Hinckley	Response-01166	Morley gardens is currently a parking area for school children now, this site could cause an increase of school traffic to the area
1.3	Acorn Way, Derby	School Capacity	Rich King	Response-00383	These are already at capacity without the additional development. It's unrealistic and too close to lees brook and west park to put a new school in as well as additional housing
1.3	Acorn Way, Derby	School Capacity	Robert Collis	Response-00355	Our understanding is that schools are already at capacity therefore where will the children go to school, hopefully the nearest Erewash school so as not to take over city spaces
1.3	Acorn Way, Derby	School Capacity	Sara Cotton	Response-00368	Schools in the area are at capacity
1.3	Acorn Way, Derby	School Capacity	Sarah Smyth	Response-00375	Schools are already at capacity in the area (we have had to send our daughter to an independent school as cannot get in proffered catchment school and class sizes too big in others) to add more houses without more schools is irresponsible and greedy
1.3	Acorn Way, Derby	School Capacity	Sarah willis	Response-00345	Lack of schools in the area to accommodate additional families requiring educational support in the local area.
1.3	Acorn Way, Derby	School Capacity	Scarlett Hamblin	Response-00395	Park view is already oversubscribed with Breadsall hilltop not far behind. I myself was awarded my child's third choice school with my two local schools full. I have the make the journey to a chaddesden school twice daily. There are not enough school places to support these new children without moving further out of the catchment area.
1.3	Acorn Way, Derby	School Capacity	Sharon Coward	Response-00360	Increased need for school places in the area which do not come under Erewash will severely impact other authorities in a negative way.
1.3	Acorn Way, Derby	School Capacity	Sue Smith	Response-00376	The local schools are already at full capacity!!!! Where will all of the children from these new houses go to school????
1.3	Acorn Way, Derby	School Capacity	Tanya Caldbeck	Response-00919	No school space and no capacity
1.3	Acorn Way, Derby	School Capacity	Tom King	Response-00735	Local schools already at capacity
1.3	Acorn Way, Derby	Traffic Congestion	Andrea Lambert	Response-00357	Acorn Way suffers enough congestion without building more houses and causing more congestion
1.3	Acorn Way, Derby	Traffic Congestion	Andrea Wightman	Response-00358	Acorn Way is already extremely busy, especially at the start and end of the day. It will be dangerous to have hundreds more vehicles using the road.
1.3	Acorn Way, Derby	Traffic Congestion	Arthur Boulton	Response-01097	Living on Morley rd I am well aware of the cogestion caused by traffic both to and from acorn way the suggestion only tinker with what will be major congestion problems in the area caused by this development
1.3	Acorn Way, Derby	Traffic Congestion	Ashley	Response-00426	The infrastructures are not in place to accept the level of traffic that would come down acorn way the works being done at the roundabout at Nottingham Road near Asda are clear evidence of the trouble that will cause.. build the roads first .. don't let the developer build first
1.3	Acorn Way, Derby	Traffic Congestion	ASHLEY STOWER	Response-01183	We live on Morley Road & suffer from chronic road congestion due to it being used as a rat run into Derby to avoid Acorn way , Lees Brook School Parking and Cavendish school traffic.
1.3	Acorn Way, Derby	Traffic Congestion	Brendan Horgan	Response-00610	Morley Road is already a designated traffic sensitive route, with heavy congestion at certain times of the day. There are five schools in the immediate vicinity, which cause excessive traffic build up due to parents traveling to Lees Brook School, or on route to the other schools in the area. Morley Road , is simply not up to accepting increased traffic. The road construction along Morley road is substandard for its present use , as it was previously a simple country lane, and it was never envisaged that traffic volumes would be what they are today.
1.3	Acorn Way, Derby	Traffic Congestion	Carl	Response-00386	This road is always busy at peak times and will cause further problems with surround roads
1.3	Acorn Way, Derby	Traffic Congestion	Cheryl Wilde	Response-00328	Acorn Way is a very busy road already and cannot support another 550 homes.
1.3	Acorn Way, Derby	Traffic Congestion	Chloe	Response-00508	One way out of spondon down willowcroft how you planning to control traffic and not make everyone late
1.3	Acorn Way, Derby	Traffic Congestion	Chris copley	Response-01246	There is already a serious problem congestion in the area, especially at school opening and closing times. Morley road has speed bumps and cars often parked up blocking part of the road so there is poor natural flow of traffic

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Traffic Congestion	Clare Tomlinson	Response-00423	Acorn Way and Morley Road are over capacity at Peak Times - the traffic noise from Acorn Way in particular is very bad. There are often delays exiting Oakwood at peak times - particularly towards Asda and Kings Corner
1.3	Acorn Way, Derby	Traffic Congestion	Courtney Hodges	Response-00403	Too much traffic on an already busy road which is one of the only ways in or out of Oakwood. This will have a huge effect on peak rush hour traffic also
1.3	Acorn Way, Derby	Traffic Congestion	Danielle Andrews	Response-01244	Morley Road already struggles to accommodate traffic flow to and from the school, there is no safe way to funnel traffic for upwards of 1000 extra people onto acorn way and the congestion on Morley Road will be significant. This road is full of speed bumps and cars parked on the roadside limit traffic flow further
1.3	Acorn Way, Derby	Traffic Congestion	David Massey	Response-00575	Morley Road is barely big enough to service the houses on it particularly at school times. It wasn't deemed important enough to be resurfaced properly and if it was decided it needed speed bumps due to the school why can it now be ok to add the volume of traffic from 550 houses.
1.3	Acorn Way, Derby	Traffic Congestion	David Rees	Response-00566	The proposal to construct ?at least 2 vehicular accesses onto Morley Road? and, by implication, none on Acorn Way, is not viable, for the following reasons: 1. Morley Road south of the Acorn Way roundabout is already a very busy road, particularly during peak periods and can become virtually impassable in the Lees Brook Academy area during school opening/closing periods. 2. Morley Road south of the Acorn Way roundabout is a relatively narrow road with several bends and it only takes a very few vehicles parked on the road to result in traffic congestion; several vehicles are always parked on the road and, in the Lees Brook Academy area during school opening/closing periods, Morley Road becomes effectively blocked 200-300m either side of the school entrance. The road is so narrow that even cars partially parked on the path [soon to become forbidden] cannot be passed by a vehicle without that vehicle crossing to the ?oncoming? side of the road. 3. Construction of any new vehicular access on Morley Road south of the Acorn Way roundabout would have to comprise either a T junction or a roundabout: the former at least would require traffic lights to allow the large number of vehicles from the development access onto Morley Road; both would have to be built to the east of Morley Road, as the west side is fully populated by housing. Either option would be feasible at the northern end of the section of Morley Road where the land on the east side is the same level as that of the road, but not south of the White House Nursery because of the increasing elevation difference between Morley Road and the land to the east of it: either a T junction or a roundabout would require lower the approach road to that of Morley Road and this, together with the bend in the road in this part of Morley Road, would result in a blind junction. Any new vehicular accesses onto Morley Road would adversely impact traffic flow on Morley Road, particularly if traffic lights are necessary. 5. Widening Morley Road would not solve the congestion problems outlined above: widening would only be possible on the east side of the road, and only as far south as Morley Gardens, from which point existing dwellings occupy both sides of the road. 4. In summary, 550 dwellings in the proposed development would result in circa 800 more vehicles regularly using Morley Road; given the congestion problems highlighted above, Morley Road in its current state or potentially widened state would not cope with this additional number of vehicles. 5. A further point on traffic congestion: if the plan is for HGVs to access the site during the building phase via the ?at least 2 vehicular accesses onto Morley Road?, this would be totally untenable: currently no large HGVs use Morley Road, because it is too narrow; I understand that there is a weight restriction on Morley Road; the impact on Morley Road residents would be immense. 6. The plans should be further amended to remove ?at least 2 vehicular accesses onto Morley Road?, and replaced with ?at least 2 vehicular accesses onto Acorn Way?: Acorn Way is a wider road and would lend itself to widening and ingress/egress points far better than Morley Road, which is totally unfit for what the current proposal requires.
1.3	Acorn Way, Derby	Traffic Congestion	Donna Pearson	Response-00441	The traffic on Morley road and acorn way is already at breaking point.For every house you build there will be another 2 cars.Our roads can't cope as it is.
1.3	Acorn Way, Derby	Traffic Congestion	Douglas Chambers	Response-01235	The potential for additional vehicular traffic causing further major congestion on Morley is unacceptable. Under present conditions through traffic can be delayed for very long periods
1.3	Acorn Way, Derby	Traffic Congestion	Douglas Hunt	Response-00353	Traffic congestion is already a major problem on Morley Road without extra traffic from new homes
1.3	Acorn Way, Derby	Traffic Congestion	Edward James Gregory	Response-00727	Acorn way is very busy, with bad visibility and drainage, and the site of many accidents. Further development will increase congestion, usage, danger and surface water run off
1.3	Acorn Way, Derby	Traffic Congestion	Emma Daniels	Response-00349	Traffic is congested enough through Morley road and Acorn way
1.3	Acorn Way, Derby	Traffic Congestion	Gary Murfin	Response-00373	Traffic congestion is always bad getting in and out of Oakwood and this is bound to make it far worse and also increased pollution, especially as most houses tend to have 2 cars or more nowadays
			Gemma	Response-00384	Acorn way is already congested at peak times. Adding more homes around this area would just be absolute chaos
1.3	Acorn Way, Derby	Traffic Congestion	Gillian stillwell	Response-01364	This area already suffers considerable congestion , particularly at the time leesbrook school finishes for the day. The area is impassable.
1.3	Acorn Way, Derby	Traffic Congestion	Glynn Booker	Response-00394	Morley road is in poor condition and not suitable for heavy traffic as the weight limit sign indicates as no through road to heavy traffic. The round about at the top of Morely road is over capacity as it is, without any additional vehicle traffic.
1.3	Acorn Way, Derby	Traffic Congestion	Helen Walker	Response-00333	Acorn way is a dangerous road already without adding in houses off it which have to come onto this already busy road, The traffic which uses this road is quite heavy and can be queuing without adding more traffic to it.
1.3	Acorn Way, Derby	Traffic Congestion	Iain Campbell	Response-01179	This will create a influx of traffic congestion with a possibility of 1100 cars with 2 cars per household being the normal now.
1.3	Acorn Way, Derby	Traffic Congestion	JACQUELINE LOUISE KELLY	Response-00327	An extra 550 houses - just about every family has 1 to 2 cars, thats an extra 550 to 1000+ vehicles using Acorn Way and the neighbouring housing estate each day Acorn way is already extremely heavily congested at peak times with traffic causing mayhem, the traffic often building up around a bend and causing accidents, I myself have been shunted on Acorn Way due to traffic on the blind bend and I know of lots of accidents and fatalities on that road
			Jake	Response-01005	This should not be allowed to happen!

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Traffic Congestion	James Bellaby	Response-00340	Congestion is already bad on acorn way. The roundabouts at each end can't cope as it is.
1.3	Acorn Way, Derby	Traffic Congestion	James Birks	Response-00574	How can Morley road support the vehicles to an extra 550 houses! The road is busy enough and during school times is sometimes impassable
1.3	Acorn Way, Derby	Traffic Congestion	James Hope	Response-00548	The intention for the development at Acorn Way to use the existing transport infrastructure would lead to a significant increase in what is currently serious traffic congestion on Morley Rd and the Acorn Way / Derby Road island. This congestion would impact the new population of SGA1 as well as the existing local population.
1.3	Acorn Way, Derby	Traffic Congestion	James Muldoon	Response-00338	Acorn Way cannot sustain another 550 homes.
1.3	Acorn Way, Derby	Traffic Congestion	Jane Pitwood	Response-01366	This area already suffers from congestion at peak times. How can an additional 550 houses alleviate this problem? I can only see it getting worse.
1.3	Acorn Way, Derby	Traffic Congestion	Jason Reader	Response-00321	I live in Breadsall village which will see significant traffic increase from this development getting to the A38. Until I see plans from the developer to alleviate both the speed and volume of traffic in my village I will object. This isn't me being a NIMBY but developers should be held accountable for the effects of their development. I realise we need more houses they just aren't built sensitively.
1.3	Acorn Way, Derby	Traffic Congestion	Jeanette Kent	Response-00400	Acorn Way is a nightmare with heavy traffic leaving Oakwood already, if there is an accident on this road ( which happen frequently) there is no way to avoid a long detour
1.3	Acorn Way, Derby	Traffic Congestion	Jenifer Truckle	Response-00925	Congestion on Morley road is a already an issue, this will make it worse
1.3	Acorn Way, Derby	Traffic Congestion	Jessica	Response-00603	This plan for housing will be hugely detrimental to the traffic in Derby, which is already a nightmare in this area particularly. The current roads cannot cope with the foot traffic that will come from this.
1.3	Acorn Way, Derby	Traffic Congestion	John Moffat	Response-01386	Once again, more houses = more cars with no thought put to the inevitable additional traffic in the surrounding area. Access to A52, M1 & Nottingham , not bad Access to A38, as usual, through Breadsall There was an opportunity to create a link from Bishop's Drive to the roundabout near McDonalds / Morrisons but this was missed.
1.3	Acorn Way, Derby	Traffic Congestion	Karen Smith	Response-00636	Acorn Way is an over subscribed road and is subject to flooding and frequent accidents
1.3	Acorn Way, Derby	Traffic Congestion	Karen Webster	Response-00419	The roads cannot cope with the existing traffic and that amount of houses will make it even worse. Even with some access, it doesn't mean the roads have any more capacity.
1.3	Acorn Way, Derby	Traffic Congestion	Karl Barlow	Response-00756	Morley Road is already congested around school drop off and pick up times. Morley Road North of the roundabout by Acorn way and Morley Road is already congested at rush hours, with tailbacks from Kings Corner all the way to this roundabout. Further traffic will only make these issues worse. Traffic is already backed up the entirety of Acorn Way from 0730 each morning. Morley Road is a residential Road, but given the unique setup of Oakwood and Chaddesden, there are few interconnecting roads, so this is often busy. Adding a considerable number of houses will likely congest one of the two main points onto the Oakwood estate. In order to make the safe and effective, the entirety of Morley Road would need to be widened.
1.3	Acorn Way, Derby	Traffic Congestion	Kelsey Strachan	Response-00377	Acorn Way is already slow at peak times at the Asda roundabout due to being a single lane, but the main route towards Derby and A52/M1 to Nottingham for all of Oakwood. Equally Morley Road is incredibly busy at school periods with parking causing it to be essentially 1 lane at those times. Speed bumps reduce the traffic currently, but this would massively increase the volume and is not remotely capable of handling more.
1.3	Acorn Way, Derby	Traffic Congestion	Laura	Response-00387	Subject: Objection to Planning for 550 Houses on Acorn Way and 160 Houses on Breadsall Hilltop Dear Sir/Madam, I am writing to formally object to the planning for 550 houses on Acorn Way and a further 160 houses on Breadsall Hilltop in Derby. I believe these developments are unsustainable and will have a significantly detrimental impact on the existing community and infrastructure. My objections are based on the following key concerns: 1. Misrepresentation of Target Residents and Increased Traffic: The proposal claims the development on Acorn Way will serve people who wish to live in Ilkeston, Long Eaton and Sandiacre, which is a fantasy. They are 20+ minutes away. The inevitable consequence of these 710 new households will be a substantial increase in traffic. Derby has high pollution levels and this will increase traffic further. 2. Over-Subscription of Local Schools: The schools in the areas surrounding both Acorn Way and Breadsall Hilltop are already over subscribed. The addition of these 710 houses will place an unsustainable burden on these educational facilities. 3. Over-Subscription of Local GP Surgeries: The GP surgeries in the areas surrounding both Acorn Way and Breadsall Hilltop are already over subscribed. The addition of these 710 houses will place an unsustainable burden on these healthcare services. 4. Increased Flood Risk at Breadsall Hilltop: In recent inclement weather, Breadsall village has flooded. Building 160 houses on the land at Breadsall Hilltop will cause further run off and increase the flood risk to Breadsall village and surrounding areas. In conclusion, I strongly believe that these planning applications for 550 houses on Acorn Way and 160 houses on Breadsall Hilltop are ill-conceived and fail to adequately consider the significant negative impacts they will have on the existing community and infrastructure of Derby. I urge the planning authority to reject these applications. A development of this scale in these locations is unsustainable and will severely compromise the quality of life for current and future residents of Derby. Yours faithfully, Mrs Lincoln
1.3	Acorn Way, Derby	Traffic Congestion	Lewis	Response-00533	Acorn Way already too busy with traffic especially at peak times. Leads to queueing at roundabout Morley road
1.3	Acorn Way, Derby	Traffic Congestion	Liz Lockwood	Response-00464	Acorn way is a busy main road and carries the traffic from Oakwood/Chaddesden and further afield with people trying to avoid the city centre and get access to A52 as well as the Asda supermarket Acorn way is already at a standstill at the Asda Roundabout in peak times due to the amount of traffic for chaddesden and oakwood. A further 600 homes = at least 600 cars will add to the congestion. The access from the proposed estate onto the Morley Road especially around Lees Brook School will add to the traffic and the road is gridlocked at drop off and pick up times The proposal to provide multi use crossing on Acorn Way to access the footpaths is ludicrous - it is a derestricted road with poor sighting around the access points will make them accident spots

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Traffic Congestion	Lorna Coope	Response-00365	With two routes out of the housing estates, one being via acorn way, there are already issues with congestion, traffic volumes and road safety.
1.3	Acorn Way, Derby	Traffic Congestion	Lou Davis	Response-00336	This development will need to utilise either Acorn Way or Morley Road for access and egress. Both of these roads suffer from the effects of traffic with Acorn Way in particular facing extreme congestion during rush hour periods. Morley Road is difficult to negotiate during school opening and closing times and more cars etc would add to this in a detrimental way.
1.3	Acorn Way, Derby	Traffic Congestion	Lucy Skeet	Response-00388	Again, this is already bad enough. The area is not meant for as much traffic as it gets now, let alone with more people
1.3	Acorn Way, Derby	Traffic Congestion	Mandy Cooling	Response-00313	I have serious concerns about the impact of such a massive development on the creaking infrastructure. Acorn Way is currently a decent road to get traffic moving around Oakwood and surrounding areas. I envisage that this road will need to be slowed to a 30mph in light of the proximity to so many new residents and that it's envisaged that it will include crossings. That will all have an impact and likely result in further gridlock around this side of Derby
1.3	Acorn Way, Derby	Traffic Congestion	Mandy Dickens	Response-00425	The amount of houses suggested for this site would mean an enormous increase to the traffic along Derby/Nottingham Road, Acorn Way and Raynesway. These roads are already suffer alot of congestion. Any further addition would simply gridlock these roads.
1.3	Acorn Way, Derby	Traffic Congestion	Mark potter	Response-00378	Acorn way gets very busy in the mornings with traffic backing up so adding more houses to cause more traffic flowing down acorn way is absolute madness and even adding a roundabout or traffic light would further add to the problem I think oakwood has had enough houses already build of the last 5 years time to move on
1.3	Acorn Way, Derby	Traffic Congestion	Mathew Lennox-Quinn	Response-01363	Already area gets to busy with traffic, road also floods every year
1.3	Acorn Way, Derby	Traffic Congestion	Nat	Response-00155	The volume of traffic will increase
1.3	Acorn Way, Derby	Traffic Congestion	Natalie Peake	Response-00794	the proposed development of 550 new homes will put unbearable pressure on local roads, many of which are already congested. It is reasonable to expect that most households will have more than one vehicle, potentially adding over 1,000 additional cars to the local network. The stretch of Morley Road outside Lees Brook Academy becomes gridlocked on a daily basis, particularly where the road narrows and is obstructed by parked cars on both sides. This often prevents larger vehicles?including buses and emergency services?from getting through. Furthermore, Acorn Way is routinely closed due to traffic accidents and flooding, forcing traffic to be diverted through Oakwood or along Morley Road, compounding the congestion. The island at Acorn Way and Morley Road is already operating at 80% capacity and simply cannot accommodate the increased volume of traffic this development would generate.
1.3	Acorn Way, Derby	Traffic Congestion	Nathan Latymer	Response-00363	The traffic in this area is awful as it is, with no need for it to be made any worse by adding loads of houses. Also, adding more pedestrian crossings along Acorn Way will amplify this issue.
1.3	Acorn Way, Derby	Traffic Congestion	Neville Chatterton	Response-01078	Acorn way and Morley Road are already very busy roads mainly at peak periods and traffic congestion and road safety will be significant.
1.3	Acorn Way, Derby	Traffic Congestion	Nick & Jacqui McCrorie	Response-01361	As a resident of Morley Rd, we already notice worsening heavy traffic at peak rush hour culminating in frequent queues crawling past our house. This proposed development will make traffic much worse with increased volumes of vehicles accessing the new development. This increased traffic will also worsen air pollution in the area.
1.3	Acorn Way, Derby	Traffic Congestion	Nick Charles	Response-01370	Morley Road is narrower than many other roads in the immediate area and struggles to provide the space cars, buses and emergency vehicles need when the road is clogged with parked cars. The twice-daily, severe school parking issues with Lees Brook Academy, make the road dreadful to drive on, and almost impossible for buses and emergency vehicles. Side streets are clogged, with some residents trapped on their own driveways. The ?creation of at least two new vehicular junctions with suitable pedestrian access into Morley Road?, will only make matters much worse, especially as there is only a footpath on one side of the road from the Acorn Way Roundabout to Lees Brook Academy. 550 houses worth of new traffic, will clog Morley Road with traffic, much more than it is now, particularly at peak times. During the 5 year building timetable, the addition of heavy vehicles along Morley Road and the obstructions they will create, will be intolerable for most residents, particularly those living near the site.
1.3	Acorn Way, Derby	Traffic Congestion	Nicki Harries	Response-00541	The congestion and number of accidents has risen due the the 2 new estates already in the area, this will make it even worse and I don?t see how new junctions will help it?ll just cause even more hold ups
1.3	Acorn Way, Derby	Traffic Congestion	Nicola Olver	Response-00434	Traffic is already horrendous in this area. Lots of accidents on Acorn Way over the years. Pollution from more traffic will rise drastically affecting people?s health. Other grey and brown belt land available to use in Erewash not Derby that can has the road infrastructure in place
1.3	Acorn Way, Derby	Traffic Congestion	Oakwood Ward Councillors Eyre, Mulhall and Trehwella	Response-01358	The comments in our previous objection remain relevant.
1.3	Acorn Way, Derby	Traffic Congestion	Paul Burge	Response-00289	The amount of traffic leaving this development will cause issues. As it is at the moment school traffic almost closes Morley road which inhibits bus services.
1.3	Acorn Way, Derby	Traffic Congestion	Pauline Shephard	Response-00483	There is already high levels of traffic congestion in and around Oakwood
1.3	Acorn Way, Derby	Traffic Congestion	Paul Roe	Response-00330	Traffic entering acorn way is disaster waiting to happen
1.3	Acorn Way, Derby	Traffic Congestion	Peter Marshall	Response-00526	The local road network is already under significant pressure, and this development would lead to dangerous levels of traffic congestion.
1.3	Acorn Way, Derby	Traffic Congestion	Rachael Hinckley	Response-01166	This will create a influx of traffic congestion with a possibility of 1100 cars with 2 cars per household being the normal now
1.3	Acorn Way, Derby	Traffic Congestion	Rebecca Styles-Jones	Response-00372	Already difficulties with sheer volume of traffic. Another 1,000+ vehicles will be bedlam.
1.3	Acorn Way, Derby	Traffic Congestion	Rich King	Response-00383	Traffic is bad enough on Nottingham road end since they put the cycle lane in and at Morley road in the afternoon and evening. This will make it worse.
1.3	Acorn Way, Derby	Traffic Congestion	Robert Collis	Response-00355	Traffic at peak times which are getting wider is already without any further developments causing congestion, tall backs, delays and accidents.
1.3	Acorn Way, Derby	Traffic Congestion	Sara Cotton	Response-00368	Acorn Way is busy and would not cope with extra traffic

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Traffic Congestion	Sarah Willis	Response-00345	Traffic in the area is already very congested and the addition of this volume of houses will bring the flow of traffic to a standstill at peak times of day and increased concern of safety of pedestrians in the area, especially around school drop off and pick up times.
1.3	Acorn Way, Derby	Traffic Congestion	Scarlett Hamblin	Response-00395	There is already enough traffic with all the new houses from the two estates without adding more pressure to our already busy roads. Each morning traffic is tailing back all the way down Bishops Drive and all down hilltop. By increasing the number of homes the number of cars will increase. This will also have an effect on the local environment as well as increasing congestion.
1.3	Acorn Way, Derby	Traffic Congestion	Sharon Coward	Response-00360	Traffic congestion is already bad & the roads are not built for the level of traffic this development will add. The surrounding infrastructure not owned by Erewash will be impacted severely.
1.3	Acorn Way, Derby	Traffic Congestion	Shaun Cavanagh	Response-00416	Acorn Way & Morley Rd are already congested traffic bottlenecks.
1.3	Acorn Way, Derby	Traffic Congestion	Sue Smith	Response-00376	More houses obviously mean more cars on the road around that area. The traffic is already particularly bad at times throughout the day, this will clearly get worse.
1.3	Acorn Way, Derby	Traffic Congestion	Tanya Caldbeck	Response-00919	This road is already used as a major through road and can flood and become dangerous, more housing would cause more issues with traffic congestion around that area which already has a major congestion issue.
1.3	Acorn Way, Derby	Traffic Congestion	Tom King	Response-00735	Traffic already high volume, adding so many houses will create huge issues.
1.3	Acorn Way, Derby	Traffic Congestion	William Gregory	Response-00411	With the growing number of accidents on Acorn Way and Morley Road, it's clear that the increased traffic? largely due to the significant rise in new housing developments? has already overwhelmed the area. Any further addition of properties would only exacerbate the existing issues, putting further strain on already dangerous roads. Moreover, the current infrastructure is not equipped to support the growing population. Local services such as doctors? surgeries, schools, and public transport are already under significant pressure. Without meaningful investment in infrastructure and safety measures, further development would be unsustainable and detrimental to the quality of life for existing and future residents.
1.3	Acorn Way, Derby	Type of Housing	Ashley	Response-00426	Poor quality houses being built in a rush.. if your going to build build some 5/6 bed roomed luxury houses
1.3	Acorn Way, Derby	Type of Housing	ASHLEY STOWER	Response-01183	It is unclear what is the type of housing, social housing brings crime & anti-social behaviour.
1.3	Acorn Way, Derby	Type of Housing	Carl	Response-00386	Housing market is already broke due to labour increase in stamp duty
1.3	Acorn Way, Derby	Type of Housing	Chris Copley	Response-01246	The scale of build is too large, it will have a negative impact on the character of the area.
1.3	Acorn Way, Derby	Type of Housing	Clare Tomlinson	Response-00423	Very little new build housing is affordable and the number of affordable houses is usually inadequate.
1.3	Acorn Way, Derby	Type of Housing	David Massey	Response-00575	If they must be built then social housing should be a larger percentage with no possibility of them being sold off.
1.3	Acorn Way, Derby	Type of Housing	Donna Pearson	Response-00441	As a home owner living in a lovely quiet area I would definitely object to any kind of social housing as this would devalue my property.
1.3	Acorn Way, Derby	Type of Housing	Gary Murfin	Response-00373	More new housing if being built needs to be far more affordable, I thought that was the idea, the percentage of new builds be so called affordable is too low, and they aren't really affordable enough.
1.3	Acorn Way, Derby	Type of Housing	Gemma	Response-00384	Oakwood has a relatively low crime rate with a tight knit community, by adding these homes you risk losing this.
1.3	Acorn Way, Derby	Type of Housing	Glynn Booker	Response-00394	I have no objection to social housing being built as long as the right infrastructure is built as well.
1.3	Acorn Way, Derby	Type of Housing	Iain Campbell	Response-01179	Who are these houses for?
1.3	Acorn Way, Derby	Type of Housing	James Birks	Response-00574	10% to social housing! Great lower the street value overnight.
1.3	Acorn Way, Derby	Type of Housing	Jeanette Kent	Response-00400	Affordable housing should be built near Amber Valley services, not Derby, this is a way of them shifting monetary expenses away from themselves whilst still collecting council tax to them!
1.3	Acorn Way, Derby	Type of Housing	Liz Lockwood	Response-00464	The changes to the provision of affordable housing is lamentable. Only 10% and there is a get out clause for off-site affordable housing to be provided - this is what will happen as the builders will want max profit from the site. The question would be where would the off-site affordable housing be sited?
1.3	Acorn Way, Derby	Type of Housing	Lou Davis	Response-00336	In reality - these properties would offer very limited options for social housing - they would be over-priced and out of the reach of most.
1.3	Acorn Way, Derby	Type of Housing	Mark Potter	Response-00378	Oakwood needs no more houses so the type of housing should be non.
1.3	Acorn Way, Derby	Type of Housing	Nick Charles	Response-01370	Only ?10% of the homes provided to be for on-site affordable home ownership?, seems unfair, as there are many families who need housing, yet cannot afford the inflated prices of large houses. But as no plans are available at this time, it is difficult to comment further.
1.3	Acorn Way, Derby	Type of Housing	Paul Burge	Response-00289	We'd rather not have any. But if this development gets forced through it should be to the high standard of the surrounding buildings.
1.3	Acorn Way, Derby	Type of Housing	Robert Mee	Response-01579	If this site were to be developed, I believe that a 10% allocation to affordable housing is woefully inadequate.
1.3	Acorn Way, Derby	Type of Housing	Scarlett Hamblin	Response-01508	If this site were to be developed, I believe that a 10% allocation to affordable housing is woefully inadequate.
1.3	Acorn Way, Derby	Type of Housing	Scarlett Hamblin	Response-00395	New build houses are chucked up and are not built to last like houses of the past. New builds have been known to have multiple issues from the brickwork to the internal structure. We do not need or want these houses which will become dilapidated in a number of years. Also, the price of houses are out of reach to any first-time buyers. This is not helping our community it is hindering it.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Andrea Lambert	Response-00357	Will have an adverse effect on the wildlife.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Ashley	Response-00426	We have lots of animals and birds visit our garden on Morley Road this would be taken away.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	ASHLEY STOWER	Response-01183	The natural habitats for animals & plants will be taken away, there are better brown field sites that could be developed.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Carl	Response-00386	Already lots of wildlife being run over.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Cheryl Wilde	Response-00328	Where is all the wildlife living in those fields where the houses are planned going to go? It will upset the ecosystem.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Chris Copley	Response-01246	The local area has a wide range of animals I've seen many, including rabbits, lots of bats living in the trees, voles, foxes and a number of unusual butterfly species. The area has variety of grass and trees types that support biodiversity, especially in the nearby stream that also hosts a lot of wildlife that I've seen.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Clare Tomlinson	Response-00423	I have personally seen Foxes and Badgers. There are multiple birds of prey. The insect life is abundant - including butterflies etc There are some large trees and older hedgerows which support a range of wildlife.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Danielle Andrews	Response-01244	I disagree wholeheartedly with the scale of housing proposed for the green belt land, alongside increasing traffic and reducing safety on a school route, removing all green land is detrimental to both the environment and the general populace. Preserving areas for green space should be considered in any planning on this area to encourage biodiversity
1.3	Acorn Way, Derby	Wildlife / Biodiversity	David Massey	Response-00575	Talk is made of cycle lanes but not enough to make up for the additional traffic. The area has a major green corridor along the brook and building this number of homes will affect this.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Donna Pearson	Response-00441	Living in a fairly rural area with .My children love to watch the rabbits and birds.You are going to take this away from the younger generation.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Douglas Hunt	Response-00353	The development will undoubtedly destroy the existing wildlife habitat
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Edward James Gregory	Response-00727	This area should be left as open agricultural land, and not be developed / hard surfaced. It provides a natural green break from Chaddesden towards Oakwood and Spondon
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Gary Murfin	Response-00373	Obviously this will suffer here and in the area around Chaddesden wood
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Gemma	Response-00384	Oakwood is known for its wildlife and green belt and you want to destroy that for homes which could be built elsewhere, Saving our wildlife and saving our green belt.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Gillian Stilwell	Response-01364	Bound to suffer with further building
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Glynn Booker	Response-00394	This is was traditionally green belt/ farm land with an abundance of wildlife, don't the wild animals have a right to homes?
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Helen Walker	Response-00333	Just have no regard for the wildlife which lives in this area their natural habitats are been disturbed and destroyed we have to protect it not kill it
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Iain Campbell	Response-01179	There is a number of birds of prey within that area, I counted 7 the other day in the potential housing spot. This would be a huge impact and a potential a lose of the birds of prey as they use this area for feeding the young. This is a safe area for people to walk their dogs.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	James Bellaby	Response-00340	More concrete less habitats, less habitats, less echo system.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	James Birks	Response-00574	To destroy the fields to build more houses is ridiculous
1.3	Acorn Way, Derby	Wildlife / Biodiversity	James Hope	Response-00548	The site provides habitat for wide variety of bird and animal life including Rabbits, Hares, Badgers and Foxes. It also provides habitat for snakes (particularly Adders) and lizards. Bird life in the SGA1 area includes ?garden birds? as well as being a major hunting area for the local Sparrow Hawk and Buzzard populations. In addition, the removal of sections of tree belt for access from Morley Road will additionally reduce habitat in a similar manner to any other chosen access points Consequently, the proposed SGA1 development will inevitably have an adverse effect on the biodiversity of the area.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Jane Pitwood	Response-01366	Again, reducing areas of green space will affect wildlife and biodiversity. The problem being that once this has been adversely affected it cannot be undone.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Jason Reader	Response-00321	Building on green belt.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Jeanette Kent	Response-00400	There is an ever decreasing amount of green wedge for wildlife to use, I have seen Cattle Egret and deer in these fields. These isn't enough of a corridor already, do not take what little is left for them.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Karl Barlow	Response-00756	You regularly see Kestrels, Buzzards and Sparrowhawks on the hillside. These fields link the wider countryside to the rest of Oakwood. We see Badgers, foxes and numerous other types of wildlife, which would be further pushed out of the area. The effect on the water and drainage would also likely be negatively impactful on the wildlife, and other sites, which would be less impactful are available.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Kelsey Strachan	Response-00377	Destroying this land would reduce the green space accessible to the public this side of Oakwood to near zero. Pushing more people to other areas which will become overrun during busier periods such as in summer. The space is also home to much wildlife and plants, which are wild compared to the cultivated green spaces around Oakwood otherwise. Acorn Way pens them in one side already, this development would destroy any remaining space they have. This development is objectively poorly thought out. The space is too small for further development whilst maintaining any consideration for current residents both human and animal/plant.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Lewis	Response-00533	Usual walks over fields and seeing wildlife will be ruined
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Liz Lockwood	Response-00464	The area on both side of Acorn Way is green wedge land to prevent the urban sprall This development will have a devastating affect on the wildlife in the area - we have foxes, badgers, rabbits and a whole host of bird life and butterflies etc which use acorn way and the surrounding fields as access corridors other areass, including Chaddesden Wood and the fields surrounding Chaddesden. The hedgerows and trees on Acorn way have already been removed, even though the planning permission had not been approved - the nesting birds and wildlife have already be disrupted!
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Lou Davis	Response-00336	I have seen foxes, badgers and birds of prey in the fields adjacent to Acorn Way. I have also seen bats and other wildlife. There is a stream which attracts wildlife and there are numerous insects which are visible in the area.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Lucy Skeet	Response-00388	This will always be my top priority, and in this case I feel like it would be terrible for wildlife in the local area. Just terrible all round and ridiculous.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Mandy Cooling	Response-00313	This would appear to be a significant development on Green Wedge. It's particularly concerning at a time when there is so much talk about the environmental impact that we are making and it's disappointing that we aren't seeing any innovative proposals to regenerate and redevelop areas rather than destroying even more green spaces and natural habitat for birds and animals. We do not know the environmental cost of such further erosion of natural habitat.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Mandy Dickens	Response-00425	This land has been farmed for many years and has a wide variety of wildlife which with the destruction of our very valuable greenbelt land we are in danger of losing with many of our native flora and fauna becoming extinct
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Mark potter	Response-00378	Wildlife is slowly being taken away from Oakwood every bit of nice green land is being taken up by concrete buildings & estates causing wild life to find new places or die off there?s already road kill on acorn way now let alone another 550 cars going down it every day
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Mathew Lennox-Quinn	Response-01363	Again removing green areas for wildlife it goes without saying
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Melanie Arnold	Response-00573	There is lots of wildlife and habitats within the proposed area that would be destroyed.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Natalie Peake	Response-00794	This area is a cherished and well-used green space by the local community for walking, dog exercise, and enjoying nature. A well-trodden path runs from Morley Road across Acorn Way toward Locko Road and is frequently used by residents seeking tranquillity and outdoor recreation. This space serves as a vital community asset and an important refuge for wildlife. The development will have a devastating impact on local biodiversity. The hedgerows that line this land are essential nesting grounds for bird species and provide crucial corridors for movement and shelter for a variety of wildlife, including badgers, foxes, and hedgehogs. The destruction of these habitats would be a significant loss to local ecology. Furthermore, this area contributes to natural water management. This proposed development is not only a threat to local wildlife and environmental health, but it also diminishes a valued green space that supports physical and mental well-being for residents.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Nick Charles	Response-01370	No comments, as plans for the development are unavailable at the moment. However, removing any of the trees or hedgerows, will have a detrimental effect on invertebrates, small mammals and birds, which rely on this habitat for their survival.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Nicola Olver	Response-00434	Our wildlife are being pushed further away from the city suburbs, ie deer in Spondon
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Oakwood Ward Councillors Eyre, Mulhall and Trehwella	Response-01358	We believe the comments in our previous objection remain relevant.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Paul Burge	Response-00289	Wildlife is bound to be effected.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Pauline Shephard	Response-00483	It is always sad when green spaces are taken from wildlife, but consideration must be made with regard to this alongside the rest of the impact of more and more development in the area.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Paul Roe	Response-00330	Land again being used for hard landscaping
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Peter Marshall	Response-00526	Developing this land would result in the loss of biodiversity and community-accessible green space.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Peter Williamson	Response-01458	There is no consideration for the reproduction of wildlife that currently call this site their home
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Rachael Hinckley	Response-01166	There is a number of birds of prey within that area, I counted 7 the other day in the potential housing spot. This would be a huge impact and potentially a lose of the birds of prey as they use this area for feeding the young
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Rebecca Styles-Jones	Response-00372	Already built up and wildlife will once again be moved on.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Rich King	Response-00383	Construction of the housing will affect the wildlife in that area which there is plenty of
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Robert Collis	Response-00355	Removing wildlife habitats will encourage them to further enter the urban environment as there natural environment has been decreased
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Sara Cotton	Response-00368	We need wildlife for our environment
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Sarah willis	Response-00345	Loss of habitat for wildlife in the area with the loss of fields, trees and bushes from the landscape
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Scarlett Hamblin	Response-00395	Lots of habitats have already been destroyed by building houses in the surrounding land we need to keep more green areas alive to allow biodiversity and habitat to increase. We have an abundance of wildlife in and around Derby and the surrounding areas I myself have seen woodpeckers, hedgehogs and other wildlife that is on the brink of extinction in this area. By destroying habitats these animals will be boxed in? into their small green areas and will no longer thrive. We cannot allow more habitats to be destroyed and ruin ecosystems!!
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Sharon Coward	Response-00360	The increase in housing will negatively impact the surrounding areas & the wildlife & biodiversity.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Shaun Cavanagh	Response-00416	Impacts on greenbelt.
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Sue Smith	Response-00376	Building on that site will obviously negatively effect the local wildlife
1.3	Acorn Way, Derby	Wildlife / Biodiversity	Tanya Caldbeck	Response-00919	Using Greenbelt land should not be done due to habitat of birds and animals. We need Greenbelt land for nature
1.5	South West of Kirk Hallam	Air Quality	Cllr Simon Mabbott	Response-01480	1/. Harmful Impact on Air Quality from Cumulative Traffic Changes The combination of 1,000 new homes, a proposed 40mph bypass, and multiple new roundabouts will significantly degrade air quality in and around Kirk Hallam. Far from alleviating pressure, these changes will increase vehicle numbers, congestion, and harmful emissions in an already strained environment. 2/. More Traffic = More Emissions The bypass and additional housing will funnel thousands of extra vehicles onto the local road network. As seen daily at the Bulls Head roundabout, traffic already stalls in long queues. With two more roundabouts feeding even more cars, vans, buses, and HGVs into the same limited routes, idling engines will emit higher concentrations of nitrogen dioxide (NO?), carbon monoxide (CO), and fine particulate matter (PM10 and PM2.5). 3/. Pollution on Residents? Doorsteps Many of Kirk Hallam?s homes, schools, and walking routes are located close to these busy roads. This puts vulnerable residents, particularly children, the elderly, and those with pre-existing conditions?at greater risk from increased air pollution. Long-term exposure to traffic emissions is well documented as a cause of asthma, respiratory illness, heart disease, and other chronic health conditions. 4/. Longer Journeys, Dirtier Air A trip to Ilkeston, just 1.3 miles away, already takes 20?25 minutes during peak times due to traffic congestion. With more development, new roundabouts, and added delays, journey times will only increase. That means more vehicles idling for longer, producing more exhaust and worsening local air quality across the board.
1.5	South West of Kirk Hallam	Air Quality	Daniel naylor	Response-01510	Obviously, more traffic, more air pollution. Dust from building sites in dry months would aggregate people locally with respiratory issues
1.5	South West of Kirk Hallam	Air Quality	Debbie Launders	Response-01293	Already way to many cars / lorries etc in this area

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Air Quality	FAY SAXTON	Response-01409	Poor air quality, as measured at A6096/Bulls Head, needs urgent attention for the benefit of all residents. Matters of fairness and equality are vital to attend to especially when it is clear that people's wellbeing is suffering both physically and mentally through poor air quality and avoidable stress.
1.5	South West of Kirk Hallam	Air Quality	Fiona Turner	Response-01362	A large-scale housing development involving thousands of homes and the construction of an access road can have several negative impacts on air quality, both short-term (during construction) and long-term (post-construction). Here's a breakdown of those impacts: ? Short-Term Impacts (During Construction) 1. Dust and Particulate Matter (PM): ? Earthmoving, excavation, and demolition activities release particulate matter (PM10 and PM2.5). ? Dust from uncovered soil, construction materials, and vehicle movement on unpaved roads can degrade local air quality. 2. Emissions from Construction Equipment: ? Heavy machinery (bulldozers, excavators, trucks) emit nitrogen oxides (NOx), carbon monoxide (CO), and diesel particulate matter. ? These emissions can cause localized air pollution ?hotspots,? especially if work continues over many months or years. 3. Vehicle Traffic and Idling: ? Increased movement of construction vehicles and trucks contributes to emissions, especially from diesel engines. ? Long-Term Impacts (Post-Construction) 1. Increased Traffic Volume: ? Thousands of new homes can lead to thousands of additional vehicles on local roads, significantly increasing NOx, CO, volatile organic compounds (VOCs), and PM2.5 emissions. ? If public transportation is lacking, car dependency will amplify the impact. 2. Worsened Urban Heat Island Effect: ? Replacing vegetation with buildings and roads reduces air filtering and increases heat retention, worsening ozone formation and reducing air quality. 3. Indoor and Residential Emissions: ? More homes mean more heating systems, fireplaces, cooking appliances, etc., which may add to local emissions?especially if gas or wood-burning systems are common. 4. Cumulative Impact: ? If nearby developments are also underway, or if the area already suffers from poor air quality, the cumulative effects can push pollution levels over health-based standards.
1.5	South West of Kirk Hallam	Air Quality	GARY MARK WOODHOUSE	Response-01451	Air Quality In the South West of Kirk Hallam at the Moment is very good due to it being green belt and large amounts of vegetation in this area, as soon as a development of 1000 houses and a heavily polluting 24/7 bypass with Lots of HGVs going along it is constructed the pollution level will increase dramatically, the new proposed development is also in danger by the bypass straight from the start of house building as it sits right next to the bypass, which from day one of opening will emit large quantities of carbon dioxide, carbon monoxide, hydrocarbons, nitrogen oxides, mobile source air toxins such as the really bad forever chemicals such as bpa.s benzene, formaldehyde , lead and may more toxins straight into their gardens and the older houses in kirk hallam, surely a poisoned environment waiting to cause all the ailments of these toxins to the public,
1.5	South West of Kirk Hallam	Air Quality	Gregory Robin Watts	Response-01297	Air quality will be impacted due to the increased traffic flow from this new development
1.5	South West of Kirk Hallam	Air Quality	John mainstone	Response-00967	Air Quality would be compromised for people of Kirk Hallam
1.5	South West of Kirk Hallam	Air Quality	Josh August	Response-00090	Living outside of a town centre has its benefits due to the vast farmland/countryside, which means less vehicles driving around the area
			Lisa Attenborrow	Response-01367	With the increase of traffic reduces the air quality.
1.5	South West of Kirk Hallam	Air Quality	Margaret Bannister	Response-01190	3. Air Pollution and Public Health Current air quality measurements already show cause for concern. According to DEFRA and local monitoring reports, air pollution levels around Bulls Head Road and Kirk Hallam often exceed recommended levels for nitrogen dioxide (NO2) and particulate matter (PM2.5), particularly during peak traffic hours. This is exacerbated by prolonged idling traffic Increased traffic from new residents and ongoing HGV activity will further deteriorate air quality, directly affecting the respiratory health of children, the elderly, and vulnerable populations. Chronic congestion also increases & contributes to serious public health issues, including asthma, heart disease. Current air pollution levels are already exceeding healthy thresholds; Kirk Hallam register PM 2.5 at 7ug/m3 and up to PM10 at 13ug/m3 ? a clear sign that air quality is already compromised.
1.5	South West of Kirk Hallam	Air Quality	Michaela Hickinbotham	Response-00229	I live on Abbot Road and have to say that already with the school traffic, cars and buses at times we have to close our windows when parents are here now, if there is too be a new estate with 1000 houses there could potentially be upwards of 2000 more cars on our small roads and not to mention the extra commercial vehicles to Stanton Park.
1.5	South West of Kirk Hallam	Air Quality	Michelle Colliver	Response-01332	Air quality in the Kirk Hallam and Bulls Head areas is a growing concern, particularly due to heavy traffic volumes, including a high number of HGVs from nearby distribution centres. Referencing Derbyshire Times in 2024, Ilkeston Town was identified as one of the most polluted areas in Derbyshire, with an air pollution score of 1.05. This figure reflects elevated concentrations of harmful pollutants such as nitrogen dioxide, benzene, sulphur dioxide, and fine particulates (PM2.5 and PM10)?all of which are known to negatively affect respiratory and cardiovascular health. Although the area is not currently designated as an official Air Quality Management Area (AQMA), this data highlights the potential risks, particularly for vulnerable groups such as children, the elderly, and those with pre-existing health conditions. With the proposed 1,000-home development in South Kirk Hallam and the already heavy traffic volumes, there is a real risk that pollution levels could worsen, reinforcing the need for air quality monitoring and proactive mitigation measures. As of the latest data, Ilkeston's Air Quality Index (AQI) is, categorized as ?Moderate.? The primary pollutant is PM2.5 (fine particulate matter) at 11.2 µg/m³. This level is approximately 2.2 times higher than the World Health Organization's annual guideline, indicating potential health concerns for sensitive individuals.
1.5	South West of Kirk Hallam	Air Quality	Mr J Edwards	Response-01355	More cars on the road equals more pollution!

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Air Quality	Mrs Beverley Anne Harrison	Response-01118	Air quality describes how polluted the air we breathe is. This can be affected by many things including human-caused traffic emissions, industry and agriculture. Poor air quality reflects higher air pollutants, creating a health hazard to all. However those with respiratory, breathing and bronchial problems and heart and lung conditions are at increased risk from poor air quality. With this in mind, it is inevitable air quality reduction will increase levels of congestion around and through Kirk Hallam as a result of so many more vehicles due to: ? Large amounts of extra cars and HGV?s to the area?s new warehousing and industry ? The additional traffic due to the huge housing increase ? more cars accessing a route through both Kirk Hallam itself and via the proposed 40mph bypass Finally, with the building of so many houses and huge bypass road ecocidally annihilating the established beauty and biodiversity of the greenbelt, the protective pollution filtering effect given by so many lost trees and hedgerows will be eradicated ? again further increasing the chances of poor air quality.
1.5	South West of Kirk Hallam	Air Quality	Paul Wright	Response-01261	More houses, generate more traffic and therefore more noise and air pollution.
1.5	South West of Kirk Hallam	Air Quality	Rachael Baines	Response-01403	Air quality in poor due to excessive traffic, slow moving due to congestion Can be checked using Plume labs app
			Robert Mee	Response-01509	See my comments on Traffic Congestion
1.5	South West of Kirk Hallam	Air Quality	Roger Tranter	Response-01323	The air quality will deteriorate more with the extra traffic.
1.5	South West of Kirk Hallam	Air Quality	Russell Bannister	Response-01360	3. Air quality The cumulative traffic changes proposed?including 1000 new houses, a 40mph bypass, and multiple new roundabouts?will have a direct and harmful impact on air quality in and around Kirk Hallam. Increased Congestion = Increased Emissions: The new bypass and additional housing will significantly increase the volume of vehicles using local roads. As already seen at the Bulls Head roundabout, traffic regularly queues in gridlock. With two more roundabouts funnelling more vehicles into the same limited network, idling cars, vans, buses, and HGVs will pump higher levels of nitrogen dioxide (NO?), carbon monoxide (CO), and particulate matter (PM10 and PM2.5) into the air. Proximity to Homes and Schools: Many of Kirk Hallam?s homes, schools, and walking routes are close to the affected roads, meaning residents?especially children and the elderly?will be exposed to increased air pollution. Long-term exposure to traffic emissions is linked to asthma, heart disease, and respiratory conditions. Longer Commute Times = More Time in Traffic: The journey to Ilkeston, which should take just 8 minutes, already takes over 20?25 minutes during peak times. With more development and road restrictions, journey times will increase further, meaning more vehicles idling in traffic for longer, directly worsening local air quality. Loss of Existing Green Buffers: The area currently benefits from mature trees, hedgerows, and natural green buffers that help absorb pollutants and provide a degree of air quality protection. This development will destroy many of those green assets, removing one of the few natural defences the community has against pollution. No Bypass Benefit for Kirk Hallam: While bypasses are often promoted as a way to reduce through-traffic in residential areas, this scheme will do the opposite. It does not bypass Kirk Hallam?it feeds more traffic into the area via the A6096 and Sow brook Lane. Therefore, it fails to reduce local pollution and instead introduces new pollution hotspots at both ends of the bypass, right on Kirk Hallam?s doorstep.
1.5	South West of Kirk Hallam	Air Quality	Simon Reeve	Response-01081	The congestion up the Bulls Head island causes standing traffic queuing back in to Kirk Hallam to the petrol station on Ladywood Road, the emissions from trucks and cars has a clear effect on the air quality, removing fields and trees and adding more vehicles is not going to make this better is it? The government needs to make their minds up whether they're taxing us to death over emissions or making money out of us with a green con. The addition of more homes on green belt land brings more pollution and the removal of fields and trees less carbon capture and converting greenery. Use the dead town of Ilkeston where shops are closed and convert those in to homes, use some of the land around Stanton, these brown field sites go untouched
1.5	South West of Kirk Hallam	Air Quality	Stephen Palmer	Response-00311	The air quality will surely suffer if more vehicles are using local roads .
1.5	South West of Kirk Hallam	Air Quality	Stephen Syson	Response-00032	Too much pollution already, this will only increase.
			Steven Street	Response-01264	Terrible air quality loss with increase traffic flow Cutting trees down disaster
1.5	South West of Kirk Hallam	Air Quality	Tracy Lee	Response-00988	Air quality is already poor in this area due to industrial traffic and the congestion that already exists, what you are proposing is going to double the amount of pollution in the air and reduce the number of oxygen generating plants.
1.5	South West of Kirk Hallam	Air Quality	William Moore	Response-01259	Obviously makes the air quality worse.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Bus Services	Cllr Simon Mabbott	Response-01480	<p>1/. Lack of Public Transport Planning Undermines the Development The proposed development is moving forward without a clear, credible plan to improve public transport for Kirk Hallam's current and future residents. Far from being expanded, vital services are actually being reduced leaving the community more isolated and dependent on cars. 2/. Withdrawal of the 21 Bus Service ? A Major Loss The cancellation of the 21 bus route, which provided direct links to Nottingham and the Queen's Medical Centre (QMC), has removed a critical public transport lifeline. This service was well used and vital for accessing employment, healthcare, and education. Its loss has left Kirk Hallam residents with fewer, less frequent travel options, particularly impacting those without access to a car. 3/. Existing Bus Services Are Unreliable and Infrequent The remaining services are already limited in frequency and increasingly unreliable, especially during rush hour. Delays caused by congestion at key points like the Bulls Head and Quarry Hill roundabouts make these services even less practical. With the added pressure from 1,000 new homes, reliability will decline further, pushing more people away from public transport altogether. 4/. No Defined Public Transport Strategy The development plans contain no clear or funded proposals for public transport. There are no confirmed agreements with bus operators, no integrated service strategy, and no indication of how increased demand will be managed. This lack of foresight and consultation risks leaving a growing population without viable travel options. 5/. More Cars, More Congestion, Less Sustainability In the absence of reliable and accessible bus routes, new residents will have little choice but to rely on private vehicles. This will inevitably lead to higher traffic volumes, greater emissions, and increased pressure on roads already operating at capacity. Rather than promoting sustainable transport, the development will deepen car dependency. 6/. Disproportionate Impact on the Most Vulnerable Those hardest hit by poor public transport include older adults, disabled residents, students, and those on lower incomes. The removal of direct access to critical destinations like Nottingham and QMC Hospital is particularly damaging for individuals who depend on public transport for medical care and essential travel. 7/. Conclusion: A Missed Opportunity for Sustainable Growth This development risks overwhelming an already fragile transport system. Without serious investment in reliable, frequent, and connected public transport, Kirk Hallam faces growing isolation, increased road traffic, and a decline in quality of life. Any responsible planning decision must factor in the urgent need for public transport reform?not simply add to the problem.</p>
1.5	South West of Kirk Hallam	Bus Services	FAY SAXTON	Response-01409	It is important for Kirk Hallam residents to have access to a regular and frequent bus service from various points around the hilly village of Kirk Hallam, along with and of equal importance to those available on the A6096, so that equality of transport is extended, particularly to the elderly, disabled and incapacitated.
1.5	South West of Kirk Hallam	Bus Services	Fiona Turner	Response-01362	<p>There are many negative impacts to bus services: 1. Strain on Existing Services: ? Without investment or planning, a sudden population increase can overwhelm current routes, leading to overcrowding, delays, and declining service quality. ? Passengers in nearby areas may experience reduced reliability or longer wait times. 2. Poor Service Uptake Without Incentives: ? If new residents default to car use (due to infrequent or indirect bus routes), then increased demand may not materialize?and services may remain underutilized or be cut in the future. 3. Mismatch Between Need and Provision: ? Buses may not run at convenient times or to employment centers, schools, or healthcare facilities, limiting usefulness for residents. ? A poorly designed layout (e.g., houses far from main roads or without direct bus access) can discourage ridership. 4. Initial Gaps Before Services Are Upgraded: ? In many developments, bus improvements lag behind housing occupancy, leaving early residents without adequate transport options.</p>
1.5	South West of Kirk Hallam	Bus Services	GARY MARK WOODHOUSE	Response-01451	bus services are nearly none existant in Kirk Hallam basically its the ilkeston flyer which passes through Kirk Hallam every 30 minutes to derby and ilkeston town , cars are the only way to really get anywhere which negates the enviromental sustainability of any new development solely reliant on car useage which the 1000 houses is purpose built for
1.5	South West of Kirk Hallam	Bus Services	kimberley grabham	Response-00306	To get to QMC for work the buses (for which I'd need to get 3 for just one way to work) which takes 1.5 hours! having extra strain on those services, how an earth am I meant to gaurantee I could get to work in anything reasonably coming close to on time.
1.5	South West of Kirk Hallam	Bus Services	Margaret Bannister	Response-01190	5. Public Transport/Bus services The development will further strain already unreliable public transport services. Trent Barton buses, which serve the Kirk Hallam area, are frequently delayed and have become increasingly unreliable due to existing traffic congestion. These delays reduce accessibility to work, education, and medical services. Kirk Hallam has also lost the No. 21 Trent Barton bus service to Nottingham and QMC Hospital, which has significantly reduced access to essential healthcare and employment opportunities. Without adequate public transport, more residents are forced to use private vehicles, exacerbating congestion and environmental impact. Bus frequency reduction and routes cuts have made public transport less dependable, inevitably increasing vehicle usage. When the study for the housing development were carried out it was stated that the 21 bus service would easily be able to be accessible to the residents of the new development...this service no longer exists, so cannot be included in the section for transport.
1.5	South West of Kirk Hallam	Bus Services	Michaela Hickinbotham	Response-00229	Kirk Hallam already has a reduced bus service thanks to Trent and one of the regular services is just to Derby not to Nottingham. If your putting in bus routes for a new estate this with be for the new residents not the old ones. More traffic great smelly buses.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Bus Services	Michelle Colliver	Response-01332	Kirk Hallam is served by 3 bus routes, providing connections to Ilkeston, Cotmanhay and Derby. Services include Route 31, which runs between Ilkeston and Kirk Hallam with hourly buses. The Ilkeston Flyer also offers a link between Cotmanhay and Derby city centre via Kirk Hallam. Additionally, Route 14A, operated by Littles Travel under contract to Derbyshire County Council, connects Ilkeston Community Hospital to St Norberts drive and Godfrey drive Kirk Hallam, though it runs only once a day at 14:30 on weekdays. Public transport provision in Kirk Hallam is increasingly inadequate, particularly in light of the proposed 1,000-home development. The area suffers from limited and unreliable bus services, which are insufficient to meet the needs of both current residents and any future population increase. There are growing concerns about the adequacy of public transport in the area. Notably, the 21 bus service to Nottingham via Queen's Medical Centre (QMC) has been removed, despite still being referenced as an active and adequate transport link in the borough's Core Strategy Review. This has left a gap in access to key destinations such as Nottingham and Queen's Medical Centre, reducing the area's connectivity. While the existing services are vital, the current network lacks the flexibility and frequency required to fully support the needs of residents, particularly those commuting outside standard hours. The Core Strategy Review acknowledges the importance of commuting patterns between Ilkeston and Nottingham. The spatial portrait highlights that while Long Eaton is geographically part of the Nottingham conurbation, Ilkeston, including villages like Kirk Hallam, is a freestanding town with its own distinct identity. Erewash was placed in the Nottingham conurbation classification due to statistics showing a higher proportion of Erewash residents commuting to work in Nottingham. Despite this, the removal of the 21 bus service to Nottingham via QMC undermines the strategy's objective of promoting sustainable transport links between Ilkeston and Nottingham. This discontinuation may increase reliance on private vehicles for commuting, contradicting the Core Strategy's goals of reducing car dependency and enhancing public transport connectivity. Addressing this gap is crucial to align transportation infrastructure with the strategic vision for sustainable development in the region.
1.5	South West of Kirk Hallam	Bus Services	Mrs Beverley Anne Harrison	Response-01118	Strategic Policy 1.5 South West of Kirk Hallam page 58, line one states 'Kirk Hallam is well served by existing bus routes'. Quite simply, this is not true. There are just 3 services: ' the Ilkeston Flyer travels to Derby every 10 minutes only travelling through Kirk Hallam along Ladywood Road which, considering the estate size and hilly terrain from both sides of the estate makes it a lengthy walk for the fit and able or a costly taxi ride to the nearest bus halt for those only able to walk short distances from much of Kirk Hallam ' the 31 which covers more of the estate and is available from early morning until after 11.00pm but is only timetabled hourly ' the 14a/b which is only available from 9.45am to 5.45pm. Additionally, with no direct public transport available to Nottingham centre, to visit there involves a lengthy multi change, time consuming bus journey which may be very difficult and too costly for many. Therefore, given population size at the 2021 census for the Kirk Hallam and Stanton by Dale ward was 6,408, alongside the factor that the total amount of houses proposed within that ward is 2,000 (plus at least 250 more on added safeguarded land at Sowbrook Farm), the amount of public transport is dire - especially considering housing size and bedroom numbers via information as per EBC's viability report per 1000 houses could well increase population by approximately 250% to over 16,000.
1.5	South West of Kirk Hallam	Bus Services	Russell Bannister	Response-01360	5. Impact on Public Transport The proposed development is being put forward without a clear or viable plan to improve public transport access for existing and future residents of Kirk Hallam. In fact, the reality on the ground tells a different story?bus services are being cut, not expanded. Withdrawal of the 21 Bus Service: The 21 bus route, which previously served Kirk Hallam with connections to Nottingham and the Queen's Medical Centre (QMC), has been withdrawn. This service was widely used and was expected to support both the existing community and any new development. Its cancellation leaves residents with fewer, less frequent options?making it harder for people without cars to access jobs, education, healthcare, and essential services. Unreliable Existing Services: The remaining bus routes are already infrequent and unreliable, especially during peak hours. Congestion at key pinch points like the Bulls Head and Quarry Hill roundabout delays buses further, making them an unviable alternative for many residents. This problem will only worsen with additional traffic from 1000 new homes. No Clear Public Transport Strategy: The development proposal includes no detail on how public transport will be supported, funded, or improved. There are no confirmed commitments from transport providers, no integrated transport plan, and no apparent consultation with bus operators to ensure services meet the needs of the expanded population. Greater Car Dependency: With no dependable bus network in place, new residents will be forced to rely on cars, increasing road congestion and emissions and reducing the quality of life for both new and existing residents. Impact on the Most Vulnerable: Those most affected by the lack of reliable buses include the elderly, disabled individuals, students, and people without access to private vehicles. The loss of the 21 bus service to key destinations like Nottingham and QMC Hospital is particularly damaging for those who depend on public transport for medical appointments and essential travel. In short, the development will place greater strain on an already inadequate public transport system. Instead of improving sustainable travel, this proposal risks isolating those who rely on buses and pushing even more traffic onto an already overstretched road network.
1.5	South West of Kirk Hallam	Bus Services	Simon Frost	Response-00684	The area is already under serviced by bus services and with no proposal to increase bus provision in the consultation only foot links to the ilkeston flyer this is not sufficient to encourage people to use public transport and also only provides a link to Derby and the Ilkeston town centre. No links are available to Sandiacre/Long Eaton/Nottingham so people have no choice other than to drive. The distance from one end of the proposed area of development to the A6096 is far greater than most people would walk to catch a bus, cycling is not possible as buses do not accept people on bikes.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Bus Services	Simon Reeve	Response-01081	The bus services in the area are good, commuting links to Ilkeston, on to Nottingham or direct to Derby are good. The set fee of £2 is lunacy however as it's £2 to the top of Stanton Road (General Havelock) from Ladywood Road, Kirk Hallam (Asda Petrol), this is a 4 minute and 1.2 mile hour eye costing me 17p in my car....why would I ever use the bus to Ilkeston? So the council whack up the price to park in Ilkeston, so I stop using the shops like Stacey's and Ogden's; so they close and stop paying rates. So the council has less money coming in and more out of work. Well done, perhaps think through public transport and parking to make the situation make sense
1.5	South West of Kirk Hallam	Bus Services	Stephen Syson	Response-00032	The bus services are ridiculous, if you live in the middle of either estate and are not in good health, you have a choice of 1 bus an hour or taxi. The ilkeston flyer, is more frequent but not in walking distance of many residents. But for those who work in Derby the first Sunday bus is 10 a.m. Last bus Monday to Thursday is 10.30 pm. There are no local buses to either Nottingham or the local cottage hospital
1.5	South West of Kirk Hallam	Bus Services	Tracy Lee	Response-00988	What is the point of a bus service if the roads are so congested? Buses already back up and are late at certain times of the day due to congestion so cannot see how this would improve anything.
1.5	South West of Kirk Hallam	Flooding / Drainage	Cllr Simon Mabbott	Response-01480	1/. Flood Risk and Drainage Concerns The proposed development presents serious risks to local drainage systems and flood resilience in Kirk Hallam. Converting greenfield land into hard, impermeable surfaces such as roads, rooftops, and pavements will significantly disrupt natural water absorption and increase surface water runoff. 2/. Loss of Natural Drainage Capacity The open fields currently act as a natural drainage system, absorbing rainfall and slowing the flow of stormwater. Paving over this land removes that natural buffer, forcing excess water into an already overburdened drainage network. 3/. Increased Local Flood Risk The additional runoff generated by 1,000 new homes and a bypass could overwhelm existing drainage infrastructure, especially during periods of heavy rainfall. This not only heightens flood risk within the new development itself but also threatens existing homes, roads, and gardens in lower lying parts of Kirk Hallam. 4/. Impact Beyond Kirk Hallam Runoff from the site will inevitably flow downstream, potentially affecting other communities within the Erewash catchment area. The development could contribute to a wider regional flooding problem, with consequences for flood management efforts beyond the immediate site. 5/. Lack of Detailed Drainage Plans So far, no comprehensive or publicly accessible flood risk assessment or drainage strategy has been provided. There is no clear evidence that sustainable drainage systems, attenuation features, or effective runoff controls will be implemented or that they will be sufficient to protect both new and existing properties. 6/. A History of Drainage Issues Parts of Kirk Hallam have already experienced surface water flooding in the past. Residents remain concerned about the area's limited drainage capacity. This development could worsen those issues, especially around key roads and junctions that lie at natural drainage points. Conclusion: An Unacceptable Risk This proposal risks replacing natural flood defences with concrete and tarmac without any clear plan to manage the consequences. Unless a robust, fully funded, and enforceable flood mitigation strategy is presented, this development could put both existing and future homes at serious risk of flooding.
1.5	South West of Kirk Hallam	Flooding / Drainage	David Cousins	Response-01303	The proposed new development and the relief road, plus the newly allocated and "safeguarded" areas, all appear to drain to the point on Sowbrook Lane which is already subject to flooding. Thereafter it all drains to the Erewash and then to the point in the middle of Sandiacre/Stapleford which flooded so catastrophically last year.
1.5	South West of Kirk Hallam	Flooding / Drainage	FAY SAXTON	Response-01409	Dealt with under "Transport" above.
1.5	South West of Kirk Hallam	Flooding / Drainage	Fiona Turner	Response-01362	Strain on Utilities and Drainage ? Existing systems for water, electricity, gas, and sewage may not be designed for a significantly larger population. ? Risk of: ? Sewer overflows or backups. ? Water pressure drops. ? Increased surface water runoff and local flooding, especially if green space is replaced by impermeable surfaces.
1.5	South West of Kirk Hallam	Flooding / Drainage	Jon Watkin	Response-00414	A question? What provision will be made to deal with the increased sewage out turn? Severn Trent do not have a good record of dealing with floods and raw sewage. Will it be a case of more income for them with no investment done. I will not mention in detail what the increased income with no invest means to senior staff bonuses and investors dividends. The Gravy train will continue untill the govenment has to eventually more at huge expense to the country and are left with a with a business needing to recover from years of lack of investment.
1.5	South West of Kirk Hallam	Flooding / Drainage	Josh August	Response-00090	Building these houses along with the roads will eradicate all of these huge fields that currently collect and soak up a lot of rainfall. Without these, this will in turn cause more flooding as the natural soak aways are gone
1.5	South West of Kirk Hallam	Flooding / Drainage	Lisa Attenborrow	Response-01367	With the earths weather changing so quickly we are experiencing floods with heavy rainfall. Sowbrook lane being a big part in that to which on a lot of occasions it is not passable. Also ladywood road has known to flood as well.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Flooding / Drainage	Margaret Bannister	Response-01190	9. Flooding Risks and Surface Water Management Kirk Hallam has a history of flooding, with major concerns highlighted by the 2019 Abbott Road Flood Alleviation Scheme. Despite these efforts, several areas remain vulnerable to flash flooding, especially during prolonged rainfall events. ? Nut Brook canal has recorded overflow incidents due to excessive surface water, affecting low-lying areas. ? The River Erewash at Ilkeston remains on flood watch, particularly during autumn and winter months. ? Existing drainage systems in Kirk Hallam are under strain, and further development will overwhelm this infrastructure. The greenbelt land earmarked for development currently plays a vital role in absorbing surface water and mitigating flood risk. Its destruction will increase the likelihood of flash flooding, property damage, and infrastructure failure. Recent studies and reports from the Environment Agency also indicate that nearby watercourses, including Nut Brook and the River Erewash, have shown elevated levels of phosphates and nitrates, and occasional detections of industrial pollutants like PAHs (polycyclic aromatic hydrocarbons) and heavy metals such as cadmium and lead, linked to former industrial activity in the area. These substances are known to be toxic to aquatic life and potentially harmful to humans through indirect exposure. Pollution from abandoned mines beneath the proposed development site are leaching residues into nearby water courses also the area is known to be discharging pollutants from the industrial slag heap (tip) causing water degradation. These issues are linked to sectors of former industrial and mining sites in the local area. Even the Erewash borough councils consultation documents, specific concerns were raised about toxic water in areas designated for potential development ? for instance, in the area identified as SGA25 (SW of Kirk Hallam) it was noted: Toxic water can be found between the farm and Dallimore School SGA25. Prior to any future development ground survey will demonstrate whether the land is safe for new building?s, whilst water course or water bodies will also be subject to survey within the site. This underscores the necessity for thorough environmental assessments before proceeding with development in area with known contamination issues. This development could increase water surface runoff, potentially overwhelming existing drainage systems. Covering it with impermeable surfaces like road, pavements and buildings will significantly reduce the capacity of the ?natural sponge? effect increasing the likely hood of surface water flooding in surrounding areas. 10. Contaminated Land and Watercourse Pollution The River Erewash, which runs near the proposed development, has been subject to pollution from sewage discharges. In 2023, the Ilkeston (Hallam Fields) Wastewater Treatment Works discharged sewage into the river for a total of 2,856.6 hours, accounting for approximately 32.61% of the year. Such discharges can lead to the spread of harmful pathogens and degrade water quality, impacting both aquatic life and public health. Physical modifications and alterations to the natural flow and structure of the water bodies impact their ecological health.
1.5	South West of Kirk Hallam	Flooding / Drainage	Michaela Hickinbotham	Response-00229	Have any you in the council ever been in Kirk Hallam when it rains? You ought to try it stand at the bottom of Godfrey Drive and watch it run down Bulls Head and Ladywood Road, stand at the Kirk Hallam lake and watch the Nutbrook canal and lake merge so that the water is almost up to the lay-by on Godfrey Drive or try walking out of Kirk Hallam school when there?s water running over the drive from the lake and canal. These new houses won?t be the ones watching there gardens fill up with water, those residents won?t have to have built there garden up with 20 tons of aggregate and soil to stop flooding , which is what we have had to do now. Our green open spaces are our natural water defence.
1.5	South West of Kirk Hallam	Flooding / Drainage	Michelle Colliver	Response-01332	Kirk Hallam faces significant flood risk, particularly from the River Erewash and its tributary, the Sow Brook. While most of the area is officially designated as Flood Zone 1 (indicating low fluvial flood risk), this does not reflect the real-world conditions experienced by residents. Sowbrook Lane, in particular, is a known hotspot for flooding, with recurrent issues caused by surface water accumulation and overwhelmed drainage systems. The Erewash Borough Council?s own consultations acknowledge the high surface water flood risk behind Dallimore School and along Sowbrook Lane. The situation is further complicated by the performance of the Dale Abbey Sewage Pumping Station, which discharged sewage into the Sow Brook 12 times in 2022, totalling 35.8 hours. These discharges pose both environmental and public health risks. In flood conditions, this contaminated water is likely to spread across nearby land and roads, increasing exposure to harmful pollutants. Any large-scale development in this area, such as the proposed 1,000 houses, would exacerbate these flood risks. Urbanisation increases impermeable surfaces, which reduces natural drainage and accelerates surface runoff. Without comprehensive flood mitigation infrastructure, this would increase both the frequency and severity of flooding?placing current and future residents at greater risk.
1.5	South West of Kirk Hallam	Flooding / Drainage	Mr J Edwards	Response-01355	Building on greenbelt will mean more flooding for our communities
1.5	South West of Kirk Hallam	Flooding / Drainage	Paul Wright	Response-01261	So many proposed new houses will only exacerbate the risk of flooding. Local authorities and Severn Trent are not keeping up with existing maintenance of drains and ditches, so how will they cope with such an expansion?
1.5	South West of Kirk Hallam	Flooding / Drainage	Rachael Baines	Response-01403	More building will increase flooding risk, in the last few years the flooding has gotten worse and getting back into Ilkeston from working in Nottingham has been difficult
1.5	South West of Kirk Hallam	Flooding / Drainage	Roger Tranter	Response-01323	The excess water run off caused by building so many houses will be immense. The area concerned is always badly affected by flooding. No matter how well a new 'suds' scheme is designed it will never relieve the current problems - it will just compound them.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Flooding / Drainage	Russell Bannister	Response-01360	12. Drainage and Flooding The proposed development poses significant risks to local drainage systems and flood management in and around Kirk Hallam. Transforming open green fields into hard, impermeable surfaces?such as roads, houses, driveways, and pavements?will disrupt natural water absorption and increase surface water runoff. Loss of Natural Drainage: The greenfield land currently acts as a natural sponge, absorbing rainfall and helping to manage storm water. Once paved over, rainfall will have nowhere to go except into man-made drainage systems, which are already under strain in parts of Kirk Hallam. Increased Flood Risk: Surface runoff from the new estate and bypass could overwhelm local drainage infrastructure, especially during periods of heavy rain. This increases the risk of flooding not only within the new development, but also in existing lower-lying areas of Kirk Hallam, including residential roads and gardens. Downstream Impact: More runoff entering local watercourses could cause flooding downstream, affecting communities further along the Erewash catchment area. This is a concern not just for Kirk Hallam, but for neighbouring settlements and local flood management authorities. Climate Change Pressures: With extreme weather events becoming more frequent and intense due to climate change, any additional strain on drainage systems will likely result in higher frequency flooding, erosion, and longer-term damage to infrastructure. Lack of Transparency on Drainage Planning: To date, no detailed, publicly available drainage impact assessment or flood risk mitigation plan has been shared. Without robust and enforceable solutions?such as SuDS (Sustainable Drainage Systems), attenuation ponds, or proper runoff controls?this development could leave Kirk Hallam residents facing serious consequences. Historical Flooding: Parts of Kirk Hallam have experienced surface water issues in the past, and residents are already concerned about drainage capacity. This development could bring those issues to the forefront, particularly around roads and junctions that sit at natural runoff points. In summary, the development risks creating new flooding problems while worsening existing ones?especially if existing green areas that currently soak up rainwater are replaced with buildings and roads. Without a comprehensive flood risk strategy, this proposal puts both new and existing homes in jeopardy.
1.5	South West of Kirk Hallam	Flooding / Drainage	Simon Reeve	Response-01081	It's a joke, the area already has issues along Nutbrook, the new housing on Quarry Hill floods as does the entire trail around Manor Flood, moreso now than ever in my almost 50 years in the areas. Taking away fields and trees and replacing with tarmac and concrete with drains to "lose the water" to another location simply overloads another area.....it can't continue
1.5	South West of Kirk Hallam	Flooding / Drainage	Stephen Palmer	Response-00311	More houses would add extra flooding to Sandiacre/ Long Eaton.
1.5	South West of Kirk Hallam	Flooding / Drainage	Stephen Syson	Response-00032	The landscape as is allows for drainage naturally. However concrete over it and with the natural downward slope of the planned area flooding will become rife, as the natural flood plains will be built on. Even with maintenance it will eventually flood because of costs of maintaining the drainage
1.5	South West of Kirk Hallam	Flooding / Drainage	Steven Street	Response-01264	Sowbrook will be a major river with the amount of tarmac concrete and roads being suggested
1.5	South West of Kirk Hallam	Flooding / Drainage	Tracy Lee	Response-00988	Flooding is becoming a major issue due to climate change and lack of areas for run off water. When every thing is paved over it will lead to increased flooding of new and existing homes and premises. There is a lot of marsh land in the area and more filed dare needed to offset the flooding. I fear the outcome of a new housing estate and the impact it will have.
1.5	South West of Kirk Hallam	Green Belt	Cllr Simon Mabbott	Response-01480	1/. Destruction of Greenbelt Land: A Threat to Kirk Hallam?s Character and Environment The land identified for development lies within or directly borders, designated Greenbelt, which plays a vital role in protecting the countryside from unchecked urban sprawl and in maintaining the rural identity of communities like Kirk Hallam. 2/. Loss of a Valued Natural Landscape The south-west of Kirk Hallam currently offers expansive views, mature trees, thriving hedgerows, and vital wildlife corridors. It forms a distinct green boundary between our community and surrounding urban areas. The introduction of a bypass and a large housing estate would permanently destroy this landscape, replacing it with concrete, tarmac, and large-scale infrastructure. 3/. Undermining the Purpose of the Greenbelt A core function of Greenbelt land is to prevent the coalescence of neighbouring towns and to maintain clear visual and physical separations. This development would erode that buffer, risking a creeping urban merger between Kirk Hallam, Dale Abbey, and potentially West Hallam, especially if future plans for an additional 850 homes northwest of Kirk Hallam proceed. Such expansion sets a dangerous precedent for further encroachment into protected rural space. 4/. Irreplaceable Environmental Value This land is far more than empty space. It supports biodiversity, provides vital habitats for local wildlife and pollinators, and contributes to climate resilience by acting as a natural carbon sink. These environmental functions cannot simply be replaced or relocated once lost to development. 5/. Impact on Public Access and Wellbeing Residents regularly use this area for walking, recreation, and personal wellbeing. It provides a quiet, natural retreat from the increasingly built-up and congested surroundings. The area also holds historical significance, with a monastic footpath once used by monks traveling between Ilkeston and Dale Abbey?linking the community to its cultural heritage. Paving over this landscape strips the community of one of its last accessible green spaces. 6/. In Conflict with Planning Policy The proposal directly contradicts national and local planning principles that aim to protect Greenbelt land unless truly exceptional circumstances exist. No such justification has been provided here nor has any serious consideration been given to alternatives, such as building on brownfield or previously urbanised sites. Conclusion: Greenbelt Must Be Protected This development would irreversibly damage a vital section of Greenbelt, undermining the environmental integrity, visual character, and identity of Kirk Hallam. It fails to meet the threshold for exceptional circumstances and should therefore be rejected outright to preserve the area?s natural and historical legacy.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Green Belt	David Cousins	Response-01303	Many have protested long and hard, individually and via Green Squeeze, at the whole development west and south of Kirk Hallam. Those protests have evidently fallen on deaf ears and the cause is seemingly lost so I will not reiterate the argument, other than to say that the objections still stand. What is especially alarming in this Amendment is that, even before the scheme begins, the previous declaration and assurance that the "Relief Road" would represent a delineation or barrier to new development has already been discarded by the appearance of the triangular shaped area to the west of the "Relief Road" and adjoining Ladywood Road. Not only has this area been designated for development but it is referred to as a "Centre" to serve the whole of the development, and presumably passing traffic on the A6096 as well. The notion that a "Centre" is located at the extreme edge of the development, and that any residents using it would need to cross the (undoubtedly very busy) "Relief Road" seems ridiculous - so much for supposedly encouraging walking and cycling - and one can only assume that it is actually envisaged to serve, ultimately, an even larger area. It is painfully obvious to most of us that, once a road exists, the pressure to utilise the Green Belt land on the opposite side of it becomes ever stronger. I wholeheartedly object to ANY encroachment of development to the West or South of the "Relief Road", now or at any time in the future.
1.5	South West of Kirk Hallam	Green Belt	Debbie Launders	Response-01293	The green belt is there for a reason to help sustain the natural beauty of this area.
1.5	South West of Kirk Hallam	Green Belt	FAY SAXTON	Response-01409	An extension of Green Belt issues from "Number of Houses/Green Belt" above. There is great sadness at the proposed extensive destruction of so much of the historic Kirk Hallam/ Dale Abbey Green Belt that has been treasured over decades and centuries. This proposed development has shown a cavalier and unfair attitude to the importance and value of the Local Green Belt as evidenced by the out of all proportion Kirk Hallam housing allocation of c 1000 houses and inappropriate local centre unnecessarily destroying Green Belt even beyond the boundary with the dangerous Relief Road. This senseless destruction of Green Belt would be so far reaching that it is difficult to imagine and impossible to justify. I can only hope that the Council will restore fairness between the villages so that the Village of Kirk Hallam bears only its rightful share, so that our precious Green Belt can be saved for our families, our descendants and our visitors. I would request the Council to seriously review its allocations and carry out its role of custodian of the Green Belt in a just way so that we can continue to cherish and care for our beautiful "Jewel of Erewash".
1.5	South West of Kirk Hallam	Green Belt	Fiona Turner	Response-01362	Erosion of Green Belt Purpose Green belts exist to: ? Restrict urban sprawl ? Maintain open countryside near cities ? Preserve the identity of separate towns/villages ? Support agriculture and biodiversity ? Provide recreational space for urban residents When housing is built in green belt land: ? These goals are weakened or undermined. ? It sets a precedent for future encroachment, known as ?salami-slicing? of the green belt. ? 2. Loss of Open Space and Natural Habitat ? Development replaces fields, woodlands, wetlands, and hedgerows with built structures. ? This leads to: ? Habitat destruction ? Loss of biodiversity ? Disruption of wildlife corridors ? Green belts often serve as buffers for nature reserves, so development on their edge can have indirect ecological impacts. ? 3. Agricultural Land Loss ? Many green belt areas contain productive farmland. ? Building over it can reduce local food production capacity and impact rural economies. ? 4. Urban Sprawl and Village Merging ? New developments can cause the merging of separate towns and villages, eroding their distinct identities. ? This risks turning rural or semi-rural settings into continuous suburban areas. ? 5. Increased Flood Risk ? Green belt land often includes natural floodplains and permeable surfaces that absorb rainwater. ? Housing developments introduce impermeable surfaces (roads, roofs), increasing surface runoff and potential for local flooding. ? 6. Infrastructure and Accessibility Challenges ? Green belt areas typically lack public transport, schools, and utilities scaled for large developments. ? New housing can place unsustainable pressure on infrastructure or result in car-dependent communities?counter to sustainability goals.
1.5	South West of Kirk Hallam	Green Belt	Gregory Robin Watts	Response-01297	The council should take a tough view on any development on green belt land and throw out the application
1.5	South West of Kirk Hallam	Green Belt	Jane Woodbridge- Smith	Response-01263	The green belt should be sacred! There are plenty of brownfield sites available!
1.5	South West of Kirk Hallam	Green Belt	John mainstone	Response-00967	Decent arable and food producing land would be lost and the green belt area that so many people love and use to the benefit of their health would be lost forever
1.5	South West of Kirk Hallam	Green Belt	Josh August	Response-00090	Green belt land needs to be kept as that
1.5	South West of Kirk Hallam	Green Belt	kimberley grabham	Response-00306	I moved here specifically to be near a green belt and enjoy the sounds of nature and diversity to see. I do not wish to look at a houseing estate instead!
1.5	South West of Kirk Hallam	Green Belt	Lisa Attenborrow	Response-01367	During Covid more and more people appreciated and loved the land around us also known as the green belt. It is good for the mind and body as most of us lead a very busy and stressful life, so to be able to de-stress is an absolute tonic.
1.5	South West of Kirk Hallam	Green Belt	Margaret Bannister	Response-01190	8. Loss of Greenbelt, Farmland, Environmental Harm, and Impact on Wildlife The proposed development site lies within designated greenbelt land, serving as a vital buffer that protects the character and identity of Kirk Hallam. This land is not only valued for its open space and recreational use but also plays a crucial role in mitigating flood risk by acting as a natural sponge, absorbing rainfall and reducing runoff. The development would result in: ? The permanent loss of valuable arable farmland, diminishing local agricultural output and undermining food security. ? The removal of established native trees, many of which are decades old and provide habitats for diverse wildlife, including birds, bats, and pollinators. ? The destruction of hedgerows, vital ecological corridors protected under national regulations. ? A significant decline in biodiversity, directly contradicting national and local planning objectives. ? The urbanisation of a rural landscape, diminishing the area's natural beauty and ecological integrity. ? Disruption and destruction of habitats for foxes hedgehogs, amphibians, Butterflies and rare invertebrates that rely on the existing green spaces for foraging and breeding. Moreover, this area encompasses sections of the historic Monk's Way, an ancient footpath used by monks travelling between Kirk Hallam and Dale Abbey. This route is part of the region's cultural heritage, with remnants still visible and recognized in local walking guides. The development of the road and houses threatens to disrupt or obliterate these historic pathways, erasing tangible links to the area's monastic past.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Green Belt	Michaela Hickinbotham	Response-00229	Why not take it all up leave our children and grandchildren wondering what grass looks like.
1.5	South West of Kirk Hallam	Green Belt	Michelle Colliver	Response-01332	The proposed development would result in the removal of approximately 50 hectares of Green Belt land?the largest single deallocation within the Erewash Core Strategy Review. This loss threatens the environmental integrity of the area on multiple fronts. The Green Belt currently acts as a vital natural soakaway, absorbing rainwater and mitigating surface water runoff. Its removal would significantly increase the risk of flooding, particularly on the land and roads at the bottom of Sowbrook Farm?an area already prone to regular flooding. The reduction of these green spaces also impacts residents? well-being by removing access to natural areas that support mental health, relaxation, and community identity. The Stanton Ironworks slag heap, located near Kirk Hallam, has been associated with environmental concerns, particularly regarding the leaching of toxins into nearby water bodies. One such water body is Furnace Pond, situated adjacent to the former slag heap site. Local observations and reports suggest that contaminants from the slag heap may have entered Furnace Pond, raising concerns about water quality and ecological health in the area. The proximity of the slag heap to Furnace Pond and the potential for leachate to enter the water system underscore the need for thorough environmental assessments and remediation efforts. Addressing these concerns is crucial to ensure the safety and well-being of the local community and the preservation of the surrounding natural environment. Additionally, The nutbrook catchment , a tributary of the river erewash has been designated by the Environment Agency as having a ?bad? ecological status both in 2019 and 2022 due to dangerously high levels of toxic substances. These include Chromium (VI), copper, iron, phenol, and zinc?along with mercury compounds and polybrominated diphenyl ethers (PBDEs), which are known to harm both human health and aquatic ecosystems. The degradation of water quality in Nut Brook underscores the need for targeted environmental management and remediation efforts to restore and protect the ecological integrity of the waterway. Disturbing this land for development risks exacerbating pollution and spreading these contaminants further. Together, the loss of Green Belt, contamination, and increased flood risk present serious environmental and public health challenges that cast doubt on the suitability of this location for large-scale residential expansion.
1.5	South West of Kirk Hallam	Green Belt	Mr J Edwards	Response-01355	We should be protecting our green belt not building on it. We all need these areas for our health and wellbeing and for the good of the planet! We will soon be one big concrete jungle if this is allowed to continue.
1.5	South West of Kirk Hallam	Green Belt	Mrs Beverley Anne Harrison	Response-01118	Oss.org.uk describes greenbelt as ?a buffer between towns and between town and countryside. The green belt designation is a planning tool and the aim of the green belt policy is to prevent urban sprawl by keeping land permanently open; however there is not necessarily a right of access there.? This is such a perfect description for Kirk Hallam?s greenbelt which runs down the side of the Wirksworth Road and Godfrey Drive edge of Kirk Hallam (much of which is also on Dale Abbey Parish land) and represents less than 1% of total Erewash greenbelt and the last fragment of Kirk Hallam?s greenbelt. Known for decades as ?the jewel of Erewash? this stunning natural beauty - designated as a greenbelt area post World War II - represents a section of ancient woodland, much of which was converted into food producing arable and dairy farmland by the Monks at Dale Abbey many centuries ago. It even kept its historic heritage of well used monks footpaths which stretched from what has become the village of Kirk Hallam?s Grade 1 listed Church ? ministered by the Canons of Dale Abbey - across to the Abbey at Dale, sections of which to this day run across fields and hedgerows which are a large part of this precious greenbelt which would be undermined and lost by such a vast development. These still active footpaths and food producing fields, are well used by locals, visitors and farmers, providing food and essential physical and mental health support. The large areas of soft soil are mother nature?s natural sponge, soaking up stormwater and melting snow to protect lower lying areas from flooding and naturally soak into the water retaining soil to feed crops and other green biodiversity - which thrive so well in the area - to provide nourishment for its wildlife such as foxes, deer, badgers and many other animals, birds and insects for whom this stunning greenbelt is home. It?s essential this should continue. The Oxford languages dictionary definition of Ecocide is ?destruction of the natural environment by deliberate or negligent human action? which is exactly what is planned by the annihilation of (52 plus 8 safeguarded and 27 acres of deregulated greenbelt as in the amended Core Strategy update) a staggering total of 87 hectares or 215 acres of ?mother nature?s? historically established natural beauty - especially considering so much ex industrial, ?grey? local land has been transformed into contrived man planned conservation. For the sake of generations yet to be born, as temporary custodians of our precious countryside, such devastating destruction is something that must not be allowed to happen.
1.5	South West of Kirk Hallam	Green Belt	Nick Jackson	Response-01260	We need more green spaces just look how bad our nations mental health is.
	South West of Kirk Hallam	Green Belt	Paul Wright	Response-01261	No green belt should be sacrificed when there are so many empty houses and brownfield sites available.
1.5	South West of Kirk Hallam	Green Belt	Rachael Baines	Response-01403	We need to protect green belt, removing green belt land will decrease air quality Green belt is good for physical and mental health, the environment
1.5	South West of Kirk Hallam	Green Belt	Rachel Brown	Response-00031	Green belt land should remain protected. This area is important for people in this area. Wildlife, history and beautiful countryside is being threatened. Allowing green let to be built on is setting a president for further development. We are already seeing this with 100 of hectors of land now being threatened to have solar panels added. Outdoor spaces and greenbelt should be protected for future generations. PROTECT THE GREENBELT!!
1.5	South West of Kirk Hallam	Green Belt	Renars Letkovskis	Response-00951	why destroy green belt, the council is doing rewilding and keeps building on the green, which doesn't make sense

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Green Belt	Robert Mee	Response-01580	My main reason for objecting to these developments is that I do not believe that the criteria set out in the NPPF has been met justifying any encroachment into the Green Belt at this time. The Core Strategy and this Amendment are developed in order to meet the housing targets allocated to the council by central government. I do not believe that the number of houses required by government constitutes, in itself, the 'exceptional circumstances' which are required under the Framework. This is particularly so in view of there being no published objective basis for the numbers allocated to each authority. The term 'exceptional circumstances' does include 'instances where an authority cannot meet its identified need for homes'. The waiting list for social housing in the general area might suggest that this is the case, but I do not accept that these plans will go far to address this issue? the vast majority of the planned housing allocations are not even for affordable housing, let alone social housing. Additionally, I do not remember seeing evidence that Erewash has specifically quantified local (i.e. Erewash) housing needs. I also do not believe that much, if any, of the Green Belt selected for development would fit the definition of 'Grey Belt?'. As a concept, I can support the idea of Grey Belt as originally reported, i.e. pieces of land within the Green Belt which have previously been developed? indeed, I can think of a few locally, though they are all fairly small. I find the arguments that I have heard over distances between the edge of Derby and the edge of other towns, and how these distances will still be maintained, extremely spurious. The Green Belt in its entirety exists to prevent Nottingham and Derby from merging? while building on any of these sites does not immediately make the two cities any closer to each other, it does reduce the green space between the two cities, which is precisely what the Green Belt was established to prevent. The Green Belt is a regional initiative, covering two counties and several local authorities. With Erewash having such a high proportion of its land earmarked as Green Belt it is incumbent on the region as a whole to find a solution to the housing shortage, rather than to expect our authority to have to sacrifice its green spaces. the decimation of the landscape by this huge development is unacceptable. This is pure Green Belt (not a drop of Grey in sight)? as such, there will be a resulting impact on biodiversity in this area, not to mention the loss of amenity to the existing residents of Kirk Hallam.
1.5	South West of Kirk Hallam	Green Belt	Robert Mee	Response-01509	My main reason for objecting to these developments is that I do not believe that the criteria set out in the NPPF has been met justifying any encroachment into the Green Belt at this time. The Core Strategy and this Amendment are developed in order to meet the housing targets allocated to the council by central government. I do not believe that the number of houses required by government constitutes, in itself, the 'exceptional circumstances' which are required under the Framework. This is particularly so in view of there being no published objective basis for the numbers allocated to each authority. With Erewash having such a high proportion of its land earmarked as Green Belt it is incumbent on the region as a whole to find a solution to the housing shortage, rather than to expect our authority to have to sacrifice its green spaces.
	South West of Kirk Hallam	Green Belt	Roger Tranter	Response-01323	The current green belt area will be reduced by this development
1.5	South West of Kirk Hallam	Green Belt	Russell Bannister	Response-01360	10 Greenbelt Impact The area proposed for development lies within or directly borders designated Greenbelt land, which serves a critical purpose in protecting the countryside from urban sprawl and preserving the natural character of places like Kirk Hallam. Loss of Natural Landscape: The land south-west of Kirk Hallam currently provides open views, mature trees, hedgerows, wildlife corridors, and a clear green boundary separating our community from further urban development. The proposed bypass and housing estate would irreversibly destroy this landscape, replacing it with concrete, asphalt, and artificial infrastructure. Purpose of Greenbelt Undermined: One of the primary purposes of Greenbelt land is to prevent neighbouring towns from merging into one another. This development threatens to erode the physical and visual separation between Kirk Hallam, Dale Abbey, and possibly West Hallam if the future plans of a further 850 houses North West of KH goes ahead surrounding rural spaces?setting a dangerous precedent for future expansion. Irreplaceable Environmental Value: This land is not just open space?it contributes to biodiversity, local ecosystems, and climate resilience. It provides habitat for local wildlife, supports pollinators, and acts as a natural carbon sink. Once built over, these functions cannot be replaced. Public Enjoyment and Wellbeing: Many residents use this area for walking, recreation, and mental wellbeing. It offers a peaceful escape from increasingly congested roads and built-up areas. Paving over it for a development that brings no real benefit to Kirk Hallam strips the community of one of its last remaining natural assets. Also this land has an strong monastic link with a foot path that was used by Monks who walked from Ilkeston to Dale to the Abbey. Contradiction to Planning Principles: Proceeding with this development contradicts national and local planning policies that aim to preserve Greenbelt land except in exceptional circumstances. No compelling evidence has been provided to justify why this development cannot be located elsewhere, on brownfield or already urbanised land. In summary, this proposal would devastate a vital stretch of Greenbelt that protects the identity, air quality, and environment of Kirk Hallam?and should be rejected on that basis alone.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Green Belt	Ruth Allen	Response-01258	Green belt was designated as such for the excellent reason that people need green space around them for their mental and physical health; the vast numbers of people who use the footpaths in the area around Dale Abbey confirm this. Dale must not be swallowed up by Kirk Hallam.
1.5	South West of Kirk Hallam	Green Belt	Simon Frost	Response-00684	The green belt should not be built on in the area as the area is heavily populated and built upon already, the green belt is small and the pockets of green land are constantly being reduced. Urban sprall is having a negative effect on the environment and health of local people.
1.5	South West of Kirk Hallam	Green Belt	Simon Reeve	Response-01081	The fields between West Hallam Village and Kirk Hallam, Kirk Hallam and Stanton Village just like those between High Lane, West Hallam and Shipley/Heanor Road, Ilkeston support a diverse population of wildlife with open fields, woodlands, marsh land, lakes and streams/ivers. Removing any part of this environment for housing should be banned on this basis alone, there be no home for nature and "not cutting the grass verges" (to save money) won't make a difference.
1.5	South West of Kirk Hallam	Green Belt	Stephen Palmer	Response-00311	No greenbelt should be built on .
1.5	South West of Kirk Hallam	Green Belt	Stephen Syson	Response-00032	There is plenty of brown field sites and abandoned houses that should be used, but you choose to use our countryside for no apparent reason other than its easier for you and for the developers and cheaper for them
1.5	South West of Kirk Hallam	Green Belt	Steven Street	Response-01264	Loss of our green belt is theft Short term politics at its worst
1.5	South West of Kirk Hallam	Green Belt	Sue Knott	Response-01268	Green belt land should be safeguarded - if we don't then future generations will pay the price . We should be protecting our planet not destroying it
1.5	South West of Kirk Hallam	Green Belt	Sue Shaw	Response-00304	I think it's appalling that green belt and historic farmland is considered worthless enough to be built over and lost forever. The green belt should remain protected.
1.5	South West of Kirk Hallam	Green Belt	Tracy Lee	Response-00988	When green belt becomes grey it will never be green again, there is a massive amount of brown belt just down the road that could be built on with Stanton now being pulled down, why can you not build on this instead? Stop destroying the countryside for all to enjoy with this urban sprawl.
1.5	South West of Kirk Hallam	Green Belt	William Moore	Response-01259	Development should NOT be in green belt - the idea of green belt is to protect the countryside
1.5	South West of Kirk Hallam	Healthcare Facilities	Cllr Simon Mabbott	Response-01480	1/. Unsustainable Pressure on Healthcare Services The proposed development of 1,000 new homes will bring a significant population increase to Kirk Hallam, placing unsustainable pressure on already overburdened local healthcare services. 2/. Existing Services Already Struggling Local GP practices and healthcare facilities are currently under strain. Many residents report long waiting times, difficulty booking appointments, and reduced access to face to face care. The system is already stretched to its limit and this development would push it beyond breaking point. 3/. No Provision for Additional Medical Infrastructure Despite the scale of the proposed development, there is no confirmed plan to expand or create new healthcare services. There is no mention of new GP surgeries, dental practices, pharmacies, or community health centres to support the influx of new residents. Without this, both new and existing patients will face even greater difficulty accessing basic care. 4/. Increased Burden on Hospitals With GP services unable to meet demand, more people will turn to A&E departments for routine care further straining already overstretched hospitals such as Queen's Medical Centre and Royal Derby Hospital. This creates a ripple effect, impacting emergency care for everyone in the region. 5/. Accessibility Challenges The recent withdrawal of the 21 bus service, which previously connected Kirk Hallam to QMC Hospital, has severely reduced access to essential healthcare particularly for those without a car. Elderly and disabled residents are especially affected. Meanwhile, increased traffic from the development will make it harder for ambulances and emergency services to reach those in need quickly. 6/. Growing Health Inequality A development of this size, without matching investment in health infrastructure, risks deepening health inequalities. Vulnerable groups including the elderly, families with young children, people with chronic illnesses, and those on lower incomes will be hit hardest. The result will be a community where timely, affordable care is no longer accessible to all. 7/. Conclusion: Health Provision Must Match Growth Without parallel investment in local healthcare infrastructure, this development will significantly worsen access to medical care and negatively impact the health and wellbeing of both new and existing residents. Planning decisions must prioritise the delivery of essential services alongside housing, anything less is short sighted and irresponsible.
1.5	South West of Kirk Hallam	Healthcare Facilities	Daniel naylor	Response-01510	Doctors,dentists and chemists are already a rare service givmven, without a further 1000+ homes to cater for
1.5	South West of Kirk Hallam	Healthcare Facilities	FAY SAXTON	Response-01409	Given the vast increase in population proposed for Kirk Hallam, it is vital that sufficient healthcare provision and funding are made available for all residents of Kirk Hallam.
1.5	South West of Kirk Hallam	Healthcare Facilities	Fiona Turner	Response-01362	There's been mention of a new school but I see no plans to build any new gp surgeries or dentists? These are two services that are already stretched to their limit. Dentists not taking NHS patients, gp surgeries full to capacity already- yes they will take on more patients but they don't have capacity to give you an appointment. Another factor of healthcare, take into consideration the elderly and vulnerable residents of Kirk hallam. Those who are lucky enough to stay at home to be cared for, will experience ongoing issues with their carers turning up late because of the congestion on the roads. This will have a negative impact on their healthcare. Waiting 8 hours or more for emergency services- congestion only adds to this and cause more disruption
1.5	South West of Kirk Hallam	Healthcare Facilities	John mainstone	Response-00967	As is common knowledge it's really difficult to see a doctor
1.5	South West of Kirk Hallam	Healthcare Facilities	Josh August	Response-00090	Not just Kirk Hallam but Ilkeston as a whole, the current healthcare situation is horrendous. It is extremely difficult to get to see your GP. Then there are the hospitals close by, A&E waiting times are already at an unbearable waiting time
1.5	South West of Kirk Hallam	Healthcare Facilities	kimberley grabham	Response-00306	I already struggle to see a GP or practice nurse let alone the huge wait for repeat precriptions at the pharmacy. I have a chronic condition so I need access to nhs services, with extra people using these facilities I worry my level of care will be seriously impacted.
1.5	South West of Kirk Hallam	Healthcare Facilities	Lisa Attenborrow	Response-01367	Yet again not enough in the healthcare facilities. One doctors surgery and one dentist which is very hard to register with.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Healthcare Facilities	Margaret Bannister	Response-01190	7. Strain on Healthcare and Dental Services Local healthcare services are already under significant pressure: ? Old Station Surgery (including Kirk Hallam branch): approx. 15,500 patients ? Eden Surgery: approx. 4,100 patients ? Gladstone House Surgery: approx. 5,000 patients ? Little wick Medical Centre: approx. 15,356 patients (2016) not current data available Kirk Hallam Dental Practice is operating at full capacity. An influx of new residents will significantly strain both GP and dental services, increasing waiting times and reducing accessibility. Ilkeston Community Hospital is also at capacity: ? Urgent Treatment Centre: waits of 1.5 to 3+ hours reported ? Blood Tests: appointment-only; long waiting times ? Imaging (X-rays, Ultrasound, MRI): Delays due to equipment limitations ? Physiotherapy, podiatry and Consultant Clinics: Delays expected. Given the existing demand is already high, population growth will lead to longer waiting periods for these services. The proposed development would significantly increase the local population, increasing pressure on already stretched healthcare services and potentially leading to longer waiting times and reduced access to essential medical services.
1.5	South West of Kirk Hallam	Healthcare Facilities	Michaela Hickinbotham	Response-00229	1 docs and 1 dentist which of course as new residents they will get into straight away. I have benn at my docs in Ilkeston since birth and even now struggle to get an appointment, as previously having had cancer which has returned I am having to wait a week to get to see a Dr which will only get worse if there is a minimum of 2 persons per household that an extra 2000 patients trying to get in, to the very few doctors in Ilkeston district.
1.5	South West of Kirk Hallam	Healthcare Facilities	Michelle Colliver	Response-01332	The proposed development in Kirk Hallam is expected to place substantial additional pressure on already strained local healthcare services. GP surgeries in the Ilkeston area, such as Old Station Surgery, are currently operating at or near full capacity, regularly advising patients to seek alternatives due to high demand, staff shortages, and limited appointment availability. Similarly, dental services such as mydentist in Kirk Hallam are only able to accept new NHS patients when availability permits, reflecting limited capacity. Ilkeston Community Hospital, while having recently reopened additional beds to improve patient flow, is primarily a community facility with limited resources. The addition of thousands of new residents will likely exacerbate wait times, reduce appointment availability, and increase the burden on urgent care and rehabilitation services. Without corresponding investment in new GP practices, expanded dental provision, and enhanced hospital infrastructure, the healthcare system will struggle to meet rising demand, leading to poorer health outcomes and reduced access to essential services for both existing and new residents.
1.5	South West of Kirk Hallam	Healthcare Facilities	Mr J Edwards	Response-01355	More strain on doctors, dentist and hospitals which are already working to capacity!
1.5	South West of Kirk Hallam	Healthcare Facilities	Mrs Beverley Anne Harrison	Response-01118	Whilst Kirk Hallam struggles with a doctors surgery which is often limited for appointments and could benefit from an update, it is perfectly sited in its central estate location of the current village centre which ensures easy accessibility by residents (especially as many bungalows occupied by the elderly or disabled are situated nearby on both sides of Ladywood Road) and is supported next door by the local Pharmacy. Within this popular and well established centre there is also an established dentist which provides both private and NHS treatment, a local post office and large Nisa supermarket
1.5	South West of Kirk Hallam	Healthcare Facilities	Paul Wright	Response-01261	Not enough capacity at the moment for GP and dental services, so where will all the additional new residents go?
	South West of Kirk Hallam	Healthcare Facilities	Rachael Baines	Response-01403	Difficult to get appointments already dentist, Dr etc
1.5	South West of Kirk Hallam	Healthcare Facilities	Russell Bannister	Response-01360	7. Impact on Healthcare Provision The proposed development of 1000 new homes is expected to bring a substantial increase in population, placing unsustainable pressure on already overstretched healthcare services in the Kirk Hallam area. Existing Services Under Strain: Local GP surgeries and healthcare facilities are already struggling to meet current demand. Many residents report difficulty in securing timely appointments, long waiting times, and reduced access to face-to-face consultations. No Additional Health Infrastructure Proposed: Despite the scale of the development, there is no clear commitment to build new healthcare facilities or expand existing services such as GP practices, dental clinics, pharmacies, or community health centres. Wider Impact on Hospitals: An increase in local population without adequate GP support will lead to more residents turning to A&E or urgent care centres for routine health concerns, further straining hospitals such as the Queen's Medical Centre and Royal Derby Hospital? facilities that are already facing heavy pressure. Accessibility Issues: With the loss of the 21 bus service (which previously served QMC Hospital), residents will face reduced access to hospital care, especially the elderly, disabled, and those without access to private transport. Increased traffic congestion from the development will also make emergency vehicle access slower and more difficult. Health Inequality and Community Impact: Without proper health provision, the development risks creating inequalities in access to care, particularly for vulnerable groups such as the elderly, children, people with chronic conditions, and low-income families. This undermines the principles of a healthy, sustainable community. In summary, the development will seriously exacerbate existing healthcare pressures in the area unless significant investment in medical infrastructure and services is delivered alongside housing. Failure to address this will directly affect the health and wellbeing of both new and current residents.
1.5	South West of Kirk Hallam	Healthcare Facilities	Simon Frost	Response-00684	Ilkeston already has surgeries working at capacity as it is impossible to obtain an appointment another few thousand residents with no addition surgery, dentist etc will further make the issue worse.
1.5	South West of Kirk Hallam	Healthcare Facilities	Simon Reeve	Response-01081	The ability to get a doctor's appointment is a bit of a joke, the doctors surgeries are all over prescribed, chemists are too busy trying to pick up the slack and dentists are near impossible to get in to, we travel 40 minutes away to a dentist. There simply cannot be more pressure through new housing on a breaking system
1.5	South West of Kirk Hallam	Healthcare Facilities	Stephen Palmer	Response-00311	Seeing a Doctor is difficult now thats before a population explosion . We cannot possibly be expected to share !!!
1.5	South West of Kirk Hallam	Healthcare Facilities	Stephen Syson	Response-00032	All GPS services are oversubscribed, there are no NHS dentists whatsoever A walk in centre that is only open from 8 to 8
1.5	South West of Kirk Hallam	Healthcare Facilities	Tracy Lee	Response-00988	Doctors appointment are already hard to get and GPs are reducing this would put an even bigger strain on the system.
1.5	South West of Kirk Hallam	Healthcare Facilities	William Moore	Response-01259	Over load?s services
		Landscape	Andrew Corban	Response-01496	This would spoil the beauty of the place and ruin a piece of greenbelt land

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Landscape	Cllr Simon Mabbott	Response-01480	1/. Irreversible Damage to the Landscape and Identity of Kirk Hallam The proposed construction of 1,000 homes, a 40mph bypass, and multiple roundabouts would have a profound and permanent impact on the landscape surrounding Kirk Hallam. 2/. From Rural Countryside to Urban Sprawl The south-west edge of Kirk Hallam is currently defined by open fields, hedgerows, mature trees, and uninterrupted rural views. This distinctive landscape not only separates the community from neighbouring areas but also gives Kirk Hallam its unique semi-rural identity. The proposed development would transform this peaceful setting into a sprawling extension of the urban area?dominated by dense housing, road networks, traffic infrastructure, and artificial lighting. 3/. Destruction of Visual Amenity Residents and visitors who currently enjoy the natural beauty and visual openness of the area will instead face a landscape filled with rooftops, vehicles, and concrete. The scenic countryside that offers relief from the built environment will be lost, replaced by an urbanised horizon that undermines the character of the area. 4/. Noise and Light Pollution A bypass and large-scale housing scheme will bring with it increased noise from construction and traffic, as well as light pollution from streetlights, vehicles, and homes. These changes will significantly alter the area's quiet character, especially for those living on the southern edge of Kirk Hallam who currently benefit from its rural setting. 5/. Permanent Loss of Landscape Character Once this development goes ahead, the existing character of the land cannot be restored. The natural boundaries that mark the edge of Kirk Hallam will be erased, and the community's connection to its surrounding countryside will be permanently severed. 6/. Erosion of Local Identity Kirk Hallam's identity is closely tied to its position at the fringe of open countryside. It is not designed to be part of a high-density conurbation. By removing this rural boundary, the proposal threatens to absorb the community into an indistinct urban sprawl, diminishing what makes the area special. Conclusion: A Lasting Loss This proposal would do more than build houses?it would erase the very landscape character that defines Kirk Hallam. Once lost, this setting cannot be recovered. The development should be rejected in order to preserve the area's distinct identity and valued countryside surroundings.
	Kirk Hallam	Landscape	Debbie Launders	Response-01293	It will soon be back to back housing from ilkeston to Spondon - who wants that
1.5	South West of Kirk Hallam	Landscape	FAY SAXTON	Response-01409	Recent proposals for development across Erewash will, if implemented, change our landscape and Green Belt forever. I would request the Council to show a serious intention to develop policies which will preserve rather than destroy our landscape.
1.5	South West of Kirk Hallam	Landscape	Fiona Turner	Response-01362	Building an access road through a nature reserve is highly intrusive and typically considered ecologically destructive. Here?s how it could affect the landscape: 1. Habitat Destruction and Fragmentation ? Trees, vegetation, and wildlife habitats will be lost to make way for the road and housing. ? The access road will fragment the reserve, isolating wildlife populations and disrupting natural movement corridors. ? This can lead to species decline, especially for birds, amphibians, reptiles, and small mammals. 2. Visual Intrusion ? Natural, scenic landscapes will be replaced by roads, street lighting, buildings, and parked cars. ? The area will lose its rural or untouched visual character, particularly where the development meets or enters the nature reserve. 3. Noise and Light Pollution ? Traffic, construction, and residential activity will introduce constant noise and artificial lighting. ? This negatively affects nocturnal species (bats, owls, insects) and can permanently change animal behavior and breeding success. 4. Pollution and Runoff ? Increased air pollution from cars and water pollution from road runoff (oil, chemicals, litter) can contaminate nearby streams, wetlands, and soil. ? The loss of vegetation reduces the land?s ability to filter and absorb water, raising erosion and flood risks. 5. Soil Compaction and Erosion ? Construction and road use compact the soil, reducing permeability and damaging the delicate balance of the reserve?s ecology and hydrology.
1.5	South West of Kirk Hallam	Landscape	Gregory Robin Watts	Response-01297	Obviously the housing will have a large effect on the landscape as green fields are covered over with housing and roads. The tranquillity will be reduced in the surrounding countryside by increased traffic noise and reduced greenery.
1.5	South West of Kirk Hallam	Landscape	Josh August	Response-00090	Building these houses will completely ruin the landscape between Kirk Hallam, Dale Abbey and Stanton By Dale. There?s currently gorgeous walks through the farmland/countryside that are great for families and dog walkers. This will all be ruined
1.5	South West of Kirk Hallam	Landscape	Margaret Bannister	Response-01190	This development will completely change the landscape around the Kirk Hallam area. I am an avid walker and have walked around the area of the proposed development for my entire life. The views are spectacular and watching the wild life helps my mental well being. Once we lose this beautiful land to development we will never be able to regain it. It is the Jewel of Erewash.
1.5	South West of Kirk Hallam	Landscape	Michelle Colliver	Response-01332	The landscape surrounding Kirk Hallam is steeped in historical and cultural significance, characterized by its gently undulating arable fields, ancient hedgerows, and historic pathways that have shaped the community's identity for centuries. One notable feature is the ?Monks Walk,? a historic route believed to have been used by monastic communities, reflecting the area's rich ecclesiastical heritage. These elements collectively contribute to a landscape that is not only aesthetically pleasing but also deeply rooted in the region's history. The arable fields around Kirk Hallam have been cultivated for generations, supporting local agriculture and maintaining the rural character of the area. These open spaces provide habitats for various wildlife species and offer residents opportunities for recreation and connection with nature. The preservation of such landscapes is crucial for maintaining biodiversity and the well-being of the community. Erewash Borough Council has publicly declared a climate emergency, pledging to reduce carbon emissions and promote environmental sustainability. However, these commitments starkly contradict their current actions, particularly in supporting a proposal that would result in the destruction of significant areas of greenbelt and arable land in Kirk Hallam. This ecocidal approach not only removes valuable carbon sinks but also erodes local biodiversity, damages essential agricultural land, and increases flood risks?undermining the very principles of climate resilience the declaration aimed to uphold. The loss of these natural assets in favour of large-scale development highlights a troubling inconsistency between stated climate goals and on-the-ground decision-making, calling into question the credibility and integrity of the council's environmental agenda.
1.5	South West of Kirk Hallam	Landscape	Nick Jackson	Response-01260	We need more green spaces not less
	South West of Kirk Hallam	Landscape	Rachael Baines	Response-01403	Protect the landscape

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Landscape	Robert Mee	Response-01509	the decimation of the landscape by this huge development is unacceptable. This is pure Green Belt (not a drop of Grey in sight) ? as such, there will be a resulting impact on biodiversity in this area, not to mention the loss of amenity to the existing residents of Kirk Hallam.
1.5	South West of Kirk Hallam	Landscape	Russell Bannister	Response-01360	11 Landscape The proposed development of 1000 houses, a 40mph bypass, and multiple roundabouts will have a drastic and irreversible impact on the landscape surrounding Kirk Hallam. From Open Countryside to Urban Sprawl: The south-west of Kirk Hallam currently offers open green fields, hedgerows, mature trees, and long-range rural views. This forms a distinctive landscape that separates the community from neighbouring settlements and provides a sense of place, openness, and identity. The development would replace this with dense housing, tarmac roads, traffic infrastructure, and artificial lighting?transforming a tranquil, semi-rural setting into an extension of urban sprawl. Loss of Visual Amenity: Residents and walkers who currently enjoy open views across fields and countryside will instead be confronted by rooftops, roadways, and traffic. The peaceful character of the landscape will be lost?along with the visual relief it provides from the built environment of Kirk Hallam. Increased Noise and Light Pollution: Introducing a bypass and large housing development will bring with it vehicle noise, construction noise, and light pollution from streetlights, cars, and housing estates. This will fundamentally alter the quiet character of the area, especially for those living on the southern edge of Kirk Hallam. Irreversible Character Change: The scale of the development means that once built, the character of the landscape cannot be restored. The natural boundaries that define the edge of Kirk Hallam today will be blurred or eliminated, and the community?s relationship with its surrounding countryside will be permanently damaged. Loss of Identity: Kirk Hallam is defined in part by its landscape setting?on the edge of open fields, not surrounded by high-density development. Removing this distinct boundary will strip the area of its rural edge and make it feel absorbed into a much larger, less defined urban sprawl. In summary, this development would not just build on the land?it would erase the very landscape character that defines Kirk Hallam and makes it a valued and distinctive place to live.
1.5	South West of Kirk Hallam	Landscape	Ruth Allen	Response-01258	Dale Abbey used to be regarded as the jewel in Erewash?s crown; it is of huge interest historically and emotionally to discerning visitors, of which there are thousands using the footpaths and bridleways each year, appreciating the peace and quiet. It must not be encroached upon by traffic and noise.
1.5	South West of Kirk Hallam	Landscape	Simon Frost	Response-00684	The area would lose the last gap in housing and the the landscape would suffer.
1.5	South West of Kirk Hallam	Landscape	Simon Reeve	Response-01081	We have a beautiful landscape, any changes to the natural environment will shatter the beauty of the area, you can't keep adding more and more homes and solar farms on the countryside. Especially when there's so much dead town centre which will never recover and should be changed from retail to housing for example the lower half of Bath Street Similarly every shop, home and all the new factories in Stanton should have solar panels on the roofs and as canopies to the car parks adding addition benefits of sheltering vehicles before any consideration to rip up the countryside.
1.5	South West of Kirk Hallam	Landscape	Stephen Palmer	Response-00311	A toxic slag heap is only 100 metres from the proposed new build housing . Power pylons will be close to homes. And there is a risk of flooding to the new homes and Sandiacre/ Long Eaton. There is a disused rifle range made from toxic furnace slag.
1.5	South West of Kirk Hallam	Landscape	Stephen Syson	Response-00032	Destruction of the natural beauty of the landscape due to build up of conurbations
1.5	South West of Kirk Hallam	Landscape	Steven Street	Response-01264	All our landscape will be tarmac roofs And solar given the current labour control
1.5	South West of Kirk Hallam	Landscape	Tracy Lee	Response-00988	The question is concrete or green food producing fields. Green is so much better for people?s mental health and the environment. The development would destroy this beautiful landscape.
1.5	South West of Kirk Hallam	Number of Houses	Cllr Simon Mabbott	Response-01480	1/. Overdevelopment Without Justification The proposed scale of development is excessive, disproportionate, and unsuited to a community like Kirk Hallam. The plan to build 1,000 new homes, alongside an additional allocation of ?safeguarded? land for a further 350 raises major concerns about overdevelopment, infrastructure capacity, and the long-term sustainability of the area. 2/. Hidden Expansion Through ?Safeguarded? Land Labelling land as ?safeguarded? is, in practice, a step toward eventual development. This means the true scope of the proposal could reach 1,350 homes, a figure that would dramatically increase the local population and place overwhelming pressure on already-stretched roads, schools, healthcare facilities, drainage systems, and public transport. 3/. No Phased Growth or Infrastructure Strategy There is no evidence of a structured, phased approach to managing this level of expansion. Without a clearly coordinated plan to deliver essential services and infrastructure in parallel with new housing, the community will likely face significant disruption and shortfalls in public provision from the outset. 4/. A Development Out of Proportion Kirk Hallam is a modest, relatively self-contained settlement with limited connectivity. An influx of up to 1,350 new homes could nearly double its size, fundamentally altering the character of the area without offering proportional benefits to current residents or demonstrating a genuine need based on local housing demand. 5/. Ignoring the Cumulative Impact This proposal cannot be viewed in isolation. Taken alongside other recent or planned developments across the borough, the combined effect on public services, infrastructure, and the environment is severe. The wider implications of such unchecked growth have not been properly assessed or addressed. Conclusion: Unsustainable and Unbalanced Growth This level of development is not only excessive it is poorly timed, insufficiently supported, and strategically unsound. Kirk Hallam lacks the infrastructure to absorb such rapid expansion, and the proposal represents a clear case of unsustainable planning that prioritises housing numbers over community wellbeing. Driven by financial gain rather than community.
1.5	South West of Kirk Hallam	Number of Houses	Emma	Response-01265	The number of houses is monstrous, the footfall of human traffic will drive animals away and ruin their habitats. The human litter and pollution will deeply affect our beautiful green belt.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Number of Houses	FAY SAXTON	Response-01409	<p>NUMBER OF HOUSES/GREEN BELT (these catagories overlap) The housing allocation of c1000 houses for the village of Kirk Hallam is totally unfair and unreasonable. Kirk Hallam is a village on the Erewash Green Belt, along with all the other Green Belt villages and should take an equal share of the development allocation, not be dumped with a massive proportion. The Inspector on examining the maps at the last Core Strategy Review could see that Kirk Hallam is a village. Yet all BUT Kirk Hallam are treated for planning purposes as villages, for no cogent reason. Kirk Hallam's church of All Saints is the nearest Grade 1 Listed Church to the Abbey of Dale Abbey and the close relationship between the two villages is well documented. We know that the Canons of Dale Abbey ministered as priests to the people of Kirk Hallm. To this day, visitors (and locals) take what is known locally as the "Monks Path" from the church and Abbey of Dale to Kirk Hallam and its Church. The Abbey at Dale owned and farmed the land that we now call our Green Belt, including Kirk Hallam. This history is a valued heritage asset to Erewash and likely to be so into the future. Expecting Kirk Hallam to take c 1000 new homes when the amounts to be taken by other villages vary from c 50 to c 280 is grossly unfair and needs to be halted. Kirk Hallam has been used over the years as a dumping ground for unwanted development. It should not be up to developers to choose what land they want to build on. At Kirk Hallam, the land proposed for development is within the Dale Abbey Parish. Many Kirk Hallam residents come under Dale Abbey for Council Tax. Kirk Hallam's ties to Dale Abbey are indisputable. Virtually all of the villages have some council houses, Kirk Hallam has many too but also many houses built for workers by Stanton Ironworks, people whose tireless work assisted in building the wealth of the Ilkeston area for many years. Many residents are descendants of those workers, some of whom are still alive, some of whom died of lung conditions due to tending the furnaces. In this way Kirk Hallam presents to Erewash a further historical heritage value, later in time, but one that should be respected. In reality, the village of Kirk Hallam has been denigrated as low value, and robbed at an unknown time of its value as a village without its consent, despite valiant ongoing efforts by a life-long Kirk Hallam villager to untangle its planning history. The village of Kirk Hallam should not be expected to take on any more than its fair share of the development in Erewash. The Council should re-visit their figures and indeed the way in which land is selected for development so that overarching fairness and common sense are the primary criteria, and the Green Belt treated as the treasured asset of Erewash that it is, long known to locals as "The Jewel of Erewash". Forcing development on the Kirk Hallam and surrounding areas is short sighted and unrealistic. It is apparent to anyone living in the area that this part of Erewash is already full to overflowing, experiencing traffic conditions which have no realistic way of being resolved by what is presented and certainly not by a so called Relief Road that creates further problems throughout the area, as discussed in "Transport" above. The housing allocations the Council have made when considering options across the Borough concern me greatly. Why overload and stifle Kirk Hallam and surrounding areas when there are clearly other options av</p>
1.5	South West of Kirk Hallam	Number of Houses	FAY SAXTON	Response-01409	<p>ailable? SA2025 UPDATE SITES ASSESSED (REJECTED) BOROUGH SOUTH shows considerable areas of land in the region of Hopwell CP that have been offered but rejected, indeed a representative of the owner of this land was present at the last Core Strategy Hearing. All we are presented with is a map showing the area, with no explanation whatsoever as to why a portion of this land could not be used to restore fairness to the village of Kirk Hallam to reduce its c 1000 house allocation, why it could not play its part in eliminating the £10 million cost of the so called Relief Road and removing the need for this road altogether, why it could not play its part in ending the daily headache for school children and commuters in the deadlock that increases day by day at A6096/Bulls Head? The land is not far at all from the high employment areas of Erewash - it is within under an hours walking distance from Kirk Hallam, it could support a primary school cost £4 million, with money to spare after eliminating the cost of the Relief Road. Beyond the points system, it makes sense, its logical, its fair, and it can reduce the congestion. Please respect the people of Kirk Hallam and be willing to reconsider and widen your perspectives to find solutions where solutions are desperately needed - and available. A steady increase over the years to an allocation of c 1000 houses at the village of Kirk Hallam is vastly out of all proportion both to the current size of Kirk Hallam itself and massively so to the size of each of the surrounding Green Belt villages. The character of the villages should be maintained, balanced and not destroyed or encroached upon by unsuitable development. None of the villages want to become small towns or satellites of Ilkeston. They should be able to remain inviting and interesting for visitors who come to the Green Belt for health giving recreation as they do at present. In particular, the c 1000 house Kirk Hallam development represents a considerable encroachment towards the historic village of Dale Abbey to which it will be in sight and sound. Of important concern is the placement of what is termed a "Local Centre" (dealt with here as it is part of the proposed new development whilst not a "house"). The Local Centre is proposed to be built on what was and should remain Green Belt land beyond the Dale Abbey side of the Relief Road and adjacent to the A6096. Whilst the Council claim the so called Relief Road "will create a defensible Green Belt boundary as well as a landscape buffer between the Green Belt and housing allocation" (CORE STRATEGY REVIEW AMENDMENT DOCUMENT; P. 36, 3RD PARA FROM BOTTOM), the proposed setting of this Local Centre entirely breaks that boundary and provides a stepping stone for more new development towards Dale Abbey. This is totally unacceptable. Such a siting, being across the Relief Road in the direction of Dale Abbey, will sooner or later lead to developers digging deeper into the Green Belt to the detriment of both Kirk Hallam and Dale Abbey. Indeed, there seems to be no other reason for such a siting given its presence at the furthest point away from Kirk Hallam old and new, which would involve residents and their children crossing the busy and dangerous Relief Road with its cars, heavy vehicles and HGVs from both existing and forthcoming heavy traffic from other delivery depots such as West Hallam. Such a crossing cannot be made safe without a pedestrian bridge. The equality issues flowing from this</p>

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Number of Houses	AT SAXTON	Response-01409	Local Centre are rightly insurmountable, given that the Local Centre would be virtually inaccessible to the elderly and disabled and extremely dangerous for children - a dash for a ball into the road or a dare could prove fatal. This proposed development adjoining the A6096 would be more accessible to motorists from other parts than to the residents of Kirk Hallam new and old. Such a building would act like a motorway service station, an eyesore to the historic rural area, and as inappropriate and unwanted an intrusion as is possible to the character of the area. It risks becoming a hub for criminality/drugs aimed at the housing development via the many exits proposed on the unpoliced Relief Road. Kirk Hallam already has a Village Centre that could be refurbished/extended if required and there are also additional local shopping facilities at the supermarket in the garage at Kirk Hallam and at nearby Ilkeston and West Hallam. In addition, the proposal for a Local Centre supplanting the existing Village Centre represents a shocking and unnecessary exploitation of Green Belt Land that needs to be prevented, and a violation of the Councils own description of the Relief Road as a "defensible Green Belt boundary."
1.5	South West of Kirk Hallam	Number of Houses	Fiona Turner	Response-01362	A development of this size is equivalent to building a small town, and its impacts on existing communities and infrastructure can be major: 1. Traffic Congestion and Road Safety ? A typical 1,000-home development could generate 1,500?2,000 extra vehicles. ? Local roads may become overburdened, leading to congestion, delays, and an increased risk of accidents, particularly near schools and junctions. 2. Pressure on Public Services ? Local GP surgeries, hospitals, schools, and emergency services may not have capacity for the population increase. ? This can lead to longer waiting times, overcrowded classrooms, and reduced service quality. 3. Impact on Community Identity ? Smaller villages or rural communities may feel overwhelmed by the scale of development. ? The development could dilute local character and disrupt the social cohesion of the area. 4. Environmental Degradation ? The loss of green space, trees, and natural features contributes to: ? Reduced air quality ? Urban heat island effects ? Declining mental well-being of local residents 5. Visual and Physical Landscape Change ? Fields, hedgerows, and open land will be replaced by rooftops, tarmac, and dense housing layouts. ? This can permanently alter sightlines, skyline profiles, and the general feel of the area. 6. Housing Market Pressures ? If houses are high-end, it may price out locals. ? If poorly integrated, it could lead to transient populations or increased social tension. ? Cumulative Effects ? Combined, the impacts of the access road, 1,000 houses, and associated infrastructure (schools, shops, car parks) will have a profound and permanent effect on both the natural and built environment. ? Particularly when built into a sensitive site like a nature reserve, the cumulative damage may be irreversible.
1.5	South West of Kirk Hallam	Number of Houses	GARY MARK WOODHOUSE	Response-01451	the housing allocation will increase Kirk Hallams population from 5966 residents by 40% plus that is far too large an increase for Kirk hallam to Take
1.5	South West of Kirk Hallam	Number of Houses	Kimberley Dawson	Response-01345	Aside from it eroding the green belt, Kirk Hallam cannot possible sustain this number of properties being built.
1.5	South West of Kirk Hallam	Number of Houses	Lisa Attenborrow	Response-01367	The total amount of houses proposed to be built in Kirk hallam is scandalous. Erewash is a very big borough and you can't tell me that we have to take the majority of it. It should be distributed evenly then perhaps you wouldn't have so many objections. Everyone knows the government have set you a figure but it doesn't mean you can just choose one area which hasn't got the infrastructure to accommodate that many houses. One relief road which won't be a relief road it is a cut through to an already congested part by Stanton.
1.5	South West of Kirk Hallam	Number of Houses	Margaret Bannister	Response-01190	This proposed development is disproportionately large for one area. We recognise the need for housing but I feel that the area of kirk Hallam and lack of infrastructure makes this development unsustainable. Not only have we got to endure an increase in population which in course will put more pressure on our already bursting infrastructure, but we have also got to live with the ever growing distribution centres at New Stanton Park.
1.5	South West of Kirk Hallam	Number of Houses	Michaela Hickinbotham	Response-00229	1300 ridiculous 1000 ridiculous Kirk Hallam is a small community with I believe less than 7500 residents and you want to put that many houses up there. West Hallam our posher neighbour how many houses for them less than 200 🤔🤔🤔
1.5	South West of Kirk Hallam	Number of Houses	Michelle Colliver	Response-01332	Kirk Hallam currently consists of approximately 2,619 households, supporting a population of around 5,966 residents. The proposed development of 1,000 new homes would increase the number of residences by nearly 40%, representing a dramatic expansion of the village. Such a large-scale development risks overwhelming the existing infrastructure and engulfing the current residential areas, fundamentally changing the character of Kirk Hallam. Rather than a gradual or balanced growth, the scale of this proposal would significantly diminish the village's close-knit identity and rural feel, replacing it with a much denser, urbanised environment that many fear would erode the community's existing cohesion and charm.
1.5	South West of Kirk Hallam	Number of Houses	Mr J Edwards	Response-01355	This area is not in need of new housing! The massive build on American adventure is struggling to sell the houses - just a ploy for government targets!!!! There is also the development near bennerly viaduct - also struggling to sell!!!! No one believes these are actually needed. We do not need in excess of 3000 houses - just imagine what this will do to Ilkeston and Kirk Hallam. Total carnage for roads, schools, services and wildlife!

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Number of Houses	Mrs Beverley Anne Harrison	Response-01118	Initially, core strategy allocations were shared fairly over Erewash. However, there genuinely were a few areas it made sense to remove allocations. Shamefully, on seemingly political preferred choice former majority EBC deleted many own constituency village allocations (siting excuses which also fit chosen locations) as many houses were unfairly reallocated to ?preferred? target areas. Between 2020 and 2022, Kirk Hallam (originally given around 400) and the then newly ?preferred? Spondon Wood site were targeted as victims to absorb West Hallam storage depot?s 1000 house allocation. In addition, when the 600 allocation at Cotmanhay was reduced to 250, Kirk Hallam was again targeted as ?preferred?, thus eventually increasing their allocation total to 1300 (over 3 times the original figure), equating to a nearly 50% housing increase in Kirk Hallam plus, just a short walking distance within the Kirk Hallam and Stanton by Dale ward, adding a further 1000 on brownfield land. This means (as stated in the bus services section) the population of 6,408 could drastically increase to well over 16,000. Finally, though Kirk Hallam?s allocated total was reduced to 1000 by the inspector in June 2024?s hearing, this review advocates safeguarding a further 8 hectares (the equivalent size of over 11 full sized football pitches!) of dairy food productive greenbelt farmland - which by coincidence roughly equates to the final remaining 7.2 hectare discarded Cotmanhay 250 house allocation - and means Kirk Hallam?s already struggling, overintensified, community is worse off than before that hearing. This review also deregulates a further 27 hectares of greenbelt in the area ? for who knows how much more future development!!!
	South West of Kirk Hallam	Number of Houses	Nick Jackson	Response-01260	There are far far better places to build.
1.5	South West of Kirk Hallam	Number of Houses	Paul Wright	Response-01261	Far too many houses proposed for this site, with house sizes shrinking by the year. Not good for the mental health of potential residents being squeezed into too little space.
1.5	South West of Kirk Hallam	Number of Houses	Roger Tranter	Response-01323	The proposal of 1000 houses is still far too many in my opinion.
1.5	South West of Kirk Hallam	Number of Houses	Russell Bannister	Response-01360	9. Number of Houses The scale of the proposed development is excessive and unjustified for an area like Kirk Hallam. The current proposal for 1000 houses, plus the designation of additional ?safeguarded? land for a further 350 homes, raises serious concerns about overdevelopment and long-term impacts on infrastructure, services, and the character of the area. Creeping Expansion: The inclusion of ?safeguarded? land is essentially a green light for future expansion, meaning the real total could reach 1350 new homes. This will dramatically increase the population and put unacceptable pressure on roads, schools, healthcare, drainage, and public transport. No Phased or Managed Growth Plan: There is no clear strategy for how this number of houses will be phased or integrated with the provision of services and infrastructure. This makes it likely that housing will be delivered well in advance of any meaningful support systems, causing immediate strain on the community. Out of Scale with the Area: Kirk Hallam is a relatively small, self-contained community with limited connectivity. Adding up to 1350 houses risks doubling the size of the settlement, with little benefit to existing residents and no clear justification based on local housing need. Cumulative Impact Ignored: The impact of 1000+ houses cannot be assessed in isolation. When combined with other recent or proposed developments in the borough, the cumulative strain on public services and the environment becomes even more severe. In short, the proposed number of houses?combined with the strategic positioning of additional land for future development?is excessive, poorly planned, and unsustainable for Kirk Hallam and its surrounding infrastructure.
1.5	South West of Kirk Hallam	Number of Houses	Simon Reeve	Response-01081	Already too many without adding more
1.5	South West of Kirk Hallam	Number of Houses	Stephen Palmer	Response-00311	No houses should be built because of the high level of soil toxins .
1.5	South West of Kirk Hallam	Number of Houses	Stephen Syson	Response-00032	1000 houses too many
1.5	South West of Kirk Hallam	Number of Houses	Steven Street	Response-01264	To many not needed none in long Eaton
1.5	South West of Kirk Hallam	Number of Houses	Tracy Lee	Response-00988	Far too many houses are being built in this area for the benefit of who? Bring buildings back into use instead of destruction.
1.5	South West of Kirk Hallam	Number of Houses	William Moore	Response-01259	We need less people not more houses
1.5	South West of Kirk Hallam	Other	Cllr Simon Mabbott	Response-01480	As the newly elected County Councillor for Ilkeston South and Kirk Hallam, I?ve had to come up to speed quickly on the issues affecting our area. What has stood out most is the strength of feeling and deep rooted pride within the local community, a community that now faces the real risk of losing its identity if this development goes ahead in its current form. Residents are not opposed to all development. They understand the need for growth and are willing to engage constructively. But development must be proportionate, sustainable, and respectful of the character and capacity of the area. It cannot come at any cost. I urge you to ensure that a meaningful and thorough consultation takes place with the people I represent. I would welcome the opportunity to meet, listen, and work together to find a solution that meets future needs without sacrificing the integrity of this community.
1.5	South West of Kirk Hallam	Other	David Harrison	Response-01429	I wish to put forward my objection to the Core Strategy and its review amendment. It is the worse possible thing which could happen on every point above to an already struggling yet amazing and beautiful place . It will destroy the greenbelt and both the homes of the wildlife and biodiversity, the heritage of the people and the monastic history which made Kirk Hallam the amazing place and community it is whilst also shattering the physical and mental health giving characteristics of the greenbelt. The plan will further over intensify the population and massively increase the already heaving regular congestion and pollution whilst creating social division and further crippling an already overstretched infrastructure beyond all limitations. The current population haven?t been given due consideration and will once again - as has happened on so many occasions to this community - not properly been given proper thought which is disgraceful. The allocations should be democratically shared fairly and equally across the whole of Erewash without disdain or disrespect towards just a small of percentage of Erewash residents.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Other	Fiona Turner	Response-01362	1. Increased Traffic and Congestion ? More residents typically mean more cars on local roads, leading to: ? Longer travel times. ? Congestion during peak hours. ? Increased risk of accidents. ? Rural or small-town road networks can be ill-equipped to handle a sudden rise in vehicle numbers. ? 2. Pressure on Local Services and Infrastructure ? GP surgeries, hospitals, schools, and public transport can become overstretched. ? Local residents may face: ? Longer wait times for medical appointments. ? Difficulty getting school places. ? Reduced availability of social services. ? This is especially problematic when infrastructure is not upgraded in parallel with housing. ? 3. Noise, Dust, and Disruption During Construction ? Extended construction periods can bring: ? Persistent noise from heavy machinery. ? Air pollution from dust and diesel engines. ? Vibration that may affect nearby properties. ? Early morning and weekend work can disturb residents? quality of life. ? 4. Strain on Utilities and Drainage ? Existing systems for water, electricity, gas, and sewage may not be designed for a significantly larger population. ? Risk of: ? Sewer overflows or backups. ? Water pressure drops. ? Increased surface water runoff and local flooding, especially if green space is replaced by impermeable surfaces. ? 5. Loss of Green Space and Visual Amenity ? Natural or undeveloped land being built over can: ? Reduce access to nature for existing residents. ? Impact mental well-being, particularly in rural or semi-rural communities. ? Change the character of the area?loss of views, openness, and tranquility. ? 6. Overdevelopment and Urban Creep ? Residents may feel the development causes: ? Loss of village identity or community feel. ? Merging of formerly separate settlements (urban sprawl). ? Increased littering and antisocial behaviour, especially if the population grows rapidly without social integration plans. ? 7. Rising House Prices and Rents (or Sometimes Falling) ? Depending on the location: ? New, expensive homes may push up prices, making the area less affordable for locals. ? In some areas, a large influx of homes can saturate the market and reduce resale values of existing properties. ? 8. Impact on Privacy and Light ? New buildings, especially if taller or denser than surrounding properties, may: ? Overlook gardens or windows. ? Block sunlight, particularly in winter months. ? 9. Increased Pressure on Recreation Areas ? More people using parks, footpaths, and green belts can lead to: ? Overuse, erosion, litter, and disturbance to wildlife. ? Reduced enjoyment for existing users. ? 10. Social Friction ? Large developments can lead to a sudden demographic shift, which may: ? Disrupt local social dynamics. ? Create tension between new and long-standing residents if integration is poor or local concerns are ignored.
1.5	South West of Kirk Hallam	Other	Gregory Robin Watts	Response-01297	There will be increased demand for water which is increasingly a scarce during long periods of dry weather that we are experiencing more frequently. No new housing should be built before we can ensure an adequate supply of water throughout the year.
1.5	South West of Kirk Hallam	Other	Joan Polak	Response-00979	My objection covers all the boxes, as per my statement below. We knew we were doomed the day a posse of council members descended onto the Kirk Hallam area in the civil parish of Dale Abbey and proceeded along the historic "Monks' footpath." They had come to pillage the picturesque landscape which provides food, e, g. crops, a natural habitat for wildlife and serenity, tranquility and exercise for humans. It was one dull day they came, and they were blind to the natural beauty and usefulness of the area, as they were intent on building on land that wasn't at their back door. We were not forewarned about the planned housing in an already densely populated region that is already above the ability of the existing infrastructure. The KH by-pass route is absurd; it will primarily serve heavy-duty vehicles from the new Stanton Park, and heavy-duty vehicles aren't allowed through KH in the first place, only for access. This implies that additional traffic will turn right and pass by homes and a school along Ladywood Road towards Ilkeston! Which will make it worse for KH residents! More pollution, noise, congestion and danger to pedestrians Floods will occur in the valley due to the concreting over of the fields. The land is also close to a grassed-over area that was used to tip thousands of tons of waste from Stanton Ironworks... Has this been checked for toxicity?
1.5	South West of Kirk Hallam	Other	Josh August	Response-00090	I would like to know why someone/people believe that we need to build this many houses. There clearly isn't a housing crisis as portrayed in the media as our local housing association have hundreds of empty houses that are ?hard to let? so they are sat there not being used. Look to use what is already there, rather than building new houses and ruining the beautiful countryside we currently have. Once it is gone, it will be gone forever
1.5	South West of Kirk Hallam	Other	Kimberley Dawson	Response-01345	The focus should be on getting empty/unoccupied homes back into use within the borough before building new ones
1.5	South West of Kirk Hallam	Other	Margaret Bannister	Response-01190	Formal Objection to Proposed Housing Development on the Outskirts of Kirk Hallam I Margaret bannister, am writing on behalf of myself, the local residents of Kirk Hallam and as the former Chair and now administrator of kirk Hallam Green Squeeze Campaign group, to formally object to the proposed housing development consisting of 1,000 houses a safe guarding for a possible further development of 350 house plus a new 40mph road on the outskirts of our community. Below are the key grounds for our objection: Conclusion I am writing on behalf of the local residents of Kirk Hallam to formally object to the proposed housing development consisting of 1,000 houses and a new 40mph road on the outskirts of our community. This development, if approved, will have severe and irreversible impacts on our infrastructure, environment, and the well-being of current residents. It will significantly increase the volume of traffic to already heavy laden roads, exacerbating further delays and gridlocked traffic This proposed development will cause widespread harm to the community of Kirk Hallam. It endangers our environment, health, safety, and infrastructure. We urge the planning authority to reject the application in full and prioritize sustainable, community-focused development that protects both people and place. It is also deeply concerning that the people of Kirk Hallam have had little to no help or representation from our elected councillors throughout this process. Furthermore, there are still many local residents who are unaware of the proposed development and its scale, raising serious concerns about the adequacy of public consultation. We recognise the need for housing, but this proposal is disproportionately large and unsustainable for the area. It fails to address the severe and compounding impact on traffic, air quality, public services, education, healthcare, flood risk, toxic pollution and environmental impact plus the loss of 50 hectares of historical greenbelt classed the ?Jewel of Erewash? which local Erewash residents have walked for generations. I also respectfully request that my opposition be personally reviewed by Planning Inspector Kelly Ford. Margaret Bannister (Mrs)

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Other	Michelle Colliver	Response-01332	In conclusion, I object to the proposed 1,000-house development in Kirk Hallam that is wholly unsuitable and poses unacceptable risks to the existing community, environment, and infrastructure. The issues raised?ranging from severe traffic congestion, flood risk, toxic land and water contamination, overwhelmed health and education services, lack of public transport, and failure to meet the needs of an ageing population?highlight a development that is both unsustainable and irresponsible. The impact on local biodiversity, heritage landscape, and the existing identity of Kirk Hallam would be irreversible. This deeply unpopular proposal has now dragged on for over five years, exhausting and frustrating residents who have had to repeatedly submit objections without meaningful engagement or action. Throughout this time, there has been a noticeable lack of support or representation from local councillors, despite the community?s clear and consistent concerns. Over 3,000 formal objections have already been lodged against this development, and this submission builds upon that strong opposition with updated environmental data, flooding statistics, service capacity information, and new evidence on the damage to public health and well-being. I request that this objection, and all new information contained within it, be formally submitted to Government Inspector Kelly Ford for consideration. It is time for the voices of Kirk Hallam residents, to be heard, respected, and acted upon. As well as the residents, the wildlife?whose habitats are also at risk?should be heard. This is not just about housing; it is about protecting the integrity, identity, and sustainability of our community. This development MUST be rejected.
1.5	South West of Kirk Hallam	Other	Mr J Edwards	Response-01355	Listen to the residents and actually work for them which is what you are paid to do!!!! Nobody wants this monstrosity of a development
1.5	South West of Kirk Hallam	Other	Mrs Beverley Anne Harrison	Response-01118	Having spoken to several concerned residents, it?s essential to point out that close-by to a large part of the lower section of proposed development South of Kirk Hallam - including the recent safeguarded area ? there?s a sizeable ?slag? heap. ResearchGate.net describes such slag as ?Steel slag is a waste material produced during the process of steel making. For many years a large amount of Steel slag was deposited in slag storing yards, occupied farmland, silted rivers and polluted the environment?. From childhood I was told the heap resulted from the tipping of (ferrous) metal and steel waste by-products from the former local iron and steelworks, Stanton and Staveley (then owned by British Steel Corporation). The craggy mound has existed for several decades and over many years has, both by nature and council planting, been covered by grass and trees in an attempt to naturalise, beautify and conceal its presence. It co-exists under constraint of all weathers. Thus when it rains or when snow melts, resulting surface water run off flows through its mass into the ground, leaching out possible hidden substances, nutrients and contaminants and depositing them ever deeper into soil layers and groundwater allowing them to be spread like an ecosystem damaging infection across a large, underlying part of the area. For many years, revelations around the dangers and tragedies resulting from toxic and other pollutive contaminants often found over time within similar waste have been revealed and more recently tv dramas and documentaries like ?toxic town? based around the true stories of such hazards have been produced. It?s even been recounted locally that as far back as the late 1960?s, Dallimore School stopped growing vegetables for the school canteen when a teacher protested due to concern of toxin contamination from the nearby sited slag heap. In addition, considering work at Stanton involved use of blast furnaces, please note information on documentation found on ?patents.google.com? includes:- DE3911982A1 ? Disposal of Harmful Waste ? by burning it in a blast furnace in region where blast air is supplied, the introduction abstract of which states ?The method enables the disposal of harmful waste material. The material is injected by a pipe into a blast furnace in the region where air is supplied to the furnace. The waste material may be in solid, liq. or gaseous form and may be supplied with or without a transport medium. The transport medium may be a gas or a gas mixture, a liq. or a container. The temp. of the blast furnace in the region of its air inlet lies between 2000 and 2,500 deg.C and thus ensures that the waste material is completely burned. USE - Disposal of harmful waste material.? - Examples of disposal according to the registrations are: dioxins, uranium hexafluoride, biological or chemical warfare agents, oily metal shavings, Contaminated soil, sludge, or similar. One resident has revealed a relative who died in 2003 that had worked on Stanton blast furnaces had described how officials under government licence would dispose of dangerous materials in the hot furnace gas. Questions we need to ask are, How was this procedure carried out? How does that affect the area (and surroundings) where the slag was disposed? What contaminant hazards could this have on the area or anyone living close by? and, Is it dangerous and/or irresponsible to allow residential development so close to such a slag heap? Regarding any decision for developm
1.5	South West of Kirk Hallam	Other	Mrs Beverley Anne Harrison	Response-01118	ent around the area, surely it must be paramount for long term public health and safety that thorough, careful and accurate soil and groundwater testing be conducted. Finally, given aforementioned concerns and the existence of such a closely sited slag heap to new homes it?s not unreasonable to ensure developer?s must inform potential house buyers of the nearby slag heap, alongside the developer?s provision of a liability insured guarantee the area is free from dangerous contaminants
			Nick Jackson	Response-01260	There are over 7,000 empty property available. Yes we need to build but there is more appropriate places to build.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Other	Russell Bannister	Response-01360	13 Conclusion and Final Comments Community Involvement and Consultation Fatigue The Core Strategy process leading to this proposed development has been a long and exhausting journey for the residents of Kirk Hallam, stretching back to 2019/2020. Over several years, residents have been repeatedly called upon to engage with review periods and consultation exercises?often needing to re-state their objections and navigate complex planning systems, with little sign that their views were truly being heard. A particularly difficult moment came in 2022, when residents were asked to respond using a lengthy and highly technical form, written in planning jargon and largely inaccessible to the general public. This process proved to be time-consuming, confusing, and emotionally draining, especially for people without expertise in planning or legal frameworks. Despite these barriers, a small and committed local campaign group?Kirk Hallam Green Squeeze (KHGS)?stepped in. Composed of residents from Kirk Hallam, Ilkeston, and Dale Abbey, the group voluntarily dedicated their time and energy to complete and submit responses on behalf of the wider community. They then rallied a group of residents they called the ?Foot Soldiers?, who knocked on every door in Kirk Hallam, raising awareness and offering people the chance to object using simplified, pre-prepared forms. Through this effort, over 3,000 objections were collected and personally delivered to Erewash Borough Council. Before this, another local group?Kirk Hallam Housing Opposition?had also made efforts to mobilise residents, successfully collecting over 1,200 signatures of objection through door-to-door engagement on a smaller scale. This level of effort highlights the depth of concern within the community, but it also reveals a broader truth: the process has taken a significant emotional and mental toll. Many residents have become understandably apathetic?not because they don?t care?but because they feel unheard and unsupported. The prolonged nature of the process, with constant consultations and shifting information, has left people drained. Critically, this all took place during a time when people were also trying to cope with the COVID-19 pandemic, which consumed their attention and energy. As people struggled to protect their health, hold down jobs, and care for their families, they had little capacity left to track or respond to planning proposals?some of which were progressing under the radar while communities were focused on survival. Moreover, residents have felt largely abandoned by their elected councillors, receiving little to no guidance or practical support throughout this drawn-out process. This has only deepened the sense of frustration and resignation. People may not always appear engaged, but that is a result of years of battle fatigue, not indifference. It is essential that this history of grassroots mobilisation, exhaustion, and emotional disengagement be properly acknowledged. The people of Kirk Hallam do care deeply about their area, and they deserve to be recognised, respected, and truly listened to. This development and bypass proposal do not address traffic issues?they compound them. They reduce access, compromise safety, and ignore the real-world experiences of those who live in Kirk Hallam. I urge the planning committee to reject this proposal or substantially revise it with proper infrastructure plans, road safety assessments, and meaningful consultation with local reside
1.5	South West of Kirk Hallam	Other	Russell Bannister	Response-01360	nts. This proposed development represents a significant overreach for an area like Kirk Hallam?an established community already under pressure from limited road access, unreliable transport, stretched healthcare, and over-subscribed schools. The overall housing figure of 1000, plus "safeguarded" land for 350 more, is excessive and appears to be an underhanded attempt at creeping development with no guarantee of phased infrastructure improvements to match the expansion. Heavy Goods Vehicle (HGV) traffic is already a major issue for Kirk Hallam, particularly along the A6096 Quarry Hill road. The situation is set to worsen further with the ongoing development at New Stanton Park, which will dramatically increase HGV movements through our community?adding to congestion, safety risks, and noise pollution. In summary, this proposal would irreversibly change Kirk Hallam for the worse. It prioritises housing quantity over quality, profit over people, and long-term harm over sustainable growth. Local infrastructure?roads, schools, buses, healthcare, and drainage?simply cannot cope with such a sudden and large-scale expansion. Without major rethinking, this development will create a legacy of congestion, environmental degradation, and community fragmentation. We therefore strongly object to this proposal in its current form, and urge Planning Inspector Kelly Ford to reconsider its suitability, sustainability, and the long-term interests of the Kirk Hallam community. I would like to express that my objection be seen personally by the government inspector Kelly Ford
1.5	South West of Kirk Hallam	Other	Simon Reeve	Response-01081	Just stop it, look at the many brownfield sites in Ilkeston, Derby, Stapleford, Long Eaton, Nottingham and regeneration of those sites will deliver the homes without irresponsible damage of natural environment
1.5	South West of Kirk Hallam	Other	Stephen Palmer	Response-00311	The proposed site should have soil and waterways tested . This to reassure the public that the area is safe. Remember Kirk Hallam has a history of steel making like Corby.
1.5	South West of Kirk Hallam	Other	Stephen Syson	Response-00032	All in all this interrupts the peace and tranquility of the country side as it currently is.
1.5	South West of Kirk Hallam	Other	Steven Street	Response-01264	Houses not needed farm land and green belt is Short term politics for tick box rules not for the real people of this country enjoy the next two years because it will be your last the people will vote
1.5	South West of Kirk Hallam	Road Safety	Andrew Corban	Response-01496	The roads linking to this site are not suitable for this development causes many accidents

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Road Safety	Cllr Simon Mabbott	Response-01480	1/. The Bypass and Development Pose a Serious Threat to Road Safety in Kirk Hallam The proposed development and bypass stand to significantly worsen road safety in and around Kirk Hallam. The area is already burdened by multiple high-risk traffic points, and this plan offers no meaningful measures to reduce those dangers. Instead, it intensifies existing hazards while introducing new ones. 2/. A6096 Roundabout ? High-Speed Danger Zone The proposed roundabout on the A6096 (Ladywood Road) would channel fast-moving traffic from Derby straight into Kirk Hallam. Drivers exiting from the community would be forced to yield to this flow, greatly increasing the risk of collisions?especially during peak times or poor weather. The speed differential and lack of controlled entry make this an inherently unsafe design. 3/. St Norbert Drive / Godfrey Drive ? A Known Hazard Worsened Located near the Cat & Fiddle pub, this junction is already recognized as an accident black spot, plagued by limited visibility and frequent near-misses. Increased traffic from the A6096 roundabout would lead to longer queues and further impair safety at this vulnerable intersection?for both drivers and pedestrians. 4/. Bulls Head / Quarry Hill Roundabout ? A Gridlock Turning Dangerous This key roundabout is already overwhelmed by school traffic, heavy goods vehicles, and commuter congestion. With the bypass funnelling even more vehicles into this point, the risks multiply: driver frustration, unsafe merging, and poor lane discipline all contribute to a higher likelihood of accidents. 5/. Sow Brook Lane Roundabout ? An Ill-Equipped Conflict Point The second proposed roundabout, at Sow Brook Lane, adds yet another junction where residents must yield to bypass traffic. This road is not built for high volumes and lacks any form of signal control or pedestrian protection. As a result, the risk of collisions will rise significantly, especially at busy times.
1.5	South West of Kirk Hallam	Road Safety	Daniel naylor	Response-01510	Traffic going into Ilkeston up quarrey hill road is very heavy at peak times already, without an extra 1000+ new homes,all with vehicles adding to it. Bulls head area is an accident waiting to happen already with school pupils walking this route at peak times alongside heavy traffic. This needs to be addressed now, without the new development, let alone with it added. The relief road would need to incorporate derby road to alleviate this already ongoing issue
1.5	South West of Kirk Hallam	Road Safety	FAY SAXTON	Response-01409	The roads in Kirk Hallam and surrounding areas cannot be made safe until the Council stops loading them with unrealistic numbers of new residents most of whom are likely to own one or more cars. It does not make sense to add to a current traffic crisis in the area which is at risk of standstill. The Council needs to implement a common sense policy of fairly sharing out housing throughout Erewash and treating our Green Belt as rare and precious as it is, an overarching policy above and beyond their points systems. No-one has to drive very far in Erewash to get to work and many prefer to live in quieter areas. There is no need for a traffic crisis that is unnecessarily undermining road safety.
1.5	South West of Kirk Hallam	Road Safety	Fiona Turner	Response-01362	My daughter attends Dallimore primary school, which is already under great pressure from passing traffic. During school drop off and pick up times (peak times) the traffic flying past is dangerous. Children?s lives are at risk due to this. Crossing patrol is in place but their safety is too, at risk. Causing more disruption to build said access road, will increase the traffic flow along Dallimore road, and increase a danger to the children who go there. Parking is already bad enough from parents coming in from surrounding areas. Road visibility is already restricted without having additional lorries and work traffic coming past. Before adding to these pressures, this should be looked at first. Stopping this traffic coming through from sowbrook lane and into Kirk Hallam. Which they do to avoid the congestion up on quarry hill and bulls head. Which has temporary traffic lights all the time which cause even more congestion. Which was created when they stopped access to midland storage (or whatever it?s called now) from west hallam.
1.5	South West of Kirk Hallam	Road Safety	GARY MARK WOODHOUSE	Response-01451	Road safety in Kirk Hallam is terrible especially School hours for dropping off and picking up children, it is a notoriously difficult time, monstrous amounts of traffic on the junctions of St Norberts road / Spondon rd / Ladywood rd / Godfrey drive all fighting to access the main road, another junction, Godfrey Drive / St Norberts / Little Hallam Hill is also as bad, Kirk Hallam has two of the three secondary schools in the whole of the Ilkeston area. Children cross at the notorious Bulls Head Junction daily with no pedestrian crossings in that area its only time before a child gets killed crossing, thousands more cars will make things even worst
1.5	South West of Kirk Hallam	Road Safety	Gregory Robin Watts	Response-01297	Increases in traffic volumes especially in the neighbouring villages and Kirk Hallam itself will necessarily increase the risk of accidents as it becomes more difficult to cross these busy routes. Cyclists will be deterred from using these routes because of increased perceived risk of collisions with passing vehicles
1.5	South West of Kirk Hallam	Road Safety	Jon Watkin	Response-00414	The Proposal states that a Relief Road will be built joining the A6096 and Sowbrook Lane. It makes no reference to the junctions at both ends , there required style and size. The junction to the A6096 is on a rise in the road and there could be a road safety issue about the siting of the junction and the view of the road coming from the estate onto the A6096. The road is clearly meant to carry a significant amount of heavy traffic increasing as the industrial development of the former Stanton site is realised . The road from the relief road to Twelve Houses Junction along Sowbrook Lane is not mentioned for an upgrade. The junction at Twelve Houses is not mentioned but critical to the completion of the relief road. There is some future promise that the development suggested for houses on the former Stanton Iron works site will fund a Junction / roadabout at the junction. However this development is not certain and is unlikely to be started before the Kirk Hallam site is completed so there will be a significant delay in work done on the junction while the Industrial site and Kirk Hallam site will be finnisied and fully functioning. At the moment if tyhe plans go ahead there is only good intentions for the Twelve Houses Junction . urther necessary and essential site surveys are needed before any plans can be made and the number of houses possible can be confirmed. This makes the funding of the junction improvmnts doubtful .
1.5	South West of Kirk Hallam	Road Safety	Josh August	Response-00090	There are lots of children that live in Kirk Hallam. The roads are already dangerous enough with limited off road parking throughout Kirk Hallam, which in turn makes it dangerous for people to cross the streets, as often all roads are double parked. More traffic in and around Kirk Hallam will cause more danger, especially to children
1.5	South West of Kirk Hallam	Road Safety	Lisa Attenborrow	Response-01367	Increase of traffic will only increase the risk of accidents due to lack of road safety.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Road Safety	Margaret Bannister	Response-01190	2. Road Safety The proposed new 40mph road and the significant increase in vehicle movements on our current roads pose a serious threat to road safety in and around Kirk Hallam. Schools, pedestrian crossings, and residential streets will all be affected by heightened traffic volumes and faster-moving vehicles. Children walking to school, cyclists, and elderly pedestrians will be particularly at risk. Increased HGV traffic raises the likelihood of serious accidents, particularly on narrow or residential roads ill-equipped to handle such loads. The existing infrastructure is not designed to absorb this volume of traffic without introducing new risks to public safety. The roads around Kirk Hallam including Ladywood Road, Godfrey Drive, St Norbert Drive and its surrounding neighbouring roads, were not designed to accommodate the traffic load that they are having to endure now, let alone more traffic from the impending development and Distribution site at New Stanton park. All traffic is routinely caught in long queues, which not only disrupts schedules like buses and appts. But also puts a greater risk on drivers and passengers from minor collisions or near misses due to the stop start nature of local traffic. The local roads already have poor visibility at junctions and on Bulls head narrow pedestrian pathways and inadequate crossing points especially for elderly an Children on their way to school. All these issues will only become more dangerous with added traffic with the overdevelopment of proposed houses in this area.
1.5	South West of Kirk Hallam	Road Safety	Michaela Hickinbotham	Response-00229	If you care to look at Ladywood Road there are currently only 3 crossings, 1 at the top of Godfrey Drive junction 1 near the School and 1 at the bottom of Ladywood Road the other Godfrey Drive junction. There are no roundabouts no traffic light systems in place for Kirk Hallam residents to be able to get out of the side roads onto Ladywood Road and this will increase our frustrations if the new estate is built.
1.5	South West of Kirk Hallam	Road Safety	Michelle Colliver	Response-01332	In addition to congestion, road safety around Kirk Hallam and the Bulls Head area is a growing concern. The combination of high traffic volumes, large numbers of HGVs, and outdated road layouts creates a hazardous environment for both drivers and pedestrians. Narrow roads, worn signage, and limited visibility at key junctions increase the likelihood of accidents?especially during busy periods when driver frustration and impatience are heightened. A recent example highlighting these risks occurred on January 22, 2025, when a serious collision led to the closure of both Ladywood Road and Cat and Fiddle Lane, causing significant disruption and delays between Dale Abbey and Ilkeston. Incidents like this not only illustrate the dangers present but also the impact such accidents have on local travel and emergency response access. Residents have voiced concern over the safety of children walking to school, cyclists navigating tight lanes, and the difficulty emergency services face reaching certain areas. Without targeted safety improvements, the risk of collisions and delays for first responders will continue to grow, making it essential that road safety is prioritised alongside any future developments or transport plans.
1.5	South West of Kirk Hallam	Road Safety	Mr J Edwards	Response-01355	This proposed development will lead to traffic congestion and dangerous roads- a disaster waiting to happen!
1.5	South West of Kirk Hallam	Road Safety	Mrs Beverley Anne Harrison	Response-01118	Considering traffic congestion, road safety and difficulty crossing the intertwined thread of often heavily congested, pollutive roads is a knock on problem. This is not just due to the regularity, volume or intensity of traffic but also the fact that, as Kirk Hallam is home to 2 of Ilkeston?s only 3 secondary schools, (with a daily ?exodus? of 11-18 year olds from as far away as Cotmanhay) the safety of many who walk or cycle to and from school on a daily basis alongside these busy routes will be affected. Safety will also be adversely affected for those who walk (via personal choice or due to frequency or limited public transport availability) around the area as there are many pedestrian routes to, from and within Kirk Hallam which are regularly used by many locals (many with children in buggies as well as cyclists or the disabled on mobility scooters)
1.5	South West of Kirk Hallam	Road Safety	Nick Jackson	Response-01260	With an extra 2,000 cars, there will be road accidents.
1.5	South West of Kirk Hallam	Road Safety	Paul Wright	Response-01261	The road network is under great pressure already, with surfaces not being maintained and pot holes multiplying by the week. Local authorities are clearly failing to maintain the existing infrastructure so adding more traffic is total madness!
1.5	South West of Kirk Hallam	Road Safety	Rachael Baines	Response-01403	School children use these roads, in many places no safe crossing areas
1.5	South West of Kirk Hallam	Road Safety	Robert Mee	Response-01580	The location of the proposed ?local centre? is rather problematic, being on the ?wrong? side of the new relief road, adding to road safety concerns.
1.5	South West of Kirk Hallam	Road Safety	Robert Mee	Response-01509	The location of the proposed ?local centre? is rather problematic, being on the ?wrong? side of the new relief road, adding to road safety concerns.
1.5	South West of Kirk Hallam	Road Safety	Roger Tranter	Response-01323	Increased traffic flow will lead inevitably to more accidents.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Road Safety	Russell Bannister	Response-01360	2 Road safety The proposed development and bypass will have a serious and negative impact on road safety in and around Kirk Hallam. The area already struggles with several known risk points, and this proposal would exacerbate those dangers without offering any practical mitigation. A6096 New Roundabout: The proposed roundabout on the A6096 (Ladywood Road) would funnel high-speed traffic from Derby directly into the Kirk Hallam area. Residents attempting to exit onto this roundabout will have to give way to fast-moving vehicles, creating significant collision risks?especially during rush hour or in adverse weather conditions. St Norbert Drive / Godfrey Drive Junction: This junction near the Cat & Fiddle pub is already an accident black spot, with poor visibility and frequent incidents. Increased queuing from traffic backing up from the A6096 roundabout will make this dangerous junction even more hazardous for both drivers and pedestrians. Bulls Head / Quarry Hill Roundabout: This key roundabout is frequently gridlocked. With the additional traffic being directed from the bypass, it risks becoming overwhelmed, creating a higher likelihood of accidents due to driver frustration, poor lane discipline, and inadequate gaps for safe merging. Sow brook Lane Roundabout: The second proposed roundabout on Sow brook Lane would introduce another conflict point where Kirk Hallam residents must yield to bypass traffic. This junction is not currently equipped to handle high traffic volumes, and its expansion without signal control or pedestrian safety measures increases the risk of collisions. Increased Pressure on Residential Roads: As delays worsen at all key junctions, frustrated drivers may begin diverting through residential roads within Kirk Hallam to avoid traffic. This will endanger pedestrians, children walking to school, cyclists, and other local road users, turning quiet streets into rat runs with elevated accident risks. Emergency Vehicle Delays: All of the above congestion points?particularly the Bulls Head roundabout?already cause significant delays for emergency vehicles. Adding to this with more traffic and choke points could result in life-threatening consequences if ambulances or fire engines cannot pass quickly through the area.
1.5	South West of Kirk Hallam	Road Safety	Simon Frost	Response-00684	Excessive traffic adding to an already heavily congested area with large numbers of HGV movements will obviously increase potential risks.
1.5	South West of Kirk Hallam	Road Safety	Simon Reeve	Response-01081	The roads are not safe, the volume of traffic and outdated roads networks are dangerous without plainly stupid ideas of putting convenience stores at the Bulls Head or adding more homes, it is simply ridiculous. The roads simply aren't built for the traffic we already have without adding more homes with more cars; I grew up in West Hallam (High Lane East) in the 80s, spending time in West Hallam Village, Kirk Hallam all around Ilkeston. There were approximately 1 car for every 2 homes thinking back to friends and neighbours in the areas, now theres 2 or more per house and many more houses. The present roads infrastructure is woefully inadequate with too much traffic on Ladywood Road and frequent accidents at the junctions for top and bottom of the estates in Kirk Hallam. The traffic getting in to and out of Ilkeston up to the Bulls Head island is horrific backing up to the lower estate junction multiple periods each day; also backing up to White Lion Square coming back to Kirk Hallam. The road past Quarry Hill is good but again at the Bulls Head end and also at 12 Houses the roads are unsafe and smashed kerbs evidence of too much heavy traffic for the road. The Kirk Hallam estate creates a lot of cut through traffic to 12 Houses already trying to avoid the jams yet causes more dangers on an unsafe corner junction. The recent over development of the old Stanton site has chaos and danger both towards Ilkeston and Sandiacre as the roads were simply not built for this level of traffic. Whilst I don't agree withuch of Maggie Throup's ideas the J25a at Stanton was a needed investment to take traffic away from Sandiacre, Kirk Hallam and Ilkeston. Adding more homes and potentially another 400 cars is sheer lunacy.
1.5	South West of Kirk Hallam	Road Safety	Stephen Palmer	Response-00311	Greater traffic numbers through Kirk Hallam .
1.5	South West of Kirk Hallam	Road Safety	Stephen Syson	Response-00032	Speeding traffic during normal times make crossing the roads hard at the best of time, the cameras never work and frequently the few crossing are abused by driving running red lights.
1.5	South West of Kirk Hallam	Road Safety	Steven Street	Response-01264	The idea for a community centre opposite the relief road is crazy needing a crossing lights close to the junction with Ladywood Road and creating a precedent to build on other side of the relief road Also there are numerous footpaths over relief road causing numerous crossings slowing road traffic up
1.5	South West of Kirk Hallam	Road Safety	Tracy Lee	Response-00988	With the congestion and proposed increase in traffic from the developments in this area it is an accident waiting to happen and already has with 2 RTCs in close proximity to each other but at different times. There is limited safe crossing points and with a bypass it is storing up trouble for the future

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	School Capacity	Cllr Simon Mabbott	Response-01480	1/. Inadequate Education Provision for a Major Housing Development The proposed construction of 1,000 new homes will place unsustainable pressure on school capacity in Kirk Hallam and the surrounding area. Without a full and forward thinking education plan, the development risks overwhelming local schools and disrupting families. 2/. Junior School Alone Is Not Enough While the developer has pledged to build a new junior school, this addresses only a fraction of the educational need. No provision has been confirmed for secondary education a serious oversight given the number of families and school age children expected to move into the area. 3/. Local Secondary Schools Are Already Full Secondary schools in and around Kirk Hallam are already operating at or near capacity. Many are among the largest and most sought-after in the borough. A significant number of students already travel in from out of area most arriving by car, placing further strain on school resources, infrastructure, and nearby roads during peak hours. 4/. Increased Travel, Increased Congestion Without local secondary school options, families will be forced to send children to out-of-area schools, relying heavily on cars or school buses. This will compound congestion along already overstretched routes, including Ladywood Road, Quarry Hill, and Sow Brook Lane adding more traffic to roads already under daily strain. 5/. Disruption to Family Life and Community Ties A lack of nearby secondary provision could lead to children being placed in schools away from their friends or siblings. Parents may be left to juggle multiple school drop-offs, long commutes, and logistical headaches. These disruptions not only increase daily stress but weaken community cohesion and support networks. 6/. A Serious Gap in Long-Term Planning The proposal to build a junior school may seem like a positive step, but it falls short of what is needed. A development of this scale requires a full education strategy, one that includes secondary and post 16 (sixth form or college) education. Without this, the plan is incomplete and puts long term educational access at risk. 7/. Conclusion: School Infrastructure Cannot Support the Strain While the junior school proposal is acknowledged, the development remains critically under-supported in terms of educational infrastructure. Kirk Hallam already accommodates a large and growing student population. Without new secondary school capacity, the area simply cannot absorb additional demand without significant consequences for education quality, traffic flow, and family wellbeing.
1.5	South West of Kirk Hallam	School Capacity	Daniel naylor	Response-01510	Secondary school places in the area are already at a small scale. An extra 1000+ houses would make some children have to travel miles to get to school due to limited places. Some children already have to travel miles out of town to attend the nearest available school with places available.
1.5	South West of Kirk Hallam	School Capacity	Devan Meehan	Response-01406	It's not just primary school spaces that are needed, nursery and secondary school space too
1.5	South West of Kirk Hallam	School Capacity	FAY SEXTON	Response-01409	It is important that children in the Kirk Hallam area should be able to take up school places in their home area and that sufficient funds are made available for this to happen.
1.5	South West of Kirk Hallam	School Capacity	Fiona Turner	Response-01362	The plans state the provisions to build a new school, but will it? The local schools are already great pressure as they are full. Not only are local schools of Kirk hallam, taking capacity up with local residents children but also children out of the area. This is because schools out of the area, are not so sort after or already full themselves. Teaching staff is also another worry. It's ok promising to build new school, if it happens, but who will staff them?
1.5	South West of Kirk Hallam	School Capacity	GARY MARK WOODHOUSE	Response-01451	kirk hallam Community Academy children aged 11-18, pupil capacity 1202 , it has 814 enrolled atm Ladywood Primary School children aged 3 - 11, pupil capacity 270, it has 321 enrolled atm, it is OVERSUBSCRIBED Saint John Houghton children aged 11-16, pupil capacity 606, it has 685 enrolled atm, it is OVERSUBSCRIBED Dallimore Primary and Nursery School aged 2-11, pupil capacity 315, it has 353 pupils atm, Oversubscribed, as you can see from these figures all accept one are oversubscribed the 1000 houses development would mean a massive influx of students to the Kirk hallam area exasperating the availability of school places with also the developers under no obligation to build any new secondary schools making it unsustainable or viable to build all these 1000 houses
1.5	South West of Kirk Hallam	School Capacity	John mainstone	Response-00967	School places are already oversubscribed
1.5	South West of Kirk Hallam	School Capacity	Josh August	Response-00090	Schools already have classes that have too many children per teacher. Plans to build a new primary school but what about once they leave there and go on to secondary schools. The education of the children is already being hindered by class sizes, they don't need more
1.5	South West of Kirk Hallam	School Capacity	Lisa Attenborrow	Response-01367	Not enough school spaces in the village. 2 primary schools and 2 high schools. The 2 high schools serve surrounding areas as well.
1.5	South West of Kirk Hallam	School Capacity	Margaret Bannister	Response-01190	6. Impact on Local Schools Local schools are already oversubscribed: ? St John Houghton Catholic Voluntary Academy: 685 students enrolled as of 2023, with a high occupancy rate and limited capacity for additional students.( Capacity 606) ? Kirk Hallam Community Academy: Approximately 814 students aged 11?18, with a student-teacher ratio of 13:1. ? Dallimore Primary & Nursery School: Approximately 353 students aged 2?11, with a pupil-teacher ratio of 21.7. Operating near full capacity ? Ladywood Primary School: Approximately 340 students aged 3?11. An influx of families would place even greater strain on educational resources, risking overcrowded classrooms and reduced quality of education. I understand there are plans for a junior school on the site, but is way down the development and before that residents of the new housing development will require places in our current local schools. Plus there are no plans for senior education and our schools are already part of other areas catchment area in including the proposed development at Spondon...which results in more traffic volume with school commuter traffic.
1.5	South West of Kirk Hallam	School Capacity	Michaela Hickinbotham	Response-00229	There are 2 junior schools and 2 secondary schools, yes there will be a junior school? And I presume the secondary schools will have places for the students which equals more traffic on Abbot Road and Godfrey Drive because heaven forbid the little darlings won't want to walk down or up a hill.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	School Capacity	Michelle Colliver	Response-01332	Kirk Hallam is served by several educational institutions catering to various age groups. Below is an overview of their capacities and current enrolments: Kirk Hallam Community Academy: This secondary school serves students aged 11 to 18. It has a capacity of 1,202 students, with 814 currently enrolled, operating at approximately 68% of its capacity. Ladywood Primary School: Catering to children aged 3 to 11, this primary school has a capacity of 270 pupils. Currently, it is over-subscribed, with 321 pupils enrolled, equating to about 119% of its capacity. Saint John Houghton Catholic Voluntary Academy: A Roman Catholic secondary school for students aged 11 to 16. The academy has a capacity of 606 students, with 685 currently enrolled, operating at approximately 113% of its capacity. Dallimore Primary & Nursery School: Serving children aged 2 to 11, this primary school has a capacity of 315 pupils. It is currently over-subscribed, with 353 pupils enrolled, equating to about 112% of its capacity. A major concern in the revised Core Strategy Review (CSR) is the removal of financial contributions previously allocated for education provision. This decision is particularly alarming given that all but one school in Kirk Hallam are already operating at or above capacity?before accounting for the significant influx of pupils that a 1,000-home development would generate. Removing funding for school expansion or new educational facilities will place unsustainable pressure on existing institutions, leading to overcrowded classrooms, reduced quality of education, and increased stress on both staff and students. Without proper investment, the development risks severely compromising the educational opportunities for both current and future residents, making it fundamentally incompatible with the principles of sustainable and inclusive community planning.
1.5	South West of Kirk Hallam	School Capacity	Mr J Edwards	Response-01355	Locals schools are at capacity now - this will be a massive strain on school places
1.5	South West of Kirk Hallam	School Capacity	Mrs Beverley Anne Harrison	Response-01118	Kirk Hallam currently has 2 primary schools ? Ladywood and Dallimore. Having seen the Government?s Website of school information (at 3/5/2025) both primary schools are currently oversubscribed. In addition, Kirk Hallam is home to 2 of the only 3 secondary schools in Ilkeston ? Kirk Hallam Community Academy and St John Houghton Catholic Voluntary Academy. Information for the 2023/24 school year shows St John Houghton has now become oversubscribed by over 13%, (606 capacity ? 685 students) whereas KirkHallam Community Academy has some available spaces. However, it appears both these schools had an increased number of pupils over the previous year. The third Ilkeston Secondary School (not located in Kirk Hallam) ? the Ormiston Ilkeston Enterprise Academy is also oversubscribed. Kirk Hallam secondary schools take children from all Ilkeston from as far away as Cotmanhay in addition to children from Kirk Hallam families who occupy many of the existing around 2,700 homes. Given another 1,250 family houses in Kirk Hallam itself plus 1,000 houses just a short walk away at the New Stanton brownfield site and possibly some from Spondon Wood, how can these schools feasibly cope with additional children from more homes than already exist on the estate (which equates to a population that could possibly increase from around 6,400 to in excess of 16,000) plus other local Erewash locations without significantly increasing the number of classes, class sizes or affecting the quality of education provided?
1.5	South West of Kirk Hallam	School Capacity	Rachael Winfield	Response-01539	Primary school is needed and great idea to build one, but what about senior school? Kirk Hallam Community academy is already over subscribed, but is under funded, no equipment. Maybe fund the schools already there rather than build brand new one?
1.5	South West of Kirk Hallam	School Capacity	Rachel Brown	Response-00031	Why is capacity for secondary age kids no longer been included in this plan.
1.5	South West of Kirk Hallam	School Capacity	Russell Bannister	Response-01360	6. Impact on School Capacity The proposed development of 1000 new houses will place significant pressure on school capacity in Kirk Hallam and surrounding areas. Junior School Provision Only: While the developers have stated an intention to build a new junior school, this only addresses part of the problem. There is no confirmed provision for secondary school places, which will be essential given the scale of the development and the number of families expected to move in. Secondary Schools Already Overburdened: Local secondary schools are already operating at or near full capacity. Kirk Hallam and the immediate area host some of the largest and most in-demand schools in the borough, and many students from outside the area already travel here?primarily by car?adding to morning congestion and increasing pressure on school infrastructure and nearby roads. Longer Travel, Greater Congestion: Pupils travelling to out-of-area secondary schools will likely rely on cars or school buses, contributing further to traffic congestion?especially along key routes like Ladywood Road, Quarry Hill, and Sow brook Lane, which are already overstretched. Disruption to Families: A lack of local secondary options could lead to children being separated from their peers or siblings, and parents having to juggle complicated school commutes. This adds stress to daily life and undermines community cohesion. Lack of Forward Planning: Simply providing a junior school does not address the full educational needs of an expanded population. There must be a comprehensive, long-term plan for all age groups, including secondary and sixth form education. In conclusion, while the junior school proposal is noted, the development remains inadequately supported in terms of overall education infrastructure, particularly at secondary level. Kirk Hallam already accommodates a high number of students, including those from outside the area, and cannot absorb additional demand without significant negative impacts on access, traffic, and education quality.
1.5	South West of Kirk Hallam	School Capacity	Simon Reeve	Response-01081	There simply isn't enough resource for the children already attending school in the area. There hasn't been needed investment and it's only getting worse with needs for investment in SEND taking investment from the mainstream; they cannot cope with the demands already. Schools are already struggling and letting children down; we drive 40 minutes each way to a school for our daughter as the local schools are poor due to already being overstretched and under invested in
1.5	South West of Kirk Hallam	School Capacity	Stephen Palmer	Response-00311	The schools cannot cope now .
1.5	South West of Kirk Hallam	School Capacity	Stephen Syson	Response-00032	The 3 senior schools we have are already over subscribed , where are those from the new primary school going?
1.5	South West of Kirk Hallam	School Capacity	Steven Street	Response-01264	Need more schools for huge population explosion
1.5	South West of Kirk Hallam	School Capacity	Tracy Lee	Response-00988	We have just three secondary schools left in-this area, by building more dwellings in this area it will overburden the capacity that we have.
1.5	South West of Kirk Hallam	School Capacity	William Moore	Response-01259	Over loads schools

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Traffic Congestion	Christopher Chambers	Response-00173	A development of 1000 houses is likely to bring around 1500 vehicles. How is the local authority anticipating the integration into the existing road networks without substantial consequence to road users? Ladywood Road to Spondon is nose-tail at peak times, the village of Ockbrook and the cut-through to A52/M1 is already in a terrible state due to existing traffic flow at one end and Stanton Road/ Hallam Fields is virtually impassable at the other end. This development can only be considered with serious and substantial investment in the surrounding road network. The inclusion of a school, whilst admirable, will need to provide capacity for at least 1000 pupils and is likely to be under-subscribed due to the popularity of other existing schools (which will have negative impacts on traffic flow in the area).
1.5	South West of Kirk Hallam	Traffic Congestion	Cllr Simon Mabbott	Response-01480	1. The Bypass Will Not Reduce Congestion - It Will Shift It Rather than easing congestion, the proposed bypass will simply divert traffic to the already overwhelmed Bulls Head/Quarry Hill roundabout. This key junction is used by vehicles accessing Ilkeston and is already a known congestion point. Adding more traffic will only exacerbate existing delays without providing any meaningful relief for local residents who already face daily gridlock. 2. Kirk Hallam Residents Have Limited and Worsening Access to Ilkeston Kirk Hallam residents primarily rely on Quarry Hill Road to reach Ilkeston a journey of just 1.3 miles that should take about 8 minutes. However, due to heavy congestion and inefficient junctions, this trip now often takes 20?25 minutes or more during peak times. The only alternative is a 4.7-mile detour through West Hallam, increasing time, fuel costs, pollution and inconvenience. As Ilkeston is the nearest hub for shopping, healthcare, public transport, and schools, this restricted access directly affects the daily lives and well-being of the Kirk Hallam community. 3. A6096 Roundabout Will Create New Delays and Hazards Introducing a roundabout on the fast-moving A6096 (Ladywood Road), which carries significant traffic from Derby, will: Force Kirk Hallam drivers to yield to high-speed vehicles, Create longer wait times when exiting the area, Increase the risk of accidents in a location ill-suited for frequent stopping and merging. 4. St Norbert Drive / Godfrey Drive ? A Known Accident Hotspot The junction near the Cat & Fiddle pub is already an accident-prone area. Increased queuing and traffic from the new A6096 roundabout will worsen safety risks and further raise the likelihood of collisions at this location. 5. Bulls Head / Quarry Hill Roundabout ? Already Gridlocked This roundabout currently suffers from regular gridlock due to high volumes of car traffic, school runs, and HGVs. It causes: Significant delays for residents, Disruption to public transport, Dangerous delays for emergency services. Feeding additional traffic from a new bypass and development into this congested hub will only compound the problem. Also planning has recently been granted for 5 residential flats and a shop which is only going to make the situation worse. 6. Sow Brook Lane Roundabout ? Yet Another Obstacle The proposed roundabout at Sow Brook Lane presents another barrier for Kirk Hallam residents. It will require them to yield to faster-moving bypass traffic, with no lights or priority system to ensure fair access. This adds to the difficulty of entering and exiting the area. 7. The Cumulative Impact ? Kirk Hallam Boxed in by Congestion With multiple new roundabouts and bottlenecks planned at every major exit, Kirk Hallam faces the risk of being completely surrounded by traffic congestion. Road access is already strained, and these developments would isolate the community further making even routine journeys increasingly difficult and stressful.
1.5	South West of Kirk Hallam	Traffic Congestion	Daniel naylor	Response-01510	A by pass for kirk hallam doesn't go far enough. All this does is divert traffic from upper ladywood road to where 12 houses are. A by pass would need derby road including in it and going much further than 12 houses towards Sandiacre. Sandiacre and stanton by Dale are already busy traffic routes, this development would gridlock those 2 areas at peak times.
1.5	South West of Kirk Hallam	Traffic Congestion	Debbie Launders	Response-01293	Traffic is already congested through Kirk Hallam so any additional housing will increase congestion.
1.5	South West of Kirk Hallam	Traffic Congestion	Devan Meehan	Response-01406	The a6096 is already full of traffic, adding a junction will make it a lot worse
1.5	South West of Kirk Hallam	Traffic Congestion	Emma	Response-01265	The area is comprised of narrow small lanes that see around 3 overturned vehicles per year. Adding 1000 houses to this area without the correct road infrastructure would be catastrophic and a danger to life. The roads are not gritted in winter and they are not cared for with numerous huge potholes. The lanes are single car and you often need to pull into passing spaces. The pollution from the cars will damage the green belt.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Traffic Congestion	FAY SAXTON	Response-01409	The people of the village of Kirk Hallam and surrounding areas experience severe traffic congestion every day, leading to a great deal of stress, time wasted and real safety issues, underlined by a recent accident on the A6096 towards Bulls Head roundabout. Many of the users are children going to and from school, giving rise to an urgent need for clear measures to protect their safety. There are plans for new homes and a retail outlet at Bulls Head roundabout, both opening onto this totally overwhelmed location. Further, the plans for c 2000 new new homes at Kirk Hallam and Stanton will massively and unreasonably add to an already impossible situation. The worst thing the Council can do is to simply add to the gridlock by allowing these new developments. It is unreasonable for the Council to expect local people to tolerate the situation as it is, let alone knowingly add such an unthinkable number of homes, many with several vehicles, to the problem. The Council consider that creating a Relief Road around Kirk Hallam will solve the problem. Local people know it will not. Joined by an increasing number of HGVs already existing and certain to increase exponentially as the previous Stanton Ironworks develops and with thousands of new occupants/workers from the new housing developments, the congestion problem will not only continue but worsen. Both new vehicles and existing vehicles will vie for places at the new roundabout at Sow Brook in order to access the Relief Road. The Council choose to play down how busy and potentially dangerous that road will be by labelling it a Relief Road, whilst instructed consultants SYSTRA call it for what it will be, a By-Pass, with all the dangers from HGVs, traffic and fumes that entails. The Council refer to multiple exits for new residents along the Relief Road, but getting their cars out to go to work in the morning will involve considerable difficulty, and who would relish squeezing in between HGVs, let alone risking their safety on a bike, or their children's safety? Crossing such a road to the inappropriately located so called "Local Centre" which is neither Local nor a Centre, is in fact only accessible by crossing the dangerous busy Relief Road itself. It can only safely be accessed by motorists, not residents. Then there is the proposed new roundabout junction at Sow Brook which reliably floods every winter, and with all the new developments, the only outcome will be complete standstill. The developers will claim to be able to stop the flooding, but we all remember when even Ilkeston Train Station was under water together with much of the locality resulting in a Climate Emergency being declared on 26.10.23. And when drivers reach the other end of the Relief Road, having met HGVs from other delivery businesses such as the depot at West Hallam coming in the opposite direction, where will those drivers actually go and what impact will they have? Previous MP Maggie Throup called the Relief Road "A road to nowhere." I believe it will be a "a road to chaos". The choices will be return to the A6096/Bulls Head queue, head through Stanley residential village with parked cars causing little road width and having suffered badly with potholes till recently resurfaced, head through Ockbrook, another residential village with parked cars, with an amazing proliferation of potholes, until recently resurfaced also, or through Spondon Village to reach the A52, unsuitable for HGVs with only the smallest of roundabouts.
1.5	South West of Kirk Hallam	Traffic Congestion	FAY SAXTON	Response-01409	uts. Please do not forget our rural roads where our farming tradition continues - where people used to get lost until the advent of Google Maps. Dale Abbey residents are rightly worried about the impact of so much residential development giving rise to numerous cut throughs at speed, already a problem but likely to be vastly increased, causing potential real dangers not only to farmers with their machinery but to residents and their children, walkers, horse riders, cyclists and the many visitors who come to enjoy this beautiful area. SYSTRA have looked only at wider road networks, but what impact assessment has the Council requested as to the impact on the people who actually live on these streets and lanes, the people and the farmers who live around the Green Belt? The outlook is bleak for those who live and work in this area and will be until people are listened to and their concerns acted upon. Will people really actually want to come and live in such an area that is quite literally stuck? What happened to growth, prosperity and quality of life?
1.5	South West of Kirk Hallam	Traffic Congestion	Fiona Turner	Response-01362	The congestion of traffic is already under a lot of pressure. Monday- Friday the area is congested beyond belief. I work in the local community and getting from Kirk hallam into Ilkeston mon-fri, takes 25 minutes, weekends takes 8 minutes. This is purely due to the congestion created by work traffic, school traffic. Let alone the disruption the road works would create. The roads are dangerous as they are, they aren't fit for purpose due to all the pot holes and the congestion and road works only will make this worse. Before adding to these pressures, this should be looked at first. Stopping this traffic coming through from sowbrook lane and into Kirk Hallam. Which they do to avoid the congestion up on quarry hill and bulls head. Which has temporary traffic lights all the time which cause even more congestion. Which was created when they stopped access to midland storage (or whatever it's called now) from west hallam.
1.5	South West of Kirk Hallam	Traffic Congestion	GARY MARK WOODHOUSE	Response-01451	Traffic volume is increasing weekly if not also at a daily rate in the Kirk Hallam area, gridlock occurs every day as far as The Cat and Fiddle public house to the Little Hallam Hill junction with Quarry Hill Road and Stanton Road numerous times throughout the day causing substantial queuing and holdups, Heavy Goods Vehicles ( HGVs) are now a major part of the problem due to the areas development of New Stanton Park which is just around the corner, this will increase traffic congestion massively over the next 10 years, the proposal to build a new bypass to the south west of Kirk Hallam is just going to send more traffic to this area with the massive housing development of 1000 houses at the side of this road / bypass with 1000s more cars added to this area surely common sense would say no to the South West of Kirk Hallam Development and further gridlock
1.5	South West of Kirk Hallam	Traffic Congestion	Gregory Robin Watts	Response-01297	The proposed housing will put massive strain on the already inadequate road network especially in conjunction with the development of the industrial site at New Stanton. Traffic flows will increase through Stanton by Dale and Dale Abbey as drivers search less congested routes to Jn 25 on the M1. This will lead to increase pollution and noise for residents who live a matter of metres from these routes.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Traffic Congestion	Jo	Response-01257	A6096 already has had RTA including fatal pedestrian and equine. The relief road won't take off this road. The junctions at cat and fiddle lane and into Dale abbey are not suitable now, never mind with increased traffic. They need cameras lower mph,proper boxed areas. Turning right is risky, with large verticals passing both sides. The Nursery exists onto a single lane with no markings so two cars cannot safely pass meaning if you're waiting to turn into the nursery, making a right turn, and someone comes out, your stuck waiting in a 50 mph road! Try it. It's not nice, especially when a bus comes gets on flying. Already traffic will be increased from the houses on the loco Estate. Pedestrians getting to a bus stop have nowhere safe to cross. Who should be crossing a 50mph road? No-one, but what choice do we have? In winter after 4pm, you are doing it in the dark. You may not think many cross this road,but consider all the footpaths, bus stops, horse riders and cyclists, cross at least two points. That's just not going to be possible with more traffic. Pegasus crossings are used in other areas.
1.5	South West of Kirk Hallam	Traffic Congestion	John mainstone	Response-00967	Traffic congestion in Kirk Hallam is already a big issue a by pass road would do nothing to alleviate this because of the sheer numbers of houses in the development
1.5	South West of Kirk Hallam	Traffic Congestion	Jon Watkin	Response-00414	There is a problem with traffic congestion and safety at the 12 houses junction . As the Kirk Hallam relief road is built and the 1000 houses built along with the finalisation of the commercial development on the former Stanton site there is no plan in place to build a new junction at Twelve Houses . There is only a possible intention for funding from the development of houses on the Stanton site. These plans are at the moment intentions with no assurance the development can and will take place . If it is eventually realised how long after the completion of the other sites? There is no guarantee that the eventual development of houses at Stanton will be able to fund the required road development. This could mean the need for junction improvement then goes into another queue for funding and that queue is a long queue with waiting times going into years while the has to be lived with , and to authorities hope road users will find their own way to avoid the site! Not a pro-active decision .
1.5	South West of Kirk Hallam	Traffic Congestion	Josh August	Response-00090	Traffic within Kirk Hallam is horrendous already. We do not need more houses especially over 1000 more, that will average 2 cars per household. Kirk Hallam and surrounding areas cannot cope with it
1.5	South West of Kirk Hallam	Traffic Congestion	kimberley grabham	Response-00306	The traffic trying to leave kirk hallam whether trying to get to Nottingham or Derby is already horrendous. I moved 3 miles to live in Kirk Hallam but have added on an extra 35 minutes to the same journey to work! with additional houses and cars I could be up to 1 hour +. As a nurse that works shifts you would add on an extra 2+ hours to my day!
1.5	South West of Kirk Hallam	Traffic Congestion	Lisa Attenborrow	Response-01367	Kirk hallam is already congested at peak times although it seems to happen all the time now.
1.5	South West of Kirk Hallam	Traffic Congestion	Margaret Bannister	Response-01190	. Traffic Congestion and Mental Health Impacts Our roads are already experiencing extremely high levels of congestion, particularly at peak times, resulting in long queues of vehicles across, Kirk Hallam, Bull Head Road and Ilkeston Increased vehicle volume and HGV usage will make our local roads more dangerous and less accessible, with greater risks of accidents and fatalities. These conditions directly affect public health. Prolonged exposure to traffic fumes contributes to respiratory issues, especially among children and the elderly. Noise pollution from traffic and HGVs disrupts sleep and contributes to chronic stress and elevated blood pressure. Daily commuting stress and long travel times reduce quality of life and negatively impact mental health increasing anxiety and reducing overall wellbeing. Adding 1000 houses to the area of Kirk Hallam will only lead to further significant increase of vehicles, exacerbating delays and gridlock. The loss of time and accessibility of services, such as health care, employment and education due to traffic delays further worsens quality of life for local residents. All of the above is especially burdensome for working people, carers and those with school runs or medical appointments, including emergency service users trying to negotiate standing traffic when trying to attend an emergency call, which could result in being delayed and possible loss of life. For a community that is already dealing with high volumes of traffic, the addition of hundreds of more vehicles daily due to the proposed developments will only amplify the frustration which we already have to endure.
1.5	South West of Kirk Hallam	Traffic Congestion	Michaela Hickinbotham	Response-00229	Having lived in the Village of Kirk Hallam all my life I have witnessed the increased traffic that we get through our one main road (Ladywood Road). From 07.30 until 09.30 traffic is increased due to the 4 schools already in Kirk Hallam and also from 14.00 until 17.30/18.00 (approximately) with queuing traffic as far back as Ladywood School going up Bulls Head. Traffic also queues on Abbot Road and Godfrey Drive and at times as been joined in the middle on Godfrey Drive going either way with traffic trying to get out onto Ladywood Road. Your traffic surveyor years ago when this was being planned choose to walk the length of Ladywood Road with her iPad taking pictures showing hardly any traffic, this is because it was done in the school holidays ( convenient).
1.5	South West of Kirk Hallam	Traffic Congestion	Michelle Colliver	Response-01332	Traffic congestion around the Bulls Head junction and through Kirk Hallam has become increasingly frustrating for local residents and commuters, with long delays especially during peak hours. The bottlenecks near Little Hallam Hill, Quarry Hill Road, and Hallam Fields Road are notorious, with vehicles often queuing for extended periods due to poor road infrastructure and high volumes of traffic. Adding to the problem is the significant number of heavy goods vehicles (HGVs) using these routes daily, largely due to two major local distribution centres operating nearby. These large vehicles contribute to slower traffic flow, increased wear and tear on the roads, and added noise and air pollution. These daily delays aren't just an inconvenience?they're taking a toll on people's mental health. Regular exposure to heavy traffic can lead to increased stress, anxiety, and a sense of helplessness, especially for those trying to get to work, appointments, or pick up children from school. Many locals report a rise in road rage and feelings of burnout simply from navigating their own neighborhood. The proposed development of 1,000 new homes in South Kirk Hallam would only worsen the problem, funneling hundreds of additional vehicles onto already overburdened roads. While a 40mph bypass road has been proposed to ease the pressure, it offers little real relief, as it simply redirects traffic back to the Bulls Head junction from a different direction?failing to resolve the root of the congestion and potentially shifting, rather than reducing, the problem. Without a comprehensive traffic management solution, the area faces worsening gridlock and growing impacts on residents' wellbeing.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Traffic Congestion	Mr J Edwards	Response-01355	The traffic congestion is terrible through Kirk Hallam and quarry hill/bulls head. How this can even be contemplated is beyond me. Ilkeston is gridlocked even without this development - it will be catastrophic!!
1.5	South West of Kirk Hallam	Traffic Congestion	Mrs Beverley Anne Harrison	Response-01118	In recent years Kirk Hallam has become perhaps the most congested area in Erewash on a daily basis with heaving, time consuming, bumper to bumper, traffic queues to/from Ilkeston through and around Kirk Hallam. The bypass can't relieve this as it increases traffic around and within Kirk Hallam, with the 'relief' road becoming what a former MP referred to as a 'road to nowhere?'. Add to the bypass adjoining roads with 'more roundabouts than a funfair' and traffic light control reacting against each section of road, causing longer delays and congestively clogging the area whilst, within the current estate. Thus:- 'those dropping kids off at Kirk Hallam's two of only 3 Ilkeston secondary schools; 'both current and hugely expanded amounts of new residents vehicles; 'traffic gaining access through the area and massively increased HGV and 'New Industry work traffic will all struggle to escape the unhealthy, congestive, pollutive and enraging entrapment. Add too a proposed future Junction 25a to the motorway as well as the 'relief' road and roads to and from Ilkeston all look set to become little more than a perpetual 'rat run' through an area whose already struggling infrastructure simply cannot safely cope. Also, with so many homes remaining to be assigned from updated Erewash allocations, if the 'shelved' former SGA23 is revived down the border of the Godfrey Drive side of the estate, around 850 more houses plus a relief road extension towards Straws Bridge at Derby Road would effectively result in creating an encircling fast track bypass around Kirk Hallam.
1.5	South West of Kirk Hallam	Traffic Congestion	Nick Jackson	Response-01260	You are bringing an extra ++ 2,000 cars on to our congestion roads.
1.5	South West of Kirk Hallam	Traffic Congestion	Paul Wright	Response-01261	The A6096 through Kirk Hallam is already at capacity. Accessing along the road towards Little Hallam Hill to gain access to Ilkeston is extremely congested with many HGV's that are unsuitable for the roads, creating noise and pollution for residents en route. An additional 1000 houses will add to congestion via the extra vehicles entering and leaving the proposed new site.
1.5	South West of Kirk Hallam	Traffic Congestion	Rachael Baines	Response-01403	The roads are at capacity
1.5	South West of Kirk Hallam	Traffic Congestion	Rachael Winfield	Response-01539	Whilst the relief road is needed, this won't help with congestion, already Stanton Road, Quarry Hill are busy especially peak times. With the building on Stanton will make even more traffic, especially larger vehicles.
1.5	South West of Kirk Hallam	Traffic Congestion	Rachel Brown	Response-00031	The road from Kirk Hallam to Ilkeston is congested every morning and evening. The island at the old Bulls head is inadequate. These roads are not suitable for the increased traffic that the additional housing will bring.
1.5	South West of Kirk Hallam	Traffic Congestion	Renars Letkovskis	Response-00951	We already can't get to Ilkeston, it's too busy everywhere, pollution in Kirk Hallam is awful, and the air is not as fresh as it used to
1.5	South West of Kirk Hallam	Traffic Congestion	Robert Mee	Response-01580	The creation of the new link road will only go to increase traffic congestion at the junction with Ladywood Road and also at Twelve Houses (and also at Spondon and in West Hallam, as it will be used as an alternative route, particularly when there are problems on the trunk roads). The amount of traffic that is likely to use this road will affect air quality in the area.
1.5	South West of Kirk Hallam	Traffic Congestion	Robert Mee	Response-01509	The creation of the new link road will only go to increase traffic congestion at the junction with Ladywood Road and also at Twelve Houses (and also at Spondon and in West Hallam, as it will be used as an alternative route, particularly when there are problems on the trunk roads). The amount of traffic that is likely to use this road will affect air quality in the area.
1.5	South West of Kirk Hallam	Traffic Congestion	Roger Tranter	Response-01323	There will be a huge increase in traffic movement in an already overcongested area.
1.5	South West of Kirk Hallam	Traffic Congestion	Russell Bannister	Response-01360	1.CONGESTION 1. Bypass Will Not Alleviate Congestion ? Only Displace It Contrary to what may be intended, the new bypass will not reduce congestion. It will simply reroute traffic to an already heavily congested junction?the Bulls Head / Quarry Hill roundabout?for vehicles trying to access Ilkeston. Rather than improving flow, this risks intensifying pressure on a known bottleneck, without offering any practical relief for the daily gridlock experienced by local residents. 2. Kirk Hallam Residents Have Limited Access to Ilkeston Kirk Hallam residents rely almost exclusively on one main route into Ilkeston? Little Hallam Hill or Quarry Hill Road, which already struggles with volume and delays and both takes residents to the Bulls Head junction/ roundabout. The direct route to Ilkeston is just 1.3 miles, and should take around 8 minutes. In reality, due to traffic congestion and poorly managed junctions, this journey now takes 20 to 25 minutes or more during peak hours. The only alternative route is via West Hallam, which is approximately 4.7 miles, adding significant time and fuel costs to every trip. Ilkeston is our nearest town for shopping, healthcare, public transport connections, and schools. Making this access more difficult undermines the well-being of the entire Kirk Hallam community. 3. Increased Congestion from A6096 Roundabout The A6096 (Ladywood Road) is a fast-moving, 50mph route with significant traffic coming from Derby. Placing a roundabout here will force Kirk Hallam drivers to give way to high-speed traffic. Cause long delays exiting the area. Increase the risk of collisions at a location not suited for increased stopping and merging. 4. St Norbert Drive / Godfrey Drive ? Accident Black Spot The junction of St Norbert Drive and Godfrey Drive, near the Cat & Fiddle pub, is already an accident black spot. Increased congestion and queuing from the proposed A6096 island will worsen safety at this location and increase the likelihood of accidents. 5. Existing Gridlock at Bulls Head / Quarry Hill Roundabout This roundabout already experiences regular gridlock due to a high volume of cars, school traffic, and HGVs. It causes: Severe delays for residents. Disruption to public transport. Risky delays for emergency vehicles. Adding even more vehicles from a new development and bypass into this system will only make the situation worse. 6. Sow brook Lane Roundabout ? Another Bottleneck The second roundabout, planned for Sow brook Lane, will further restrict residents trying to leave Kirk Hallam. Again, we would be forced to give way to faster traffic using the bypass, with no traffic-light control or priority system. 7. Cumulative Effect ? Kirk Hallam Trapped in Congestion With multiple roundabouts and bottlenecks forming at every exit point, Kirk Hallam is effectively being encircled by congestion. The community is already stretched to its limit in terms of road access and traffic volume. These developments would result in Kirk Hallam residents being boxed in, with even basic daily travel becoming increasingly frustrating and time-consuming.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Traffic Congestion	Simon Frost	Response-00684	This end of Ilkeston and Kirk Hallam already contains many roads and junctions which are running at capacity and the influx of more housing would further exacerbate this problem. The Bulls head roundabout is a prime example as well as the junction at twelve houses. The new developments at the former stanton iron works is further adding traffic and congestion to the area. Between Merlin way and Twelve houses the road is not adequate in scale or construction to handle the current levels of traffic. The new relief road proposed will do little to reduce the traffic in the area as it would only be used by residents of the proposed new area or as a cut through which would then mean the twelve houses junction becomes even more congested at peak times. This proposal does very little to solve the capacity problems in the area or add sufficient infrastructure.
1.5	South West of Kirk Hallam	Traffic Congestion	Simon Reeve	Response-01081	The roads simply aren't built for the traffic we already have without adding more homes with more cars; I grew up in West Hallam (High Lane East) in the 80s, spending time in West Hallam Village, Kirk Hallam all around Ilkeston. There were approximately 1 car for every 2 homes thinking back to friends and neighbours in the areas, now theres 2 or more per house and many more houses. The present roads infrastructure is woefully inadequate with too much traffic on Ladywood Road and frequent accidents at the junctions for top and bottom of the estates in Kirk Hallam. The traffic getting in to and out of Ilkeston up to the Bulls Head island is horrific backing up to the lower estate junction multiple periods each day; also backing up to White Lion Square coming back to Kirk Hallam. The road past Quarry Hill is good but again at the Bulls Head end and also at 12 Houses the roads are unsafe and smashed kerbs evidence of too much heavy traffic for the road. The Kirk Hallam estate creates a lot of cut through traffic to 12 Houses already trying to avoid the jams yet causes more dangers on an unsafe corner junction. The recent over development of the old Stanton site has chaos and danger both towards Ilkeston and Sandiacre as the roads were simply not built for this level of traffic. Whilst I don't agree withthuch of Maggie Throup's ideas the J25a at Stanton was a needed investment to take traffic away from Sandiacre, Kirk Hallam and Ilkeston. Adding more homes and potentially another 400 cars is sheer lunacy.
	South West of Kirk Hallam	Traffic Congestion	Stephen Palmer	Response-00311	Why are you proposing a 40 mph road when Ladywood Road is only 30 mph. How would animals cross the road safely.
1.5	South West of Kirk Hallam	Traffic Congestion	Stephen Syson	Response-00032	More congestion due to school run etc, travelling from Derby to Ilkeston at rush hour can take up to 1 hour from Kirk Hallam to Ilkeston town centre, more pollution from the extra traffic, relief road may be used by boy racers like Chalins way is.
1.5	South West of Kirk Hallam	Traffic Congestion	Steven Street	Response-01264	The relief road is pointless as it will massively increase traffic through Ockbrook and Spondon no one will use it for Ilkeston as that's gridlocked Most days Lorrie?s will still go to sandiacre as best route to A52 and M1
1.5	South West of Kirk Hallam	Traffic Congestion	Sue Knott	Response-01268	Roads are busy enough without extra traffic in a built up area
1.5	South West of Kirk Hallam	Traffic Congestion	Sue Shaw	Response-00304	The congestion on Ladywood road is, at times, ridiculous, in particular when there are road works, so a proposed ongoing development will create havoc. Ah, a relief road...how long would that take to be built? Will we still be allowed cars by then?
1.5	South West of Kirk Hallam	Traffic Congestion	Tracy Lee	Response-00988	Congestion is already a major issue in the area of Derbyshire with the raids backing up daily and making it difficult to get anywhere on time thus increasing pollution and poor air quality. With this comes the potential for accidents, and the ability for those with mobility issues. To add traffic from the proposed development and the existing developments nearing completion is madness and counter productive and costly to the council.
1.5	South West of Kirk Hallam	Traffic Congestion	William Moore	Response-01259	Encourages more traffic
1.5	South West of Kirk Hallam	Type of Housing	Aubrey Bacon	Response-01181	The 10% affordable housing, 'if viable', needs to be explained. It is seen by the general public as a 'get-out-of-jail free card' to be played when no actual affordable housing is included once the build is completed. The criteria should be clearly explained up front not hidden away in legal jargon elsewhere. A council member should champion this and hold the developer's feet to the fire to ensure that it happens and the get-out-of-jail card is not played.. Developers who default should be debarred from tendering for future business.
1.5	South West of Kirk Hallam	Type of Housing	Cllr Simon Mabbott	Response-01480	1/. Failing to Meet Local Housing Needs The proposed development of 1,000 homes does not align with the genuine housing requirements of the Kirk Hallam community?falling short in affordability, accessibility, and demographic relevance. 2/. No Provision for Accessible or Senior Friendly Homes The plan fails to include bungalows or single-storey homes, which are vital for older residents and those with mobility challenges. Kirk Hallam has a growing elderly population in need of safe, accessible housing within their existing community. Instead of offering suitable downsizing options, the proposal prioritises larger, less accessible family homes that are often unaffordable or impractical for those most in need. 3/. Inadequate Commitment to Affordable Housing The suggested provision of just 10% affordable housing, contingent on financial viability which offers no real guarantees. This minimal and uncertain commitment does little to support young people, key workers, and lower income families who are already struggling to find secure, affordable accommodation in the area. 4/. Focused on Developer Profit, Not Community Need The emphasis on high cost, market rate housing serves developers far more than the local population. Rather than addressing the regional housing crisis, this approach risks pricing out existing residents and undermines efforts to build a diverse, inclusive community. 5/. Missed Opportunity for a Balanced Housing Mix A development of this scale should include a broad range of housing types and tenures?such as affordable family homes, social rent properties, accessible units, and shared ownership options. This is a chance to create a community that supports people at all stages of life. Failing to plan for a varied housing mix raises serious concerns about social exclusivity and long-term sustainability. Conclusion: A Community Left Behind The current proposal overlooks the real housing priorities of Kirk Hallam. Without a clear, inclusive strategy to deliver genuinely affordable and accessible homes, the development risks serving investors, not residents. To meet the true needs of the community, a more thoughtful and balanced approach is essential.
1.5	South West of Kirk Hallam	Type of Housing	Devan Meehan	Response-01406	New builds nowadays are too small with tiny gardens, not good enough housing attracting undesirable people

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Type of Housing	FAY SAXTON	Response-01409	The majority of houses proposed are closely constructed with small gardens. There will be little scope to create biodiversity from destruction of Green Belt unless green areas with plants, trees and hedges are plentiful, and even then any biodiversity would be minimal in comparison with the natural Green Belt they would replace. There would need to be plenty of provision of green areas for children to play locally and safely. Careful regard needs to be paid to the houses being of sufficient quality to provide resilience to increasing climate change. Only 10% of the houses are proposed to be affordable housing and only if viable. If indeed there is a local housing need as the current administration claim as opposed to Angela Rayner's broadcast statement that Britain has "plenty of houses" and despite local estate agents having a variety of homes for sale, then it would be important for a 10% commitment to be upheld. There are concerns that any new houses would in reality be let out for landlord profit both in the UK and abroad which would lead to an unsettled and ever changing community and would inevitably be disruptive and unsettling for the residents of the current village of Kirk Hallam and for those occupying the new houses. In addition, such occupation would lead to a greater likelihood of crime, inherent with large settlements anyway, to be vastly increased. The lack of a settled community would also have health implications for residents stressed about their personal safety and security and that of their children.
1.5	South West of Kirk Hallam	Type of Housing	GARY MARK WOODHOUSE	Response-01451	No Bungalows for the elderly no nursing homes or social centres not enough affordable housing for the local community all big 3, 4, and 5 bed houses out of the reach of locals bringing in outsiders and creating a new social divide with existing locals
1.5	South West of Kirk Hallam	Type of Housing	James William Allen	Response-01281	Only making 10% of this development affordable seems a ridiculously low target, and smacks of pandering to developers wishes. Given that Kirk Hallam is characterised by relatively affordable housing already - in contrast to West Hallam and Dale Abbey - this percentage should be increased to a minimum of 40%.
1.5	South West of Kirk Hallam	Type of Housing	Margaret Bannister	Response-01190	There is no mention of Bungalows on the proposed development ...with an aging apopulation I think they should be part of any proposed developments.
1.5	South West of Kirk Hallam	Type of Housing	Michelle Colliver	Response-01332	The proposed development in Kirk Hallam, as outlined in the csr, fails to adequately address the housing needs of the area?s aging population. Despite a clear demographic trend toward an older population, the development does not include specific provisions for accessible, adaptable, or supported living accommodations tailored to older residents. In addition, the plan only includes a 10% allocation for affordable housing?and even this is qualified as ?where viable.? This limited provision of affordable homes, combined with the predominance of high-cost new housing, is likely to contribute to increased inequality in the community. It risks creating a social divide between long-standing residents, many of whom may be priced out of the new development, and more affluent newcomers. Without a balanced and inclusive housing strategy, the development could deepen existing disparities and fail to meet the full range of local housing needs.
1.5	South West of Kirk Hallam	Type of Housing	Mrs Beverley Anne Harrison	Response-01118	There are several house sizes (with between 2 to 5 bedrooms) proposed, which are mainly limited to more affluent, higher priced family houses. However, it?s shameful that not as much as one single storey disabled or elderly residence is proposed. Considering the UK is a country with an increased ageing population which, where possible, also actively promotes independent living for persons with manageable or limited disabilities, this is a disgrace. Though there are some older ? already occupied - single storey elderly or disabled dwellings within the existing estate, given the expected overintensifying huge population increase as a direct result of Core Strategy, it is unfair and biased against certain groups in Kirk Hallam to evade additional suitable homes for vulnerable demographics of the community ? especially considering losses over the last few years of such local specialist accommodation as the former Hillcrest Care home which was closed and refurbished into 44 flats. It?s also recently been revealed Ladywood Nursing Home may close.
1.5	South West of Kirk Hallam	Type of Housing	Rachel Brown	Response-00031	A higher percentage of housing should be affordable not executive homes we don?t need.
1.5	South West of Kirk Hallam	Type of Housing	Robert Mee	Response-01580	If this site were to be developed, I believe that a 10% allocation to affordable housing is woefully inadequate.
	South West of Kirk Hallam	Type of Housing		Response-01509	If this site were to be developed, I believe that a 10% allocation to affordable housing is woefully inadequate.
1.5	South West of Kirk Hallam	Type of Housing	Russell Bannister	Response-01360	8. Type of Housing The proposed development of 1000 homes fails to address the real housing needs of the local community, particularly in terms of affordability, accessibility, and demographic suitability. Lack of Bungalows and Accessible Housing: There is no mention of bungalows or single-storey homes, which are essential for elderly residents and people with mobility issues. Kirk Hallam has a growing ageing population who need accessible, downsized housing within their community?not more large family homes that are out of reach or unsuitable. Minimal Affordable Housing Commitment: The proposal includes a provisional target of just 10% affordable housing, and even this is subject to viability. This weak commitment means there is no guarantee that affordable homes will actually be delivered, and it risks pricing out young people, key workers, and lower-income families. Focus on High-Profit Housing Stock: The emphasis appears to be on delivering higher-cost, market-rate housing which serves the interests of developers more than the needs of the local population. This approach does little to solve the regional housing crisis or promote a socially balanced community. Missed Opportunity for Mixed Tenure: A development of this size should include a diverse mix of housing types and tenures, including rental homes, shared ownership options, accessible units, and genuinely affordable family housing. The lack of such planning raises concerns about exclusivity, isolation, and a failure to meet the needs of current and future residents. In conclusion, the proposal does not reflect the real housing priorities of Kirk Hallam and surrounding areas. Without a more inclusive and needs-based approach to housing provision, the development will fall short of serving the community it?s intended for.
1.5	South West of Kirk Hallam	Type of Housing	Simon Reeve	Response-01081	The types of housing isn't too much of a concern, that said all housing developed anywhere in the UK should be legislated to have solar, heat pump etc to ensure self sufficiency as the grid is at breaking point. As are the sewers and refuse collection services that often aren't considered. There needs to be more affordable housing £120k - £280k but not more social housing; more needs to be done for working people on lower wages as they are the group missed out when housing strategy is planned and yet they're working hard and paying taxes

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Type of Housing	Stephen Palmer	Response-00311	We don't want these house . They are only being built to make big profits for the rich . All new houses should be built to accommodate two parked motor cars.
			Steven Street	Response-01264	Need more first time buyer houses Not social housing
1.5	South West of Kirk Hallam	Type of Housing	Tracy Lee	Response-00988	The amount of house that could be brought back into use would negate the need to build more houses and destroy the green belt. Social housing would be priority and with it bring its own problems.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Andrew Corban	Response-01496	Would destroy lots of wonderful wildlife in the area
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Cllr Simon Mabbott	Response-01480	1/. Irreversible Harm to Local Biodiversity and Natural Ecosystems The land to the south-west of Kirk Hallam is a vital part of the local ecosystem, providing essential habitat and green space that supports a wide range of wildlife. The proposed development poses a significant threat to biodiversity, disrupting the delicate ecological balance and permanently fragmenting the natural landscape. 2/. Habitat Destruction on a Large Scale The fields, hedgerows, mature trees, and open green spaces targeted for development are home to a variety of species including birds, bats, small mammals, and pollinators. These habitats would be destroyed or severely disturbed during construction, with no meaningful replacement. Once lost, these ecosystems cannot simply be re-established elsewhere. 3/. Loss of Critical Wildlife Corridors This area currently functions as a wildlife corridor, enabling animals to move safely between woodlands, fields, and hedgerows. The introduction of a housing estate and bypass would sever this natural link, creating a hard barrier that isolates animal populations and disrupts their ability to travel, feed, and breed effectively. 4/. Threat to Legally Protected Species Although a full ecological assessment has yet to be disclosed, it is highly likely that protected species?including bats, hedgehogs, badgers, and nesting birds?are present in the area. Disturbing or displacing these animals without appropriate mitigation would risk violating legal protections and could lead to long-term ecological harm. 5/. Loss of Essential Pollinator Habitats Bees, butterflies, and other pollinators rely on the wildflowers and hedgerows found throughout this green space. Their decline would not only impact local biodiversity but also disrupt the plant life and food chains they support. The wider health of the ecosystem depends on the survival of these species. 6/. Compounding Pressure on an Already Stressed Environment The surrounding area is already under strain from existing development, traffic, and recreational use. Removing even more green space and introducing additional air, noise, and light pollution will only increase the stress on remaining wildlife populations and diminish the area's natural resilience. 7/. Greenbelt Land ? More Than Just Open Space This land is designated Greenbelt for a reason. It serves not only to preserve open countryside but to support environmental health and biodiversity. Once built over, these habitats and ecological functions are gone for good?they cannot be replicated in landscaped gardens or managed green strips. 8/. A Long-Term Environmental Cost If allowed to proceed, this development would inflict lasting damage on the natural environment, reduce local biodiversity, and sever Kirk Hallam?s ecological link to the surrounding countryside. These impacts must be recognised as fundamental reasons to reject, at the very least, drastically reconsider this proposal.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Debbie Launders	Response-01293	The development is in an area of natural beauty and conservation which is under threat from many areas. We need to keep the boundaries between urban areas to allow wildlife and biodiversity to stand a chance of surviving.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Devan Meehan	Response-01406	Losing a lot green space
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Emma	Response-01265	

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	FAY SAXTON	Response-01409	With the current area of Green Belt set to be destroyed at Kirk Hallam now standing at c 50 hectares, its biodiversity will be lost. The development that replaces it appears to be mainly closely aligned homes with small gardens with little or no ability to re-establish diversity. Local people remain deeply upset at this predicted loss and share poignant video footage of it whilst it still remains Green Belt, their over 3000 objections to the development having not been listened to. I am particularly concerned about the future of Pioneer Meadows. I appreciate the Council's recognition of its Green Flag multiple prize winning LNR importance but is this purely lip service? Many developments would not even be considered for fear of disturbing such a biodiverse local asset, especially in a Green Belt setting, strikingly at its beautiful best with its 111 plant Derbyshire County Biological Register record, at this time of year. At the last Inspector's hearing, which I attended, reference to an approach to Derbyshire Wildlife Trust was made to consider sufficiency of measures to protect wildlife and biodiversity. No letter of instruction or actual report formed part of the evidence. Now, the situation has deteriorated for the worse for wildlife/biodiversity as shown in the CORE STRATEGY REVIEW AMENDMENT MAP BOOK on FIGURE 2 SOUTH WEST OF KIRK HALLAM HOUSING ALLOCATION. At present of course, the animals have the benefit of the whole of the Green Belt in which to come and go, so a proposed extension of Pioneer Meadows does not form a benefit for them in itself. To their detriment, that extension continues to lead them to a high chance of death on the Relief Road, especially with no provision stated to help them cross safely into the wider Green Belt beyond. The position now with this latest map is that Pioneer Meadows is virtually enclosed. There is nothing in the Key to the map to indicate what hatching (Strategic Green Infrastructure Corridor) infilled with Orange (Housing Allocation) actually means - does it refer, for instance, to an area where there may or may not be housing so the animals may or may not have sole access, or an area where housing has priority over the animals? Much of the unclarified hatched orange area continues to the south-east as a narrow section, which does not appear wide enough to allow often shy animals to feel safe to use it, given the Orange (Housing Allocation) is so near with its human family noise to deter them. The newly added so called "Safeguarded Land" will ultimately mean more development and yet another route out of Pioneer Meadows will be blocked to wildlife, including deer, badgers, foxes, stoats, hares, rabbits, rodents and hedgehogs etc. The position with birds, including birds of prey, owls, bats, invertebrates and insects including moths needs to be considered, including the need for special low lighting and crossings. Likewise the restriction on biodiversity via plants and fungi needs consideration. I would request the Inspector to ask for a Report/Updated Report to be obtained from the Derbyshire Wildlife Trust on the impact on wildlife/diversity of the whole of the revised proposal shown on this map, plus clarification by the Council/Developers as to what the hatching infilled with orange actually means. These steps are important because Pioneer Meadows is a valuable wildlife/biodiversity asset to both Kirk Hallam and also Derbyshire with its listing on the Derbyshire County Biological Register.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	FAY SAXTON	Response-01409	The Report may lead to important amendments to the extent of land available to animals to move safely and further provisions for their safety, and the chance of the proliferation of plant seeds within and beyond the reserve to increase biodiversity.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Fiona Turner	Response-01362	A new housing development on the edge of a nature reserve can have significant and often detrimental impacts on the reserve and its wildlife. These impacts can be both direct and indirect, short-term (during construction) and long-term (after occupation). Here's a breakdown: ? Construction Phase Impacts 1. Noise Pollution: ? Heavy machinery and construction activity generate sustained noise, which can disturb sensitive wildlife, particularly breeding birds, mammals, and amphibians. ? Some species may abandon nesting sites or relocate permanently. 2. Light Pollution: ? Bright artificial lighting at night can disrupt nocturnal species, alter insect behavior, and interfere with bird migration and bat foraging. 3. Dust and Air Pollution: ? Dust from construction can settle on vegetation, affecting plant health. ? Emissions from machinery may degrade air quality for both flora and fauna. 4. Vibration and Ground Disturbance: ? Ground vibrations from heavy equipment can impact burrowing animals and disturb the soil ecology near the boundary. ? Post-Construction/Long-Term Impacts 1. Habitat Fragmentation and Edge Effects: ? Proximity to a development changes the microclimate and ecology at the boundary, increasing exposure to wind, light, and invasive species. ? Wildlife that depends on undisturbed habitat may be forced deeper into the reserve or may not survive at all. 2. Increased Human Activity: ? Recreational pressure from new residents?dog walking, biking, off-trail hiking?can lead to soil compaction, disturbance to nesting sites, and littering. ? Unleashed pets, especially cats and dogs, can prey on birds, small mammals, and reptiles. 3. Pollution and Runoff: ? Stormwater runoff from new roads, driveways, and lawns can carry pesticides, fertilizers, and oil residues into the nature reserve, degrading water quality in streams and wetlands. ? Potential for nutrient enrichment (eutrophication), leading to algal blooms and decline of sensitive aquatic species. 4. Invasive Species Introduction: ? Landscaping with non-native plants or accidental introductions (e.g., via soil, garden waste) can lead to invasive species colonizing the reserve. ? These often outcompete native plants, altering food webs and reducing biodiversity. 5. Disturbance to Wildlife Movement and Breeding: ? Artificial barriers like roads, fences, or high-traffic paths can impede wildlife movement, affecting access to foraging or breeding sites. ? Some species may experience population decline or local extinction due to isolation. ? Cumulative and Long-Term Ecological Risks ? Loss of ecological integrity: Even if the physical footprint is outside the reserve, the ecological impacts can degrade the value of the habitat over time. ? Biodiversity loss: Especially significant in reserves set up to protect rare, threatened, or sensitive species. ? Reduced ecosystem services: E.g., pollination, water filtration, carbon sequestration?all could be compromised.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	GARY MARK WOODHOUSE	Response-01451	well what can we say apart from destroying a local nature reserve by building around it like a brick wall but even worst a housing development with a thousand houses entrapping the wildlife and oh one more thing a 24/7 40mph bypass that no amphibian or mammal can cross safely this development is a catastrophe for the local wildlife, a small wildlife corridor just aims the wildlife to the bypass to its death, roads kill lots of wildlife its a reported fact this development will not help wildlife at all it will kill more than it will ever save, disturbance from construction, dirty water run off into the local brookes streams will reduce amphibians and cut off from surrounding mates for breeding purposes wildlife will be reduced to a minimum, footfall from the new development with dogs, cycles, childrens noise and mechanical noises ie cars lorries and garden implements will drive nature away not increase its numbers a great example of amphibian destruction is the famous under road pipes for toads at Awsworth bypass, now a housing development has now wiped out the toads in that area not one survives
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Gregory Robin Watts	Response-01297	Wild life and diversity will be affected as fields are covered over with housing and roads
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	John mainstone	Response-00967	Foxes badgers hares and many species of birds all around the area near ladywood farm and the rear of wirksworth road play park and all the way to Dale Abbey. These would all be displaced if this project went ahead
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Josh August	Response-00090	Eradicating over 50 hectares of current farmland/countryside will have a huge impact on the wildlife in those areas. Building 1000 houses, all that will no doubt be fenced off - will affect 1000's of different animals. Along with that relief road, that will be the cause of a lot of animals dying. We need to look after our countryside and keep it green for the sake of the wildlife and for us as humans to enjoy.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	kimberley grabham	Response-00306	I moved to the area to be closer to green space, birds and wildlife. I have put up bird boxes, feeders and hedgehog feeding station in my garden. Building houses will upset the biodiversity of the area and restrict the habitats for so much wildlife which I love and nurture.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Lisa Attenborrow	Response-01367	We have such a broad range of wildlife in and around pioneer meadows. We have deer, fox, swans, fish, buzzards, kestrels, both types of woodpeckers, squirrels and hedgehogs which are a dying breed to name but a few and I feel their natural habitat will disappear and so too will the wildlife.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Margaret Bannister	Response-01190	4. Impact on Wildlife and Biodiversity The greenbelt area proposed for development is home to a rich variety of wildlife species, many of which rely on the area's hedgerows, meadows, and woodland edges for survival. Foxes, badgers, hedgehogs, bats, and a range of bird species are frequently observed by residents. Amphibians and invertebrates such as frogs, newts, butterflies, and dragonflies depend on the nearby watercourses and wetlands. Destroying this habitat will fragment ecosystems, reduce foraging areas, and threaten the long-term viability of local species. The loss of native flora and fauna represents not just an ecological tragedy but a disconnection from our natural heritage. This loss is contrary to local biodiversity action plans and national commitments to halt biodiversity loss. Many of the water course around the Kirk Hallam area are recognised for their ecological significance. They encompass various habitats, including standing water, lowland etc which are crucial for biodiversity ? but these ecosystems are vulnerable to pollution and habitat disruption.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Michaela Hickinbotham	Response-00229	We have up the top road natures best area for wildlife already matured already thriving yet you want to rip it out and make it a brick jungle yet are preparing to spent a lot of money converting the old golf course which if left to itself with take over and do the job for you. As children we walked over those fields n wood into Dale Abbey, we stood at the top of the hill and looked towards Ilkeston to see St Mary's church our church in Kirk Hallam and Dale Abbeys Abbey, we have done this with our children and hoped to do this with our grandchildren but that sadly we won't be able to.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Michelle Colliver	Response-01332	The proposed 1,000-house development and accompanying 40mph road in South Kirk Hallam raise serious concerns about the potential impact on local wildlife, biodiversity, and nearby protected spaces such as Pioneer Meadows Nature Reserve. This area is home to a rich mix of habitats?including grasslands, hedgerows, and wetland areas?that support a diverse range of species, including birds, bats, pollinators, and small mammals. Development on this scale would likely lead to habitat fragmentation, loss of green corridors, and increased human disturbance, all of which can significantly disrupt local ecosystems. Construction activity, increased traffic, noise pollution, and artificial lighting from new housing and the bypass road could negatively affect sensitive wildlife, particularly nocturnal species like bats and owls that rely on dark, quiet environments. Runoff from roads and housing could also impact water quality in nearby streams and wetland areas, further threatening plant and aquatic life. The presence of Pioneer Meadows, managed for conservation and biodiversity, makes this area ecologically valuable and particularly vulnerable to change.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Mr J Edwards	Response-01355	I object to the loss and destruction of the wildlife habitat. These areas are precious to the community and we should do every we can to preserve these areas. Absolutely disgusting this monstrosity of a development is even being considered!
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Paul Wright	Response-01261	Further encroachment into the Green belt will have a detrimental affect on wildlife and birdlife with the destruction of habitats and the construction of roads, paving Driveways and patios. Excess water from such new surfaces will create a greater risk of pollution for the area.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Rachael Winfield	Response-01539	There's no mention of what is going to be done to counter act the effects on wildlife. This area is huge and full of animals and plants.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Robert Mee	Response-01509	See my comments on Landscape
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Roger Tranter	Response-01323	The area of the site is adjacent to a conservation area. The impact of new roads and housing will be disastrous on the wildlife - wildlife is noticeably diminishing in this area already.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Russell Bannister	Response-01360	4. Wildlife and Biodiversity The land south-west of Kirk Hallam forms part of a vital local ecosystem, supporting a range of wildlife and natural habitats. The proposed development would pose a major threat to local biodiversity, removing green space and fragmenting the ecological network that currently exists in and around the area. Destruction of Habitats: The fields, hedgerows, mature trees, and natural green spaces earmarked for development are home to a variety of species, including birds, bats, small mammals, and pollinators. These habitats would be cleared or severely disrupted during construction, with no adequate replacement. Loss of Wildlife Corridors: The area currently acts as a wildlife corridor, allowing animals to safely move between woodland, fields, and hedgerows. The bypass and housing estate would create a physical barrier across this corridor, isolating populations and making it harder for wildlife to move, feed, and breed. Impact on Protected Species: While no full ecological survey has been referenced, it is highly likely that protected species such as bats, hedgehogs, badgers, and nesting birds inhabit the area. Development could violate legal protections if these species are disturbed or displaced without mitigation. Loss of Pollinator Habitats: Bees, butterflies, and other pollinators depend on the wildflowers and hedgerows currently found in the area. Their decline has direct consequences for local plant life, food chains, and wider ecosystem health. Cumulative Effect with Existing Pressures: The surrounding landscape is already under pressure from traffic, housing, and recreational use. Removing more green space and increasing pollution (air, noise, and light) will compound stress on local wildlife. Greenbelt and Biodiversity Connection: This land is part of the Greenbelt for a reason?it not only provides space but supports environmental health. Once developed, these ecosystems cannot simply be recreated elsewhere. In summary, this development would result in long-term damage to the natural environment, reduce local biodiversity, and break the ecological link between Kirk Hallam and its countryside. It is essential that this impact be recognised as a key reason for rejecting or significantly rethinking the proposal.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Ruth Allen	Response-01258	The fields between Kirk Hallam and Dale Abbey support a large range of species, particularly plovers, hares and deer both red and fallow. The UK has an appalling record of loss of biodiversity: please don't contribute to the destruction.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Simon Frost	Response-00684	The areas earmarked for development are a strategic green area which provides numerous environments for wildlife and public amenity. The continued sprall of Ilkeston and Kirk Hallam in the area will have a negative effect on diversity and access to green space/pathways of local residents.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Simon Reeve	Response-01081	The fields between High Lane, West Hallam and Shipley/Hearon Road, Ilkeston support a diverse population of wildlife with open fields, woodlands, marsh land, lakes and streams/rivers. Removing any part of this environment for housing should be banned on this basis alone, there be no home for nature and "not cutting the grass verges" (to save money) won't make a difference.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Stephen Palmer	Response-00311	Why would a nature reserve be created for animals that have no means of roaming to open fields. This 40mph road would just be a kill zone. Disturbing the toxic soil from areas that are polluted would decimate wildlife.
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Stephen Syson	Response-00032	We already have a fragile ecosystem, that is slowly dying out because of our infringement of their homes. We need our trees, our hedgerows, our fields to keep and sustain the animals and insects who without We would not have crops
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Steven Street	Response-01264	Wild life loss of habitat for owls foxes deer newts bird population butterflies hares rabbits Taking our green belt is pure robbery and theft from the people of Kirk Hallam
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Sue Knott	Response-01268	The area around Dale Abbey is historic land. Developments and roads should not affect any green belt land. We have to protect our wildlife and biodiversity rather than systematically destroy our planet
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Sue Shaw	Response-00304	Concreting over the greenbelt will have adverse effects on wild life and nature, by the very fact of it!
1.5	South West of Kirk Hallam	Wildlife / Biodiversity	Tracy Lee	Response-00988	Wildlife would suffer with urban sprawl pushing species out of their environments and upsetting the ecological bio diversity in this area. Some species are already struggling to survive and with the addition of more street lights and traffic at night this would affect the nocturnal animals as we already suffer massive light pollution.
1.7	West of Sandiacre	Air Quality	William Moore	Response-01259	Detrimental to wildlife
1.7	West of Sandiacre	Air Quality	Aaron Locksley	Response-00711	With the proximity to the motorway, what analysis of the air quality has been done? I worry residents of the new houses could be moving into ill health. What measures will be put in place to mediate this? Could the planning permission require the houses to be fitted with a mechanical ventilation system that contains air filtration?
1.7	West of Sandiacre	Air Quality	Adam Shooter	Response-01925	We already have the M1 and A52 on our doorstep and due to the green belt we have acceptable air quality. Removal of this and construction processes will disrupt this.
1.7	West of Sandiacre	Air Quality	A Harby	Response-01684	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Alex Corns	Response-01151	The harmful impact of air pollution caused by diesel exhaust fumes on our health is well known. It's responsible for causing everything from respiratory problems to dementia and even certain types of cancers. Up to 55% of roadside traffic pollution is made of non-exhaust particles, with around 20% of that pollution coming from brake dust, these particles may be just as damaging to our lungs as exhaust fumes. Composed of iron particles, brake dust is caused by friction between the iron brake rotor grinding on the brake pads when a vehicle slows down. This brake dust is then worn away and becomes airborne. And as recent research shows, brake dust triggers inflammation in the lung cells with the same severity as diesel particles. By adding brake dust particles to macrophages ? the cells responsible for clearing the lungs of invading germs, waste and debris, nearly 185% increase in the cell's inflammatory activity. Brake dust prevents the immune cells from destroying Staphylococcus aureus ? a species of bacteria responsible for pneumonia. With 180 houses being built, lets say 1.5 per house. so at least over 300 cars and all the additional deliveries, construction traffic the air quality is of course going to suffer terribly and therefore peoples health.
1.7	West of Sandiacre	Air Quality	Alice Cooper	Response-01721	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Alice Ilett	Response-00571	The greenbelt is a well loved and respected area of Sandiacre we feel very lucky to have. Living close to the M1 this area acts as a green space and filter for the air quality and noise.
1.7	West of Sandiacre	Air Quality	A Malinski	Response-00620	Placing home so close to the motorway cannot be healthy! Also this band of land provides some buffer space for the existing home close by.
1.7	West of Sandiacre	Air Quality	Amanda Leech	Response-01625	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Amy Cray	Response-01223	More cars equals yet more pollution
1.7	West of Sandiacre	Air Quality	Amy Skinner	Response-01447	Due to the proximity to the M1 many of the roads/streets around the green belt land already suffer with poor air quality due to the traffic pollution. The green belt and Stoney Clouds at least act as a buffer against this but by destroying the green belt, turning it into grey and building many houses there would only add to the poor air quality. The dust and dirt that would result from the works in addition to the massively increased flow of traffic would be highly detrimental to residents and visitors. Even more so for those with existing respiratory conditions. During the Covid pandemic we were encouraged to make the most of green belt areas, to improve our mental and physical health and to get fresh air, being close to nature. This land needs to be preserved for the sake of the people here now and the generations to come.
1.7	West of Sandiacre	Air Quality	Anastasia Anthony	Response-01865	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour. More traffic = more NO2 = poor air quality, especially if we no longer have a greenbelt to mitigate this. Poor air quality contradicts Environment Act (2021) + NPPF para. 186
1.7	West of Sandiacre	Air Quality	Andrew Bishop	Response-01186	Any increase in traffic will affect suit quality due to HGV and car emissions in a residential area
1.7	West of Sandiacre	Air Quality	Andrew Davies	Response-01295	Increased traffic will affect air quality as those in employment will be travelling either towards Derby, Ilkeston, Long Eaton or Nottingham. Those going towards the latter three could well be putting more traffic & pollution as they pass Cloudside school
1.7	West of Sandiacre	Air Quality	Andrew Marvin	Response-00255	All the additional cars with the motorway already so close will have an impact on air quality and noise Outrageous
1.7	West of Sandiacre	Air Quality	Andrew Meadwell	Response-01654	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Andria Nyilasi	Response-00672	As previously stated, the sheer volume of extra vehicles would increase the air pollution tremendously and affect all local residents.
1.7	West of Sandiacre	Air Quality	Andy Martin	Response-01761	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Angela Roberts	Response-00681	More houses means more pollution . The greenbelt area must be maintained to protect air quality in the area which already has more than its fair share of Lorries/ cars/ industry.
1.7	West of Sandiacre	Air Quality	Annabel Marriott	Response-00760	Is this housing development practical being so close to the M1? Surely the air quality is going to be poor without these new houses/occupants adding to it?

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Anne Butler	Response-00385	The site is next to the motorway where lorries are doing the uphill run, churing out diesel fumes. Not healthy for anyone living next to it.
1.7	West of Sandiacre	Air Quality	Anne Castledine	Response-00499	Without the green belt between Linden and the motorway, the air pollution would be much greater.
1.7	West of Sandiacre	Air Quality	Anne Jenkins	Response-00350	Air quality will suffer due to the amount of dust and mud that will be created
1.7	West of Sandiacre	Air Quality	Annette Jones	Response-00961	The air quality is already getting worse in this area and the extra traffic on the motorway is only adding to the problem. We are aware that the widening of the motorway took us close to the threshold of high pollution and the addition of electric cars is not as green as we are led to believe - bigger and heavier loads on the roads not to mention tyre dust. The industrial development at Stanton also adds to this and regularly dust covers cars carried by the wind - this was also an issue when Stanton Ironworks was there and caused on-going health issues therefore green space is important to this area and should be protected.
1.7	West of Sandiacre	Air Quality	Ann Harrison	Response-01602	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Anthony Ford	Response-01921	Increased traffic will increase the air pollution outside of my house.
1.7	West of Sandiacre	Air Quality	Anthony Pearson	Response-01760	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Antony M Ingram	Response-01626	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	April	Response-00469	As a parent of a child with health issues, I am deeply concerned about the impact this proposed high-density development will have on local air quality. Increased traffic and construction will inevitably lead to higher levels of pollution, which can severely affect individuals with respiratory conditions and other health vulnerabilities. My son's well-being depends on clean air, and any rise in pollutants such as car exhaust and dust particles could trigger serious health complications. It is not just an environmental issue?it is a direct threat to the health and quality of life for families like mine in this community.
1.7	West of Sandiacre	Air Quality	A R Gregory	Response-01918	
1.7	West of Sandiacre	Air Quality	Arleen Corns	Response-01146	I would believe that will all the extra traffic the air quality will worsen.
1.7	West of Sandiacre	Air Quality	Awson Wheldon	Response-01649	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Barbara Michell	Response-01787	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Barbara Warton	Response-01886	Poor. Will get worse. Glad none of my family has asthma.
1.7	West of Sandiacre	Air Quality	Barry Partridge	Response-01778	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Ben Hollins	Response-01651	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	ben riley	Response-00607	We are near the M1, we don't want more pollution.
1.7	West of Sandiacre	Air Quality	Ben Snowdon	Response-00428	180 additional houses will deliver 250 to 360 more cars. This will have a significant affect on air quality, compounded by the fact that green space and trees will be removed.
			Bethany Oakes	Response-00960	240 more cars is an unsustainable amount of air pollution for a small village already next to the M1.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Beverley Gardner	Response-01692	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Beverley Green	Response-01686	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Bill Hartley	Response-01696	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Bill Meadwell	Response-00864	Adding extra vehicles to the area will inevitably lead to increased emissions which will have a detrimental effect on air quality. The M1 motorway runs very close to the proposed site with 8 lanes of traffic constantly being used. It is by no means a rare event for traffic hold-ups to occur, which leads to vehicles standing still or stopping and starting, leaving behind pollution of the air. During the construction phase, there will be a number of large lorries driving very slowly along the narrow access roads which will add greatly to this pollution
1.7	West of Sandiacre	Air Quality	B T Duke	Response-01900	Bad enough with the motorway.
1.7	West of Sandiacre	Air Quality	B T Keen	Response-01735	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	c/o The Equalised Club	Response-01603	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Callum binnall	Response-00460	All the heavy duty construction vehicles Will mess up the air quality of sandiacre
1.7	West of Sandiacre	Air Quality	C A Partridge	Response-01903	Extra pollution.
1.7	West of Sandiacre	Air Quality	Caroline Blackmore	Response-00451	Increase traffic Increase air pollution obviously
1.7	West of Sandiacre	Air Quality	Caroline Driver	Response-00618	Pollution is already high as we have to live so close to the M1 and A52. Volume of traffic creates many standing vehicles queuing to get on these main roads which already exacerbate the problem. Building on the ?buffer zone? that acts as lung absorbing much pollution will poison our area further with fumes.
			Caroline Roy	Response-00945	Being so close to the M1 already, we really don't need additional traffic in the area to reduce air quality
1.7	West of Sandiacre	Air Quality	Carol Marshall	Response-00736	Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Carolyn Hallam	Response-00489	We already have too much air pollution. We are stuck between the M1 and the A52. Our boiler is being damaged by air pollution blocking the filters. Asthma is on the rise as are other breathing problems
1.7	West of Sandiacre	Air Quality	Catherine Richardson	Response-00531	All this extra traffic would cause more air pollution. It's already bad enough being near the M1
			Charlotte Fry	Response-00583	Air quality is already bad enough.
1.7	West of Sandiacre	Air Quality	Charlotte Hunter	Response-01376	This is a green belt and close proximity to a nature reserve and the building works will inevitably have a negative impact the quality of air for the surrounding people and ho live in the houses as well as the surrounding wildlife.
1.7	West of Sandiacre	Air Quality	C Holmes	Response-01620	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Chris Hume	Response-01373	The air quality is poor with the M1 and all the Stanton lorry traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Chris Jones	Response-01718	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Chris O Connor	Response-01641	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Christian Rearson	Response-01763	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Christine Anderson	Response-00484	Air quality is already affected as it is next to the 8 lane motorway. More cars from these houses will increase this.
1.7	West of Sandiacre	Air Quality	Christine Gough	Response-00578	The air quality is bad due to the amount of traffic now and will only get a lot worse with more houses built . There is a school and there is a shop with the only post office in Sandiacre all on Stanton Road , so the traffic is ongoing , people leaving their engines running whilst waiting for the children or dropping them off at school , all Sandiacre residents have to drive to the local shop on Stanton Road to use the Post office and also to use the cash point and banking there . So huge amount of pollution from the vehicles . This will get even worse with more houses built and all the construction vehicles adding to more pollution and poor air quality
1.7	West of Sandiacre	Air Quality	Christine Ridgway	Response-00465	This is worry, as I already live close to the M1 and this will create more pollution with more vehicles accessing the proposed housing development.
1.7	West of Sandiacre	Air Quality	Claire binnall	Response-00459	This will massively reduce air quality for its already struggling residents due to Increased traffic on long Moor road and the increase of pollution from the M1
1.7	West of Sandiacre	Air Quality	Clare franks	Response-00498	We already live next to one of the busiest motorways with poor air quality. Adding homes will not only worsen the air quality while contractions takes place, but the homes are also being build right next to the motorway meaning the noise pollution for the houses and the extra pollution in the area will be worse.
1.7	West of Sandiacre	Air Quality	Clare Green	Response-01751	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Cole Hawkins	Response-01714	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Colin Cox	Response-01716	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Colin Marriott	Response-00686	According to official figures Sandiacre is only just below high levels of pollution due to emissions from the motorway. In addition there is increased incidence of pollution from brake dust and tyres
1.7	West of Sandiacre	Air Quality	Corrina loosemore	Response-00589	At least 180 cars and more will pollute the atmosphere Trees will be remove which means carbon will not be removed naturally
1.7	West of Sandiacre	Air Quality	Courtney Bennett	Response-00593	There are already several large construction vehicles that pass through Sandiacre causing dust in the air and on the roads. Having the area dug up and general constructions works is going to cause further air pollution and poor quality of air for the current residents, wildlife and children.
1.7	West of Sandiacre	Air Quality	C Owen	Response-01917	The air quality is bad enough now with the M1 motorway which is not being monitored, so it's only going to get worse.
1.7	West of Sandiacre	Air Quality	Craig Freeman	Response-01561	Although we have the conservation area as a cleaner space to walk and exercise our dogs, the quality will probably be decreased due to additional traffic so close, in addition to the Motorway noise and air pollution.
1.7	West of Sandiacre	Air Quality	Craig Richards	Response-01638	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Craig Thims	Response-01765	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Cristina Jenkins	Response-01588	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	C Thompson	Response-01634	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	DAllen	Response-00525	More cars ie pollution to the environment plus upheaval and congestion whilst building
1.7	West of Sandiacre	Air Quality	Daniel	Response-00545	More vehicles mean more exhaust emissions, contributing to poorer air quality in a primarily residential area where children walk to school and residents engage in outdoor activities. The development's proximity to the M1 already subjects residents to elevated noise levels. Increasing local road traffic will only worsen this issue, impacting overall wellbeing. The proposed site is adjacent to a nature reserve area, as shown on the map. The increase in noise, litter, and human intrusion will have a detrimental effect on local wildlife and biodiversity.
1.7	West of Sandiacre	Air Quality	Daniel Downes	Response-01630	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Danielle Harrison	Response-00568	No brainer. If you build on green belt the air quality will decrease. The motorway has already increased the carbon monoxide levels in my body. As a non-smoker my midwife could not believe my readings and she asked directly if I lived close to a motorway. A housing estate of this size will increase poor air quality readings.
1.7	West of Sandiacre	Air Quality	Daniel Naylor	Response-00680	With 2300 homes approved for development in the 2022 Erewash core strategy in neighbouring kirk hallam and Stanton, and the currently developing industrial units in Stanton using Sandiacre and Stanton by dale as direct access to the m1, air pollution will already be at unnecessary high levels without adding 180 new homes in sandiacre to add to this. With the 4 lane M1 running alongside sandiacre, the air quality in this area is already in poor condition, without adding to it with 180 new homes, all with vehicles and some with more than 1 on their driveway.
1.7	West of Sandiacre	Air Quality	Darran and Emma Rea	Response-00597	Increase of traffic pollution in the area is a concern
1.7	West of Sandiacre	Air Quality	David Casey	Response-01608	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	David Cater	Response-01756	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	David Fry	Response-00596	Obviously we don't want even more pollution from more vehicles
1.7	West of Sandiacre	Air Quality	David Ruddock	Response-01776	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	David Thompson	Response-01324	Detrimental to air quality

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	David Tindsley	Response-00515	I wish to object to the proposed development on the grounds of its likely negative impact on local air quality. Only a few years ago, parts of Sandiacre were identified as exceeding national air quality standards leading to a need to regularly monitor air pollution levels. It took considerable effort by both the local authority and the community to reduce harmful emissions and bring pollution levels under control. The land identified for development currently acts as a vital green buffer between the M1 motorway and existing residential properties. This open space plays an important role in absorbing pollutants and providing a physical barrier that shields homes from the worst effects of motorway emissions. The loss of this green space would remove that buffer entirely, exposing current residents to higher levels of air pollution. Whilst I understand that the council either ceased or significantly reduced monitoring of air quality in 2022 because of reduced levels at that time, since then the M1 close to Sandiacre has become a 'smart' motorway. Speed control/monitoring tends to result in more cars being slower/stationary in the area increasing air pollutants. Furthermore, HGV through the village has undoubtedly increased since then, and will increase further as the commercial property element of the re-development at Stanton expands. The proposed addition of 180 dwellings would lead to a significant increase in vehicle movements in the area both during construction and once the homes are occupied. This additional traffic, in combination with the factors previously highlighted risks tipping the local area back into non-compliance with national air quality standards, undoing years of progress. This proposal is therefore in conflict with Paragraph 186 of the National Planning Policy Framework (NPPF), which states that 'Planning policies and decisions should sustain and contribute towards compliance with relevant limit values or national objectives for pollutants.' It also goes against Paragraph 183, which requires planning decisions to ensure that new development is appropriate for its location, taking into account the likely effects (including cumulative effects) of pollution on health and the natural environment. Allowing development in this location risks not only increasing air pollution for future residents, who would be living right next to a major motorway, but also worsens the quality of life and health outcomes for the existing community by removing a green-belt space that currently acts as a protective buffer. For these reasons, I strongly object to the proposed development and urge the planning authority to carefully consider the long-term environmental and health impacts on the community.
1.7	West of Sandiacre	Air Quality	David Yeo	Response-01705	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Dean Bosworth	Response-01665	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Dean Lavelle	Response-01774	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Dean Michell	Response-01343	The extra traffic will bring extra noise and fumes to a already busy area.
1.7	West of Sandiacre	Air Quality	Debra Michell	Response-01346	To many cars use Beech Avenue to get to their homes now. More traffic more fumes. From braking,tyres and exhaust.
1.7	West of Sandiacre	Air Quality	Debra Scully	Response-00288	Dust and particles will impact residence who currently live in a peaceful area
1.7	West of Sandiacre	Air Quality	Debs Washer	Response-00487	Greater pollution through increased vehicles near a beauty spot
1.7	West of Sandiacre	Air Quality	Denise bennett	Response-00030	We already have the highest pollution in Erewash
1.7	West of Sandiacre	Air Quality	Denise Creasey	Response-00786	Pollution is already high in the area due to the proximity to the A52 and M1 and the M1 junction 25. Widening of the M1 has already increased this pollution along with bringing the heavy goods vehicles closer to the housing. This proposed site currently acts to absorb much of this pollution .
1.7	West of Sandiacre	Air Quality	Denise Lingard	Response-01759	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Dennis Watts	Response-01726	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Derek Morton	Response-01607	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Derrick Hunt	Response-00437	When the motorway was widened to four lanes the highway's agency sent out forms for people to claim compensation in the houses that are already here How can it be right to build these new houses next to the motorway ?
1.7	West of Sandiacre	Air Quality	Destiny Jade-Blake	Response-01636	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Diane Jones	Response-00852	Any additional traffic is detrimental to an already polluted area.
1.7	West of Sandiacre	Air Quality	Diane Mcmorrow	Response-00433	Being asthmatic I'm real concerned about the air quality/pollution living on Sycamore Crescent I struggled when the motorway was extended to 4 lanes either side we need to be aware and responsible for what we are doing especially for our young venerable children
1.7	West of Sandiacre	Air Quality	Diane Meadwell	Response-00807	There is proven evidence that emissions from vehicles cause health problems. This is not only from fuel, but also from tyre and brake dust which is given off by all vehicles. Many larger vehicles are not electric and are not expected to be any time soon. In the short term, the huge amount of construction traffic will result in excessive emissions of all kinds. They will need to drive slowly owing to the narrowness of the roads and the tight turns needed to approach them, thus ensuring the maximum amount of engine emissions. In the longer term, any additional traffic will obviously increase emissions. This has a negative impact not only for humans but also for the flora and fauna of the area.
1.7	West of Sandiacre	Air Quality	Diane Turner	Response-01744	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Dorothy Deeprise	Response-00817	The added traffic will make polution. Also, traffic will use the other roads nearby making them conjested
1.7	West of Sandiacre	Air Quality	D Pallett	Response-01627	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	D Simpson	Response-01712	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	E Cooper	Response-01923	Ruining the air quality near nature reserve. Light pollution & noise would increase.
1.7	West of Sandiacre	Air Quality	Elaine Pickering	Response-00811	Extra traffic fumes
1.7	West of Sandiacre	Air Quality	Eleanor Moseley	Response-00799	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Eleanor Newman	Response-00718	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Emily	Response-01880	With the traffic at a standstill the cars will be polluting. Plus too close to M1.
1.7	West of Sandiacre	Air Quality	Emily Milnes	Response-00470	New houses will be along the M1 corridor, if houses are built they will have poor air quality, ignoring the increased traffic
1.7	West of Sandiacre	Air Quality	Emma Peterson	Response-00491	Trucks not ideal
1.7	West of Sandiacre	Air Quality	Emma Ryan	Response-00503	The building works will cause pollution. The 180 extra homes bringing in roughly 180-360 extra cars to the town will cause more pollution.
1.7	West of Sandiacre	Air Quality	Emma Wall	Response-00319	More traffic, more poor air quality. Stony Flowers is a nature reserve and as such should be protected from air quality as much as it is impression of building around it. You will damage the flora, specifically the lichen that is protected by the woodland trust that Stoney clouds

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Esther Cook	Response-01861	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Ewan Snowdon	Response-00766	Further construction and traffic will negatively contribute towards lowering the air quality and as a passionate environmentalist, we have to limit what we're putting into the atmosphere and the impact on the wildlife that depends on the air quality to survive and thrive.
1.7	West of Sandiacre	Air Quality	Fay Cresswell	Response-00701	The pollution levels in this area are high as your own records show. Adding these extra vehicles will only add more pollution and the houses will be exceptionally close to not only chemicals pollution but light pollution and noise pollution too. We are obviously further away and can hear the M1 all day and night. Our house if covered in dust much more than anywhere else I know.
1.7	West of Sandiacre	Air Quality	Finlay Moss	Response-00588	Considering we already live next to m1 corridor (which significantly increases both noise and air pollution) this planned increase will only further decrease the already low air quality in the area
1.7	West of Sandiacre	Air Quality	Gail and Tony Orme	Response-00805	Since myself and my husband have moved here we have had respiratory problems coughs etc more than we have ever had . Due to heavy pollution we feel.
1.7	West of Sandiacre	Air Quality	Gail Berry	Response-01644	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Geoff Tindsley	Response-00755	I wish to object to the proposed development on the grounds of its likely negative impact on local air quality. 1. The land identified for development currently must act as a vital green buffer between the M1 motorway and existing residential properties. This open space would play an important role in absorbing pollutants and providing a physical barrier that shields homes from the worst effects of motorway emissions. The loss of this green space would remove that buffer entirely, exposing current residents to higher levels of air pollution. 2. Speed control/monitoring on the M1 tends to result in more cars being slower/stationary in the area increasing air pollutants. There also seems to be far more HGVs going through the village. 3. The proposed addition of 180 dwellings would lead to a significant increase in vehicle movements in the area both during construction and once the homes are occupied. This additional traffic, in combination with the factors previously highlighted risks tipping the local area back into non-compliance with national air quality standards. 4. Following development in this location risks not only increasing air pollution for future residents, who would be living right next to a major motorway, but also worsens the quality of life and health outcomes for the existing community by removing a green-belt space that currently acts as a protective buffer. For these reasons, I strongly object to the proposed development and urge the planning authority to carefully consider the long-term environmental and health impacts on the community.
1.7	West of Sandiacre	Air Quality	Georgia C	Response-01296	Next to motorway which already contributes to poor air quality in the area.
1.7	West of Sandiacre	Air Quality	Georgia Marvin	Response-00261	Construction will affect air pollution and quality. The dust, chemicals which will cover cloudside and coronation avenues will have a detrimental effect on all residents. The noise and hustle it will also bring will be outrageous and many residents will have their lives interrupted for many many years!
1.7	West of Sandiacre	Air Quality	Gill West	Response-01725	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Glyn Holner	Response-01697	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Gordon Bruce	Response-01455	The proposed site is a green buffer zone, one of few, to protect the people of Sandiacre from the traffic on the M1. They already endure reduction in air quality and noise pollution and should not have this small green space removed as a local amenity.
1.7	West of Sandiacre	Air Quality	Gordon Daris	Response-01639	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Greg Cox	Response-01702	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Gregg Bartrum	Response-01591	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Harriet Farnsworth	Response-01914	Yet more cars, litter etc!
1.7	West of Sandiacre	Air Quality	Helen Gillain	Response-00964	Brake dust from cars struggling to get through narrow roads would have a severe impact on air quality and affect the health of local residents
1.7	West of Sandiacre	Air Quality	Helen Thompson	Response-01356	Many more lorries and vans are coming through Sandiacre from the Stanton site using Ilkeston Road/Town Street/ Derby Road to and from the M1. More housing will bring more traffic especially while it's built. Are there up to date measurements of the existing air quality for instance at the traffic lights by the canal and at the motorway junction to assess this issue?
1.7	West of Sandiacre	Air Quality	Helen Whiteman	Response-00447	We do not need all the extra pollution of this build
1.7	West of Sandiacre	Air Quality	Ian	Response-00493	Increase in traffic will deplete air quality in an already bad area
1.7	West of Sandiacre	Air Quality	Ian Herbert	Response-00939	Sandiacre is presently plagued with fine dust from a wood recycling yard which conducts open air operations on town street. Any further residential development and traffic movements will add to the already dangerous particulate levels through brake dust and tyre particulates.
1.7	West of Sandiacre	Air Quality	Ian Steele	Response-00780	More traffic will not improve the air quality we enjoy already in stone clouds area
1.7	West of Sandiacre	Air Quality	IAN TAYLOR	Response-00972	Vehicle use will remain a mix of petrol, diesel and electric for the foreseeable future. Increased numbers of idling engines due to obstructions and queues will only exacerbate the problem.
1.7	West of Sandiacre	Air Quality	Ian Telfer	Response-00991	On Taft Avenue we are already covered in wood dust from town street and at night seemingly everyone has wood burning stoves, and not burning clean legal wood.
1.7	West of Sandiacre	Air Quality	Ian Ward	Response-01628	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Irina Anthony	Response-01867	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Isabelle Love	Response-00529	Again, more traffic (and there will be a lot with potentially x2 cars per household) there is obvious danger with the increase of air pollution, the area already has to deal with pollution from the M1 and removing more green sites and adding more congestion produces obvious results.
1.7	West of Sandiacre	Air Quality	Isobel Ball	Response-01092	Undoubtedly, the machinery and digging that will be required to understand this type of planning on a green area. Will contribute heavily to air pollution, it will fill the air with dust and gases which is merely unsustainable for the type of area planned. It will drastically affect the livelihood of those already living in the area.
1.7	West of Sandiacre	Air Quality	J. E. Lord	Response-01601	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Jack Greateorex	Response-01731	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Jacob Whitt	Response-01748	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Jacqueline Marshall	Response-01436	The increased traffic from extra Lorries if the development goes ahead will without doubt be detrimental to our health. The estimated 360 cars from the proposed development will create a decline in Air Quality for our residents.
1.7	West of Sandiacre	Air Quality	Jade Smith	Response-01783	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Jake Simpson	Response-00667	Extra cars and housing would increase pollution and losing trees and plants would have a negative impact on air quality
1.7	West of Sandiacre	Air Quality	James Meadwell	Response-01653	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	James Roberts	Response-01708	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	James Seward	Response-01683	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	James White	Response-01883	Why is the build happening next to the M1. No consideration to proposed new home owners.
1.7	West of Sandiacre	Air Quality	Jane Dennett	Response-00965	I have Astma air quality is poor in this area. More dust and pollution from site additional traffic fumes etc
1.7	West of Sandiacre	Air Quality	Jane Elizabeth Tindsley	Response-00669	I wish to object to the proposed development on the grounds of its likely negative impact on local air quality. Only a few years ago, parts of Sandiacre were identified as exceeding national air quality standards leading to a need to regularly monitor air pollution levels. It took considerable effort by both the local authority and the community to reduce harmful emissions and bring pollution levels under control. The land identified for development currently acts as a vital green buffer between the M1 motorway and existing residential properties. This open space plays an important role in absorbing pollutants and providing a physical barrier that shields homes from the worst effects of motorway emissions. The loss of this green space would remove that buffer entirely, exposing current residents to higher levels of air pollution. Whilst I understand that the council either ceased or significantly reduced monitoring of air quality in 2022 because of reduced levels at that time, since then the M1 close to Sandiacre has become a 'smart' motorway. Speed control/monitoring tends to result in more cars being slower/stationery in the area increasing air pollutants. Furthermore, HGV through the village has undoubtedly increased since then, and will increase further as the commercial property element of the re-development at Stanton expands. The proposed addition of 180 dwellings would lead to a significant increase in vehicle movements in the area both during construction and once the homes are developed and occupied. This additional traffic, in combination with the factors previously highlighted risks tipping the local area back into non-compliance with national air quality standards, undoing years of progress. This proposal is therefore in conflict with Paragraph 186 of the National Planning Policy Framework (NPPF), which states that 'Planning policies and decisions should sustain and contribute towards compliance with relevant limit values or national objectives for pollutants.' It also goes against Paragraph 183, which requires planning decisions to ensure that new development is appropriate for its location, taking into account the likely effects (including cumulative effects) of pollution on health and the natural environment. Allowing development in this location risks not only increasing air pollution for future residents, who would be living right next to a major motorway, but also worsens the quality of life and health outcomes for the existing community by removing a green-belt space that currently acts as a protective buffer. For these reasons, I strongly object to the proposed development and urge the planning authority to carefully consider the long-term environmental and health impacts on the community.
1.7	West of Sandiacre	Air Quality	Janet Whildes	Response-01869	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Jane Warton	Response-00662	increased pollution creating health issues and poor air quality.
1.7	West of Sandiacre	Air Quality	Janice Taylor	Response-01743	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Janice West	Response-00989	Putting family housing so close to a busy motorway is not at all acceptable. Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Janine Holmes	Response-01595	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Jason Deepprose	Response-00818	Your plans will make the air worse. Not good for pedestrians and cyclists
1.7	West of Sandiacre	Air Quality	Jason Harwood	Response-01667	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Jason Webb	Response-01637	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Jayne Rowley	Response-01279	The air quality in this area is already impacted with its close proximity to the A52 and M1 especially at peak times when there is congestion on the roads. This has been further increased with the Stanton Park development and the significant rise in HGVs and traffic passing through the area. The industrial traffic travelling to the area during building works would further add to this especially in the summer months when sites are dusty. Local homes would be greatly impacted by this dust and put those local residents with respiratory conditions at an increased risk.
1.7	West of Sandiacre	Air Quality	J Cates	Response-01750	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Jeanette O Connor	Response-01640	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Jeffrey Whittaker	Response-00594	To close to the M1
1.7	West of Sandiacre	Air Quality	Jennifer Bailey	Response-01857	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Jennifer Saville	Response-00516	More traffic more pollution
1.7	West of Sandiacre	Air Quality	Jennifer Tindley	Response-00751	I wish to object to the proposed development on the grounds of its likely negative impact on local air quality. 1. The land identified for development currently must act as a vital green buffer between the M1 motorway and existing residential properties. This open space would play an important role in absorbing pollutants and providing a physical barrier that shields homes from the worst effects of motorway emissions. The loss of this green space would remove that buffer entirely, exposing current residents to higher levels of air pollution. 2. Speed control/monitoring on the M1 tends to result in more cars being slower/stationary in the area increasing air pollutants. There also seems to be far more HGVs going through the village. 3. The proposed addition of 180 dwellings would lead to a significant increase in vehicle movements in the area both during construction and once the homes are occupied. This additional traffic, in combination with the factors previously highlighted risks tipping the local area back into non-compliance with national air quality standards. 4. Following development in this location risks not only increasing air pollution for future residents, who would be living right next to a major motorway, but also worsens the quality of life and health outcomes for the existing community by removing a green-belt space that currently acts as a protective buffer. For these reasons, I strongly object to the proposed development and urge the planning authority to carefully consider the long-term environmental and health impacts on the community.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Jenny Stephens	Response-01723	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Joanna hardy	Response-01304	Sandiacre already has to deal with pollution from the M1. More traffic will create more pollution and the construction of so many homes will create dust and further reduce air quality. The greenbelt land is currently acting as a buffer, with the trees acting as a barrier to some of the M1 pollution. Removing this area for houses or any buildings would remove this buffer.
1.7	West of Sandiacre	Air Quality	Joanne Guyatt	Response-01784	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Joanne Johnson	Response-00765	Air pollution facts and figures up to 43,000 premature deaths? a year are linked with air pollution in the UK 1,460 schools in neighbourhoods across England are located in areas where nitrogen dioxide or PM2.5 levels, or both, are double the World Health Organisation guidelines. Air pollution affects people of all ages? but children are particularly vulnerable? to dirty air as their lungs are still developing and they breathe faster and are often close to the ground near vehicle exhausts. Health effects can include growing up with reduced lung capacity. From Friends of the Earth Erewash - This in the Maple Ave area Annual concentration Health limit NO2 12.1 µg/m3 10 µg/m3 These are already above the governments recommended limits. PM2.5 8.1 µg/m3 5 µg/m3 Households without a car/van 13% - this will increase with more housing £20 billion how much air pollution costs? the UK economy every year The air quality is not the best around this area as it is flanked by the M1, Derby Road and the A52 close by. Children and the elderly will suffer the most if they live in the proposed new housing.
1.7	West of Sandiacre	Air Quality	Joanne Lambert	Response-00494	Extra vehicles once the houses are built are going to impact on the air quality in the area, the building work itself will also have an impact. Sandiacre already has a high level of pollution due to being close to the m1. Further pollution could see a decline in health outcomes for residents.
1.7	West of Sandiacre	Air Quality	Jodie Owen	Response-01688	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Jodie Shrive	Response-00601	More vehicles means more unnecessary emissions and noise. This will not only harm the environment but will also deteriorate the quality of life for current longstanding residents, particularly those of us living near the development access points.
1.7	West of Sandiacre	Air Quality	Joe Sells	Response-01924	Building so close to the motorway raises serious concerns about air pollution, exposing residents, especially children & the elderly to harmful emissions & health risks.
1.7	West of Sandiacre	Air Quality	Jo Gerhardt	Response-01286	Sandiacre is already an area of poor quality. Apparently the powers that be have stopped monitoring the levels. The M1 is close by plus all the HGV's, vans etc making pollution levels higher than other parts of the country. Constructing an additional 180 houses next to the M1 would increase pollution levels due to dust from construction and exhaust fumes from the additional 200 plus cars, into an already polluted area. I reluctantly open my front windows due to pollution. I get a layer of black dust on a regular basis on my window sills probably due to the many HGV's etc brake dust.
1.7	West of Sandiacre	Air Quality	John Gardner	Response-01694	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	John G Brown	Response-01752	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	John Hibbitt	Response-01855	One of the worst now. Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	John Ledger	Response-01605	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	John Payne	Response-01785	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	John whiteman	Response-00450	We have enough pollution as it is with all the extra hg v vehicles from the Stanton site without the traffic this will make
1.7	West of Sandiacre	Air Quality	Jon Burn	Response-01722	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Josh Williams	Response-01632	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	J Pearson	Response-01772	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	J Telfer	Response-01876	My window ledges have dust on every day.
1.7	West of Sandiacre	Air Quality	Judith A Putfer	Response-01863	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Judith Blackburn	Response-01928	What is going to happen when the air becomes more polluted with dust and noise? I know we are already affected by pollution because my homes is already covered in dust from the motorway.
1.7	West of Sandiacre	Air Quality	Julie Hill	Response-01643	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	J West	Response-01874	To put houses so close to a major motorway surely cannot be a healthy option for family homes.
1.7	West of Sandiacre	Air Quality	Karen Alldread	Response-01868	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Karen Blain	Response-01732	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Karen Evans	Response-00523	Any removal of trees etc will impact air quality.
1.7	West of Sandiacre	Air Quality	Karen Harwood	Response-01668	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Karen Pitts	Response-00643	Brake pads and tyres contribute significantly to non-exhaust emissions, a major source of air and water pollution, according to a study by the University of Southampton [1, 2, 18, 22]. These particles are released as the vehicle wears down, and while some are toxic, they also contribute to the formation of microplastics, which can be harmful to the environment and potentially human health. Respiratory health issues plus potential cancer and Alzhiemers developing The government?s Air Quality Expert Group said particles from brake wear, tyre wear and road surface wear directly contribute to well over half of particle pollution from road transport. 180 houses equals approx. 250 cars (O.N.S 1.29 per household) plus associated visitors etc going both ways up narrow steep existing roads gives conservative 19,000 vehicles per year. This coupled with the already high vehicle pollution from the M1 will give rise to serious health implications for the existing residents and foot traffic especially children on their way to school. Acceleration to get up the hill will emit high exhaust emissions and braking to avoid other vehicles. Braking to go down such steep streets necessitates using your brakes constantly especially at the blind corners and t junction this at Cloudside Rd. Vehicles will give off constant pollutants and micro plastics on both inward and outward journeys. Far in excess of acceptable levels.
1.7	West of Sandiacre	Air Quality	Kathryn Lovatt	Response-00497	The proposed building of 180 homes is of great concern to my family and I due to the increased pollution levels (adversing affecting air quality/noise levels) during the construction of the homes and following the development's completion. Conservative estimate: 700+ additional daily car/vehicle journey's driving past current homes. This is in addition to the pollution residents (air and noise) already experience due to living in close proximity to the M1 motorway. Furthermore, building new homes incredibly close to the M1 motorway is obviously detrimental to the health and well being of families/children living in those homes.
1.7	West of Sandiacre	Air Quality	Kathryn Martin	Response-00527	It is the last green buffer between the m1 and sandiacre. Air quality already poor.
1.7	West of Sandiacre	Air Quality	Katie Morrice	Response-00664	The increase in traffic from residents and construction activity will introduce more exhaust emissions and pollutions into the air which is extremely concerning considering how close the area is to a local nature reserve. These changes will significantly degrade the air quality around the area. The noise pollution will considerably affect the surrounding area already being close to the busy M1 there can be loud periods during peak times. Having an increase on this will really affect the residents surrounding it. Pollution is already high in the area due to the proximity to the A52 and M1 and the M1 junction 25. Widening of the M1 has already increased this pollution along with bringing the heavy goods vehicles closer to the housing. This proposed site currently acts to absorb much of this pollution .
1.7	West of Sandiacre	Air Quality	Katie Robinson	Response-00943	I only moved to this area a year ago so I received the environmental reports that showed polluted areas and air quality - which was very important to me due to health concerns. The land you want to build on is right next to the motorway and was shown as having poor air quality but also showed that it was a buffer between the motorway and the estate to essentially negate the negative impact of the motorway and pollution it causes. If you build on that site you are taking away that buffer and will cause further poor air quality that will effect the current residents which will cause poor health especially for people like myself that suffer from breathing conditions like asthma.
1.7	West of Sandiacre	Air Quality	Kelly Randall	Response-00591	The existing green belt provides essential protection against motorway pollution. Removing this buffer will deteriorate air quality and expose new homes to noise and emissions from the M1, contravening basic public health standards.
1.7	West of Sandiacre	Air Quality	Kelsey Green	Response-01666	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Kenneth Cooper	Response-01720	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Kern-Paul Lewis	Response-01715	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Kerry Meadwell	Response-01655	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Kerry Smith	Response-01271	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Kerry stokes	Response-00769	As an asthma sufferer the increase in traffic pollution caused by the increase in cars for new residents & construction traffic will have impact on my quality of life. I'm really concerned about the negative impacts the build will have on our air quality. The air quality is already poor with the increase in Lorrie's we're experiencing in Sandiacre, coming from the M1 to Stanton. So adding another 500 plus transport journeys a day will only exasperate this. Not only will it come from exhaust fumes but also the micro plastics created from car brakes & tyres. We live at the bottom of Stanton road (hill) & know that brakes are used nearly all the way down, adding another few hundred lots of this (from more cars the build brings) will only make this so much worse. I am an asthma sufferer so I know how much my lungs suffer from air pollution & know how the new build will negatively affect my health.
1.7	West of Sandiacre	Air Quality	KH Taylor	Response-01663	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Kim Helm	Response-00632	The air quality will be worse, as a person suffering with Asthma I prefer not to add to the pollution even more Not great for a house estate to be next to the motorway
1.7	West of Sandiacre	Air Quality	Kirk Moss	Response-00439	The site is adjacent to the M1, an area known for high levels of nitrogen oxides (NOx) and other pollutants. Currently, the open fields help disperse toxic gases. Development would trap these pollutants, exposing residents to dangerously poor air quality. Prolonged exposure to NOx is linked to respiratory diseases, cardiovascular issues, and premature deaths.
1.7	West of Sandiacre	Air Quality	Kirsty Handa	Response-00445	The existing residents air quality is going to severely reduced and have a huge negative impact. The dust and debris that will come from the construction is going to be in people's gardens and homes affecting people's health. Air quality will also have an effect on any proposed development with the M1 being so close. This could have huge long term effects on any residents and this is not sustainable and there is also nothing can be done to reduce this. This will negatively impact both existing and proposed residents
			K Reynolds	Response-01916	There is already too much pollution. We need to cut down, not create more.
1.7	West of Sandiacre	Air Quality	Kristie Rugers	Response-01864	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Kyle Jones	Response-01764	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	L A Keen	Response-01659	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Laura Hallam	Response-01711	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Laura Thompson	Response-00702	The building of the home alone will affect air quality. The losses of green spaces and loss of trees/vegetation will impact on air quality. We would lose a green space where people go for exercise and relaxation.
1.7	West of Sandiacre	Air Quality	Laurence Luck	Response-01727	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Lauren Freeman	Response-01562	More vehicles, more pollution around our homes. Not only vehicle pollution but the dust which will be stirred up by creating these homes. This will aggravate health conditions and possibly cause long term damage to residents.
1.7	West of Sandiacre	Air Quality	Lauren Rose	Response-01446	Air quality in the area is historically poor and increased traffic from vehicles to the proposed development will reduce this quality further. The heavy goods vehicles needed to create the development will also reduce the air quality further.
1.7	West of Sandiacre	Air Quality	Leah morral	Response-00712	Most houses now have at least 2 cars, so that's a potential 360 extra cars polluting the air in our area and beautiful surroundings

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Lee Wilcock	Response-01670	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Lesley Bruce	Response-01397	This area of Sandiacre already endures the pollution from both the increasingly busy M1 and A52. The proposed area for 180 extra homes plus their vehicles would not only increase that pollution, but remove the important green belt which separates homes from the detrimental effect of that M1 traffic.
1.7	West of Sandiacre	Air Quality	Lesley Carter	Response-00536	We have pollution from the adjacent motorway, A52 and the increasing number of lorries that are now based in the growing number of new units in Stanton that thunder through the village to access the main routes. Adding 180 houses and associated vehicles etc will add to poor air quality, noise pollution and congestion.
1.7	West of Sandiacre	Air Quality	Lesley Morral	Response-01920	Sandiacre has only just managed to reduce to acceptable levels which this proposal will increase again.
1.7	West of Sandiacre	Air Quality	Lia Thims	Response-01766	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	lilly stokes	Response-00767	i go on multiple walks as walking helps with my mental health and i walk to school everyday, with the amount of pollution increasing this will damage my lungs and the idea of this puts me off walking making my mental health much worse. On top of this my mum struggles with asthma and with the pollution in the air this will cause her asthma to get a lot worse seeing my mother struggle like this makes me incredibly upset and anxious.
1.7	West of Sandiacre	Air Quality	Linda Castledine-Davies	Response-00850	Historically the area of Sandiacre has had extremely high levels of pollution because of its proximity to the constantly busy A52 and M1 junction 25. Higher than the rest of England at times. Some improvement may have been made with cleaner fuel and more environmentally cleaner cars but the recent widening of the M1 into 4 lanes has moved the bulk of vehicles and heavy duty vehicles much closer to the residents in this area. Although traffic may move at a more steady speed during the day it is still very congested at peak times of commuting and school runs. Every day sees a long line of traffic spewing out their pollutants as they try to access at junction 25. The residents of Poplar Ave, Linden Grove, Sycamore Crescent, Chestnut Grove, Cloudside Road and Larch Drive are particularly affected by the M1 and also spent 2 years of constant congestion during the widening process with all lines stationary belching out their fuels. It is extremely noticeable on health when the wind is in a northerly direction. The green belt land acts as an effective buffer and barrier to some of these pollutants. Not only will this proposal remove this buffer an additional 180 high density houses will add to it considerably with an average of 6 tonnes of CO2 alone being emitted by each house. a study by the Office for National Statistics found that households contribute 26% of UK emissions, with travel accounting for a significant portion. The total lack of existing amenities or facilities and none being proposed means all requirements will need to be sourced outside of the site. The terrain is steep not suited to walking and cycling but many, the public bus can only access so far up the hill in good weather so majority will use their vehicles. With just one access point, by completion, that will equate to and extra 700 plus vehicles a day spewing out their pollution onto the nearby residents. Childrens health will be greatly affected as they walk to school. Pollution is contaminates everyone and the environment it impacts the air, water, and land, and can harm humans and animals. Not only will this impact residents it will have a detrimental effect on the flora and fauna on Stoney Cloud Nature Reserve. Pollution the average UK household emits about 6 tonnes of CO2 annually that would equate to and extra 1080 tonnes a year on households and wildlife. Constructing a new house likely emits on the order of 15 to 100 tons of CO2. In 2023, cars accounted for 52% of all domestic vehicle emissions. The UK's average petrol car produces 164 grams of CO2 per kilometre, equivalent (g CO2e), while a diesel car produces 170 grams of CO2/km New developments can negatively impact wildlife through pollution from various sources, including construction dust, runoff containing chemicals and nutrients, and noise pollution. These pollutants can harm wildlife directly or indirectly by affecting habitats and the food chain. Furthermore, development can fragment habitats, reducing connectivity and impacting species' ability to find food, breed, and adapt to climate change. The proposal for 180 houses to be built on this site will impact on the health of existing residents and foot traffic in this area in so many ways. Air pollution from brake discs and tyres is well known and this proposal which could increase traffic by up to 20,000 vehicles a year, possibly more, plus heavy construction vehicles will raise the pollution that is already high to dangerous levels. Many studies hav

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Linda Castledine-Davies	Response-00850	e shown the impact on respiratory and neurological conditions from the toxic materials and micro plastics which may also contribute to cancers and Alzheimers. This will be exacerbated by the narrow twisting roads with no where to dissipate these toxic elements. Children in particular and foot traffic will be particularly affected and childhood asthma and breathing problems are already a problem in this area. Please take all of this into consideration and a full disclosed analysis of this needs to be done. Brake pads and tyres contribute significantly to non-exhaust emissions, a major source of air and water pollution, according to a study by the University of Southampton [1, 2, 18, 22]. These particles are released as the vehicle wears down, and while some are toxic, they also contribute to the formation of microplastics, which can be harmful to the environment and potentially human health. Respiratory health issues plus potential cancer and Alzhiemers developing The government?s Air Quality Expert Group said particles from brake wear, tyre wear and road surface wear directly contribute to well over half of particle pollution from road transport. 180 houses equals approx. 250 cars (0.N.S 1.29 per household) plus associated visitors etc going both ways up narrow steep existing roads gives conservative 19,000 vehicles per year. This coupled with the already high vehicle pollution from the M1 will give rise to serious health implications for the existing residents and foot traffic especially children on their way to school. Acceleration to get up the hill will emit high exhaust emissions and braking to avoid other vehicles. Braking to go down such steep streets necessitates using your brakes constantly especially at the blind corners and t junction this at Cloudside Rd. Vehicles will give off constant pollutants and micro plastics on both inward and outward journeys. Far in excess of acceptable levels. Tyre pollution. A car's four tyres collectively emit 1 trillion ultrafine particles ? of less than 100 nanometers ? per kilometer driven. They are small enough to reach into the deep lung. These particles may contain a range of toxic chemicals including polyaromatic hydrocarbons, benzothiazoles, isoprene, and heavy metals like zinc and lead Tyre particles emitted during use are a major component of microplastics in urban runoff and a source of unique and highly potent toxic substances. Thus, tyres represent a ubiquitous and complex pollutant that requires a comprehensive examination to develop effective management and remediation Brake pad dust can be more toxic than exhaust emissions. Microscopic particles emitted from brake pads can be more toxic than those emitted in diesel vehicle exhaust, a study has found. This research shows that even with a move to electric vehicles, pollution from cars may not be able to be eradicated. While newer pads are made without asbestos, they contain high levels of copper, which can aggravate asthma when inhaled. Older cars may have brake pads that contain asbestos. Environment Minister Thérèse Coffey said : ?The documents published today make clear that it is not just fumes from car exhaust pipes that have a detrimental impact on human health but also the tiny particles that are released from their brakes and tyres. Prof Anna Hansell, Professor of Environmental Epidemiology, University of Leicester, said: It shows that particulates from brake and tyre wear from both combustion-engine and electric vehicles h
1.7	West of Sandiacre	Air Quality	Linda Castledine-Davies	Response-00850	ave toxic impacts on human cells. And risks to human health and ecological systems. Dr Antonis Myridakis, Lecturer in Environmental Sciences, from Brunel University of London, ?that copper-enriched brake-wear PM induces significant oxidative stress, inflammation, and metabolic reprogramming in lung cells, surpassing even the effects of diesel exhaust PM. This aligns with established evidence regarding the role of transition metals in PM toxicity, but also introduces new insights into the pseudohypoxic activation of hypoxia-inducible factor (HIF) signalling, which has been implicated in chronic lung diseases and cancer.? Scientists are ?increasingly concerned? by the health impact of air pollution produced by the wear of vehicle tyres. The particles are especially damaging due to the toxic chemicals they are made from, say the scientists from Imperial College London. Small particles separate from tyres as cars travel, become airborne and can be inhaled deep into the lungs. Air pollution causes 26,000 to 38,000 early deaths a year in England Harmful particle matter from tyres ? and also brakes ? is a very serious and growing environmental problem, one that is being exacerbated by the increasing popularity of large, heavy vehicles such as SUVs, and growing demand for electric vehicles, which are heavier than standard cars because of their batteries. Construction vehicles contribute to air pollution through brake and tire wear, releasing particulate matter (PM) into the atmosphere, including both fine and coarse particles. These particles can contain toxic chemicals like polyaromatic hydrocarbons, benzothiazoles, and heavy metals. Additionally, construction sites can contribute to resuspension of road dust, further impacting air quality. It is estimated a site of this size will take approx 5 years to complete and that is IF a further phase is not introduced once this green belt is breached.
1.7	West of Sandiacre	Air Quality	Linda Oscroft	Response-01927	This land sits directly alongside the M1 motorway and with the infrastructure required increases on top of the motorway pollution to the whole area in general.
1.7	West of Sandiacre	Air Quality	Lindsey Rawlinson	Response-01624	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	LISA ANNE GILLIGAN-LEE	Response-00710	Increase in emissions of nitrogen dioxide and other particulate matter. More cars on the road will worsen air quality?something that is directly linked to asthma, respiratory issues, and heart disease. The loss of green space means we lose a vital natural filter for air pollutants. At a time when climate change and public health are top priorities, approving this development would run counter to both local and national environmental goals. Children, elderly and others with health issues are at risk from poor air quality which can be made worse by traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Lisa J Pearson	Response-01762	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Liz Woodhouse	Response-01584	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	L Mee	Response-01777	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Logan Fox	Response-00746	Living near the M1 does result in extra air quality issues, but we are fortunate to have the open space and forest near us that helps this a lot. Removing this will see us lose these benefits and the additional houses, cars and people will result in a far less 'clean' area. Not fair on those living in a quiet and healthy space.
			Lorraine Daly	Response-00495	Air quality is already poor due to heavy traffic and proximity to A52 and M1
1.7	West of Sandiacre	Air Quality	Lorraine Hands	Response-00534	The whole area is close enough to the motorway , excessive traffic goes through Sandiacre to get to the motorway (large Lorrie?s) which roads in the area were never designed to take! It is increasingly becoming a dirty place from dust the traffic causes! I live on Moores Avenue which is off Starch Lane, Starch Lane is the cut through for many people who live this end of Sandiacre! We just do not need more traffic ???..
1.7	West of Sandiacre	Air Quality	Louise dix	Response-00975	The pollution from all the extra cars on roads with most household having 2 cars and how that will effect the local school air quality at breaks when they already have the motorway so close
1.7	West of Sandiacre	Air Quality	Louise Felfoldt	Response-01733	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Louise Harper	Response-01571	With more houses there will be more air pollution, at the moment only horses have been there for many years, building houses will create lots of dust and increased noise , at the moment it is very quiet
1.7	West of Sandiacre	Air Quality	Louise Harrison	Response-01719	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Louise Jacks	Response-01767	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Louise Libberton	Response-01693	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Louise Robinson	Response-00647	Queuing traffic is already a big concern down Rushy lane and Town street. Increasing houses, will increase cars and result in further congestion which will increase pollution further. This is especially undesirable outside schools (such as Friesland and cloudside). Road infrastructure needs improvement first, especially access to the M1.
1.7	West of Sandiacre	Air Quality	Lucy johnson	Response-01369	With the M1 and A52 being as close to Sandiacre as they are (you know it can?t be helped) the air quality in Sandiacre isn?t great! It needs to get better for the community! We don?t need any more air pollution in our town! Let?s be a town that doesn?t follow the norm of new housing and developments! We need to get away from that and have green spaces to soak up the pollution!
1.7	West of Sandiacre	Air Quality	lucy victoria garner	Response-00949	lots of research around health impact of increased pollution and living next to roads. risk of respiratory disease living close to motorway with increased particles. risk of child health impact growing up above motorway <a href="https://www.bmj.com/content/367/bmj.l6677#%3A:text=Living%20near%20a%20busy%20road%20can%20stunt%20lung,tougher%20air%20pollution%20laws%20in%20the%20UK.%201">https://www.bmj.com/content/367/bmj.l6677#%3A:text=Living%20near%20a%20busy%20road%20can%20stunt%20lung,tougher%20air%20pollution%20laws%20in%20the%20UK.%201</a> Significant studies available regarding the health concerns around air quality, social overcrowding and the need for green spaces.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Luke Chein	Response-01779	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Lynda Morton	Response-01606	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Macie Brothwell	Response-01633	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Malcolm Dillon	Response-00722	Air quality will inevitably be reduced for the people on the access route. A possible 360+ vehicle miles per day just to service this site will have pollution levels that will be concentrated in a residential area. The proposed housing will be very close to the M1, four lane motorway. This section of motorway regularly experiences standing traffic stretching all the way back to junction 25. This standing traffic will inevitably produce additional pollution from the "normal" pollution generated by vehicles on a very busy motorway. The loss of trees due to the loss of greenbelt will also have a detrimental effect on all of the Sandiacre citizens, not simply the additional density of population.
1.7	West of Sandiacre	Air Quality	Malcolm Fox	Response-00215	People move and live into an area like this for the peace and quiet and Air Quality is a life essential these days. Firstly, the building impact alone will negatively effect all current residents with dust and debris the norm for months on end. Removing the green belt reduces the overall space which will simply negatively impact air quality on the whole. Again, why remove a green site when there are plenty of other areas that could be considered which would not impact air quality with the removal of green space?
1.7	West of Sandiacre	Air Quality	Malcolm Riggs	Response-01680	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Malc Orbiston	Response-01673	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mandy Rait	Response-01587	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour. There is already a constant barrage of heavy HGVs through our village producing excessive noise and pollution.
1.7	West of Sandiacre	Air Quality	Marcel Janovsky	Response-00481	Air quality very bad
1.7	West of Sandiacre	Air Quality	Mark Gough	Response-00888	Pollution is horrendous coming from cars and lorries in Beech Avenue, Stanton Road , Spencer Ave and of course the M1 is near , the amount of poor air quality affects the people living here. Air pollution is medically linked to brain and breast cancers , dementia, reduced ability to learn , asthma, bipolar disorders, lung cancers , heart disease , strokes (survey done from Mums for Lungs on air quality) and you're thinking that 180 more houses right near the M1 isn't going to make a difference !!! Think of the people going to live there ! The air quality is going to affect everyone around here even more .
1.7	West of Sandiacre	Air Quality	Mark Leek	Response-01740	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	mark skelton	Response-01341	Absolutely something that we are concerned about. More heavy diesel delivery Lorries and cars passing by our home.
1.7	West of Sandiacre	Air Quality	Mark Warton	Response-00693	Even more pollution and health issues
1.7	West of Sandiacre	Air Quality	Marta McManus	Response-00646	This development means having less of a barrier between M1 and nature reserve and also sandiacre
1.7	West of Sandiacre	Air Quality	Martin Driver	Response-01387	Air quality is poor around the area. Monitoring has tapered off this last few years. I read that it's not required as it went down. I'd say this was due to Covid and less traffic on the road. Needs to be regularly monitored again. Has serious health implications
			Martin Ford	Response-01908	More vehicles.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Martin Hardy	Response-01413	If the proposed construction is permitted the air quality in the area will drop. We already have air and noise pollution from the M1 and increasing traffic and building works will cause more. The traffic would cause issues with dust, fumes from large vehicles and dust from break pads. Also having such a large construction site would cause large amounts of dust to be produced which would fall over the surrounding area. Causing breathing problems, dirty cars and make drying washing outside impossible. The noise from the construction site over several years would also negatively impact the local area.
1.7	West of Sandiacre	Air Quality	Martyn Locker	Response-00903	As mentioned above, 200+ more cars idling and queuing to get in and out of the estate using the single access road is undoubtedly going to have a negative impact on air quality.
1.7	West of Sandiacre	Air Quality	Matt Hallam	Response-00476	Having another lane added onto the m1 has made it louder for the people on cloudside and chestnut, imagine 200+ cars on this new area. Going from listening to the horses running up and down to chavy boy racer cars polluting the air and sound
1.7	West of Sandiacre	Air Quality	Matthew Buckland	Response-00615	Pollution is historically high in this area because of the proximity to M1, which runs alongside the majority of the current field. In particular congestion at peak times accessing junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to the proposed area. A number of trees on the site would need to be cut down which would further reduce the air quality as they naturally absorb pollutants.
1.7	West of Sandiacre	Air Quality	Maurice Mason	Response-01617	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Maxine Sutton	Response-00471	The extra cars will not only congest the local area they will contribute to air pollution. The Council has a duty of care to ensure the health of residents, especially young children, is not affected.
1.7	West of Sandiacre	Air Quality	M Dougle	Response-01749	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	M Eastwood	Response-01757	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Melanie	Response-00586	The existing Green Belt provides a vital buffer between residential areas and the M1 motorway, helping to mitigate air and noise pollution. Removing this buffer would directly expose future and existing residents to higher levels of harmful pollutants and noise, with potentially serious health implications. There is evidence of air pollution online, so is public knowledge.
1.7	West of Sandiacre	Air Quality	Melanie Caumont	Response-01272	Increased vehicle emissions from hundreds of new residents will contribute to a decline in local air quality. Given the site's proximity to the M1 motorway, the area already experiences heightened pollution levels. Adding more traffic and construction activity will negatively impact air quality and public health, particularly for children and the elderly.
1.7	West of Sandiacre	Air Quality	Melanie Howarth	Response-01621	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Michael Anderson	Response-00461	This site runs adjacent to an eight lane motorway. With the extra residents vehicles for this site it must have an impact to air quality.
1.7	West of Sandiacre	Air Quality	Michael Darnell	Response-00648	The development would too close to the M1 and air quality for potential residents would be very poor. The current green space provides a buffer.
1.7	West of Sandiacre	Air Quality	Michael Ocroft	Response-01926	This land sits directly alongside the M1 motorway and with the infrastructure required increases on top of the motorway pollution to the whole area in general.
1.7	West of Sandiacre	Air Quality	Michell Birkin	Response-01657	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Michelle Alsop	Response-01645	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Michelle Cox	Response-01724	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Michelle Ledger	Response-00815	Air Quality ? Pollution is historically high in this area because of the proximity to A52 & M1. In particular congestion at peak times accessing junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of this pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Michelle Wenham	Response-01650	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mick Hughes	Response-01701	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mike Darnell	Response-00698	The incline up the steep hills and bends make tyre and brake usage so great and all this affects air quality not counting exhaust fumes
1.7	West of Sandiacre	Air Quality	Miss Garratt	Response-00905	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Miss R Cordon	Response-01648	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Misty McGrath	Response-01556	We should not be building houses so close to the M1. The air quality is already poor, and reducing the green space and expanding the residential areas are going to contribute to making that worse.
1.7	West of Sandiacre	Air Quality	Mollie Snow	Response-01729	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Molly Newbold	Response-00486	Of course it will be affected, you could add 360 new cars to our streets if each household averages 2 cars per house
1.7	West of Sandiacre	Air Quality	Mr. Mark Lovatt	Response-00956	I am concerned about a decline in air quality which would be caused by the added pollution from hundreds of extra vehicles driving by daily. The air quality is already compromised by living near the motorway and the nearby busy roads. During years of housing construction, the roads accessing the proposed site would be inundated with huge vehicles emitting fumes - thus adversely affecting the air we breathe. The dust caused by the building of the proposed housing estate, would equally add to air pollution and massively affect the quality of life of local residents.
1.7	West of Sandiacre	Air Quality	Mr & Mrs Turton	Response-01660	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mr and Mrs R Skelton	Response-01274	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Mr and Mrs Wright	Response-01275	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mr Colin Key	Response-01841	Substantial increase in Pollution (of all kinds) in an already higher than average area will affect the health of existing and future residents and have a detrimental effect on their wellbeing.
1.7	West of Sandiacre	Air Quality	Mr David Ainsworth	Response-00621	The volume of houses will have a direct increase in carbon monoxide. I have asthma and am concerned that the volume of traffic will directly affect my respiratory health.
1.7	West of Sandiacre	Air Quality	Mr K Gubb	Response-01838	Substantial increase in Pollution (of all kinds) in an already higher than average area will affect the health of existing and future residents and have a detrimental effect on their wellbeing.
1.7	West of Sandiacre	Air Quality	Mr K Turton	Response-01706	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mr Luke	Response-01703	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mr P J Tanner	Response-01728	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mr R M Draper	Response-01856	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mr R Widdowson	Response-01734	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mr S. Haywood	Response-01585	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mrs Christina Pope	Response-00732	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mrs Donna C. Ball	Response-01594	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mrs Froggatt	Response-00449	Too much heavy traffic causing air pollution
1.7	West of Sandiacre	Air Quality	Mrs Griffin	Response-01698	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Mrs J. Cooper	Response-01596	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mrs Jennifer Fry	Response-00581	More traffic will increase air pollution
1.7	West of Sandiacre	Air Quality	Mrs Joanne Thompson	Response-01690	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mrs J Reeder	Response-01909	This will deteriorate with all traffic with fumes & noise.
1.7	West of Sandiacre	Air Quality	Mrs Lee Farabella	Response-01899	More emissions cause air pollution.
1.7	West of Sandiacre	Air Quality	Mrs Linda Cox	Response-01753	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mrs Luke	Response-01704	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mrs M. Rose	Response-01583	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mrs Marie Draper	Response-01755	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour. I suffer with C.O.P.D - more cars and lorries in the area will not help my health.
1.7	West of Sandiacre	Air Quality	Mrs M Burke	Response-01887	More emissions will cause much more air pollution.
1.7	West of Sandiacre	Air Quality	Mrs N Taylor	Response-01896	Vehicle emissions will cause much more air pollution.
1.7	West of Sandiacre	Air Quality	Mrs Rachel Coats	Response-01623	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mrs R Cordon	Response-01647	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mrs Rigby	Response-00641	pollution is historically high in this area because of the proximity to A52 & M1. In particular congestion at peak times accessing junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to the nearby houses. This site acts as a lung absorbing much of this pollution. Animals and wildlife will be greatly affected by noise, Air and light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mrs Shani Wainwright	Response-00754	Pollution is already historically high in this area due to its proximity to the A52 & M1. A massive increase in vehicles means even more emissions and road noise. This is not only harmful to the environment and wildlife but also in particular to the current residents, as it will deteriorate their quality of life greatly and have lasting negative health and wellbeing implications. The M1 road widening has already brought heavy goods vehicles closer to nearby houses, increasing pollution levels. Plus increased traffic through Sandiacre due to the New Stanton Park development, bringing increased cars and many heavy goods vehicles through Sandiacre...again increasing traffic congestion and negative impacting air quality.....and on top of this you now propose to add a further 700 vehicles to the area due to the new development.....further impacting all of these issues. At peak times Sandiacre will become a car park of danger and pollution, with traffic queuing through Sandiacre to get to use junc 25 of the M1.....which is already a problem anyway!!!!

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Mrs Sheila Hickingbotham	Response-01338	The proposal to build these houses so close to the M1 motorway can only result in a further deterioration of air quality for the residents. This area of green belt land serves as a 'buffer' between the motorway and existing houses and contributes to the improvement of air quality by reducing pollution from vehicle use.
1.7	West of Sandiacre	Air Quality	Mrs Shirley Victoria Riggs	Response-01685	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mrs Susan Bantle	Response-01612	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mrs Turton	Response-01707	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Mrs Whittaker	Response-00595	The additional houses will add to the poor air quality already in the area due the traffic on the motorway.
1.7	West of Sandiacre	Air Quality	Nasim Rashid	Response-01103	Increase in cars is bound to have a detrimental effect on air quality
1.7	West of Sandiacre	Air Quality	Natalie Bentley	Response-01646	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Neil Biddulph	Response-01891	
1.7	West of Sandiacre	Air Quality	Nicole Cooper	Response-01597	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Nikki Vincent	Response-00688	The additional air pollution from the increased traffic in our local area will have health implications for all! The level of air pollution in our area is already of concern to me, particularly the effects this has on my children's future health.
1.7	West of Sandiacre	Air Quality	Normn McCrea	Response-01754	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Oliver Marriott	Response-00679	Air Quality Pollution / Air quality - My husband suffers with asthma, we have a very strong concern over the air quality and the pollution caused by the extra traffic and larger vehicles, what measures will you take in order to prevent this?
1.7	West of Sandiacre	Air Quality	Olivia Allen	Response-00520	Air quality will be a lot worse with more cars. We need to try and keep the green areas not turn it into grey areas
1.7	West of Sandiacre	Air Quality	Paige Walker	Response-01669	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Pam shepherd	Response-00453	With the motorway running on this route this area helps to reduce the damage to the air quality taking this land away and building on it is going to to reduce the air quality even more it's total impractical
1.7	West of Sandiacre	Air Quality	Pat Hardy	Response-01739	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Patricia Ancliff	Response-00948	The air quality on B5010 is already poor. Adding more vehicles can only worsen this
1.7	West of Sandiacre	Air Quality	Paula Darnell	Response-00665	The heavy electric cars the tyre wear the constant exceleration stopping and starting. The pollution will be immense. Then of course the fumes.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Paula Luck	Response-01710	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Paula Sims	Response-01687	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Paul Randall	Response-00131	This green belt offers a buffer zone between the existing residents and the M1 corridor. This buffer will disappear increasing the potential for poor air quality and increased noise in Sandiacre. Also, building new homes next to the motorway is not a great idea?
1.7	West of Sandiacre	Air Quality	Paul Vleeton	Response-01770	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	paul wheeldon	Response-00582	Increased traffic fumes from extra traffic coupled with that coming from what is now an 8 lane M-way will be detrimental to health
			Paul Wilkes	Response-00599	We are not happy as the developers adding a bigger carbon footprint to the area.
1.7	West of Sandiacre	Air Quality	Peter Anthony	Response-01866	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Peter brown	Response-00671	We get lots of thick black dust inside our home already due to traffic pollution and it will get worse
1.7	West of Sandiacre	Air Quality	Peter Nicholls	Response-01622	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Pete West	Response-01700	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Phil Creasey	Response-01342	The increase in traffic from residents and construction activity will introduce more exhaust emissions and pollutions into the air which is extremely concerning considering how close the area is to a local nature reserve. These changes will significantly degrade the air quality around the area. Pollution is already high in the area due to the proximity to the A52 and M1 and the M1 junction 25. Widening of the M1 has already increased this pollution along with bringing the heavy goods vehicles closer to the housing. This proposed site currently acts to absorb much of this pollution .
1.7	West of Sandiacre	Air Quality	Philip Reed	Response-01449	I object to the proposed development of 180 houses on greenbelt land due to the significant deterioration in local air quality it would cause. Increased traffic and loss of natural vegetation will raise pollution levels, endangering public health and damaging biodiversity in an area meant to be protected for environmental preservation.
1.7	West of Sandiacre	Air Quality	P Sandes	Response-01682	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Rachel Crossley	Response-01661	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Rachel Skelton	Response-01241	Extra traffic in the area will worsen air pollution

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	R Barratt	Response-01664	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Rcahel Sharp	Response-00652	The air quality in the centre of Sandiacre is particularly bad due to the volume of traffic and type of traffic (HGV). Waiting to cross the roads there is bad. Family members used to live on Town Street and the grime from the air was evident on the inside surfaces and outside of the windows. We also have the M1 close by which must also affect the air quality and the development will be right next to this. Green spaces are vital to counteract this.
1.7	West of Sandiacre	Air Quality	Rebecca Longmuir	Response-00253	You wish to add more traffic in a small tightly packed area. This is an obvious problem. More traffic and cars! More pollution. Less air quality for the locals and the children who live here
1.7	West of Sandiacre	Air Quality	Rhiannon Lowater	Response-01592	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	R Hibbitt	Response-01862	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Richard Broughton	Response-01352	It goes with saying that 180 house with like vehicles Woodburning stoves and the like can only be detrimental
1.7	West of Sandiacre	Air Quality	Richard Chambers	Response-00745	The air quality in Sandiacre is already poor due to the M1 - this will only make it worse
1.7	West of Sandiacre	Air Quality	Richard Deeprise	Response-00816	This development will reduce the air quality in the area due to more buildings and Vehicles
1.7	West of Sandiacre	Air Quality	Richard Haines	Response-01674	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Richard Jenkins	Response-00264	I also have respiratory issues and a regular prescription for nasal spray. It is only recently (November 2024) that I was able to stop using an inhaler to alleviate symptoms. The proposed development is likely to add some 20,000 vehicle movements per annum (using Government statistics) in the immediate vicinity ? ALL of these additional vehicles will be obliged to use Stanton Road (less than 200 metres from my house), and most will no doubt use Maple Avenue (less than 60 metres from my house). The additional microparticle pollution from rubber tyre degradation, brake dust and exhaust fumes are guaranteed to impact on our health. Bad enough at the best of times but made far worse when we can't even get to see a doctor!! The average UK household emits about 6 tonnes of CO2 annually. Thus, this development would equate to and extra 1,080 tonnes a year on households and wildlife. Constructing a new house likely emits on the order of 15 to 100 tons of CO2, thus some 2,700 ? 18,000 tons of CO2 would be created by this development.
1.7	West of Sandiacre	Air Quality	Richard Marriott	Response-00675	Air Quality Pollution / Air quality - My husband suffers with asthma, we have a very strong concern over the air quality and the pollution caused by the extra traffic and larger vehicles, what measures will you take in order to prevent this?
1.7	West of Sandiacre	Air Quality	Richard Naylor	Response-00066	The air quality will be affected during the years of building and the additional traffic of, say, 360 additional vehicles, 2 per house.
1.7	West of Sandiacre	Air Quality	Richard Shrimpton	Response-01301	Pollution is historically high in this area because of the proximity to A52 & M1. In particular congestion at peak times accessing junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of this pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Rob Lowe	Response-01768	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Roger Farnsworth	Response-01910	Yet more cars, litter etc!
1.7	West of Sandiacre	Air Quality	Rosemarie Gough	Response-00997	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Roy Drew	Response-01614	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Ruby Sharp	Response-00886	180 houses equals approx. 250 cars (O.N.S 1.29 per household) plus associated visitors etc going both ways up narrow steep existing roads gives conservative 19,000 vehicles per year. This coupled with the already high vehicle pollution from the M1 will give rise to serious health implications for the existing residents and foot traffic especially children on their way to school. Acceleration to get up the hill will emit high exhaust emissions and braking to avoid other vehicles. Braking to go down such steep streets necessitates using your brakes constantly especially at the blind corners and t junction this at Cloudside Rd. Vehicles will give off constant pollutants and micro plastics on both inward and outward journeys. Far in excess of acceptable levels.
			Ryan Selby	Response-00479	Air pollution with the added vehicles and the time it takes to build these houses and the machinery, air quality would be effected.
1.7	West of Sandiacre	Air Quality	S. Brailsford	Response-00598	Additional traffic from the lorries in building phase especially when stopped with the engine running for other road users to pass on already narrow streets will have a massive impact on air quality Additional cars from 180 extra houses will add to the traffic build up in the area causing excessive air pollution In summer you can already taste the difference in the air at peak times
1.7	West of Sandiacre	Air Quality	S. Jones	Response-01615	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Sally Davies	Response-01294	Air quality is bound to be poor due to the higher levels of traffic.
1.7	West of Sandiacre	Air Quality	Samantha Anne Whitney	Response-00757	The extra 360 cars, and emissions from housing and extra people are going to decrease the air quality. The air quality is already very close to the acceptable levels so with the extra development the air quality will be very poor. The development is next to the M1 motorway and I'm sure it wouldn't be pleasant for the homes to be so close to all those fumes either.
1.7	West of Sandiacre	Air Quality	Samantha Whildes	Response-01270	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Sam Buckland	Response-00600	Pollution is historically high in this area because of the proximity to M1, which runs alongside the majority of the current field. In particular congestion at peak times accessing junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to the proposed area. A number of trees on the site would need to be cut down which would further reduce the air quality as they naturally absorb pollutants.
1.7	West of Sandiacre	Air Quality	Sam Fleck	Response-00821	I wish to object to the proposed development on the grounds of its likely negative impact on local air quality. Only a few years ago, parts of Sandiacre were identified as exceeding national air quality standards. It took considerable effort by both the local authority and the community to reduce harmful emissions and bring pollution levels under control. Monitoring and mitigation measures were introduced, and progress has been hard won. The land identified for development currently acts as a vital green buffer between the M1 motorway and existing residential properties. This open space plays an important role in absorbing pollutants and providing a physical barrier that shields homes from the worst effects of motorway emissions. The loss of this green space would remove that buffer entirely, exposing current residents to higher levels of air pollution. Furthermore, the proposed addition of 180 dwellings would lead to a significant increase in vehicle movements in the area both during construction and once the homes are occupied. This increased traffic, in combination with exposure to existing pollution from the M1, risks tipping the local area back into non-compliance with national air quality standards, undoing years of progress. This proposal is therefore in conflict with Paragraph 186 of the National Planning Policy Framework (NPPF), which states that 'Planning policies and decisions should sustain and contribute towards compliance with relevant limit values or national objectives for pollutants.' It also goes against Paragraph 183, which requires planning decisions to ensure that new development is appropriate for its location, taking into account the likely effects (including cumulative effects) of pollution on health and the natural environment. Allowing development in this location risks not only increasing air pollution for future residents, who would be living right next to a major motorway, but also worsens the quality of life and health outcomes for the existing community by removing a green space that currently acts as a protective buffer. For these reasons, I strongly object to the proposed development and urge the planning authority to carefully consider the long-term environmental and health impacts on the community.
1.7	West of Sandiacre	Air Quality	Sam Greatorex	Response-01695	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Sandra Cooke	Response-01613	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Sarah Favell	Response-00038	This is of a bit concern due to the amount of HGVs going through the village and very near the M1
1.7	West of Sandiacre	Air Quality	Sarah Harrison	Response-01658	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	S Bryne	Response-01677	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Sebastian Roberts	Response-01675	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Shanead Ligton	Response-01689	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Shannon moss	Response-00454	The proposed development site is located on the edge of the M1, an area known for high levels of nitrogen oxides (NOx) and other harmful pollutants. Currently, the open fields serve as a natural disperser of these toxic gases. However, introducing a residential development will trap these pollutants, exposing future residents to dangerously poor air quality. The World Health Organisation (WHO) has linked prolonged exposure to NOx with respiratory diseases, cardiovascular issues, and premature deaths. Approving this development would be an irresponsible act of environmental and public health negligence
1.7	West of Sandiacre	Air Quality	Shannon Robinson	Response-01635	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	sharon thornhill	Response-00448	my comment on traffic covers this section adequately and during construction which i would presume will take a few years there will be a lot of pollution and dust etc
1.7	West of Sandiacre	Air Quality	Sharon weston	Response-00440	Air quality is appalling in Sandiacre,I live on chestnut grove,n I've never known a house so dusty,n got worse when an extra lane was added on m1 n yes I do clean my house
1.7	West of Sandiacre	Air Quality	Shaun Green	Response-01773	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Sheila	Response-00587	The existing Green Belt provides a vital buffer between residential areas and the M1 motorway, helping to mitigate air and noise pollution. Removing this buffer would directly expose future and existing residents to higher levels of harmful pollutants and noise, with potentially serious health implications. This is already public knowledge as you can check the current state of the Air quality in Sandiacre online.
1.7	West of Sandiacre	Air Quality	Sheila Payne	Response-01782	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Sian Knox	Response-01679	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	S Leek	Response-01737	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Sonya Birkin	Response-01656	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Sophie	Response-00472	We already have struggles in the area with the local motorways polluting the area
1.7	West of Sandiacre	Air Quality	Sophie Bennett	Response-01631	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Sophie Farnsworth	Response-01913	Yet more cars, litter etc!
1.7	West of Sandiacre	Air Quality	Stephen Barlow	Response-01808	I have recently moved to Sandiacre from Hallam Fields, Ilkeston to move away from the noise and pollution of Wards Recycling. We chose our property as it is a lovely area with good local amenities and walks with no noise or pollution which we previously experienced.
1.7	West of Sandiacre	Air Quality	Stephen Davies	Response-00214	Currently the fields behind Larch Drive provide a break to M1. Development would worsen this. The area has only recently been agreed as having acceptable air quality and the proposed development is likely to reduce air quality bearing in mind additional vehicle movements. The reduction in green space will also exasperate the impact of the M1. Note also the impact of tyre dust from the ever increasing use of electric vehicles
1.7	West of Sandiacre	Air Quality	Stephen Sacker	Response-01598	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Steve Bilbie	Response-00285	Air quality is going to be at a high risk for the people in this area.
1.7	West of Sandiacre	Air Quality	Steve Whittaker	Response-01781	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Stuart Pensom	Response-00049	Air quality is getting bad. I have noticed this as being an asthma sufferer
1.7	West of Sandiacre	Air Quality	Sue Harrison	Response-01629	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Susan Heinke	Response-00468	This will considerably add to global warming and climate disruption. When are we going to learn and say enough is enough
1.7	West of Sandiacre	Air Quality	Susanne Beaven	Response-01618	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Tamara Partridge	Response-01780	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Tarnya Hinman	Response-01786	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Thomas Ilett	Response-01088	Research and studies have demonstrated living near a major road can have significant detrimental health consequences, including Alzheimer?s, Parkinson?s, multiple sclerosis and mental disorders ( <a href="https://ehjournal.biomedcentral.com/articles/10.1186/s12940-020-0565-4">https://ehjournal.biomedcentral.com/articles/10.1186/s12940-020-0565-4</a> and <a href="https://www.kcl.ac.uk/news/study-supports-link-between-traffic-related-air-pollution-and-mental-disorders">https://www.kcl.ac.uk/news/study-supports-link-between-traffic-related-air-pollution-and-mental-disorders</a> ). As the proposed housing allocation is within close proximity to the M1 motorway, these studies and research highlight housing allocation for this Green Belt as inappropriate. Aside from the aforementioned points, representing how the proposed housing allocation would negatively impact the current Sandiacre community, should the housing allocation go ahead; new residents would be blighted by the previous points and be subjected to increased negative health risks.
1.7	West of Sandiacre	Air Quality	Tim Derbyshire	Response-01681	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Tim Gough	Response-00996	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Toby Moran	Response-01769	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Tom Ball	Response-01672	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Tony Weston	Response-00990	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Tracey Howe	Response-01860	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Tracey Hughes	Response-01699	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Tracy Jones	Response-00436	It is poor enough with the Lorrie?s running up and down derby road
1.7	West of Sandiacre	Air Quality	Tracy Kerry-Cliff	Response-00801	The levels of pollution, in this area will thus be increased incrementally - and it will be unacceptable. Health issues need to be considered, of the residents that already live in this busy community, and also, the mental health issues of all these people who currently use this open land to relax, and calm themselves, walking their children and animals and breathing in the fresh air.
1.7	West of Sandiacre	Air Quality	Trevor Rowston	Response-01678	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Tricia Herbert	Response-00944	there are already problems with the huge number of lorries in this area since the opening of the Stanton Lorry Park alongside the unmonitored dust coming from Maple Tree Wood Yard...

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Air Quality	Try church	Response-00033	Constant heavy plant machinery will cause a massive reduction in air quality, dust disturbance and breathing issues. Many of the residents on larch drive are elderly and it will cause a drastic impact on health and anxiety
			Tyler Hobbs	Response-00879	Pollution due to additional cars that will frequent the local area will be bad for our children, wildlife and environment.
1.7	West of Sandiacre	Air Quality	Vanessa Asbach	Response-00700	More houses mean more people, more people mean more cars. The emission is going to go up in the area and affect everyone around the area
			Verity Lamb	Response-01298	Again, you can't just keep increasing traffic in a finite area and not have pollution increase
1.7	West of Sandiacre	Air Quality	Vickie Wright	Response-01552	More vehicles means more emissions and noise. This not only harms the environment but also deteriorates the quality of life for current residents and wildlife.
			Vicky	Response-00485	Why destroy more green belt when there are houses empty!! We already have the local hotels filled with immigrants where does it end
1.7	West of Sandiacre	Air Quality	Victoria Abraham	Response-01652	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Victoria Galpin-shrimpton	Response-01009	Air Quality ? Pollution is historically high in this area because of the proximity to A52 & M1. In particular congestion at peak times accessing junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of this pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Victoria Greatorex	Response-01730	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Victoria Marriott	Response-00674	Pollution / Air quality - My husband suffers with asthma, we have a very strong concern over the air quality and the pollution caused by the extra traffic and larger vehicles, what measures will you take in order to prevent this?
1.7	West of Sandiacre	Air Quality	Vivien Davis	Response-01582	Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. Pollution is historically high in this area because of the proximity to A52 and M1. In particular congestion at peak times accessing Junction 25 still takes place. Widening has brought the heavy goods vehicles even closer to nearby houses. This site acts as a lung absorbing much of pollution. Animals and wildlife will be greatly affected by Noise, Air and Light pollution affecting their natural behaviour.
1.7	West of Sandiacre	Air Quality	Wayne Major	Response-00408	I wish to object to the proposed development on the grounds of its likely negative impact on local air quality. Only a few years ago, parts of Sandiacre were identified as exceeding national air quality standards. It took considerable effort by both the local authority and the community to reduce harmful emissions and bring pollution levels under control. Monitoring and mitigation measures were introduced, and progress has been hard won. The land identified for development currently acts as a vital green buffer between the M1 motorway and existing residential properties. This open space plays an important role in absorbing pollutants and providing a physical barrier that shields homes from the worst effects of motorway emissions. The loss of this green space would remove that buffer entirely, exposing current residents to higher levels of air pollution. Furthermore, the proposed addition of 180 dwellings would lead to a significant increase in vehicle movements in the area both during construction and once the homes are occupied. This increased traffic, in combination with exposure to existing pollution from the M1, risks tipping the local area back into non-compliance with national air quality standards, undoing years of progress. This proposal is therefore in conflict with Paragraph 186 of the National Planning Policy Framework (NPPF), which states that "Planning policies and decisions should sustain and contribute towards compliance with relevant limit values or national objectives for pollutants." It also goes against Paragraph 183, which requires planning decisions to ensure that new development is appropriate for its location, taking into account the likely effects (including cumulative effects) of pollution on health and the natural environment. Allowing development in this location risks not only increasing air pollution for future residents, who would be living right next to a major motorway, but also worsens the quality of life and health outcomes for the existing community by removing a green space that currently acts as a protective buffer. For these reasons, I strongly object to the proposed development and urge the planning authority to carefully consider the long-term environmental and health impacts on the community.
1.7	West of Sandiacre	Air Quality	William Marriott	Response-00676	Air Quality Pollution / Air quality - My husband suffers with asthma, we have a very strong concern over the air quality and the pollution caused by the extra traffic and larger vehicles, what measures will you take in order to prevent this?
1.7	West of Sandiacre	Air Quality	Zoe Hughes	Response-01919	The area is already polluted by the M1 & A52 adding such a densely populated housing estate will cause further issues.
1.7	West of Sandiacre	Bus Services	Aaron Locksley	Response-00711	The bus service itself will struggle with the traffic, especially when heavy goods vehicles and the buses cross paths. Apart from that does the bus service around peak usage have the capacity to cater for 180 new homes?
1.7	West of Sandiacre	Bus Services	A Harby	Response-01684	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Alex Corns	Response-01151	With potentially 180 houses being built, will the local bus service be required to put extra services on ? This again will add to compromised safety/traffic congestion as they already struggle to navigate around the streets of Sandiacre.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Alice Cooper	Response-01721	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Alice Ilett	Response-00571	The bus service generally around Sandiacre is great. However around this area of Sandiacre due to the bad traffic already can take a while. The parking and traffic in general- especially around school hours is dangerous and the bus can't always get through.
1.7	West of Sandiacre	Bus Services	Amanda Leech	Response-01625	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Amy Cray	Response-01223	There?s no bus?.
1.7	West of Sandiacre	Bus Services	Amy Skinner	Response-01447	The bus services that operate in and around Sandiacre estates already struggle at times to navigate through narrow roads which have cars parked either side. This makes the running of the service difficult and in fact it simply doesn't serve some streets after 7pm due to the lack of road access. I firmly believe that the works and the huge increase in traffic will make this service nigh on impossible to operate as frequently as it does, which would thus negatively impact the many many people who are dependent upon it. If the bus was no longer able to serve the estates at all due to the increased congestion many people would struggle as it is a long walk into Sandiacre town, one which for the elderly and those with reduced mobility would be unable to undertake.
1.7	West of Sandiacre	Bus Services	Anastasia Anthony	Response-01865	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Andrew Bishop	Response-01186	The current service already has difficulty navigating the volume of free flowing and parked traffic therefore any increase will add more burden.
1.7	West of Sandiacre	Bus Services	Andrew Davies	Response-01295	It will require an increase in the frequency of 14b for those travelling toward Ilkeston so that have an alternative public transport service offered. Also to access public transport toward Derby would require walk through to Derby Rd
1.7	West of Sandiacre	Bus Services	Andrew Marvin	Response-00255	Many elderly people rely on this bus service which is already a challenging route for the buses based on the local parking and traffic It?s going to be very dangerous!!!!
1.7	West of Sandiacre	Bus Services	Andrew Meadwell	Response-01654	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Andria Nyilasi	Response-00672	The local bus service would be put under tremendous strain by the sheer volume of extra passengers. It would not be able to reach the new estate due to the narrow roads and lack of turning points.
1.7	West of Sandiacre	Bus Services	Andy Martin	Response-01761	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Anne Butler	Response-00385	Bus services to it will be non existent as the buses will not be able to negotiate the surrounding streets.
1.7	West of Sandiacre	Bus Services	Anne Castledine	Response-00499	Buses have problems getting around because of parking, the roads are those of a village; extra traffic from the proposed house builds will cause mayhem.
1.7	West of Sandiacre	Bus Services	Anne Jenkins	Response-00350	There would be no opportunity to extend the bus route and extra traffic would make it difficult for buses to cope
1.7	West of Sandiacre	Bus Services	Annette Jones	Response-00961	The bus service already struggles with access at times. In winter this is made even worse because of the steepness and tight manoeuvres that have to be contemplated. The snow and ice is very hazardous and doesn't melt as quick at the top so some people are house bound during this period.
1.7	West of Sandiacre	Bus Services	Ann Harrison	Response-01602	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Anthony Pearson	Response-01760	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Antony M Ingram	Response-01626	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	A R Gregory	Response-01918	
1.7	West of Sandiacre	Bus Services	Awson Wheldon	Response-01649	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Barbara and John Morrell	Response-00509	I am greatly concerned about the impact extra traffic will have on the bus route which at the moment runs very near to this proposed development and down Beech Avenue. The area will quite simply not cope with more vehicles.
1.7	West of Sandiacre	Bus Services	Barbara Michell	Response-01787	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Barbara Warton	Response-01886	Can't facilitate any more.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Barry Partridge	Response-01778	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Ben Hollins	Response-01651	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Ben Snowdon	Response-00428	The busses get stuck at my house on Stanton Road with the current traffic levels. Increased traffic will make the bus route even more congested. I have photographic evidence
1.7	West of Sandiacre	Bus Services	Beverley Gardner	Response-01692	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Beverley Green	Response-01686	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Bill Hartley	Response-01696	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Bill Meadwell	Response-00864	There is a limited service from Sandiacre estates. The Nottingham Trent Barton 14 service only runs until 7pm and after that time you have to walk from Stanton Road. Many people, especially the elderly and disabled, would find that an impossible walk as it is uphill all the way. There is a bus to Ilkeston, but this only goes along Stanton Road. It is inevitable that people will use cars and taxis, especially for medical appointments.
1.7	West of Sandiacre	Bus Services	B T Duke	Response-01900	No Bus.
1.7	West of Sandiacre	Bus Services	B T Keen	Response-01735	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	c/o The Equalised Club	Response-01603	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Callum binnall	Response-00460	The bus is already struggling, you wouldn't be able to add any bus stops as the bus wouldn't get up near the new builds
1.7	West of Sandiacre	Bus Services	C A Partridge	Response-01903	Buses would not be able to extend route 4. They are already looking at shortening the route because of parked cars.
1.7	West of Sandiacre	Bus Services	Caroline Driver	Response-00618	There is a bus service but there shouldn't be as the roads are too narrow. The bus is regularly stuck on Beech Avenue, honking their horn and the driver knocking on doors, often very angrily. When I'm driving on my own street, it is necessary to mount the curb in order for the bus and a car to pass at the same time. This is a danger to all especially pedestrians.
1.7	West of Sandiacre	Bus Services	Carol Marshall	Response-00736	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Catherine Richardson	Response-00531	The bus service already struggles with access and frequently gets held up on Beech Avenue
1.7	West of Sandiacre	Bus Services	Charlotte Fry	Response-00583	We already have plenty of buses coming up and down the roads. We don't need anymore
1.7	West of Sandiacre	Bus Services	Charlotte Hunter	Response-01376	There is a major bus route which falls at the bottom of the road, this is going to cause mayhem as the roads are very narrow. Being prone to accidents happening.
1.7	West of Sandiacre	Bus Services	C Holmes	Response-01620	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Chris Hume	Response-01373	I use the buses to Nottingham, there are often issues for the drivers with parked cars and vans for the busses to pass. Honestly I don't know how the drives put up with this as it's dangerous now, this development would make it worse
1.7	West of Sandiacre	Bus Services	Chris Jones	Response-01718	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Chris O Connor	Response-01641	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Christian Rearson	Response-01763	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Christine Anderson	Response-00484	Extra traffic will impinge on our already stretched local bus service. Buses are required, especially for the elderly, to reach the Drs, Chemist, Shops etc. Buses are unable to get through the estate and more cars on our small roads will make it quite impossible and feel that the Bus companies will have to change their routes !

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Christine Gough	Response-00578	One bus service runs up and down Beech Avenue and Coronation rd, and Stanton Road . This is a necessity for people who need to get to work., shopping and for the elderly that rely on this . Not many people I have seen use the bus from this end at work peak times but of course the bus would pick up through Sandiacre . It is needed . The only complaint I have is that the buses struggle to get down Beech Avenue most of the time , due to the cars being parked in this road . And it's a complete nightmare school times with even more cars parked outside the school on Stanton Road, and cars parked to use the shop with the only post office in Sandiacre at the shop . The shop and school are on the same side . Elm Ave gets cars parked all along there too so difficult for them pulling out when a bus is trying to turn into Spencer Ave .
1.7	West of Sandiacre	Bus Services	Christine Ridgway	Response-00465	I rely on using the buses to get about and they are very limited, so this issue would be made worse with new housing developments.
1.7	West of Sandiacre	Bus Services	Claire binnall	Response-00459	Useless services always late
1.7	West of Sandiacre	Bus Services	Clare Green	Response-01751	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Cole Hawkins	Response-01714	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Colin Cox	Response-01716	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Colin Marriott	Response-00686	The i 4 bus service in this area is a godsend especially for elderly people. If this development was to go ahead and with increased traffic movement, congestion on Stanton Road . Could this mean a cancellation of the bus which would lead to some people being unable to get to shops, the Post Office or face a 15 to 20 minute walk to another bus stop.
1.7	West of Sandiacre	Bus Services	Courtney Bennett	Response-00593	The bus services in the area is already inconsistent. This will cause more people to use cars and motorbikes increasing the road congestion even more, polluting the air even more, increasing the risk of antisocial behaviour towards pedestrians and transport services when there aren't enough services to provide for the residents as is.
1.7	West of Sandiacre	Bus Services	Craig Freeman	Response-01561	Buses can only loop around Coronation Avenue and Maple Drive. These buses often have to use the pavements to navigate around the narrow turns. This will require many people having to walk down from the new estate to a very limited number of ref bus stops, potentially requiring more frequent buses along congested and narrow roads.
1.7	West of Sandiacre	Bus Services	Craig Richards	Response-01638	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Craig Thims	Response-01765	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Cristina Jenkins	Response-01588	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	C Thompson	Response-01634	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Daniel	Response-00545	The local council in my opinion runs a good public transport system however adding. Adding 180 new households will put pressure on this and lead to a inferior service. Without significant investment in bus infrastructure, the majority of new residents will rely on private vehicles, which will worsen congestion and pollution.
1.7	West of Sandiacre	Bus Services	Daniel Downes	Response-01630	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Danielle Harrison	Response-00568	The bus route through the estate already struggles to navigate the roads, this will be increased with a further highly populated estate is built with poor access routes to it.
1.7	West of Sandiacre	Bus Services	Darran and Emma Rea	Response-00597	The bus service is a concern, it is going to isolate and cut off a lot of elderly and disabled people who do not have access to cars if the bus that currently services this area has to cease because of the increase in traffic and parked cars
1.7	West of Sandiacre	Bus Services	David Casey	Response-01608	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	David Cater	Response-01756	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	David Ruddock	Response-01776	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	David Tindsley	Response-00515	I wish to raise an objection to the proposed development on the grounds of poor accessibility and inadequate public transport provision. There is already existing evidence that buses regularly struggle to navigate the narrow residential roads leading to the proposed site. In some cases, buses have become stuck due to parked cars and tight corners. Given the constraints, I am uncertain how a large service bus would be able to safely access the proposed site entrance, especially when accounting for construction traffic and future vehicle use. If a bus is unable to enter the site itself, residents particularly those who are older or have limited mobility would be expected to walk back uphill from the existing bus stop on Cloudside Road/Maple Avenue to return home. This presents a serious accessibility concern, as the existing roads include a significant gradient, which would make walking difficult or even unmanageable for many, especially in poor weather. This directly conflicts with Paragraph 112 of the National Planning Policy Framework (NPPF), which requires that developments give priority to pedestrian and cycle movements and promote access to high-quality public transport. It also contradicts Paragraph 130, which emphasises that developments should be inclusive and accessible, ensuring that they meet the needs of people with disabilities and reduced mobility. If the development cannot provide a site layout that enables safe and practical access for buses, it will result in a scheme that is not only poorly connected but excludes a significant portion of the population from being able to live there comfortably. For these reasons, I object to the current proposal and urge the planning authority to ensure that any approved development provides proper, accessible public transport links that serve all residents.
1.7	West of Sandiacre	Bus Services	David Yeo	Response-01705	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Dawn Glennis Smith	Response-00510	Bus services are already impacted by parked vehicles, narrow roads, etc. An already difficult route would prove impossible if extended.
1.7	West of Sandiacre	Bus Services	Dean Bosworth	Response-01665	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Dean Lavelle	Response-01774	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Debra Michell	Response-01346	We need this bus service for everyone. I do believe you should double yellow lines on the corners of Beech Avenue so the bus can get round more easily.
1.7	West of Sandiacre	Bus Services	Debra Scully	Response-00288	Insufficient bus services in the area and none adjacent to the site means more cars in the road
1.7	West of Sandiacre	Bus Services	Denise Creasey	Response-00786	As the current bus service is unable to access the roads above Coronation Avenue due to the steepness and parked cars it would not be possible to provide a bus service for a residents on an even higher site.
1.7	West of Sandiacre	Bus Services	Denise Lingard	Response-01759	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Dennis Watts	Response-01726	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Derek Morton	Response-01607	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Derrick Hunt	Response-00437	There is only one bus route one way up Stanton road up coronation ave down beech AVE up Stanton road and put through travers road. If it can get round due to parked cars delivery drivers and courier vans blocking the roads
1.7	West of Sandiacre	Bus Services	Destiny Jade-Blake	Response-01636	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Diane Jones	Response-00852	Sandiacre has no Chemist, Bank or Post Office and one Doctor's surgery. This means that people have to travel into Stapleford or Long Eaton to access these services. The village cannot sustain increases in population in our local schools etc.
1.7	West of Sandiacre	Bus Services	Diane Mcmorrow	Response-00433	There is a bus service it sometimes struggles to pass with park cars I can't imagine what the extra volume of traffic would do to the bus service our roads are not built to cope with this.
1.7	West of Sandiacre	Bus Services	Diane Meadwell	Response-00807	There is a limited bus service in this area. The residents of the proposed development will not be close to any of these services and will no doubt drive to their destinations. The walk from the area to the nearest bus stop is quite substantial, with the return trip being uphill. This excludes those people who are unable to carry out this walk, and could thus create isolation
1.7	West of Sandiacre	Bus Services	Diane Turner	Response-01744	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	D Pallett	Response-01627	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	D Simpson	Response-01712	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Eleanor Moseley	Response-00799	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Eleanor Newman	Response-00718	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Elisha Gunn	Response-00585	Due to the increased number of cars already parking on the roads causing minor obstructions to bus services and difficulty navigating from the Bluebell end of Sandiacre right up to beech avenue and round by adding more houses which will increase the number of cars will make this extremely important bus service nearly impossible to continue
1.7	West of Sandiacre	Bus Services	Emma Ryan	Response-00503	Perhaps it will get a few more people using the bus service. But that is probably the only positive I can see in any of this. But I doubt that many as the bus service isn't that reliable at the best of times.
1.7	West of Sandiacre	Bus Services	Emma Wall	Response-00319	Coronation Avenue is already difficult for buses to get through the increase of buses. I've no doubt we need to go up through cloud side in order to get to this new development and therefore the infrastructure will not cope with it.
1.7	West of Sandiacre	Bus Services	Esther Cook	Response-01861	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Fay Cresswell	Response-00701	Currently we have the I4 and 14 bus service this side of Sandiacre with only the I4 coming anywhere near to the new development. The nearest bus stop will be where Coronation/Mapleand Cloudside meets. This runs from 5:30 until 7pm then nothing until following day with no service up here Sunday. During the rest of the time buses run on Stanton Road a good 20 minutes away from the new development for the able bodied. The I4 runs to Nottingham and the 14 Ilkeston.
1.7	West of Sandiacre	Bus Services	Gail Berry	Response-01644	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Geoff Tindley	Response-00755	1. Whilst I do not have any experience of using the bus service in the area, I can well understand the problems that the buses have in negotiating the local roads. I know that both my parents have had situations where the bus driver has been unable to get through a gap because of parked cars, and has had to stop and knock on doors to ask people to move their vehicles. I wish to raise an objection to the proposed development on the grounds of poor accessibility and inadequate public transport provision. 2. There is no way that a bus could access the development land. Access from the development site would be difficult for less mobile residents, or parents with pushchairs, and I believe this would discourage the use of public transport, and thereby encourage increased car usage, which is not ecologically friendly. For these reasons, I object to the current proposal and urge the planning authority to ensure that any approved development provides proper, accessible public transport links that serve all residents.
1.7	West of Sandiacre	Bus Services	Georgia C	Response-01296	Limited bus services in place as is.
1.7	West of Sandiacre	Bus Services	Georgia Marvin	Response-00261	The I4 is the only bus route which many residents rely on. Many elderly residents rely on this service to carry out their retirement. The bus service struggles to get through as it is with the congestion of vehicles and parked cars. How are the services going to cope with over 200 more residents to take ? The buses will always be reaching full capacity !
1.7	West of Sandiacre	Bus Services	Gill West	Response-01725	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Glyn Holner	Response-01697	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Gordon Bruce	Response-01455	The busses on Coronation AVE and Stanton Road are frequently held up by the many cars which struggle to park to access Cloudside, the swimming clubs at the pool and the Costcuttr shop. 180 extra houses will only make bus access more difficult.
1.7	West of Sandiacre	Bus Services	Gordon Daris	Response-01639	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Greg Cox	Response-01702	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Gregg Bartrum	Response-01591	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Helen	Response-00883	The I4 bus already has issues getting around the route up Stanton Road and onto the estate. Many times vehicles have to back up to allow the bus to pass due to parking and accessibility. The roads aren't wide enough for vehicles to pass as it is. With increased traffic this will cause major congestion and road rage incidents!

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Helen Gillain	Response-00964	One one day alone I witnessed 2 busses struggling to get through Coronation Avenue ... I am told by an i4 Trent Barton Driver that this service is regularly cancelled due to inaccessability issues
1.7	West of Sandiacre	Bus Services	Helen Richardson	Response-00432	There are no significant bus services that service the proposed area apart from the R4 which has a limited time table.
1.7	West of Sandiacre	Bus Services	Helen Thompson	Response-01356	I think this will exacerbate the problems of bus access through this area due to increased traffic and parking. Has the bus company been consulted with especially about existing problems?
1.7	West of Sandiacre	Bus Services	Helen whiteman	Response-00447	How are you going to get buses up there. No thought whatsoever given as usual from an uncaring council
1.7	West of Sandiacre	Bus Services	Ian herbert	Response-00939	The i4 bus service does go near to the proposed site but residents will find that after 6pm it becomes a cinderella service with frequent cancellations and only once an hour after 8pm.
1.7	West of Sandiacre	Bus Services	IAN TAYLOR	Response-00972	There is currently only one bus route in this area (i4) which is already liable to regular disruption due to congestion on Stanton Road and other roads. Buses regularly cannot turn onto Spencer Avenue, causing delays and impacting pedestrian safety.
1.7	West of Sandiacre	Bus Services	Ian Ward	Response-01628	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Irina Anthony	Response-01867	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Isabelle Love	Response-00529	One bus that passes through the area to commute to Nottingham (not Derby), and struggles to do so, this will only encourage the use of cars. i4 is a poor service at the best of times.
1.7	West of Sandiacre	Bus Services	Isobel Ball	Response-01092	Our bus services are already strained. With some not showing up and most overcrowded. It is almost impossible to get where you need to be without leaving at least 2x earlier than is required. This is already a difficulty many of us face living in this area. So building houses to live hundreds more will absolutely escalate this issue. Furthermore, buses may have to become more frequent to accommodate to the additional passengers. Which will make the difficulty of getting around those tight corners and streets more frequent, thus, making congestion far far worse.
1.7	West of Sandiacre	Bus Services	J. E. Lord	Response-01601	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Jack Greatorex	Response-01731	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Jacob Whitt	Response-01748	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Jacqueline Marshall	Response-01436	If you have checked how difficult it is for buses to navigate the route that they take at present you would fully understand that extra buses can not be accommodated and would not be able to access the proposed development without great disruption to residents.
1.7	West of Sandiacre	Bus Services	Jade Smith	Response-01783	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	James Meadwell	Response-01653	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	James Roberts	Response-01708	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	James Seward	Response-01683	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Jane Elizabeth Tindsley	Response-00669	I wish to raise an objection to the proposed development on the grounds of poor accessibility and inadequate public transport provision. There is already existing evidence that buses regularly struggle to navigate the narrow residential roads leading to the proposed site. I have personally used the 14 bus service both to Nottingham and returning to Sandiacre (Larch Drive). On several occasions the bus driver has had to stop the bus, get off, and physically knock on the doors both on Beech Avenue and Coronation Road to ascertain who the car(s) belonged to and to request them to move their car(s) to allow the bus to continue its journey. Given the constraints, I am uncertain how a large service bus would be able to safely access the proposed site entrance, especially when accounting for construction traffic and future vehicle use. If a bus is unable to enter the site itself, residents particularly those who are older or have limited mobility would be expected to walk back uphill from the existing bus stop on Cloudside Road/Maple Avenue to return home. This presents a serious accessibility concern, as the existing roads include a significant gradient, which would make walking difficult or even unmanageable for many, especially in poor weather. This directly conflicts with Paragraph 112 of the National Planning Policy Framework (NPPF), which requires that developments give priority to pedestrian and cycle movements and promote access to high-quality public transport. It also contradicts Paragraph 130, which emphasises that developments should be inclusive and accessible, ensuring that they meet the needs of people with disabilities and reduced mobility. If the development cannot provide a site layout that enables safe and practical access for buses, it will result in a scheme that is not only poorly connected but excludes a significant portion of the population from being able to live there comfortably. For these reasons, I object to the current proposal and urge the planning authority to ensure that any approved development provides proper, accessible public transport links that serve all residents.
1.7	West of Sandiacre	Bus Services	Janet Edwards	Response-01906	Services are already overstretched & the proposed building would put even more pressure on them.
1.7	West of Sandiacre	Bus Services	Janet Whildes	Response-01869	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Janice Taylor	Response-01743	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Janice West	Response-00989	Buses are so precious to all residents of Sandiacre and on the Coronation Estate essential. The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Janine Holmes	Response-01595	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Jason Deepprose	Response-00818	Make more free bus services. If public transport was free or cost less people would stop using cars
1.7	West of Sandiacre	Bus Services	Jason Harwood	Response-01667	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Jason Webb	Response-01637	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Jayne Rowley	Response-01279	Due to the narrowness of some of the roads in this area and also the parked cars the bus often struggles to follow its route as it is unable to pass through the parked cars on and oncoming traffic. The increase in traffic and also industrial traffic would potentially make the service unreliable for its users.
1.7	West of Sandiacre	Bus Services	J Cates	Response-01750	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Jeanette O Connor	Response-01640	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Jennifer Bailey	Response-01857	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Jennifer Saville	Response-00516	already commented on, problems with 14 accessing bus route around narrow streets

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Jennifer Tindsley	Response-00751	1. Whilst I do not have any experience of using the bus service in the area, I can well understand the problems that the buses have in negotiating the local roads. I know that both my parents have had situations where the bus driver has been unable to get through a gap because of parked cars, and has had to stop and knock on doors to ask people to move their vehicles. I wish to raise an objection to the proposed development on the grounds of poor accessibility and inadequate public transport provision. 2. There is no way that a bus could access the development land. Access from the development site would be difficult for less mobile residents, or parents with pushchairs, and I believe this would discourage the use of public transport, and thereby encourage increased car usage, which is not ecologically friendly. For these reasons, I object to the current proposal and urge the planning authority to ensure that any approved development provides proper, accessible public transport links that serve all residents.
1.7	West of Sandiacre	Bus Services	Jenny Stephens	Response-01723	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Joanna hardy	Response-01304	The current bus services struggle to get along some of the narrow roads in sandiacre and increased traffic from the proposed site would increase this issue.
1.7	West of Sandiacre	Bus Services	Joanne Guyatt	Response-01784	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Joanne Johnson	Response-00765	Our bus service is adequate, we don't need anything changing in this area.
1.7	West of Sandiacre	Bus Services	Jodie Owen	Response-01688	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Jodie Shrive	Response-00601	The public transport around this area of Sandiacre is already very limited, adding another 180 homes with at least 2 people per household puts increased & un-needed pressure on a public transport system that is already on it's knees. Therefore you will be encouraging people to use their cars, referring back to the other issue of congestion. Has this been thought through at all?
1.7	West of Sandiacre	Bus Services	Jo Gerhardt	Response-01286	There would be no access to bus stops unless you walked down a steep hill. Could be difficult in icy bad weather.
1.7	West of Sandiacre	Bus Services	John Gardner	Response-01694	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	John G Brown	Response-01752	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	John Hibbitt	Response-01855	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	John Ledger	Response-01605	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	John Payne	Response-01785	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	John whiteman	Response-00450	No buses will be able to get near to the proposed site
1.7	West of Sandiacre	Bus Services	Jon Burn	Response-01722	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Josh Williams	Response-01632	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	J Pearson	Response-01772	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Judith A Pulfer	Response-01863	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Judith Blackburn	Response-01928	Delays in bus journeys.
1.7	West of Sandiacre	Bus Services	Julie Hill	Response-01643	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Karen Alldread	Response-01868	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Karen Blain	Response-01732	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Karen Harwood	Response-01668	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Karen Pitts	Response-00643	I refer to the increase in traffic congestion. If you take the time to speak to bus drivers on the route, I think they would all agree that it is already intolerable, causing delays and frustration to all concerned.
1.7	West of Sandiacre	Bus Services	Kathryn Lovatt	Response-00497	Regular users of the Trent Barton i4 bus service including many elderly people, could be adversely affected by the increase in vehicles on Coronation Avenue/Beech Avenue (due to the proposed housing development). The i4 bus currently has difficulties negotiating the number of vehicles (including parked vehicles) on Beech Avenue and frequently gets completely stuck and has to wait for cars to move. I have personally been a bus passenger when this has happened. This congestion would be made worse by increased number of vehicles on Stanton Road, Beech Avenue and Coronation Avenue. My fear is that Trent Barton could stop this bus service altogether as it impacts on their drivers and timetabling. The removal of this bus service would prevent non drivers (including elderly and disabled) accessing shops, doctors surgeries etc. and would mean some people losing their independence thus having a detrimental impact on their lives.
1.7	West of Sandiacre	Bus Services	Kathryn Martin	Response-00527	Surrounding roads are tight and congested, buses often get stuck.
1.7	West of Sandiacre	Bus Services	Katie Morrice	Response-00664	There is a regular bus route through station Road, coronation avenue, maple avenue and Beech avenue. This route already has to avoid a lot of the on street parking around the area, having an increased traffic flow will cause a lot of congestion turning onto streets like cloudside Road where a bus stop is right at the bottom of it. As the current bus service is unable to access the roads above Coronation Avenue due to the steepness and parked cars it would not be possible to provide a bus service for a residents on an even higher site.
1.7	West of Sandiacre	Bus Services	Katie Robinson	Response-00943	The bus that services the top of the estate is already under pressure - during the winter it can not services the area where the proposed plan is due to ICE or snow or extreme weather. In addition to this in sometimes has to miss this side of the estate out due to the traffic on the roads and parked cars. I have experience myself many times the road has been blocked as the bus can not proceed on his route due to park cars and at worse double parked cars - the roads are small as it is so when the cars are double parked it makes it very difficult for the bus to proceed. We have to wait for the driver to knock on doors asking people to move their cars and at best they do and if they don't I have seen the bus reverse and exit and not complete the route he is meant to go on. Add extra traffic and park cars and this is only going to get worse. Some people relay on that service -people like myself that have mobility problems so not having this service or having it effected will cause major problems. Also if the bus route is constantly effected could Trent Barton pull the service from this area? Currently it's manageable with problems but this build could very easily push it pass the point of manageable.
1.7	West of Sandiacre	Bus Services	Katrina	Response-00628	I've already seen the i4 bus driver have to leave the vehicle to knock on peoples doors to get them to move their cars as he was unable to fit through, this will get even worse with more cars on the road.
1.7	West of Sandiacre	Bus Services	Kelly Randall	Response-00591	Current bus services are limited, with the R4 route only serving Nottingham and often disrupted during winter. Other public transport links are not within easy walking distance, reducing the site's accessibility.
1.7	West of Sandiacre	Bus Services	Kelsey Green	Response-01666	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Kenneth Cooper	Response-01720	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Kern-Paul Lewis	Response-01715	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Kerry Meadwell	Response-01655	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Kerry Smith	Response-01271	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Kerry stokes	Response-00769	Buses often have trouble trying to get round the streets in this area due to the volume of parked cars. We've had experience of big Lorries getting stuck down Stanton road when they meet public buses coming in the opposite direction, this results in them mounting the kerb which is really dangerous for me & my children walking on the pavements. We already have congestion with various businesses around us which bring in bigger vehicles, the construction of the new houses will bring even more & block up the roads. We had one incident where a bus & lorry met on Stanton road & couldn't get past one another so the bus had to mount the pavement & manoeuvre several times before they could move any where.
1.7	West of Sandiacre	Bus Services	KH Taylor	Response-01663	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Kim Helm	Response-00632	An extra bus service or more frequent buses will be needed putting more vehicles on the road
1.7	West of Sandiacre	Bus Services	Kirk Moss	Response-00439	The existing bus route that serves Sandiacre already struggles to navigate the narrow streets near the proposed site. If public buses struggle with access, larger construction and delivery vehicles will find it nearly impossible.
1.7	West of Sandiacre	Bus Services	Kirsty	Response-00970	Roads are too tight for buses
1.7	West of Sandiacre	Bus Services	Kirsty Handa	Response-00445	There is a 1 bus that services this area. The proposed development could negatively impact this service as it already struggles to drive through the estate with parked cars, adding more vehicles will hinder this
1.7	West of Sandiacre	Bus Services	Kirsty Meredith	Response-01462	The bus already struggles to get round Coronation avenue, we do not want to lose this service due to access issues becoming worse.
1.7	West of Sandiacre	Bus Services	Kristie Rugers	Response-01864	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Kyle Jones	Response-01764	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	L A Keen	Response-01659	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Laura Hallam	Response-01711	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Laurence Luck	Response-01727	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Lauren Freeman	Response-01562	I have witnessed the 14 bus struggle to pass the corner of town street onto Stanton Road and also the corner onto Spencer avenue countless times because of parked cars and traffic. As well as the great difficulty it has actually passing from one end of Stanton Road to the other during school start and end. This would become a greater problem with more traffic and construction vehicles. If Trent Barton then decide that Stanton Road/coronation avenue/beech avenue are impassable and change the route this could have a major impact on residents.
1.7	West of Sandiacre	Bus Services	Lauren Rose	Response-01446	Bus services have already been cut to the proposed development area and so the area is already poorly serviced. In the winter, buses struggle to access the area above Coronation Avenue due to the steep nature of the roads and lack of gritting by the Council. More people moving into the area will only place further strain on an already stretched bus service.
1.7	West of Sandiacre	Bus Services	Lee Wilcock	Response-01670	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Lesley Bruce	Response-01397	The bus services around Stanton Road and Coronation Avenue already suffer dramatically from the narrow roads and lack of parking. The extra cars arriving at the schools would make this desperate situation considerably worse with greater congestion.
1.7	West of Sandiacre	Bus Services	Lia Thims	Response-01766	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Linda Castledine-Davies	Response-00850	There is one regular bus service but the bus can only access the lower streets because of the steep terrain, parked cars, narrowness of the roads. The steepness especially towards the top is extreme making it impossible for many to walk to and from the bus stop. Personally, due to health issues - heart and respirator, I am unable to negotiate such a steep hill and like most have to rely on my car to travel. The bus is unable to complete its journey during icy weather again because of the obstructions, narrowness and steepness. When it passes down Beech Avenue vehicles have to mount the pavement to allow it to pass and the congestion from school run vehicles on Beech and Stanton Road often causes delays as the bus cannot get past. The bus often has to curtail its route because of access leaving folk stranded. It is a notorious route that bus drivers dread being allocated.
1.7	West of Sandiacre	Bus Services	Lindsey Rawlinson	Response-01624	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	LISA ANNE GILLIGAN-LEE	Response-00710	Such a development would place immense pressure on local infrastructure?schools, GP surgeries, public transport, and emergency services are already stretched. Without serious and sustainable planning, these additional homes could lead to long-term issues for the entire community. In light of all these concerns, I strongly urge you to reject the proposed development. Instead, I ask that the Council consider alternative solutions that protect our green spaces and focus on improving, not undermining, the quality of life in Toton.
1.7	West of Sandiacre	Bus Services	Lisa J Pearson	Response-01762	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Liz Woodhouse	Response-01584	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	L Mee	Response-01777	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Logan Fox	Response-00746	I take the bus each day and have to walk to the bus stop as it is a few mins away from the house. In winter, the bus cannot make it up the road when it freezes over and results in us having to walk on the icy roads to get closer to home. Surely with more people, this can be a risk particularly for older people having to walk in this situation?
1.7	West of Sandiacre	Bus Services	Lorraine Hands	Response-00534	I have already mentioned that buses struggle to get through Coronation Avenue and down Beach Avenue, I say again safety of all pedestrians would be affected if the volume of traffic was to increase on such scale!
1.7	West of Sandiacre	Bus Services	Louise dix	Response-00975	Buses already struggle to make it around the estate so the increase in traffic would make it a nightmare for buses and the resident with delays to service
1.7	West of Sandiacre	Bus Services	Louise Felfoldt	Response-01733	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Louise Harper	Response-01571	The buses are usually regular but in the snowy weather we had recently the bus didn't turn up at all due to the road going round coronation avenue not getting gritted, I usual leave my moped down there as chestnut doesn't get gritted at all but I was unable to use it to get to work at the road was dangerous
1.7	West of Sandiacre	Bus Services	Louise Harrison	Response-01719	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Louise Jacks	Response-01767	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Louise Libberton	Response-01693	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Lucy johnson	Response-01369	I do think the bus service in sandiacre is quite good! We get regular bus services to Nottingham and Derby! It helps out the community massively! We dont want to put a strain on that!
1.7	West of Sandiacre	Bus Services	Luke Chein	Response-01779	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Lynda Morton	Response-01606	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Macie Brothwell	Response-01633	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Malcolm Dillon	Response-00722	Currently this greenbelt area does not need, or have, a bus service. The current road structure does not permit busses to go up to the start of the proposed development. The current bus system is limited in timings and route options. Journeys to Nottingham is the only option for current users. This limitation is unlikely to change due to the costs involved in running any bus service. This limitation of destination options will have a detrimental effect on the occupants of this proposed development.
1.7	West of Sandiacre	Bus Services	Malcolm Fox	Response-00215	1 Bus, 1 route.... Again, very little consideration for current infrastructure. Trying to solve an issue further down the line (housing) without first supporting the key required elements - transport being one, is short sighted and shows lack of serious consideration.
1.7	West of Sandiacre	Bus Services	Malcolm Riggs	Response-01680	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Malc Orbiston	Response-01673	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mandy Rait	Response-01587	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mark Gough	Response-00888	We need a bus service for people who don't drive , elderly people to get to their appointments and for shopping , so we don't want to loose that . However we could if the traffic increases and makes it even more difficult for the buses to get round Beech Avenue, Stanton Road . We need to use the buses more to save using cars and more pollution . This build of 180?more houses will add to the traffic chaos and could cause the bus company to either take the bus (i4) off altogether, or divert it making it harder for the elderly to walk to the stops. Especially in icy and wintry weather . This could add to falls and broken hips .
1.7	West of Sandiacre	Bus Services	Mark Leek	Response-01740	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	mark skelton	Response-01341	Already used during peak times. Hope the route won't have to have more busses to cope, have impact on air quality and heavy traffic down the road.
1.7	West of Sandiacre	Bus Services	Martin Driver	Response-01387	Bus can hardly get through already due to traffic issues. NO MORE TRAFFIC!
1.7	West of Sandiacre	Bus Services	Martin Hardy	Response-01413	We already have problems with bus access. At least a few times a week the buses are forced to wait honking their horns to get other vehicles to move when parked. There have been rumours that they will stop the bus loop up coronation avenue due to these issues. More traffic would only increase this problem.
1.7	West of Sandiacre	Bus Services	Martyn Locker	Response-00903	This has been covered in previous sections.
1.7	West of Sandiacre	Bus Services	Matt Hallam	Response-00476	No way could busses be able to travel up anywhere near this new estate, the bends on cloudside are too tight plus the 2 lanes are not the normal road width .Bad weather is near impossible to get down cloudside when it snows and we often have to grit this ourselves.
1.7	West of Sandiacre	Bus Services	Matthew Buckland	Response-00615	The bus can only get as close as Coronation Avenue to the site. In winter, it struggles to access this road, and Beech Avenue due to ice. There are also a lot of occasions when the bus hasn't been able to drive round Coronation Avenue and Beech Avenue due to parked cars blocking the road. The way that new developments are built now, a bus wouldn't be able to drive round on a new route either.
1.7	West of Sandiacre	Bus Services	Maurice Mason	Response-01617	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Maxine Sutton	Response-00471	Very few buses run through Sandiacre, I doubt they would be able to cope with more people. There are no links to the tram network which might help take traffic off the main roads.
1.7	West of Sandiacre	Bus Services	M Dougle	Response-01749	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	M Eastwood	Response-01757	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Melanie	Response-00586	While the current bus service is available, its coverage is limited and often unreliable, particularly in adverse weather. Other bus routes are located approximately 20 minutes? walk away, which is not suitable for many residents, especially the elderly or those with mobility issues.
1.7	West of Sandiacre	Bus Services	Melanie Caumont	Response-01272	Current bus routes already struggle to navigate the estate due to narrow roads and parked vehicles. Additional housing will exacerbate this issue, making public transport less reliable and less attractive, further pushing residents towards car use and worsening congestion and pollution
1.7	West of Sandiacre	Bus Services	Melanie Howarth	Response-01621	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Michael Anderson	Response-00461	Main bus services to Ilkeston, Nottingham, Derby, and local facilities such as doctors, dentists, chemists are already a problem getting through will become even worse with the extra traffic. This will be particular concern to the ageing community.
1.7	West of Sandiacre	Bus Services	Michell Birkin	Response-01657	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Michelle Alsop	Response-01645	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Michelle Cox	Response-01724	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Michelle Ledger	Response-00815	I get the i4 bus service most days and this is my experience at 10am in the mornings which i dare say is the quietest time of the week. Navigating the bend at Blue Bell/Sandiacre football club. Many occasions where cars parking on the road at the football club, and with it been almost a blind bend make bus passing very difficult School - school drops mean influx of drivers who then park outside school and up Beech Ave, sometimes right on the bend and on pavements..buses cannot get through many times. I have witnessed buses been at a standstill until parents have done there drop and returned to their car Coronation Ave -turning in from Stanton Road - cars often parked on pavement as road too narrow to park on both sides - with the cars that are parked on the road you can only drive 1 a time through there right the way round. (You can here the bus drivers chuntering to themselves under their breath lol) Bus stop bottom of Cloudside Road/Maple Ave..again noted cars resorting to parking on pavements but the bus ALWAYS have a nightmare navigating this bend (I think most of them feel they have drawn a short straw when they are given the Sandiacre route ) Beech Ave - again, buses noted having to weave their way through the parked cars. Given this is the main road up to Cloudside estate/Maple Ave etc etc this road along with Coronation is no where near wide enough as it is currently never mind more housing stock to support. Also to add on, the traffic queues at the crossroads even at this time of day waiting to turn from Lidl into estate is simply horrendous - I have noted this be worse last year or so clearly because of all the HGVs coming and going to the Stanton Works site. I have often wondered if i was ever to need an abulance or had a fire how on earth could the emergency services get to me at times? Or moreso in a urgent manner? We simply cannot support HGVs/building vehicles in this area - they can't get up there. (Not unless they make every resident move their cars which god forbid I hope they can't enforce that?? The fact of the matter is basically more or less of the whole estate does not have wide enough roads for traffic to flow both directions end of
1.7	West of Sandiacre	Bus Services	Michelle Wenham	Response-01650	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mick Helm	Response-00021	See comments in road safety.
1.7	West of Sandiacre	Bus Services	Mick Hughes	Response-01701	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mike Darnett	Response-00698	A bus service couldn't get up there.This site is far from services.and fails to prioritise age friendly family housing
1.7	West of Sandiacre	Bus Services	Miss Garratt	Response-00905	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Miss R Cordon	Response-01648	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Misty McGrath	Response-01556	Already difficult and poor given the access roads and car parking, and will only get worse.
1.7	West of Sandiacre	Bus Services	Mollie Snow	Response-01729	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Molly Newbold	Response-00486	The buses already struggle to get down beech Avenue. Imagine 180 additional cars to get in the way.
1.7	West of Sandiacre	Bus Services	Mr & Mrs Turton	Response-01660	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mr and Mrs R Skelton	Response-01274	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mr and Mrs Wright	Response-01275	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mr David Ainsworth	Response-00621	The buses already can't get around our narrow streets. The bus drivers are rude, and with so many cars parked on the pavements, I urge you not to increase the number of buses going round. They are a hazard and a nuisance.
1.7	West of Sandiacre	Bus Services	Mr John Hickingbotham	Response-01431	All traffic from this proposed site must use either Coronation Avenue or Beech Avenue, both of which are the current, and only possible, route of the TrentBarton i4 bus service. As a regular user of this service I know of the difficulties experienced by bus drivers and the delays caused due to inconsiderate parking and sheer volume of vehicle movements, particularly during peak hours and school-run times. A significant traffic increase may well create intolerable delays which ultimately result in withdrawal of the bus service, to the detriment of anyone without access to a private car, particularly the elderly
1.7	West of Sandiacre	Bus Services	Mr K Turton	Response-01706	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mr Luke	Response-01703	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Mr P J Tanner	Response-01728	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mr R M Draper	Response-01856	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mr R Widdowson	Response-01734	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mr S. Haywood	Response-01585	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs Christina Pope	Response-00732	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs Donna C. Ball	Response-01594	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs Griffin	Response-01698	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs J. Cooper	Response-01596	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. The buses struggle to get through Stanton Road, Coronation Avenue and Beech Avenue. Cars being parked causing obstruction on narrow roads. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs Joanne Thompson	Response-01690	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs Lee Farabella	Response-01899	180+ houses will put pressure on local services & public transport.
1.7	West of Sandiacre	Bus Services	Mrs Linda Cox	Response-01753	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs Luke	Response-01704	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs M. Rose	Response-01583	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs Marie Draper	Response-01755	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs M Burke	Response-01887	More houses will add more pressure on local services and public transport.
1.7	West of Sandiacre	Bus Services	Mrs Rachel Coats	Response-01623	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs R Cordon	Response-01647	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs Rigby	Response-00641	The bus is unable to access roads above Coronation Ave because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs Shani Wainwright	Response-00754	The bus service already has issues accessing the roads due to them being g narrow and windy with many parked cars along them. Accessing the new site would be impossible because of this and the steepness and terrain of that area. Many people at the top of the hill currently can't use the current bus service because of the above issues plus weather issues in winter, so any new residents will be forced to use cars not the unreliable limited public transport. Therefore the massive negative impact of number of cars will be terrible for the whole area.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Mrs Sheila Hickingbotham	Response-01338	The area north of Stanton Road is currently served by Trent Barton i4 bus which at times already experiences difficulty in accessing part of the route due to volume of traffic and parking issues. The addition of 180 additional homes will only increase these issues. If these problems resulted in the bus company withdrawing the service altogether, this would deprive anyone living north of Stanton Road access to nearby public transport.
1.7	West of Sandiacre	Bus Services	Mrs Shirley Victoria Riggs	Response-01685	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs Susan Bantle	Response-01612	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs Turton	Response-01707	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Mrs Whittaker	Response-00595	The increase in traffic, will adversely effect the already congested route for the only bus service which operates in the immediate area.
1.7	West of Sandiacre	Bus Services	Natalie Bentley	Response-01646	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Neil Biddulph	Response-01891	
1.7	West of Sandiacre	Bus Services	Nicole Cooper	Response-01597	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Nikki Vincent	Response-00688	The i4 bus service serves our local area and there are already concerns around access due to the tight roads and problems caused by poorly parked vehicles. The increase in heavy duty & household vehicles will only add to this problem and my concern is that the bus company will stop serving this route as a result. Local people rely on this bus service and I personally use this as an alternative to driving myself.
1.7	West of Sandiacre	Bus Services	Normn McCrea	Response-01754	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Oliver Marriott	Response-00679	Bus Services Bus The buses are unable to access a large part of sandiacre due to the nature of the steep roads and sharp turns, coronation avenue and larch road are particularly challenging. In winter and when we have previously had floods the buses have to find an alternative route missing out the more challenging areas including the proposed site access roads.
1.7	West of Sandiacre	Bus Services	Paige Walker	Response-01669	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Pamela Bassett	Response-00608	I am worried as a pensioner that bus services will be reduced because they can't get through on the smaller roads due to the parking and the traffic
1.7	West of Sandiacre	Bus Services	Pam shepherd	Response-00453	Already stretched more buses more damage on the roads congestion
1.7	West of Sandiacre	Bus Services	Pat Hardy	Response-01739	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Paula Darnell	Response-00665	Buses cannot possibly get up the narrow congestion windy roads and it would be so dangerous.
1.7	West of Sandiacre	Bus Services	Paula Luck	Response-01710	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Paula Sims	Response-01687	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Paul Randall	Response-00131	The existing bus service R4 is OK but limited as it only serves Nottingham direction. The bus service often doesn't serve Coronation Avenue in winter due to ice. Other bus services are a 20 minute walk away.
1.7	West of Sandiacre	Bus Services	Paul Vleeton	Response-01770	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	paul wheeldon	Response-00582	Buses already have major problems navigating the roads used in the area due to congestion
1.7	West of Sandiacre	Bus Services	Peter Anthony	Response-01866	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Peter Nicholls	Response-01622	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Pete West	Response-01700	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Phil Creasey	Response-01342	As the current bus service is unable to access the roads above Coronation Avenue due to the steepness and parked cars it would not be possible to provide a bus service for a residents on an even higher site.
1.7	West of Sandiacre	Bus Services	Philip Reed	Response-01449	I object to the proposed development of 180 new houses due to the strain it will place on existing local bus services. Current services already struggle at times to get around the Sandiacre estate due to resident parking. Increased demand could lead to overcrowding, reduced reliability, and inconvenience for current residents who rely on public transport for daily needs.
1.7	West of Sandiacre	Bus Services	P Sandes	Response-01682	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Rachel Crossley	Response-01661	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Rachel Skelton	Response-01241	Busses up Coronation Avenue and down Beech Avenue are already struggling, the extra traffic will add to this
1.7	West of Sandiacre	Bus Services	R Barratt	Response-01664	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Rcahel Sharp	Response-00652	We have a really good bus service in the i4 which I use to go to work, to visit my Mum in her care home and also for leisure. I am worried with the increased traffic/development that the bus operator will stop serving Coronation Ave/Maple Avenue/Beech Avenue given the problems they already have negotiating the traffic.
1.7	West of Sandiacre	Bus Services	Rebecca Longmuir	Response-00253	Buses struggle to get through the tight and narrow streets with double parked cars now. And that?s without this ridiculous new building idea. More congestion and stuck buses will only add to more pollution and poor bus service.
1.7	West of Sandiacre	Bus Services	Rhiannon Lowater	Response-01592	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	R Hibbitt	Response-01862	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Richard Broughton	Response-01352	Given the increase in residents, there will very likely be an impact on the bus service. What steps have you taken to ensure that the bus service will keep pace with any additional demand?
1.7	West of Sandiacre	Bus Services	Richard Haines	Response-01674	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
			Richard Jenkins	Response-00264	Already struggling with local traffic issues.
1.7	West of Sandiacre	Bus Services	Richard Marriott	Response-00675	Bus Services Bus The buses are unable to access a large part of sandiacre due to the nature of the steep roads and sharp turns, coronation avenue and larch road are particularly challenging. In winter and when we have previously had floods the buses have to find an alternative route missing out the more challenging areas including the proposed site access roads.
1.7	West of Sandiacre	Bus Services	Richard Naylor	Response-00066	The bus will not be able to get around this estate.
1.7	West of Sandiacre	Bus Services	Richard Shrimpton	Response-01301	the bus is unable to access the roads above Coronation Ave because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Rob Lowe	Response-01768	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Roger Day	Response-00023	There are no buses serving the area covered by the proposed development.
1.7	West of Sandiacre	Bus Services	Roger Fleck	Response-01083	The bus that currently runs around the estate leading up to the proposed site has often got stuck due to the narrowness of the roads and the amount of cars already in the area parked or passing. The bus would not be able to access the new proposed site due to the road structure therefore not offering easily accessible public transport for the residents of the new proposed site.
1.7	West of Sandiacre	Bus Services	Rosemarie Gough	Response-00997	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Roy Drew	Response-01614	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Ruby Sharp	Response-00886	We have a really good bus service in the i4 which I use to for leisure and to go to the QMC. I am worried with the increased traffic/development that the bus operator will stop serving Coronation Ave/Maple Avenue/Beech Avenue given the problems they already have negotiating the traffic. Bus drivers often have trouble getting up Coronation Avenue and around Maple Avenue due to parked cars, I see it many times a week from my window. This route is essential for those with disabilities and the elderly who cannot walk down to the White Lion/Lidl to get the bus. If the bus route disappears due to traffic, there will be more cars on the road contributing to all points mentioned above: congestion, road safety and pollution.
1.7	West of Sandiacre	Bus Services	Ryan Selby	Response-00479	Will effect the bus service, new routes and buses may need to be added, again adds to the pollution, air and noise.
1.7	West of Sandiacre	Bus Services	S. Brailsford	Response-00598	Bus service always under pressure as traffic in this area and surrounding streets means the busses often have to mount the kerb & are often unable to pass parked cars Bus services are often late because of this
1.7	West of Sandiacre	Bus Services	S. Jones	Response-01615	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Sally Davies	Response-01294	Are bus services are very good but adding more routes will cause even more congestion.
1.7	West of Sandiacre	Bus Services	Samantha Anne Whitney	Response-00757	The buses come onto the estate every 20 minutes at the moment, if they can make it up that far. They frequently get stuck once they reach Stanton Road, even with the amount of traffic we have now. Adding another 360 cars onto them roads means the busses will get stuck more frequently, the drivers won't want to come onto the estate and we'll end up with no bus service. There are a lot of older people on the estate, what will they do with no bus service? Have you walked from the centre of Sandiacre where the buses would then stop. It's a 20 minute walk from the centre of Sandiacre to Chestnut Grove, all up hill. My parents along with lots of local residents wouldn't manage that! I'm only 46 and even I would struggle doing that everyday.
1.7	West of Sandiacre	Bus Services	Samantha Whildes	Response-01270	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Sam Buckland	Response-00600	The bus can only get as close as Coronation Avenue to the site. In winter, it struggles to access this road, and Beech Avenue due to ice. There are also a lot of occasions when the bus hasn't been able to drive round Coronation Avenue and Beech Avenue due to parked cars blocking the road. The way that new developments are built now, a bus wouldn't be able to drive round on a new route either.
1.7	West of Sandiacre	Bus Services	Sam Fleck	Response-00821	Bus Service: I wish to raise an objection to the proposed development on the grounds of poor accessibility and inadequate public transport provision. There is already existing evidence that buses regularly struggle to navigate the narrow residential roads leading to the proposed site. In some cases, buses have become stuck due to parked cars and tight corners. Given the constraints, I am uncertain how a large service bus would be able to safely access the proposed site entrance, especially when accounting for construction traffic and future vehicle use. If a bus is unable to enter the site itself, residents particularly those who are older or have limited mobility would be expected to walk uphill to reach the nearest bus stop. This presents a serious accessibility concern, as the existing roads include a significant gradient, which would make walking difficult or even unmanageable for many, especially in poor weather. This directly conflicts with Paragraph 112 of the National Planning Policy Framework (NPPF), which requires that developments give priority to pedestrian and cycle movements and promote access to high-quality public transport. It also contradicts Paragraph 130, which emphasises that developments should be inclusive and accessible, ensuring that they meet the needs of people with disabilities and reduced mobility. If the development cannot provide a site layout that enables safe and practical access for buses, it will result in a scheme that is not only poorly connected but excludes a significant portion of the population from being able to live there comfortably. For these reasons, I object to the current proposal and urge the planning authority to ensure that any approved development provides proper, accessible public transport links that serve all residents.
1.7	West of Sandiacre	Bus Services	Sam Greatorex	Response-01695	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Sandra Cooke	Response-01613	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Sarah Harrison	Response-01658	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	S Bryne	Response-01677	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Sebastian Roberts	Response-01675	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Shanead Ligton	Response-01689	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Shannon moss	Response-00454	The buses already struggles to navigate the streets due to their narrowness, particularly towards the upper sections near the proposed development site. If a standard public bus finds it difficult to pass through these areas, it raises serious concerns about how heavy-duty machinery, such as cranes, concrete lorries, and grab hire trucks, would even begin to manoeuvre through these constricted roads. Even standard cars often struggle to navigate the tighter sections, meaning construction traffic would likely cause further congestion, damage to road surfaces, and an increase in safety hazards for pedestrians and existing road users.
1.7	West of Sandiacre	Bus Services	Shannon Robinson	Response-01635	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Sharon weston	Response-00440	Buses getting stuck cus of traffic what would happen if emergency services couldn't get thro let's hope it's not your family
1.7	West of Sandiacre	Bus Services	Shaun Green	Response-01773	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Sheila	Response-00587	While the i4 bus service - Trent Barton, is available, its coverage is limited and often unreliable, particularly in adverse weather. Other bus routes are located approximately 20 minutes? walk away, which is not suitable for many residents, especially the elderly or those with mobility issues. There have already been complaints from people regarding the bus service and getting around the estate. Adding more people with more cars will only exacerbate this issue.
1.7	West of Sandiacre	Bus Services	Sheila Payne	Response-01782	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Sian Knox	Response-01679	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	S Leek	Response-01737	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Sonya Birkin	Response-01656	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Sophie	Response-00472	They have struggles getting the buses around sandiacre especially in areas where there is already lots of people living with lots of vehicles
1.7	West of Sandiacre	Bus Services	Sophie Bennett	Response-01631	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Stephen Davies	Response-00214	i4 route currently has severe issues in negotiating roads once it leaves Derby Road and additional traffic in area would only worsen this. Given the constrains of parked cars as evidenced on page 65 of the EBC Neighbourhood Plan and the 3 x 90 degree bends required to access the development from the current i4 route the site is unlikely to be accessible by public transport resulting in making a lengthy walk to a bus stop essential. This would prove difficult or indeed unmanageable for many. This is contrary to paragraph 13 which empathises that developments should be inclusive and accessible, ensuring they meet the needs of people with disabilities and reduced mobility. If the development cannot provide a site layout that enables safe and practical access for buses it will result in a scheme that is not only poorly connected but excludes a significant portion of the population from being able to live there comfortably
1.7	West of Sandiacre	Bus Services	Stephen Sacker	Response-01598	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Steve Bilbie	Response-00285	Buses already are already struggling to navigate the existing estate. Buses have serious access issues in this area and will only get worse.
1.7	West of Sandiacre	Bus Services	Steve Whittaker	Response-01781	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Sue Harrison	Response-01629	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Susanne Beaven	Response-01618	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Sylvia Plampin	Response-00624	The i4 bus often gets stuck on beech avenue because of badly parked vehicles, and struggles to turn out of beech avenue and also onto coronation avenue. I've been on the bus when it became stuck, and was unable to carry on the journey for 15 mins due to someone's inconsiderate parking at school drop off!! I'm surprised they still access the estate.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Tamara Partridge	Response-01780	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Tarnya Hinman	Response-01786	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Thomas Ilett	Response-01088	Bus services are generally good in Sandiacre, however the Sandiacre Neighbourhood Plan highlights that young couples moving to the area who require housing will likely work in the huge commercial developments in Ilkeston. At present, the area of Sandiacre proposed for development is serviced well by the I4 (although this regularly gets stuck and delayed due to poor parking), however this only connects Sandiacre with Nottingham and Derby. Other areas that new residents could need include Ilkeston, Long Eaton, East Midlands Airport and Leicester, which are not available by bus in this particular part of Sandiacre. Therefore, I propose the bus services in this area of Sandiacre are inadequate for 180 new properties.
1.7	West of Sandiacre	Bus Services	Tim Derbyshire	Response-01681	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Tim Gough	Response-00996	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Toby Moran	Response-01769	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Tom Ball	Response-01672	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Tony Weston	Response-00990	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Tracey Howe	Response-01860	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Tracey Hughes	Response-01699	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Tracy Jones	Response-00436	The bus regularly gets stuck due to over congestion
1.7	West of Sandiacre	Bus Services	Trevor Rowston	Response-01678	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Try church	Response-00033	With more housing comes more people who will need more services, which will again mean more buses using the area around the proposed development. The roads cannot cope now let alone with more vehicles
1.7	West of Sandiacre	Bus Services	Tyler Hobbs	Response-00879	Building on the greenbelt in Sandiacre will put significant strain on the already limited local public transport infrastructure, particularly the i4 bus route, which is currently the only service operating in the area. This route is already well-used by residents commuting to and from Derby and Nottingham, and an increase in population from new housing developments would place additional pressure on this single line. Overcrowding, longer wait times, and reduced reliability are likely outcomes, making it harder for existing and new residents to rely on public transport. Without investment in expanded or additional transport services, this development would contribute to congestion, increase car dependency, and reduce the overall sustainability of the area.
1.7	West of Sandiacre	Bus Services	Vanessa Asbach	Response-00700	The bus service will certainly be impacted by these houses. Yes there is potential for more bus users, but realistically more people need to rely on cars to get to and from work. The bus transport already struggles going around the narrow existing corners of the roads, especially when cars are trying to come the other way. It is not only awkward, but also dangerous. Especially when the football club is open. Love the community, but hate the way they park long the entirety of the road making it unsafe for everyone else.
1.7	West of Sandiacre	Bus Services	Verity Lamb	Response-01298	I've never envied the drivers having to negotiate the route by cloudside school, adding more cars is an accident waiting to happen
1.7	West of Sandiacre	Bus Services	Victoria Abraham	Response-01652	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Victoria Galpin-shrimpton	Response-01009	Bus Service ? the bus is unable to access the roads above Coronation Ave because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Bus Services	Victoria Greatorex	Response-01730	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Victoria Marriott	Response-00674	Bus The buses are unable to access a large part of sandiacre due to the nature of the steep roads and sharp turns, coronation avenue and larch road are particularly challenging. In winter and when we have previously had floods the buses have to find an alternative route missing out the more challenging areas including the proposed site access roads.
1.7	West of Sandiacre	Bus Services	Vivien Davis	Response-01582	The bus is unable to access the roads above Coronation Avenue because of the terrain, steepness and parked vehicles so would not be able to access the even higher new site. It also struggles up the hill during winter and regularly gets held up on Beech Avenue. Many at the top of the hill cannot use the current bus service because of the steep terrain.
1.7	West of Sandiacre	Bus Services	Wayne Major	Response-00408	I wish to raise an objection to the proposed development on the grounds of poor accessibility and inadequate public transport provision. There is already existing evidence that buses regularly struggle to navigate the narrow residential roads leading to the proposed site. In some cases, buses have become stuck due to parked cars and tight corners. Given the constraints, I am uncertain how a large service bus would be able to safely access the proposed site entrance, especially when accounting for construction traffic and future vehicle use. If a bus is unable to enter the site itself, residents particularly those who are older or have limited mobility would be expected to walk uphill to reach the nearest bus stop. This presents a serious accessibility concern, as the existing roads include a significant gradient, which would make walking difficult or even unmanageable for many, especially in poor weather. This directly conflicts with Paragraph 112 of the National Planning Policy Framework (NPPF), which requires that developments give priority to pedestrian and cycle movements and promote access to high-quality public transport. It also contradicts Paragraph 130, which emphasises that developments should be inclusive and accessible, ensuring that they meet the needs of people with disabilities and reduced mobility. If the development cannot provide a site layout that enables safe and practical access for buses, it will result in a scheme that is not only poorly connected but excludes a significant portion of the population from being able to live there comfortably. For these reasons, I object to the current proposal and urge the planning authority to ensure that any approved development provides proper, accessible public transport links that serve all residents.
1.7	West of Sandiacre	Bus Services	William Marriott	Response-00676	Bus Services Bus The buses are unable to access a large part of sandiacre due to the nature of the steep roads and sharp turns, coronation avenue and larch road are particularly challenging. In winter and when we have previously had floods the buses have to find an alternative route missing out the more challenging areas including the proposed site access roads.
1.7	West of Sandiacre	Flooding / Drainage	Aaron Locksley	Response-00711	Has analysis been done of how loss of natural drainage could affect the current flooding issues experienced around the canal in Sandiacre?
1.7	West of Sandiacre	Flooding / Drainage	Adrian Randall	Response-00463	The site is known to have poor drainage, adding a large number of houses will put a huge strain on existing drainage systems
1.7	West of Sandiacre	Flooding / Drainage	Aimee	Response-00952	Flooding in recent years has been a significant problem in this area, all the concrete and impermeable surfaces all contribute to this and further housing will mean a further reduction in land that rain can soak into. The flooding causes devastating impact on individuals and families in the area leaving them homeless and paying rent for properties not safe or fit to inhabit. These residents will be further impacted by the run off water.
1.7	West of Sandiacre	Flooding / Drainage	Alice Ilett	Response-00571	I live on Spencer avenue and my home has already been highlighted as a flood risk on the Sandiacre neighbourhood plan. I find it incredibly concerning that your looking at building houses on the boggy horse field that contains a lot of the water. There won't be anywhere for that water to go and my home is at the bottom of the hill putting us at an increased flood risk.
1.7	West of Sandiacre	Flooding / Drainage	Amelia Loosemore	Response-00537	More flooding because more houses are being built
1.7	West of Sandiacre	Flooding / Drainage	Amy Cray	Response-01223	It floods all over this area already!
1.7	West of Sandiacre	Flooding / Drainage	Amy Skinner	Response-01447	The site is at risk of flooding due to poor drainage.
1.7	West of Sandiacre	Flooding / Drainage	Anastasia Anthony	Response-01865	No ground to absorb water, so it'll probably eventually flood the M1.
1.7	West of Sandiacre	Flooding / Drainage	Andria Nyilasi	Response-00672	Extreme lengths to ensure the field has decent drainage and will not impact on residents already living in the area will be needed. The impact of so many houses will have a negative effect on flooding for those already living there and will put considerable pressure onto the local services. Sandiacre has been overwhelmed recently with extreme weather due to climate change and it has been evident that our current infrastructure cannot cope with flash flooding and very wet weather. The extra housing would put even more pressure on our poor drains and would see flooding further down the hill in our neighbourhood.
1.7	West of Sandiacre	Flooding / Drainage	Anne Butler	Response-00385	This is the top of the hill so will not be flooded. However as we have learnt from the building on Springfield house, ripping out the trees which sucked up water before, and the wall to wall tarmac and concrete caused flooding to surrounding houses, because all the rain water that landed on the site was not absorbed and ran off causing flooding to gardens either side of the site, flooding to my garage, water running under my house and coming out at the bottom of my drive. Silt running off the site blocked drains, so excess rain water then ran down Longmoor lane and flooded under the A52 bridge. Reporting blocked drains meant that after 8 weeks I got them cleared. Extra drains on the site had to be put in, and a soakaway all the way along the side of my property to ameliorate the nuisance caused by this water. The old quarry had so much water land in it that all the trees in the middle died due to standing water. This has caused annihilation of the wildlife on this site.
1.7	West of Sandiacre	Flooding / Drainage	Anne Castledine	Response-00499	In heavy rain, Poplar, Sycamore and Coronation become flooded. There have also been problems with the water supply, Severn Trent have had to repair pipes many times, and residents have been without water at times.
1.7	West of Sandiacre	Flooding / Drainage	Anne Jenkins	Response-00350	I live on a hill and my garden gets flooded from water draining down from the woods. Disruption to the water table is only going to make it worse. The drains couldn't cope without a massive upgrade which would impact on the whole area

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Flooding / Drainage	Annette Jones	Response-00961	Flooding off the fields is getting worse and as someone who lives on the higher level this is quite concerning and feel for those on lower ground. The drainage is bad and not cleared as it should be so the system cannot cope with the extreme weather we have been experiencing. Water bursts are getting worse particularly on Stanton Road and the last time this happened we were without water almost a day. No plans to do major works so it won't get any better and more bursts likely. Sink holes are also starting to appear and the time it takes to repair is far too long and not safe to the public.
1.7	West of Sandiacre	Flooding / Drainage	Ann Foxall	Response-00748	overloading facilities such as sewage
1.7	West of Sandiacre	Flooding / Drainage	Anthony Ford	Response-01921	The field absorbs water, if it is built on rain has to go somewhere & I am downhill. Kings Road suffers because the drains cannot cope. They are not deep enough & have insufficient fall. We regularly get blockages & overflows. The Severn cannot take any more sewage without causing us major health problems.
1.7	West of Sandiacre	Flooding / Drainage	April	Response-00469	The development of a high-population state in this area raises serious issues around flooding and inadequate drainage. Urban expansion often leads to the replacement of natural ground with concrete and asphalt, which greatly reduces the land's ability to absorb rainwater. Without a well-planned and upgraded drainage system, this can result in frequent flooding, property damage, and even health hazards due to standing water. Our community has already experienced drainage challenges during heavy rains, and additional pressure from new construction could make the situation far worse. Responsible development must prioritize sustainable water management to protect both the environment and residents.
1.7	West of Sandiacre	Flooding / Drainage	A R Gregory	Response-01918	
1.7	West of Sandiacre	Flooding / Drainage	Barbara Warton	Response-01886	More flooding will occur. Where is the rain water to go?
1.7	West of Sandiacre	Flooding / Drainage	B T Duke	Response-01900	Very concerned.
1.7	West of Sandiacre	Flooding / Drainage	Callum binnall	Response-00460	All these houses will have a knock on effect for stoney clouds. The house are to be built on top of a hill. So naturally all that water will drop down onto stoney clouds and down too the old gold course
1.7	West of Sandiacre	Flooding / Drainage	C A Partridge	Response-01903	The fields flood & when draining off the drainage system can't cope.
1.7	West of Sandiacre	Flooding / Drainage	Caroline Blackmore	Response-00451	We need this land to absorb the rain water , too much concrete where does the water go .... it doesn't hence the increase in flooding. You see the drainage infrastructure struggle why add to it
1.7	West of Sandiacre	Flooding / Drainage	Caroline Driver	Response-00618	October 2023 saw horrific flooding, even Lidl was under water. As we are towards the top of steep incline, replacing green belt with concrete jungle is very likely to impact this and run off into the canal. You need to liaise with Broxtowe council for impact on stapleford as they have been battling to solve the flooding where houses and businesses were destroyed. You will both need to undertake a risk assessment involving Broxtowe council. The roads at every entrance to our estate were blocked due to flooding, trapping people in including the vulnerable. I have videos as we were supposed to be going to the airport but couldn't get out. Imagine if it was the hospital we needed! More houses would impact massively the severity of this, putting people's lives, homes and livelihoods at risk.
1.7	West of Sandiacre	Flooding / Drainage	Carolyn Hallam	Response-00489	Sandiacre flooded last year. We were very close to being flooded ourselves. I am concerned that run off from the new housing development will cause our street to flood in the future. Green spaces are needed to offset this. Building is going ahead next to the canal and river now. On what was an open space. More housing higher up is almost certainly going to cause exacerbation of the floods in Sandiacre
1.7	West of Sandiacre	Flooding / Drainage	Catherine Richardson	Response-00531	There will be problems with flooding. The houses on the estate are all lower down from the proposed site
1.7	West of Sandiacre	Flooding / Drainage	Charlotte Hunter	Response-01376	This is flood prone field - natural disaster zone!!
1.7	West of Sandiacre	Flooding / Drainage	Chris Hume	Response-01373	My garden floods during heavy rain, I back onto the field and the water gathers in the field and then runs off into the gardens on Chestnut Grove. It's sometimes like a river running down the garden path and sometimes floods my garage. There is 12" of top soil, then clay which prevents draining
1.7	West of Sandiacre	Flooding / Drainage	Christine Gough	Response-00578	The drainage will be a problem , houses built with no gardens , and the greenbelt areas all taken away , there will be flooding . These houses that are proposed to be built will be high up , and water will run down onto adjacent homes from Larch drive down to Laburnum , Cloudside , Maple , and Beech Ave . Blocking drains and causing more flooding and damage . We have concerns that we can smell sewage sometimes and worried that our drains on Beech Ave and maybe other roads maybe not emptying as quick , I would like the environmental team to check that the drainage is looked at , also concerns that the drainage may be affected more if more houses are built at the top 180 houses and then joined to ours Major concern of the build I have heard that the sewage could be a problem, does the sewage back up from the top ? Is it released in stages at night or day ? From Cloudside , Larch area down to Beech Ave , if so this would be a concern if more houses are joined into our drainage . I can smell sewage sometimes . I'm not sure how old the drainage is 1920? 1930 ?s . It would all needs replacing if more houses are built especially that many .
1.7	West of Sandiacre	Flooding / Drainage	Christine Ridgway	Response-00465	I walk my dogs in the nature reserve daily and have seen alot of standing water in the proposed housing development, this would be a significant worry when building houses there.
1.7	West of Sandiacre	Flooding / Drainage	Claire binnall	Response-00459	There is serous risk of flooding here
1.7	West of Sandiacre	Flooding / Drainage	Clair Ellis	Response-00475	How will this effect the drainage for those of us at the bottom of the hill?
1.7	West of Sandiacre	Flooding / Drainage	Colin Marriott	Response-00686	The infrastructure is over 60 years old and has been subject to burst pipes in recent times. More pressure on an already overstretched system could have a devastating effect. The land at the rear of Sycamore Crescent gets very boggy after heavy rain. Any reduction in land able to soak up rainfall could lead to more run off and potential flooding

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Flooding / Drainage	Courtney Bennett	Response-00593	The area already floods and there is no proper drainage plan. It's common knowledge that new build houses are so poorly built that they flood and have so many issues with flooding and removal of the increased heavy rainfall each year. Building on land where water escapes is only going to cause the flooding to increase in the area. The water has to go somewhere and has to drain somewhere.
1.7	West of Sandiacre	Flooding / Drainage	Daniel	Response-00545	The area is on a slope and currently benefits from natural drainage through the green space. Removing trees and topsoil will increase surface runoff, heightening the risk of flooding for existing homes, especially those at lower elevations. Local drainage systems are already dated and often strained during periods of heavy rain.
1.7	West of Sandiacre	Flooding / Drainage	Daniel Hands	Response-00057	While drainage in the immediate area may not be an issue, the increased pressure on the systems downhill of the site cannot be overlooked. Areas at the base of the hill have seen increased flooding over recent years, with the river erewash regularly bursting its banks and the erewash canal bursting in 2023.
1.7	West of Sandiacre	Flooding / Drainage	Danielle Harrison	Response-00568	180 houses increases surface runoff which off and puts more pressure on ailing sewer systems, flood defences drains. The flooding seen in Sandiacre with the bursting of the Erewash was unprecedented. This will only get worse, at a cost to the council
1.7	West of Sandiacre	Flooding / Drainage	Daniel Naylor	Response-00680	The proposed area currently holds flood water. Once this development is completed, the flood water will not have anywhere to soak away like it already does, so the risk of passing flood water running through nearby houses causes millions in damage and putting existing residents lives in potential danger, rises significantly.
1.7	West of Sandiacre	Flooding / Drainage	Darran and Emma Rea	Response-00597	The area is already at capacity, when we get rain, the water runs down the middle of the road, the drainage has only been built for what housing we have in the area
1.7	West of Sandiacre	Flooding / Drainage	David Tindsley	Response-00515	Whilst the proposed site is not in the designated flood zones identified by the council, nevertheless, I believe that any proposed development on the land could create major issues for residents in the area. Gardens backing on to the site on Larch Drive and Chestnut Grove (backing on to what are currently now stables) get flooded during heavy rain. I have been told by some residents on Maple Avenue and Elm Avenue that their gardens can flood with water and it can come up to the bottom of their front doors during heavy rain as the water finds its natural course down the hill. Nature reserves often act as natural drainage areas. With more tarmac/concrete making drainage less easy, developing this land could increase the risk of flooding to the existing houses, especially during extreme weather, which are becoming more frequent due to climate change. Severn Trent have not been at all helpful in providing any information about sewers in the area. However, a development of 180 houses will inevitably place significant stress on what is probably an already aged and stressed sewer system.
1.7	West of Sandiacre	Flooding / Drainage	Dean Michell	Response-01343	Building on this space I am concerned about flooding.
1.7	West of Sandiacre	Flooding / Drainage	Debra Michell	Response-01346	Building 180 I am concerned about flooding. The rain water will run down and the land what you want to build on his hightup.
1.7	West of Sandiacre	Flooding / Drainage	Debra Scully	Response-00288	With removal of trees and soaking away areas there will be an increase of flooding in the local adjacent properties. A further 80 homes of clean and foul water. Does the local systems already have capacity to take that extra waste?
1.7	West of Sandiacre	Flooding / Drainage	Denise Creasey	Response-00786	Increasing the density of housing with loss of green belt will increase the risk of flooding in the housing below this site.
1.7	West of Sandiacre	Flooding / Drainage	Derrick Hunt	Response-00437	All the drainage from this goes down onto Stanton road 180 houses were is all that sewage and surface water capacity going to come from
1.7	West of Sandiacre	Flooding / Drainage	Diane Mcmorrow	Response-00433	We have had problems with drainage before especially with spells of heavy rain. Recently we've also had burst pipes as the old drainage system is crumbling/cracking in parts. My concern would be about the added use of construction vehicles on the roads
1.7	West of Sandiacre	Flooding / Drainage	Diane Meadwell	Response-00807	Whilst the area in question is not part of a flood zone, it acts as part of a soak away area to prevent rainfall running down the hills into the lower lying land. We are being told regularly of the threat to nature and flooding as a result of more and more people concreting over gardens, and yet the Council is willing to build over an area of Green Belt land.
1.7	West of Sandiacre	Flooding / Drainage	Donna Steele	Response-00781	If these houses are built on the green belt land where will the rain go? It could cause flooding to area including my own house, it's very stressful thinking this could happen to me. We need green belt land for natural drainage.
1.7	West of Sandiacre	Flooding / Drainage	Dorothy Deeprose	Response-00817	This area is prone to floods now. More buildings will make it worse
1.7	West of Sandiacre	Flooding / Drainage	E Cooper	Response-01923	Currently soaks up water, changing to pavements/houses will cause additional run off.
1.7	West of Sandiacre	Flooding / Drainage	Elaine Pickering	Response-00811	Is there capacity for this
1.7	West of Sandiacre	Flooding / Drainage	Emma Ryan	Response-00503	As seen with a lot of the new housing developments the heavily concreted areas that were once green have caused significant flooding and damage. Some of this damage has been to the new build houses, other areas it has caused flooding to homes that have never encountered this problem before now. That area being high up as it is will more likely cause issue for the homes already in situ below it.
1.7	West of Sandiacre	Flooding / Drainage	Emma Wall	Response-00319	Currently drainage around this area is very very poor. I have friends on Chestnut and on Poplar/Larch back onto this field and they frequently get flooded through the houses. Also the drainage along Coronation Avenue is constantly needing to be fixed. It's always leaking on the road.
1.7	West of Sandiacre	Flooding / Drainage	Ewan Snowdon	Response-00766	The flooding and surface water that I drive through on Stanton road will be even worse with more houses, concrete and pavements that green space. I already feel nervous about driving through the flooding and surface water at current levels.
1.7	West of Sandiacre	Flooding / Drainage	Fay Cresswell	Response-00701	The drains already cannot cope with heavy rain fall they fill to the top and overflow causing huge puddles across the road. There is a rat issue in this area already this will only add to it

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Flooding / Drainage	Geoff Tindsley	Response-00755	1. Whilst I believe the proposed site is not in the designated flood zones identifies by the council, I am of the opinion that any proposed development on the land could create major issues for residents in the area. My understanding is that gardens backing on to the site on Larch Drive and Chestnut Grove (backing on to what are currently now stables) get flooded during heavy rain. Some residents further down the hill, on Maple Avenue and Elm Avenue, also can be flooded as the water finds its natural course down the hill. 2. Nature reserves often act as natural drainage areas. With more tarmac/concrete making drainage less easy, developing this land could increase the risk of flooding to the existing houses, especially during extreme weather, which are becoming more frequent due to climate change. 3. A development of 180 houses will inevitably place significant stress on what is probably an already aged and stressed sewer system.
1.7	West of Sandiacre	Flooding / Drainage	Georgia C	Response-01296	I have already witnessed local areas to myself experience heartbreaking flooding, areas which have never flooded previously. The residents who lost homes and priceless possessions all seemed to believe the reason for this was the new housing development on former farmland, which at the time had only been half completed. It seems likely they will flood again, with potentially more homes and areas flooded as the development continues.
1.7	West of Sandiacre	Flooding / Drainage	Gordon Bruce	Response-01455	There are artesian springs in this area which needs to flood in wet weather, and old drainage lower down the hill in Sandiacre that is unlikely to fare well with new housing.
1.7	West of Sandiacre	Flooding / Drainage	Helen	Response-00883	Has a flood and drain survey been done!! Extra housing will cause issues as the drains will be unable to cope especially when we have heavy rain or storms! This will cause major flooding issues within the lower areas due to the water flowing down hill especially if the drains aren't renewed and advanced around the area
1.7	West of Sandiacre	Flooding / Drainage	Helen Gillain	Response-00964	Drains would be unable to cope with the increased number of homes, there would be no natural soak away and flooding would be inevitable
1.7	West of Sandiacre	Flooding / Drainage	Helen Thompson	Response-01356	There is already regular flooding along Ilkeston road as you leave Sandiacre and recently in Sandiacre itself. The proposed building will further restrict the amount of rain that is soaked up by replacing green fields with concrete and tarmac. Has the effects been calculated?
1.7	West of Sandiacre	Flooding / Drainage	Helen whiteman	Response-00447	The water pressure in the house is very poor and if these house are builds it will be even worse. Further down the hill on elm avenue we are always having Severn Trent digging up and having to clear the sewers how will it be with extra housing up the hill
1.7	West of Sandiacre	Flooding / Drainage	Ian Bailey	Response-00505	This will affect the drainage as this area holds a lot of water in wet periods which will now flow down into the neighbouring streets and drainage system which is already poor
1.7	West of Sandiacre	Flooding / Drainage	Ian herbert	Response-00939	this will increase the pressure on the victorian sewer system draining down to town street.
1.7	West of Sandiacre	Flooding / Drainage	IAN TAYLOR	Response-00972	Sandiacre is already liable to flooding from the River Erewash. Any significant development will increase rain run off to the River and potentially increase this risk. Additional development will also create additional sewage which needs to be treated.
1.7	West of Sandiacre	Flooding / Drainage	Isabelle Love	Response-00529	The area floods regularly, obviously not help by Erewash councils failure to maintain drains, but the site is a flood risk despite this. Building yet more houses on flood plains in this area will not only prove a poor investment for the people buying the house, it will just move the water onto areas people already live, or onto stones which will again affect the wildlife.
1.7	West of Sandiacre	Flooding / Drainage	Isobel Ball	Response-01092	Rather straightforward but undeniably building an estate based on concrete and tarmac will not be good for flooding/drainage. Green areas almost naturally allow for flooding and soak up excess water and rain. Never mind what it?ll look like having to install drainage systems in this area, and the damage that will do.
1.7	West of Sandiacre	Flooding / Drainage	Jack McQueenie	Response-01823	The hilltop acts as a giant sponge in the winter months, it is a marsh from November though to May. If built upon the houses will sink and the quickly released rain water will Flood Sandiacre Every Winter. Such as it did in the Floods of October 2023. Necessitating Insurance Companies paying out Hundreds of Millions of Pounds to homeowners and Progress Rail.
1.7	West of Sandiacre	Flooding / Drainage	Jake Simpson	Response-00667	The loss of grass, plants and trees would put houses lower down in the Sandiacre area at risk of flooding
1.7	West of Sandiacre	Flooding / Drainage	Jane Dennett	Response-00965	More concrete affects drainage in areas.
1.7	West of Sandiacre	Flooding / Drainage	Jane Elizabeth Tindsley	Response-00669	Whilst the proposed site is not in the designated flood zones identifies by the council, nevertheless, I believe that any proposed development on the land could create major issues for residents in the area. Gardens backing on to the site on Larch Drive and Chestnut Grove (backing on to what are currently now stables) get flooded during heavy rain. I have been told by some residents on Maple Avenue and Elm Avenue that their gardens can flood with water, and it can come up to the bottom of their front doors during heavy rain as the water finds its natural course down the hill. Nature reserves often act as natural drainage areas. With more tarmac/concrete making drainage less easy, developing this land could increase the risk of flooding to the existing houses, especially during extreme weather, which are becoming more frequent due to climate change. Severn Trent have not been at all helpful in providing any information about sewers in the area. However, a development of 180 houses will inevitably place significant stress on what is probably an already aged and stressed sewer system.
1.7	West of Sandiacre	Flooding / Drainage	Jayne Rowley	Response-01279	This area is already at risk from flooding during periods of heavy rain. Cloudside road is already a run off for water and developing the proposed site would reduce drainage and increase surface water in this area. As it is at the top of the hill this would then impact the lower ground. In recent years Sandiacre has suffered from significant flooding and damage, resulting in people having to leave their homes for a number of months and also cutting off access into and out of the town due to the roads flooding, making them impassable.
1.7	West of Sandiacre	Flooding / Drainage	Jeffrey Whittaker	Response-00594	Most of Sandiacres drains which the news houses would glow into would not take it, system is heavily outdated and it could not take anymore
1.7	West of Sandiacre	Flooding / Drainage	Jennifer Bailey	Response-01857	I am concerned the more we build on green belt, the houses lower down will be at higher risk of flooding.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Flooding / Drainage	Jennifer Tindsley	Response-00751	1. Whilst I believe the proposed site is not in the designated flood zones identifies by the council, I am of the opinion that any proposed development on the land could create major issues for residents in the area. My understanding is that gardens backing on to the site on Larch Drive and Chestnut Grove (backing on to what are currently now stables) get flooded during heavy rain. Some residents further down the hill, on Maple Avenue and Elm Avenue, also can be flooded as the water finds its natural course down the hill. 2. Nature reserves often act as natural drainage areas. With more tarmac/concrete making drainage less easy, developing this land could increase the risk of flooding to the existing houses, especially during extreme weather, which are becoming more frequent due to climate change. 3. A development of 180 houses will inevitably place significant stress on what is probably an already aged and stressed sewer system.
1.7	West of Sandiacre	Flooding / Drainage	Joanna hardy	Response-01304	The area currently is fields and so easily soaks up rain water. By building on this area the run off would potentially damage surrounding properties and add it the flooding issues in the erewash valley in sandiacre and stapleford.
1.7	West of Sandiacre	Flooding / Drainage	Joanne Johnson	Response-00765	The water coming off this area during times of heavy rain already affects local residents. The drains etc will not cope with further concrete/tarmac etc.
1.7	West of Sandiacre	Flooding / Drainage	Joanne Lambert	Response-00494	Over the last few years Sandiacre has seen a rise in flooding, extra housing will add to less natural water retention and which in turn can increase local flood issues.
1.7	West of Sandiacre	Flooding / Drainage	Jodie Shrive	Response-00601	Natural reserves such as this one act as natural drainage areas. Developing this land WILL increase the risk of flooding to existing houses, especially during extreme weather which is becoming more and more frequent due to climate change. The drainage in this area has not been updated in almost 80 years and there is no plan in this development to update it. Sandiacre is becoming more and more under pressure with floods in recent years, you will be destroying pre-existing homes just to create new ones. Why?
1.7	West of Sandiacre	Flooding / Drainage	Joe Sells	Response-01924	The site already suffers from water logging, development will worsen drainage & increase flood risk for downstream homes & properties.
1.7	West of Sandiacre	Flooding / Drainage	Jo Gerhardt	Response-01286	I'm concerned with future flooding caused by rainwater not being able to absorb into the ground due to the proposed building development. We had floods last year around the Lidl area and what with future 'global warming', the weather systems are already changing. In the height of heavy rain, Starch Lane becomes a torrent of water that collects at the bottom onto Ilkeston Road, making it even more hazardous. Building the proposed houses on the green belt would lead to more rainfall not being able to be absorbed, ultimately leading to more flooding in the area. Not acceptable.
1.7	West of Sandiacre	Flooding / Drainage	John Hibbitt	Response-01855	Flooding on Ilkeston Road frequent now
1.7	West of Sandiacre	Flooding / Drainage	John whiteman	Response-00450	Drainage and water pressure are bad enough now Severn Trent are always working down the hill on elm Ave clearing the sewers etc so what will it be like with extra houses
1.7	West of Sandiacre	Flooding / Drainage	Judith A Pulfer	Response-01863	I strongly object to the proposed development. My home is adjacent to the site and two properties away from the only entrance and exit to this site. I live at the highest point of the hill and in the really wet weather my garden floods. I cannot get down the path next to the conservatory and the roads are awash with running water. The horse field is also very much waterlogged. Climate change being what it is I do not know what can be done about this matter - perhaps you do but I doubt very much that any more roads, buildings and hard landscaping will resolve this problem.
1.7	West of Sandiacre	Flooding / Drainage	Judith Blackburn	Response-01928	Land can flood, even up hill, underground drainage chokes causing road flooding.
1.7	West of Sandiacre	Flooding / Drainage	Karen Evans	Response-00523	Any extra building will add pressure to the system.
1.7	West of Sandiacre	Flooding / Drainage	Karen Pitts	Response-00643	An extra 180 houses will produce 180 houses worth of extra sewage. The system will not cope. Sandiacre suffers flooding each year, being at the top of the hill may be an advantage to the new houses, but what about the areas below? Losing the land full of vegetation which absorbs rain, replacing with concrete roads. Heavy rain has nowhere to go but down into the rest of Sandiacre. Just look at what happens in Risley every year.
1.7	West of Sandiacre	Flooding / Drainage	Kathryn Martin	Response-00527	We already have drainage issues in this area
1.7	West of Sandiacre	Flooding / Drainage	Katie Morrice	Response-00664	Increasing the density of housing with loss of green belt will increase the risk of flooding in the housing below this site.
1.7	West of Sandiacre	Flooding / Drainage	Katie Robinson	Response-00943	I have spoken to a number of people that have lived here a number of years and they have reported and spoken of flooding and drainage problems in the winter or when we receive high volumes of rainfall. I was walking to Stoney Clouds in the winter after a heavy down pour - up Cloudside Road and past Larch Dr and the amount of water that was pouring from the drives was quite shocking. I initially thought it had flooded peoples houses or they had an issue with burst pipes but this was draining from the hill and off the space you are proposing to build on. Now if this natural drainage system was taken away where would that rain water go? now all of it goes into the pipes? only a couple of years back it flooded extremely badly around Lidl and on the corresponding streets which caused a lot of damage in the area. If we have increased use of the pipes with 180 houses using water as every house does and then using the pipes for increased rain water to go down is very likely going to cause this issue to happen again. I also have a man hole in my garden which requires access for Severn Trent to use at any point - this also concerns me the damage that could be caused to my property if the sewers and pipe work was put under further pressure. We also have to remember these pipes are not new pipes also - this is a service that has been there for a long while and were not built to manage this volume of properties. Severn Trent my say its ok but they are not the most trustworthy - try asking people that live on the estate that have these problems already.
1.7	West of Sandiacre	Flooding / Drainage	Katrina	Response-00628	Stanton road has already been known to flood if more concrete is added to the top of the hill, more water will flow down the hill causing an even greater likelihood of flooding in less extreme weather
1.7	West of Sandiacre	Flooding / Drainage	Kelly Randall	Response-00591	Existing sewer and drainage infrastructure is already under strain, and downstream flooding is a known issue. Without significant investment, increased surface water run-off will exacerbate local flood risks and impact the M1 motorway. Existing sewer is a 12" pipe down Stanton Road. Will this 1940s sewer be upgraded?

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Flooding / Drainage	Kerry stokes	Response-00769	We already experience flooding at the bottom of Stanton road when we have heavy rainfall, how is adding more houses going to cope with this?
1.7	West of Sandiacre	Flooding / Drainage	Kim Helm	Response-00632	Drainage will not cope with that amount of houses It floods quite easily along that road and the fields
1.7	West of Sandiacre	Flooding / Drainage	Kirk Moss	Response-00439	The fields currently act as a natural soakaway, helping to manage rainwater. Even with this buffer, the area experiences recurring flooding. Removing this drainage will increase flood risk, placing local properties and infrastructure in danger.
1.7	West of Sandiacre	Flooding / Drainage	Kirsty Handa	Response-00445	The roads surrounding this development already struggle with the drainage system. The pipes are all old and there have been several occasions in which the pipes have burst. Adding on an additional 180 properties will cause undue stress to these pipes and this could then cause undue damage to nearby properties. The pipes cannot sustain this development. Flooding, although we are on a hill the nearby properties to the development have previously be subjected to flooding to the weather, this is already taking into account the green belt land absorbing much of the water and still this was not enough. If this land is built on, where does this water go? this will flow down to the nearby streets causing flooding to properties and damage to those properties. This cannot happen
	West of Sandiacre	Flooding / Drainage	Kirsty Meredith	Response-01462	The greenbelt regularly floods and this filters down into gardens and down the roads, Drainage is already an issue.
1.7	West of Sandiacre	Flooding / Drainage	Lesley Bruce	Response-01397	The site contains a number of artesian springs which regularly appear in wetter weather and which would suffer from the concrete and tarmac which accompanies high density housing. The sewers in the older part of Sandiacre can not cope when there is heavy rain, as evidenced several times recently. The proposal would further add to the problem as the site is on a hill and the drainage and sewerage would flow down into inadequate Victorian and older drains. The
1.7	West of Sandiacre	Flooding / Drainage	Lesley Morral	Response-01920	Reduction of green space will increase localised flooding.
1.7	West of Sandiacre	Flooding / Drainage	Linda Castledine-Davies	Response-00850	There are a number of properties on Cloudside and Coronation Avenue who have problems with flooding. Severn Trent have regular problems with the water pipes on both Maple Avenue and Town Street which also floods regularly. The sewer that these existing properties feed into is at full capacity and could not take waste from an extra 180 houses/500 estimated people.
1.7	West of Sandiacre	Flooding / Drainage	Linda Ocroft	Response-01927	In times of severe storms & torrential rains Stanton Road can give the appearance of resembling a river in flood. It seems there is insufficient depth of sub soil on the rock of high ground to control run-off & could not cope with more buildings & tarmac. Plus the council does not relieve water run-off flooding by street drains cleaning.
1.7	West of Sandiacre	Flooding / Drainage	LISA ANNE GILLIGAN-LEE	Response-00710	1. Sandiacre has a documented history of flooding, including recent serious flood events. Adding new homes o Stoney Cloud, with significant hard surfacing (roads, driveways, rooftops), will dramatically reduce natural drainage, increasing surface runoff into nearby lower-lying areas like Sandiacre. 2.
1.7	West of Sandiacre	Flooding / Drainage	Lisa Heppell	Response-00878	More surface runoff means increased flow into the Erewash Canal and its connecting drainage systems. Without major investment in flood defences and water management infrastructure, this development could worsen overflow risks during heavy rain. Green spaces currently act as natural soakaways, absorbing rainwater and reducing flood peaks. Replacing these with housing removes that natural buffer, leading to faster water flow into drainage systems that are already under strain.
1.7	West of Sandiacre	Flooding / Drainage	Lisa Heppell	Response-00878	We need to keep fields for drainage,not for more houses to be built
1.7	West of Sandiacre	Flooding / Drainage	Lorraine Hands	Response-00534	As mentioned before every piece of Green space is important during times of heavy rainfall!, building on this space could have a negative effect on houses surrounding and lower down Sandiacre!
1.7	West of Sandiacre	Flooding / Drainage	Louise dix	Response-00975	A lot of the houses up there flood when it rains heavy so making more houses where it floods makes no sense would make more sense to buy next to lidl where the land has been derelict for at least 20 years
1.7	West of Sandiacre	Flooding / Drainage	Louise Harper	Response-01571	If you build on this green belt land, adding more and more concrete, which doesn't soak up rainfall , where will it go ? downwards into the middle of sandiacre where the canal flooded not long ago flooding whole street and lidl car park even, this will get even worse as the drainage is very old and unable to cope, how will it cope with more housing where the only place for excess water it to go downwards
1.7	West of Sandiacre	Flooding / Drainage	Lucy johnson	Response-01369	I've read somewhere the drainage up there already is bad! Adding more houses and more families are going to make it worse and in the long run cause more and more issues and cost more and more money! Use your head!
1.7	West of Sandiacre	Flooding / Drainage	Malcolm Dillon	Response-00722	The proposed development is on ground higher than the existing properties. This development would inevitable give increased run off of rainwater. This increased run off will effect existing properties. The trend to have increased rainfall in much shorter time periods will inevitable give need to improve the existing drainage systems. No plans have been published to cover this aspect. The speed of this proposal throws up more questions than answers.
1.7	West of Sandiacre	Flooding / Drainage	Malcolm Fox	Response-00215	I can make the assumption that due to the location and incline of the proposed site, this is a natural drainage area. Who knows what impact this will have to the proposed properties and the current ones. What will happen is that the homeowners will be left to deal with any impact we might experience with drainage or flooding.
1.7	West of Sandiacre	Flooding / Drainage	Malcolm Riedlinger	Response-00743	We have noticed poor drainage, particularly during heavy rainfall on Stanton Road ever since we moved into the area. I am concerned that this will increase significantly with the introduction of so many new houses on the green belt nearby. I would imagine that poor drainage further compromises the safety and integrity of the road along our street.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Flooding / Drainage	Mark Gough	Response-00888	Flooding is already a problem. Heavy rain coming down Beech Ave floods the drains , causing more problems . The houses on the side (number 50 where we are ) is built down from the road so water floods down to our front door . The drainage in this street is old , 1930's on our road , and to our knowledge hasn't ever been updated . So with more houses being built this is going to add more pressure on our drainage systems . I know there is already a problem as sometimes can smell sewage. This is going to be more of a detrimental health hazard in the future . Taking up fields and building on them will cause more flooding as the water will have nowhere to run , can't soak into the fields , it's already a problem and this will make it 100 times worse. I mentioned about the smell of sewage earlier , this is only occasionally and not enough for us to contact anyone as yet . Just wanted to voice a concern going forward thank you
1.7	West of Sandiacre	Flooding / Drainage	mark skelton	Response-01341	More surface water to remove from hard standing area. Could cause flooding down the roads and hill. Already lots of home at the top.
1.7	West of Sandiacre	Flooding / Drainage	Marta McManus	Response-00646	I have concerns for surface water and drainage from this area
			Martin Driver	Response-01387	Drainage network is struggling as it is, without another 180 houses
1.7	West of Sandiacre	Flooding / Drainage	Martin Hardy	Response-01413	This area acts as a soakaway for rain water and prevents it from flowing into the residential area. We already have issues with the roads turning into rivers during heavy rain, but removing this vital soakaway and building on the area would increase this problem. Also this water all flows into the erewash river, which is prone to flooding. This causes damage to homes, businesses and services.
1.7	West of Sandiacre	Flooding / Drainage	Martyn Locker	Response-00903	I'm no geologist so am unsure of any potential implications in this area. I can only speak from experience that rainwater during heavy rain and storms accumulates into streams and large puddles in my neighbours' and my gardens and on the streets, flowing down the hill from the green belt land where work is proposed. How would this be exacerbated by the proposed plans?
1.7	West of Sandiacre	Flooding / Drainage	Matt Bancroft	Response-00916	The land proposed already has drainage issues, making more of the land impermeable to rain (tarmac etc) will only make this worse.
1.7	West of Sandiacre	Flooding / Drainage	Matt Hallam	Response-00476	having 180 more houses, the 1940's sewer on Stanton Road wouldn't be able to cope as it struggles now, especially in stormy weather. It's 4.5 meters deep and approximately 12 inches in diameter, how on earth can this be sufficient to take waste from another 180 houses . It's all ready over capacity years ago . It's ludicrous. We often see the drains spilling out which you can see the tissue paper or tanpoms. I've been told it would cost hundreds of thousands if not up to 1million to replace it.
1.7	West of Sandiacre	Flooding / Drainage	Matthew Buckland	Response-00615	Although not on the flood plain maps, in winter when there is heavy rain, the water flows down from the nature reserve, flooding area where the stables currently are, the public footpath, and gardens of houses on Larch Drive. If the houses go ahead, the flooding problem will increase, as trees, hedging and the fields will be removed reducing drainage further.
			Maxine Sutton	Response-00471	We already get flooding in Sandiacre, building in more land, especially green belt, would only worsen the risk.
1.7	West of Sandiacre	Flooding / Drainage	Melanie	Response-00586	The local area has a history of flooding, particularly downstream of the proposed site. Increased surface water runoff from additional impermeable surfaces will likely overwhelm existing drainage infrastructure. The capacity of local sewers and drainage systems has not been demonstrated, nor have mitigation measures been adequately detailed. Properties on lower ground, such as those on Sycamore Crescent, could face heightened flood risk.
1.7	West of Sandiacre	Flooding / Drainage	Melanie Caumont	Response-01272	There are already known drainage and flooding problems affecting this area. The greenbelt currently serves as a natural soakaway. Developing over it would remove this function and likely worsen flooding on neighbouring properties, especially during heavy rainfall. Sustainable drainage systems (SuDS) would not be sufficient to mitigate the risk, especially given the known poor drainage conditions on the site.
1.7	West of Sandiacre	Flooding / Drainage	Michael Oscroft	Response-01926	In times of severe storms & torrential rains Stanton Road can give the appearance of resembling a river in flood. It seems there is insufficient depth of sub soil on the rock of high ground to control run-off & could not cope with more buildings & tarmac. Plus the council does not relieve water run-off flooding by street drains cleaning.
1.7	West of Sandiacre	Flooding / Drainage	Misty McGrath	Response-01556	The role of the wider Erewash Basin is essential to reduce flooding at lower levels. The places of higher land, like this one, should be planted with trees to help the water table. As we enter a period of natural warming, when the environment is going to be subject to greater levels of rain, we need to reduce building on land that is green and increase tree planting.
1.7	West of Sandiacre	Flooding / Drainage	Mr and Mrs R Skelton	Response-01274	Please note that there has been no mention of the drainage and sewage from the site. It is my understanding that the newest house development along Cloudside Road has to have their sewage held until the early hours to be released as the existing sewage pipes are inadequate for the purpose. What will be done about that ???
1.7	West of Sandiacre	Flooding / Drainage	Mr John Hickingbotham	Response-01431	Surface water run-off from this proposed development will, it would appear, simply be added to the existing sewers, which in this area are combined foul and storm flows, eventually reaching the main sewer in the vicinity of Sandiacre market place. This area, around the Co-op store frequently experiences flooding during high intensity storms. The continual addition of more housing to infrastructure that is unable to adequately cope with intense storms, and given that climate change is likely to increase such severity, is of very great cause for concern to all who live in the affected area.
1.7	West of Sandiacre	Flooding / Drainage	Mrs Froggatt	Response-00449	Sandiacre has always been an area subject to flooding in areas. More housing will effect the natural drainage and cause more problems
1.7	West of Sandiacre	Flooding / Drainage	Mrs J. Cooper	Response-01596	Development of this land could increase the risk to existing houses due to weather/climate change.
1.7	West of Sandiacre	Flooding / Drainage	Mrs Lee Farabella	Response-01899	Development of this land could risk increase of flooding to existing houses.
1.7	West of Sandiacre	Flooding / Drainage	Mrs M Burke	Response-01887	Developing this land could risk flooding to existing houses.
1.7	West of Sandiacre	Flooding / Drainage	Mrs N Taylor	Response-01896	Development could risk flooding existing houses.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Flooding / Drainage	Mrs Rigby	Response-00641	The majority of the time the River Erewash is always affected with flooding when heavy and bad weather conditions are forecasted. its banks have burst a few times in the past year causing significant damage to peoples homes and putting them having to leave their homes because of them being un habited. The canal also dried out in summer 2024 causing concern for all wildlife etc.
1.7	West of Sandiacre	Flooding / Drainage	Mrs Shani Wainwright	Response-00754	The green belt area acts as a natural drainage area.And so the loss of this will increase the risk of flooding to the existing houses especially during extreme weather events which have already impacted Sandiacre in recent years even before this additional burden has come to fruition.
1.7	West of Sandiacre	Flooding / Drainage	Mrs Sheila Hickingbotham	Response-01338	Developing this land could increase the risk of flooding to existing houses especially during extreme weather events which are becoming more frequent. Man made surfaces e.g. roads and driveways will result in more water run-off which will eventually have to enter the sewerage system which is already struggling to cope with excess rain water at certain times. This will not only affect people in the immediate vicinity but also anyone living north of Derby Road.
1.7	West of Sandiacre	Flooding / Drainage	Mrs Whittaker	Response-00595	The local inferstructure will struggle to deal with the extra capacity, with out it causing significant issues for other properties.
	West of Sandiacre	Flooding / Drainage	Nasim Rashid	Response-01103	Will building on the site affect lower properties as less absorption of rain in fields?
1.7	West of Sandiacre	Flooding / Drainage	Oliver Marriott	Response-00679	Flooding / Drainage Drainage / flooding We seem to experience flooding at times and particularly in heavy bouts of rain it?s been known for the rain/ flood to run down Stanton road in particular, it has previously caused partial road closures and standing water, affecting traffic and sometimes causing road closures.
1.7	West of Sandiacre	Flooding / Drainage	Pam shepherd	Response-00453	Flooding in the area has increased by 100% already with the houses that have already been built over the years this will be increased it is total impractical
1.7	West of Sandiacre	Flooding / Drainage	Paula Darnell	Response-00665	Already water runs down stanton road on to spencer avenue and surrounding areas like a river when it rains, can you imagine how much worse this will be .?
1.7	West of Sandiacre	Flooding / Drainage	Paul Randall	Response-00131	What is the design limit for the existing sewer infrastructure (# of homes)? What will the impact be of the extra homes? Downstream of this area, flooding has been a problem. What will be the method of resolving surface water run-off that may impact Sycamore Crescent? Additionally, how will the site prevent run-off onto the adjacent M1 motorway? The site currently absorbs most of the surface water, with some running down Cloudside Avenue under heavy rain conditions. This would clearly increase. My neighbour has a manhole that blows under heavy rain and in the past water has entered their property. How will this be prevented with extra load? The sewer system already blows manholes during periods of heavy rain, bearing in mind this is at the top of a hill. If more houses were to be built, who will upgrade the sewer system (which runs under existing property and not down the roads)? I am sure it was sized for the number of properties built at the end of the 1990s with no expectation of more. Cloudside Road is often a run off for rain water flooding off the existing fields. If there was to be housing, the paving of the area would make this significantly worse, adding strain to an already stretched sewer system.
1.7	West of Sandiacre	Flooding / Drainage	paul wheeldon	Response-00582	The field has poor drainage with at least one spring rising in it
	West of Sandiacre	Flooding / Drainage	Phil Creasey	Response-01342	Increasing the density of housing with loss of green belt will increase the risk of flooding in the housing below this site.
1.7	West of Sandiacre	Flooding / Drainage	Philip Reed	Response-01449	Building houses on greenbelt land disrupts natural drainage, increasing flood risk. Impermeable surfaces replace absorbent soil, reducing rainwater absorption and overwhelming local drainage systems. This can cause water runoff, soil erosion, and damage to nearby ecosystems. Protecting greenbelt areas is essential for sustainable water management and community flood prevention
1.7	West of Sandiacre	Flooding / Drainage	Rcahel Sharp	Response-00652	The flooding and drainage aspect is a real worry. I was really shocked with the severity of the flooding in recent times of the area around the canal and Lidl. It was terrible to hear first hand from people affected. Sandiacre was basically inaccessible affecting business and individuals. Before this the "lanes" - the road running at the bottom of Starch Lane and the road near over the M1 at Stanton Road have often been flooded. The land up at Stoney Clouds also turns into a bog and does not clear for a long time after heavy rainfall. Therefore it is clear that this area and the area for development area are key flood plain areas. Already after heavy rain, water runs for days down Coronation Avenue and Church Drive. With the increase in wet winters this situation is only going to become more regular and with less land to hold the rainfall it will impact surrounding areas.
1.7	West of Sandiacre	Flooding / Drainage	Rebecca Longmuir	Response-00253	There isn?t anywhere for water to drain away properly if you keep taking up the fields, most of it will probably run into people?s houses that were already here. Also the local sewerage works will become overwhelmed and most like block or burst. How much ground disruption will occur to foundations of already existing homes with drilling and vibrations through the ground. This isn?t good for the homes here now or the wildlife.
	West of Sandiacre	Flooding / Drainage	R Hibbitt	Response-01862	Front garden gets flooded front house field now
1.7	West of Sandiacre	Flooding / Drainage	Richard Broughton	Response-01352	Yet more land being built on and tarmacked over can only mean more run off
1.7	West of Sandiacre	Flooding / Drainage	Richard Deeprose	Response-00816	More buildings will mean less natural managment of water equaling more flooding.
1.7	West of Sandiacre	Flooding / Drainage	Richard Jenkins	Response-00264	I live on Elm Avenue which is a steepish hill. (It is certainly steep when I walk up it!) My garden has soil on top of clay on top of sandstone on top of clay. Despite living on a hill, my garden regularly floods. I dread to think what will happen if there are disruptions to the current fragile drainage scenario. Development on this site could exacerbate local flooding issues by reducing natural drainage and increasing runoff, endangering both new and existing homes. From my own experience living on Elm Avenue, which is on a steep incline but downhill from the development site, I regularly suffer from a flooded garden in times of heavy rain. How much worse will this become if the development goes ahead? What evaluation has EBC done with regard to flooding in the area? What evaluation has EBC done with regard to sewage capacity in the area?
1.7	West of Sandiacre	Flooding / Drainage	Richard Marriott	Response-00675	Flooding / Drainage Drainage / flooding We seem to experience flooding at times and particularly in heavy bouts of rain it?s been known for the rain/ flood to run down Stanton road in particular, it has previously caused partial road closures and standing water, affecting traffic and sometimes causing road closures.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Flooding / Drainage	Ruby Sharp	Response-00886	The flooding and drainage aspect is a real worry. I was really shocked with the severity of the flooding in recent times of the area around the canal and Lidl. Many homes were flooded on and around Regent Street and residents had everything taken from them. It was terrible to hear first hand from people affected. Sandiacre was basically inaccessible affecting business and individuals. Before this the "lanes" -the road running at the bottom of Starch Lane and the road near over the M1 at Stanton Road have often been flooded. Fields surround the lanes, which should prevent flooding. But many times, these fields become too saturated. There will be no reduced greenland if the houses are built, increasing the risk of flooding. The land up at Stoney Clouds also turns into a bog and does not clear for a long time after heavy rainfall. Therefore it is clear that this area and the area for development area are key flood plain areas. Already after heavy rain, water runs for days down Coronation Avenue and Church Drive. It is like a river. With the increase in wet winters this situation is only going to become more regular and with less land to hold the rainfall it will impact surrounding areas.
1.7	West of Sandiacre	Flooding / Drainage	Ryan Selby	Response-00479	Building in the green belt increases the chances of run off water and puts pressure on the drainage, it was only the other year when there was bad flooding. Learn from the past.
1.7	West of Sandiacre	Flooding / Drainage	Sally Davies	Response-01294	Closing is an important issue. Building on this land will not allow water to escape.
1.7	West of Sandiacre	Flooding / Drainage	Sally Peake	Response-01893	The land already floods where the new development is proposed. The water will be displaced into local houses.
1.7	West of Sandiacre	Flooding / Drainage	Samantha Anne Whitney	Response-00757	Stoney Clouds floods in Winter, it goes into the gardens backing onto the fields. This land isn't suitable for building due to the flooding. It will only get worse if you build on it and the water has nowhere to go.
1.7	West of Sandiacre	Flooding / Drainage	Sam Buckland	Response-00600	Although not on the flood plain maps, in winter when there is heavy rain, the water flows down from the nature reserve, flooding area where the stables currently are, the public footpath, and gardens of houses on larch drive. If the houses go ahead, the flooding problem will increase, as trees, hedging and the fields will be removed reducing drainage further.
1.7	West of Sandiacre	Flooding / Drainage	Shannon moss	Response-00454	Flooding is a recurring issue in the area, and the fields in question currently act as a natural soakaway, helping to mitigate excess water. Even with this natural buffer, flooding remains a serious risk. If these fields are developed, their ability to absorb excess rainwater will be lost, increasing the likelihood of severe flooding in Sandiacre and surrounding areas. This would place additional strain on local flood defences and increase the potential for property damage, insurance claims, and displacement of residents.
1.7	West of Sandiacre	Flooding / Drainage	sharon thornhill	Response-00448	as you are probably aware flooding is becoming a real issue nowadays and i fear that the more concrete and bricks we introduce the worse that risk will be
1.7	West of Sandiacre	Flooding / Drainage	Sharon weston	Response-00440	Flooding has already been an issue, the fields act as a soak away and to concrete/ tarmac over this on the top of a hill well the water is only going to go in one direction.
1.7	West of Sandiacre	Flooding / Drainage	Sheila	Response-00587	The local area has a history of flooding, particularly downstream of the proposed site. Increased surface water runoff from additional impermeable surfaces will likely overwhelm existing drainage infrastructure. The capacity of local sewers and drainage systems has not been demonstrated, nor have mitigation measures been adequately detailed. Properties on lower ground, such as those on Sycamore Crescent, could face heightened flood risk. You are stealing green belt land.
1.7	West of Sandiacre	Flooding / Drainage	Sophie	Response-00472	As I'm sure you are aware sandiacre has dealt with some major flooding especially the last couple of years. Which caused some real devastation to families and residents. The area where the build has been suggested Also gets very bogged/flooded in wetter months
1.7	West of Sandiacre	Flooding / Drainage	Stephen Davies	Response-00214	Not aware of any issues currently but extensive development likely to increase water run off down Larch Drive. The current green area regularly floods and the water runs off through existing gardens Additional houses can only make this worse Also bear in mind recent severe flooding to properties within Sandiacre and as such at a lower level which again can only be made worse by water running down from the proposed development
1.7	West of Sandiacre	Flooding / Drainage	Steve Bilbie	Response-00285	As already stated it will affect the whole of Sandiacre especially the town centre.
1.7	West of Sandiacre	Flooding / Drainage	Stuart Pensom	Response-00049	Already getting flooding around the area
1.7	West of Sandiacre	Flooding / Drainage	Sylvia Plampin	Response-00624	At present, water pours off the fields and down cloudside road when it rains.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Flooding / Drainage	Thomas Ilett	Response-01088	Housing allocation in the location stated will create significant and increased flooding risk to properties in North-West Sandiacre. I refer you to chapter 16, paragraphs 136, 140, Map 10A and Policy 9 of the Sandiacre Neighbourhood Plan. Paragraph 136 states 'The extent of flood risk from surface water is a consideration. This collects on areas of hardstanding such as road surfaces and parking areas in dips or flows along escape routes after periods of heavy rainfall. This type of flood risk is distributed in pockets throughout the settlement. Map 10A shows the extent of the Flood Zones and the streets liable to surface water flooding'. The referenced streets liable to surface water flooding include, but are not limited to; Cloudside Road, Maple Avenue, Beech Avenue, Stanton Road, Coronation Avenue, Sycamore Crescent and Spencer Avenue. As Map 10A shows, these streets are adjacent or near to the proposed housing allocation. They are also directly downhill; 60m lower in extremis. In addition, paragraph 140 states 'Sustainable drainage systems in the context of Sandiacre Parish, will include increasing the amount of permeable surfaces allowing water to soak away. The impact of paving over front gardens and the lack of permeable surfaces along the main streets has been noted in the Design Guidance and Codes 2023, especially around the local centre. This not only erodes the character of streets but is a contributory factor in the extent of surface water run-off. SuDs can only be required as part of major planning applications however, implementing Neighbourhood Plan Policy 7a Greening the Streets and Policy 7b Improving Biodiversity will help to alleviate the extent of surface water run off as well as improving landscape character and biodiversity'. This leads to the implementation of Neighbourhood Plan Policy 9, section 7 'Surface water management should be undertaken through the utilisation of appropriate techniques which mimic natural drainage patterns and, where appropriate, achieve net gains for nature including through green infrastructure provision such as the planting of native trees and bushes'. As such, the proposed housing allocation directly contravenes Neighbourhood Plan Policy 9, section 7 as it will decrease natural drainage patterns and achieve net losses for nature. It will also decrease permeable surfaces at higher ground level, substantially increasing risk of surface water runoff flooding for streets already highlighted as 'liable to surface water flooding' as well as decreasing sustainable drainage solutions exacerbating a prevalent problem. Further to the above, the increased flooding risk will also likely threaten the Sandiacre Cloud Conservation Area. The Sandiacre Cloud Conservation Area is adjoined to the East of the proposed housing allocation, with a large proportion being downhill from the proposed housing allocation. With a decrease of permeable surfaces, increased surface flood water will likely be directed to Sandiacre Cloudside Conservation Area, which is already a floodplain for Sandiacre. Chapter 9, paragraph 46 of the Sandiacre Neighbourhood Plan highlights topographical significance of the area 'The HER (Derbyshire Historic Environment Record) notes that there are significant medieval ridge and furrow earthworks that can easily be seen on LIDAR mapping. The Conservation Character Appraisal notes that this area (which is also a floodplain) makes a positive contribution to the setting of the Conservation Area'.
1.7	West of Sandiacre	Flooding / Drainage	Thomas Ilett	Response-01088	area with its agricultural character and with long views afforded to St Giles' Church'. Increased surface water flooding will threaten the heritage of Sandiacre Cloud Conservation Area, by threatening the aforementioned 'significant medieval ridge and furrow earthworks'. The proposed housing allocation therefore contravenes Policy 2 of the Neighbourhood Plan, specifically sections 1a and 1b. It contravenes 1a, as it will not 'conserve, enhance or better reveal those elements which contribute to the heritage significance and/or its setting'. It contravenes 1b as it does not 'respect any features of special architectural or historic interest, including where relevant the historic curtilage or context'. As evidenced, Sandiacre's current (Victorian built) drainage system is under immense stress and ultimately failing. Building the proposed housing development will add even further stress to an already failing system. Aside from the issues already highlighted, it is likely the council will need to significantly improve the drainage system. The cost effective mitigations currently in place and those proposed in the Neighbourhood Plan will be eradicated, consequently costing the council large financial quantities now and in the future.
1.7	West of Sandiacre	Flooding / Drainage	Tony Price	Response-00977	Where will the added sewage go from this proposal? Bessel Lane STW is at full capacity and having to pump to Toton would represent a mammoth task in putting new rising mains in. This works does not have digestion capability so there would be increased sludge levels being taken by road tanker for treatment
1.7	West of Sandiacre	Flooding / Drainage	Tony Weston	Response-00990	Development on this site could exacerbate local flooding issues by reducing natural drainage and increasing runoff, endangering both new and existing homes.
1.7	West of Sandiacre	Flooding / Drainage	Try church	Response-00033	Every winter since 2017 the land has flooded badly. The footpath is unusable and a large lake area collects at the entrance to the footpath from cloudside. It floods into people's gardens and once the first heavy rain of winter occurs there will be sitting water Until April.
1.7	West of Sandiacre	Flooding / Drainage	Tyler Hobbs	Response-00879	Building 180 houses on the greenbelt in Sandiacre, particularly next to and above the M1, could exacerbate the area's existing flooding and drainage issues, leading to significant environmental and property damage. Sandiacre is already prone to extreme flooding, with its low-lying areas and overburdened drainage systems struggling to cope during heavy rainfall. Developing on this land would replace natural, permeable surfaces such as grass and fields with impermeable surfaces like roads and rooftops, which would increase surface water runoff. This additional water would have nowhere to go, potentially overwhelming the already strained drainage infrastructure and causing greater flood risks for the local community. Furthermore, building near the M1, which is a heavily trafficked area with complex drainage systems, could disrupt natural water flow, leading to increased runoff that could affect both the development itself and surrounding areas. This could result in flooding of homes, roads, and public spaces, particularly during storm events, causing property damage, environmental harm, and public safety risks. The development would also further degrade the natural water absorption capacity of the greenbelt, making it even harder to manage extreme weather events in the future.
1.7	West of Sandiacre	Flooding / Drainage	Vickie Wright	Response-01552	The current infrastructure can severely flood in the autumn and winter months. The development will worsen this situation. The excess rain flows down into streets across sandiacre
1.7	West of Sandiacre	Flooding / Drainage	Vicky	Response-00485	The drainage is rubbish , every time we have heavy rain we get floods where it's running straight down from stoney clouds

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Flooding / Drainage	Victoria Galpin-shrimpton	Response-01009	Sandiacre Flooded extensively in 2023 with all water running to the crossroads of Derby Road and Longmoor Lane. Numerous houses and businesses were flooded and destroyed and this is not the first time. It has been proven that Green land can minimise the effects of flooding.
1.7	West of Sandiacre	Flooding / Drainage	Victoria Marriott	Response-00674	Drainage / flooding We seem to experience flooding at times and particularly in heavy bouts of rain it?s been known for the rain/ flood to run down Stanton road in particular, it has previously caused partial road closures and standing water, affecting traffic and sometimes causing road closures.
1.7	West of Sandiacre	Flooding / Drainage	Wayne Major	Response-00408	While I am not aware of any direct evidence of flooding on the site itself, I am concerned about the potential for increased surface water runoff due to the gradients of the land. The natural slope of the area could lead to water runoff onto existing roads and houses, which presents a real risk of localised flooding during periods of heavy rainfall. Given the topography of the site, it is essential that proper flood mitigation measures are put in place to prevent water from flowing onto surrounding properties and infrastructure. These measures should include sustainable drainage systems (SuDS) and other appropriate solutions to manage and control water flow effectively. This is particularly important in line with Paragraph 163 of the National Planning Policy Framework (NPPF), which states that developments should avoid increasing flood risk and ensure that any residual risk is safely managed. I urge the planning authority to require a comprehensive flood risk assessment and ensure that effective measures are in place to protect surrounding properties from flooding before any development is approved.
1.7	West of Sandiacre	Flooding / Drainage	William Marriott	Response-00676	Flooding / Drainage Drainage / flooding We seem to experience flooding at times and particularly in heavy bouts of rain it?s been known for the rain/ flood to run down Stanton road in particular, it has previously caused partial road closures and standing water, affecting traffic and sometimes causing road closures.
1.7	West of Sandiacre	Green Belt	A Harby	Response-01684	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Aimee	Response-00952	The green belt land needs protecting, our green belt land provides local residents with green spaces to walk surrounded by nature. It's one of the reasons I decided to buy a property here with easy access to countryside pathways and woodland. If this land is used for housing what's to stop further green belt land being used in the same way. It will ruin the area and those who can afford to move away from here will leave. The wildlife that lives in these green belt areas will be left without a home and may die as a result of this. We have birds of prey, many other species of birds, bats and countless insects. Our land is being sold off to foreign owned businesses and shell companies. Our country will not benefit from this nor will our people.
1.7	West of Sandiacre	Green Belt	Alexander Love	Response-00626	Building on the green belt
1.7	West of Sandiacre	Green Belt	Alex Lord	Response-00946	I would like to keep the greenbelt as it a nice break away form the built up area Sandiacre finds itself to be now. And it is important to our community.
1.7	West of Sandiacre	Green Belt	Alice Cooper	Response-01721	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Alice Ilett	Response-00571	Greenbelt is cherished and used by locals. It's our green space to use and enjoy nature as it should be used. Once this is gone it cannot be reversed. This area is incredibly treasured by locals and visitors and the horse field for me contains many beautiful memories. It upsets me that I can't protect this for my daughter to enjoy.
1.7	West of Sandiacre	Green Belt	Ali Harrison	Response-00947	Green belt land should be protected and preserved for now and for future generations
1.7	West of Sandiacre	Green Belt	A Malinski	Response-00620	Whilst I agree we need more homes for our families building on Green Belt should be the last resort!
1.7	West of Sandiacre	Green Belt	Amanda Leech	Response-01625	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Amy Cray	Response-01223	It should be kept gelesen but yet more houses stacked up everywhere
1.7	West of Sandiacre	Green Belt	Amy Skinner	Response-01447	Green belt land should be protected at all costs. There are already existing brown and grey lands that would be far more suitable for this proposal. Green belt land is necessary for the sake of the environment - both for the wildlife and for the people that reside here. It is beneficial to our physical, mental and emotional health and this became much more apparent during the Covid pandemic.
1.7	West of Sandiacre	Green Belt	Anastasia Anthony	Response-01865	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites. The Countryside Charity (in regard to Erewash Core Strategy Review) contends more robust Green Belt Assessments are necessary prior to building (via Google). Planning + Compulsory Purchases Act 2004 requires local plans to be justified, effective + consistent with National Policy. Most up-to-date evidence has been produced by residents, not the council. Ultimately, are circumstances exceptional enough to justify housing, when other sites are available? I would argue not. (NPPF para. 141). Sandiacre Cloudside Conservation Area was designated in 1984 to protect the landscape. The proposed building site is a historic + visual backdrop to the town, something our predecessors shared a sentiment with when giving it greenbelt status. On 2%. of new addresses in 2021/22 were built on greenbelt land and it would be unfortunate to see Erewash be an exception to the nationwide commitment in preventing the urban sprawl. 1 Ministry of Housing 2023-2024 Statistical Release Accessed via gov.uk
1.7	West of Sandiacre	Green Belt	Andrew Davies	Response-01295	Any development will put extra pressure on Cloudside and other open spaces
1.7	West of Sandiacre	Green Belt	Andrew Marvin	Response-00255	So so sad to even think of this lovely green belt area disappearing Shame on this Government and Erewash borough Council
1.7	West of Sandiacre	Green Belt	Andrew Meadwell	Response-01654	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Andrew Solloway	Response-00958	No more local countryside

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Andria Nyilasi	Response-00672	There are many brown sites available in our local area which could be used instead of this site. A Green site could never return to its original status once its been built on. An example of this is currently happening next to the canal in Sandiacre, where a factory has been demolished and a housing development is currently being constructed. It is having very little impact on local wildlife, as it's self contained and wasn't originally green belt. If you build on this site you'll be disturbing badgers and bats, amongst many others forms of wildlife and the entire ecosystem connected with them. Once it's gone, it's gone forever.
1.7	West of Sandiacre	Green Belt	Andy Martin	Response-01761	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Angela Whitehead	Response-00544	The people of Sandiacre do not live by the sea or the Peak District etc so we have to make the most of what greenery and countryside we have got. We are sandwiched between the A52 and the M1 we cannot continue to erode on the little bit of greenery we have left to walk dogs children and stroll across to local villages. This is our pleasures you seem fit to destroy despite the fact they have already been deemed as conservation already. What has changed!
1.7	West of Sandiacre	Green Belt	Annabel Marriott	Response-00760	Me and my family enjoy this space to exercise and is good for our mental wellbeing. We often use this space to walk up through to Stanton by Dale and Dale Abbey. If the plans go ahead I don't think we would have the desire to no longer walk in this space we enjoy! Because who would choose an housing estate over green space to go walk?
1.7	West of Sandiacre	Green Belt	Anne Butler	Response-00385	This is green belt and should not be built on. There are poor quality buildings in Long Eaton that should and could be demolished to provide site for social housing, with better facilities for those without transport in the town centre.
1.7	West of Sandiacre	Green Belt	Anne Castledine	Response-00499	It's green belt and can be boggy in places, not large enough to take the amount of houses planned. Why not use other areas with easier access roads?
			Anne Jenkins	Response-00350	Green belt land is exactly that. There are brown field sites which could be used
1.7	West of Sandiacre	Green Belt	Annette Jones	Response-00961	You should be protecting this area even more so now that the widening of the motorway which no one was compensated for and the industrial development at Stanton. There are other areas more suitable in the area and should be looked at first. This is a special place for many people of Sandiacre and somewhere we can escape to and enjoy the surroundings. Why were areas/buildings that were council owned especially residential not earmarked to be re-developed or does that have a special clause.
1.7	West of Sandiacre	Green Belt	Ann Harrison	Response-01602	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Anthony Pearson	Response-01760	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
			Anthony Smedlewick	Response-01877	We need spaces to walk & destress in.
1.7	West of Sandiacre	Green Belt	Antony M Ingram	Response-01626	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	A R Gregory	Response-01918	
1.7	West of Sandiacre	Green Belt	Awson Wheldon	Response-01649	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Barbara Michell	Response-01787	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Barbara Warton	Response-01886	All the above is being swallowed up with building etc. Build on brown belt not green belt land.
1.7	West of Sandiacre	Green Belt	Barry Partridge	Response-01778	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Ben Hollins	Response-01651	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	ben riley	Response-00607	It's protected Green Belt for a reason. In what way is it protected if you can just build on it?
1.7	West of Sandiacre	Green Belt	Beverley Gardner	Response-01692	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Beverley Green	Response-01686	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Bill Hartley	Response-01696	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Britta Solloway	Response-00959	Soon there won't be any nature left
1.7	West of Sandiacre	Green Belt	B T Duke	Response-01900	Criminal to build there.
1.7	West of Sandiacre	Green Belt	B T Keen	Response-01735	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	c/o The Equalised Club	Response-01603	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Callum binnall	Response-00460	Protect the green belt
1.7	West of Sandiacre	Green Belt	Caroline Blackmore	Response-00451	Save the Green Belt quite simply it's been there for years with good reason we need our green spaces

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Caroline Driver	Response-00618	You should be protecting the green belt, as instructed by all constituents and voted for over and over again. As elected officials you should be doing what the electorate and tax payers want and sticking up for the local people, not blindly acting on instruction of the government who know nothing of our area. I'd be interested to know how many of the people proposing this live in any of the areas. The green belt provides recreation and wellbeing to everyone as well as animals, insects, amphibians (often have lots of frogs in my garden) and birds, so many different birds.
1.7	West of Sandiacre	Green Belt	Carol Marshall	Response-00736	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Carolyn Hallam	Response-00489	The houses are being built on green belt land. Downgrading it to grey belt to enable building is despicable.
1.7	West of Sandiacre	Green Belt	Catherine Richardson	Response-00531	Green belt land should remain greenbelt and not be downgraded to just to slap up houses to meet the targets. More thinking needs to go into this. There are other sites available. Behind Lidl for a start
1.7	West of Sandiacre	Green Belt	Charlotte Hunter	Response-01376	Green belts are protected areas, this should NOT be built on,
1.7	West of Sandiacre	Green Belt	C Holmes	Response-01620	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Chris Hume	Response-01373	Iv lived in this area for 20 years, if you go ahead with this ridiculous development you will ruin what is a beautiful area. Do not reclassify this green belt, look at the brown field sites of which there are many, you don't need to do this
1.7	West of Sandiacre	Green Belt	Chris Jones	Response-01718	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Chris O Connor	Response-01641	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Christian Rearson	Response-01763	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Christine Anderson	Response-00484	A beautiful area enjoyed by so many people - Green belt. Surely there are other areas that can be used.
1.7	West of Sandiacre	Green Belt	Christine Gough	Response-00578	It is Green belt area and that should be protected at all costs . England is a small nation and the UK has over 68 million people living here . 1. Stop immigration- too many people here 2. There are 1800 homes empty in this area Use these homes for people , not build more . Green belt is for wildlife , heritage and of course our health and wellbeing , you cannot put a price on that , once gone we can never get that back . Stop the greed , because it?s about money , that they are taking the Green belt , it?s not for need when there are far too many homes empty!
1.7	West of Sandiacre	Green Belt	Claire binnall	Response-00459	There are plenty of brown spaces that could be used this is a ridiculous proposal
1.7	West of Sandiacre	Green Belt	Clair Ellis	Response-00475	I do not want to lose this green belt! I regularly walk my dog here. I can't bear the thought of this space being destroyed. Not to mention the horses that currently live here.
1.7	West of Sandiacre	Green Belt	Clare franks	Response-00498	There are many brownfield sites in eh area, why is greenfield being used?
1.7	West of Sandiacre	Green Belt	Clare Green	Response-01751	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Cole Hawkins	Response-01714	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Colin Billington	Response-00227	Why not build more near the old golf course
1.7	West of Sandiacre	Green Belt	Colin Cox	Response-01716	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Colin Marriott	Response-00686	This has been a greenbelt since 1951 when the land was sold to Westerman. We don't have enough green space now and once built on they don't come back
1.7	West of Sandiacre	Green Belt	Connor Murfin	Response-00926	The green belt needs to be protected at all costs. If this allocation gets approved then what's to stop more allocations being permitted and then they'll be nothing of the green belt left.
1.7	West of Sandiacre	Green Belt	C Owen	Response-01917	This green belt has been part of my life since childhood. It's a nature reserve & needs to be protected.
1.7	West of Sandiacre	Green Belt	Craig Freeman	Response-01561	It's clearly taking green belt away, and in such a way that it is immediately adjacent to a conservation area.
1.7	West of Sandiacre	Green Belt	Craig Richards	Response-01638	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Craig Thims	Response-01765	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Cristina Jenkins	Response-01588	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	C Thompson	Response-01634	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	DAllen	Response-00525	The land should be kept as green belt to preserve the habitats that exist there
1.7	West of Sandiacre	Green Belt	Dana	Response-01173	We shouldn't be destroying wildlife habitats and local beauty spots
1.7	West of Sandiacre	Green Belt	Daniel Downes	Response-01630	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Daniel Hands	Response-00057	The idea of greenbelt land is to prevent urban sprawl. By removing, reducing or reclassifying green belt goes against the core principles of establishing protected areas and boundaries in the first place, especially as there are already derelict and undeveloped brownfield sites in and around the local area. These remain undeveloped and unused, which not only creates an eyesore on the community but also attracts various anti social behaviours and incidents. To ignore these blights on our community landscape while we are expected to engage and agree to further loss of natural and green spaces for residents to enjoy, seems a little far suited to cost over common sense OR the views and opinions of local residents.
1.7	West of Sandiacre	Green Belt	Danielle Harrison	Response-00568	Green belt should be protected at all costs and never built on while brown field sites in the local community exist. Why isn't the area at the side of the Lidl site being developed instead. We are destroying this planet.
1.7	West of Sandiacre	Green Belt	Daniel Naylor	Response-00680	Simply shouldn't be building on greenbelt anyway. What's the point in greenbelt if the local council refuse to protect it?
1.7	West of Sandiacre	Green Belt	Darran and Emma Rea	Response-00597	The fact that they want to build on the green belt is abhorrent, it is green belt for a reason, the impact on the services and wildlife to the area is going to be detrimental, there has to be other sites other than green belt that must be considered
1.7	West of Sandiacre	Green Belt	David Casey	Response-01608	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	David Cater	Response-01756	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	David Fry	Response-00596	Why is it even a consideration to build on greenbelt land when there are other options available
1.7	West of Sandiacre	Green Belt	David Ruddock	Response-01776	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	David Thompson	Response-01324	We need green belt
1.7	West of Sandiacre	Green Belt	David Tindsley	Response-00515	The land in question is currently classified as green belt, and it also adjoins the Stoney Clouds Nature Reserve. Whilst the Revised Strategy document requires that 'a suitable green buffer between development and the adjoining Stony (sic) Clouds Local Nature Reserve?', I am highly sceptical that this would be adhered to by the developer, or properly monitored and enforced by the Council. Using green belt land when there are suitable brownfield sites in Sandiacre (and particularly Stanton) available is completely unacceptable.
1.7	West of Sandiacre	Green Belt	David Yeo	Response-01705	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Dawn Glennis Smith	Response-00510	This area is GREEN BELT land. Part of it has already disappeared to house building, the rest should protected so that it can be enjoyed by everyone. It is a wonderful area of natural beauty which SHOULD NOT BE BUILT ON! I strongly object to destruction of green belt land!
1.7	West of Sandiacre	Green Belt	Dean Bosworth	Response-01665	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Dean Lavelle	Response-01774	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Dean Michell	Response-01343	Stoney Clouds is a well used area by the locals community. This is something that is needed for people wellbeing.
1.7	West of Sandiacre	Green Belt	Dean Peake-Whitehurst	Response-00488	Just stop trying to ruin the countryside. Just have a bit of a grow up and stop it...
1.7	West of Sandiacre	Green Belt	Debra Michell	Response-01346	We need more open spaces for our mental health and our wellbeing . Open space are so important. Once we lose this land we never get it back The Princess of Wales even said how nature help her with her illness. Having gone through cancer myself walking and being with nature was the best medicine. We don't have many foot paths in sandiacre so we don't want to be walking through a housing estate to get to our destination. Green belt land should NEVER be built on.
1.7	West of Sandiacre	Green Belt	Debra Scully	Response-00288	Green belt land already adjoins Nature reserve and the urbanisation will remove the break from the M1
1.7	West of Sandiacre	Green Belt	Debs Washer	Response-00487	I'm amazed that this is even being considered as a viable option. Get a grip!
1.7	West of Sandiacre	Green Belt	Denise bennett	Response-00030	How can you guarantee that the loss of green belt will not result in ever worsening flood threats
1.7	West of Sandiacre	Green Belt	Denise Creasey	Response-00786	Green belt should be protected from construction in order to provide recreation and wellbeing to everyone. Also to protect the habitat for all our animals, insects, birds and plants and trees.
1.7	West of Sandiacre	Green Belt	Denise Lingard	Response-01759	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Dennis Watts	Response-01726	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Derek Morton	Response-01607	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Derrick Hunt	Response-00437	The lang is green belt as a buffer from the motorway there is a well used footpath that gives access to and from Stanton
1.7	West of Sandiacre	Green Belt	Destiny Jade-Blake	Response-01636	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Diane Gillborn	Response-00983	It is a disgrace that building on green belt land is even an option. It will stop the area being used for recreational walks, damage the wildlife and create even more pollution.
1.7	West of Sandiacre	Green Belt	Diane Jones	Response-00852	Green Belt is precious. Local people have enjoyed this area for hundreds of years ie the walks to Stanton Village , the Monks Path to Dale Abbey and the ancient field systems.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Diane Mcmorrow	Response-00433	Feel strongly about green belt and conservation area they are there for a reason having their own ecosystems and habits to support the local wildlife. Having green areas in towns and cities give tranquil escapes to the local residents therefore green belt areas should be left alone
1.7	West of Sandiacre	Green Belt	Diane Meadwell	Response-00807	I quote from the Council's website: To adapt meaningfully to the changing climate and its impacts we need to restore the natural habitat and biodiversity to our borough This includes linking up green spaces to enable plant and animal species to flourish and find refuge Erewash Borough Council will be assessing all our parks and wild places to see where restoration can be made to the benefit of nature and the community We will be liaising closely with the County Council as part of the Derbyshire Local Nature Recovery Strategy. By destroying Green Belt land you will jeopardise this vision. Mitigation of climate change is being sought urgently. Leaving this area of Green Belt to nature, as it has been for many years, will surely contribute to this. Why plant trees and create green spaces when at the same time destroying what we already have?
1.7	West of Sandiacre	Green Belt	Diane Turner	Response-01744	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Donna Steele	Response-00781	I just don't understand how Green belt land isn't protected from building houses on. I always believe it was but suddenly councils can change this to build houses on. Stop and think, if this carries on we will be left without any beautiful green belt land and what happens to our wildlife?
1.7	West of Sandiacre	Green Belt	Dorothy Deeprise	Response-00817	If you destroy the green belt its gone for good.
1.7	West of Sandiacre	Green Belt	D Pallett	Response-01627	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	D Simpson	Response-01712	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Elaine Pickering	Response-00811	Green belt land should be protected
1.7	West of Sandiacre	Green Belt	Eleanor Moseley	Response-00799	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Eleanor Newman	Response-00718	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Emily	Response-01880	More & more green belt gone for housing which is wrong.
1.7	West of Sandiacre	Green Belt	Emily Milnes	Response-00470	Erosion of greenbelt
1.7	West of Sandiacre	Green Belt	Emma Peterson	Response-00491	This should remain green belt
1.7	West of Sandiacre	Green Belt	Emma Wall	Response-00319	This is greenbelt. This is an archaeological space that connects to stony clouds and I'm sure has archaeological connotations. I will be searching for an archaeological specialist to look at this land. It also has a public right of way across the motorway to the golf course.
1.7	West of Sandiacre	Green Belt	Emma Wilson	Response-01222	Shouldn't be building on green belt EVER
1.7	West of Sandiacre	Green Belt	Esther Cook	Response-01861	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Fay Cresswell	Response-00701	This development is next to the beautiful Stoney Clouds nature reserve and would severely affect the landscape and wildlife. This is a hugely popular location used by 100s of people walking dogs. Taking exercise birdwatching mushroom picking etc. This land has changed to grey belt from green in a very unhandled way where none of the rest who back onto the fields were never contacted
1.7	West of Sandiacre	Green Belt	Gail and Tony Orme	Response-00805	There are not many places left as it is for people to walk and enjoy . Especially for the young . Please please leave the Green Belt land alone .
1.7	West of Sandiacre	Green Belt	Gail Berry	Response-01644	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Geoff Tindsley	Response-00755	The land in question is currently classified as green belt, and it also adjoins the Stoney Clouds Nature Reserve. Whilst the Revised Strategy document requires that 'a suitable green buffer between development and the adjoining Stony (sic) Clouds Local Nature Reserve', I am highly sceptical that this would be adhered to by the developer, or properly monitored and enforced by the Council. Using green belt land when there are suitable brownfield sites in Sandiacre (and particularly Stanton) available is completely unacceptable.
1.7	West of Sandiacre	Green Belt	Georgia C	Response-01296	This is vital for both human and wildlife. If we keep encroaching and destroying our natural world I truly believe people's mental health will suffer. We are not built to sit behind screens 9-5, we need fresh air and green spaces to breathe. If we keep building in every area here and there every year to meet so called housing targets, we will be left with little to no areas of green space.
1.7	West of Sandiacre	Green Belt	Georgia Marvin	Response-00261	What once was a lovely, peaceful and charming area. A place where you could appreciate nature at its finest. During lockdown we got a real feel for what was on our doorstep, we appreciated everything nature had to offer and we've never taken it for granted again, to have that taken away from us is a disgrace and dishonour. A nature reserve no more, an absolute disgrace.
1.7	West of Sandiacre	Green Belt	Gill West	Response-01725	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Glyn Holner	Response-01697	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Gordon Bruce	Response-01455	This green belt is one of very few that side of the M1 in the huge conurbation. The amenity of green space is well known now as a positive for mental health.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Gordon Daris	Response-01639	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Greg Cox	Response-01702	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Gregg Bartrum	Response-01591	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Greg Watts	Response-00733	The site lies within designated Green Belt, which plays a crucial role in preventing urban sprawl, preserving the openness of the countryside, and maintaining a clear boundary between communities. Development here would undermine the very purpose of the Green Belt designation. At a time when local and national planning policy emphasises the re-use of brownfield sites and the protection of open countryside, this proposal appears premature and lacking in justification. It does not align with the principles of sustainable development.
1.7	West of Sandiacre	Green Belt	Harriet Farnsworth	Response-01914	Popular spot for local dog walkers, including us, offers a wide, fresh green space to walk pets & take mindfulness walks.
1.7	West of Sandiacre	Green Belt	Helen Gillain	Response-00964	The area is green belt and it is important to keep it so ... we need green space for both physical and mental wellbeing
1.7	West of Sandiacre	Green Belt	Helen Richardson	Response-00432	I strongly object to the proposed development of 108 new homes on Green Belt land. This development directly undermines the fundamental purpose of the Green Belt, which is to prevent urban sprawl, protect the countryside, and maintain the distinct character of settlements like Sandiacre. Building on this land sets a dangerous precedent and erodes the vital buffer between urban areas.
1.7	West of Sandiacre	Green Belt	Helen Thompson	Response-01356	This is an important part of the Green Belt for Sandiacre. There is not a clear break in building between Sandiacre, Long Eaton and Risley and only the canal between Sandiacre and Stapleford ; therefore people value the green countryside including this site , the Nature reserve and the fields along the canal as they form literally a green belt in this area. Attempts by the council to reclassify sections of Green Belt don't sit well with common sense and fail to recognise the importance of our Green Belt for leisure activities beneficial to health and happiness.
1.7	West of Sandiacre	Green Belt	Helen whiteman	Response-00447	For goodness sake let's have a bit of green belt. This green belt which is next to Stoney clouds should be left well alone let the residents of sandiacre have one thing they can be proud of We have to put up with hundreds of Lorrie's trundling down the roads, from the Stanton site. No one care about the residents of sandiacre at all especially the local council
1.7	West of Sandiacre	Green Belt	H Foster	Response-00714	Greenbelt is sacrosanct and to be able at the click of a button to change parameters to suit this council that is going against all the wishes of the sensible majority holds dear It won't be long before the whole of our area is covered in concrete and tarmac and the people of this area will have to drive to get a breath of true countryside Please look for more suitable, non arable land
1.7	West of Sandiacre	Green Belt	Ian	Response-00493	Building on green space during a climate crisis is not a good idea, find a brownfield site to develop on
1.7	West of Sandiacre	Green Belt	Ian herbert	Response-00939	this land should stay as green buffer between sandiacre and the motorway.
1.7	West of Sandiacre	Green Belt	IAN TAYLOR	Response-00972	The site adjoins the Stoney Clouds Nature Reserve and is essentially part of the same ecosystem. Together with surrounding farmland they form part of the green belt around Sandiacre and should be treated equally.
1.7	West of Sandiacre	Green Belt	Ian telfer	Response-00991	We need some green land within the conurbation. There's loads of suitable land between Sandiacre and Borrowwash. Most of which isn't actually growing food but exercising horses!!
1.7	West of Sandiacre	Green Belt	Ian Ward	Response-01628	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Irina Anthony	Response-01867	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Isabelle Love	Response-00529	There are so many brown field sites that can be developed on that is so confusing that the land grab seems to be for the greenbelt - an area that SHOULD be protected for the good of the community as well as wildlife. Removing all lush land for uniform houses is detrimental to wildlife and to the mental health of the residents who enjoy breathing fresh air.
1.7	West of Sandiacre	Green Belt	Isobel Ball	Response-01092	It is absolutely absurd to be building on green belt areas when there are so many brown belt areas in dire need of usage. Green belts are beautiful places full of wildlife and colour and many of us adore this particular spot. It is greedy and selfish, especially in the position we are currently in with climate change and deforestation, destruction of habitats the list goes on. Building here will most likely entail destruction of grass and concreting over it and chopping down trees to make room. Why do it? When there are so many empty spaces where many many more houses could be built? It is hardly a thought through plan and i know of no one local who endorses it. It's destroying beauty and animal habitats, trees we require to survive.
1.7	West of Sandiacre	Green Belt	J. E. Lord	Response-01601	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Jack Greatorex	Response-01731	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Jacob Whitt	Response-01748	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Jacqueline Marshall	Response-01436	Houses SHOULD NOT be built on the GREEN BELT until ALL other options have been investigated and in this instance I do not believe that this has happened. Residents should be informed where else was looked at before it was decided that this was the only option.
1.7	West of Sandiacre	Green Belt	Jade Smith	Response-01783	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Jake Simpson	Response-00667	Losing green open space would be a negative thing to the area

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	James goddard	Response-01204	Trying to destroy one of our few remaing Green Belts, and creating urban sprawl, the very thing our Green Belt serves to protect us from -Absolutely disgusting, and very underhanded.
1.7	West of Sandiacre	Green Belt	James Meadwell	Response-01653	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	James Roberts	Response-01708	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	James Seward	Response-01683	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	James White	Response-01883	Green belt land should be protected ahead of alternatives such as Mark Street.
1.7	West of Sandiacre	Green Belt	Jane Dennett	Response-00965	Keep as green belt it is our heritage and right to roam on
1.7	West of Sandiacre	Green Belt	Jane Elizabeth Tindsley	Response-00669	The land in question is currently classified as green belt, and it also adjoins the Stoney Clouds Nature Reserve. Whilst the Revised Strategy document requires that ?a suitable green buffer between development and the adjoining Stony (sic) Clouds Local Nature Reserve?, I am highly sceptical that this would be adhered to by the developer, or properly monitored and enforced by the Council. Using green belt land when there are suitable brownfield sites in Sandiacre (and particularly Stanton) available is completely unacceptable.
1.7	West of Sandiacre	Green Belt	Janet Whildes	Response-01869	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Jane Warton	Response-00662	losing heritage and country side
1.7	West of Sandiacre	Green Belt	Janice Taylor	Response-01743	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Janice West	Response-00989	There will soon be no green belt areas for future generations to enjoy. You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Janine Holmes	Response-01595	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Jason Deeprose	Response-00818	Keep the green belt
1.7	West of Sandiacre	Green Belt	Jason Harwood	Response-01667	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Jason Webb	Response-01637	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Jayne Rowley	Response-01279	We should be protecting our green belt and if anything enhancing this with the planting of more trees to not only protect the habitats of our wildlife but help to reduce air pollution and flood risks. Trees can help reduce flood risks by absorbing the rainwater and also slowing down the run off to other areas. The root system of trees allow more water to infiltrate and be stored underground. They also play a huge part to mitigate air pollution which is much needed in the area to improve air quality. Greenbelt land also plays a huge part in providing a recreational area for the local community, improving health and wellbeing.
1.7	West of Sandiacre	Green Belt	J Cates	Response-01750	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Jeanette O Connor	Response-01640	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.

1.7	West of Sandiacre	Green Belt	Jennie Handley	Response-00723	Green Belt land was created for a reason and should be left alone. There are plenty of options to redevelop run down empty properties And knock down old industrial buildings that are sat empty. If building on green belt land is allowed as a cheap option there will soon be no Green Belt left.
1.7	West of Sandiacre	Green Belt	Jennifer Bailey	Response-01857	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites. I do feel it will be a great shame to lose even more green belt. Why can't you build on brown and grey areas? I thought that was what Labour were looking to do. To even consider classing Stoney Clouds as grey belt is dishonest at best. How can a nature reserve be considered grey belt?
1.7	West of Sandiacre	Green Belt	Jennifer Saville	Response-00516	The land should still be green belt, no consultation as far as I am aware with residents to change this
1.7	West of Sandiacre	Green Belt	Jennifer Tindsley	Response-00751	The land in question is currently classified as green belt, and it also adjoins the Stoney Clouds Nature Reserve. Whilst the Revised Strategy document requires that ?a suitable green buffer between development and the adjoining Stony (sic) Clouds Local Nature Reserve?, I am highly sceptical that this would be adhered to by the developer, or properly monitored and enforced by the Council. Using green belt land when there are suitable brownfield sites in Sandiacre (and particularly Stanton) available is completely unacceptable.
1.7	West of Sandiacre	Green Belt	Jenny Stephens	Response-01723	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Joanna hardy	Response-01304	Our greenbelt is a vital part of the British landscape. It has been protected for many years and should continue to be so. This proposed removal of greenbelt land is a direct attack on what makes Britain a green and pleasant land. It is our heritage.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Joanne Guyatt	Response-01784	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Joanne Johnson	Response-00765	Loss of green belt is unacceptable anywhere. We have very little in the way of greenbelt in this area, all major routes such as the M1 should not be built up to. Yes there is an embankment but no doubt children will be living there, safety aspects need considering.
1.7	West of Sandiacre	Green Belt	Joanne Lambert	Response-00494	There are lots of unused buildings in erewash which could be used for housing instead of biluinding close to green belt land which will disturb the wildlife.
1.7	West of Sandiacre	Green Belt	Jodie Owen	Response-01688	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Jodie Shrive	Response-00601	In Labour's manifesto, you claim that you will prioritise freeing up 'grey-belt' land for development and prioritise saving green-belt land. You are contradicting your own manifesto, the ONLY thing that even enabled you to be in the position of power that you are. There is already so much uproar regarding Labour retracting everything that they promised and you are ensuring you will NEVER be re-elected in this area. Approving such a project goes against not only what is in your own manifesto, but the national and local commitments to fight climate change, protect green spaces and promote sustainable development. THERE IS NO PLANET B!!!!
1.7	West of Sandiacre	Green Belt	Jo Gerhardt	Response-01286	Building on our precious Green Belt is not the answer. Cramming in all the those houses in an already overpopulated area would cause all kinds of problems as already mentioned in other sections. In my opinion, using the Green Belt would be a detriment to the local area next to the nature reserve. There is plenty of brown belt land in the area to use. All it appears to be is a cheaper way by the Government to use Green Belt rather than brown belt. Money would have to be spent decontaminating the old ironworks, then so be it. I don't mind paying more tax if that's what is required., so that Green Belt is not built on.
1.7	West of Sandiacre	Green Belt	John Gardner	Response-01694	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	John G Brown	Response-01752	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	John Hibbitt	Response-01855	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	John Ledger	Response-01605	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	John Payne	Response-01785	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	John whiteman	Response-00450	Please leave the green belt alone. It is the government that wants this not the people of sandiacre
1.7	West of Sandiacre	Green Belt	Jon Burn	Response-01722	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Josh Williams	Response-01632	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	J Pearson	Response-01772	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Judith A Pulfer	Response-01863	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites. Brown field sites - These areas I believe to be proposed building land. Why do the council not use them when they are designed as such? These areas could possibly need cleaning up due to their previous site history. This could prove costly in both time and money to the council and the developer. The Labour led council need a 'quick fix' to the alleged housing problem. This area of land once part of green belt and now designated as grey belt at an Extraordinary meeting of the Borough Council, grey belt being land that can be built upon with the appropriate planning permissions. We are all aware that all councils are a bit short of funds these days but surely it would be cheaper to pay for it (cleaning up) now than in years to come when the remedials will obviously cost more. It makes sense.
1.7	West of Sandiacre	Green Belt	Judith Blackburn	Response-01928	This must be saved for everyone, residents and newcomers. It is well researched that outdoor pursuits are beneficial to mental and physical well being. It is possible to run+jog, walk dogs, met neighbours and friends, have picnic and play areas and educate children to appreciate and protect wildlife.
1.7	West of Sandiacre	Green Belt	Julie Hill	Response-01643	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Julie Taylor	Response-01503	This area is a lovely dog walking or just a walking area that alot of people use on a daily basis, we want to look at greenery not concrete.
1.7	West of Sandiacre	Green Belt	June Daniels and Terence Hancox	Response-00847	NO !!!!! Totally against the plan to build on Sandiacre green belt.
1.7	West of Sandiacre	Green Belt	Karen Alldread	Response-01868	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Karen Blain	Response-01732	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Karen Evans	Response-00523	Please stop destroying this. We need it to survive.
1.7	West of Sandiacre	Green Belt	Karen Harwood	Response-01668	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Karen Pitts	Response-00643	Why use green belt when there are plenty of brownfield sites eg near Lidl and also the amount of empty housing throughout Sandiacre
1.7	West of Sandiacre	Green Belt	Kathryn Martin	Response-00527	There are alternative sites that will not require building on green belt, behind Lidl for example. Closer to services and more easily accessible.
1.7	West of Sandiacre	Green Belt	Katie Morrice	Response-00664	Green belt should be protected from construction in order to provide recreation and wellbeing to everyone. Also to protect the habitat for all our animals, insects, birds and plants and trees.
1.7	West of Sandiacre	Green Belt	Katie Robinson	Response-00943	This is the biggest shock - that there are plenty of other build opportunities in the area that are brown belt but the choice to remove green belt was the first choice. The effect it has on the local population that moved to be closer to area's like this let alone the destruction it will cause to the wildlife in the area also. Brown belt is sat there and waiting to be developed on - most not in use anymore and causing eye sores. My understanding it was proposed to use the site to the rear of Lidl and also there is all the brown belt in Stanton.....Why is this not being progressed or used? In addition to brown belt there are a number of properties/old factories/buildings just sat empty - again why are these sites not being looked into? why is the first choice always the green belt - we can take bits and pieces here and there and think its only a small bit but every time some is taken that's a bit more and soon there will be no more to take!
1.7	West of Sandiacre	Green Belt	Kelly Randall	Response-00591	The proposal directly contravenes the Neighbourhood Plan and national policies aimed at protecting the green belt. Brownfield sites, such as Stanton, remain underutilised and present a more appropriate development opportunity.
1.7	West of Sandiacre	Green Belt	Kelsey Green	Response-01666	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Kenneth Cooper	Response-01720	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Kern-Paul Lewis	Response-01715	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Kerry Meadwell	Response-01655	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Kerry Smith	Response-01271	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Kerry stokes	Response-00769	We need to keep the land as Greenbelt. Why are we losing our greenbelt when there is still brown belt to be used.
1.7	West of Sandiacre	Green Belt	KH Taylor	Response-01663	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Kim Helm	Response-00632	It is important to keep the green belt to help the environment and reduce pollution
1.7	West of Sandiacre	Green Belt	Kirk Moss	Response-00439	The land is designated greenbelt and should be protected from inappropriate development. This proposal contradicts long-standing policies designed to safeguard greenbelt areas. It also disregards past planning rejections on similar grounds. Permitting development here would set a dangerous precedent for further greenbelt erosion.
1.7	West of Sandiacre	Green Belt	Kirsty Handa	Response-00445	Green belt land should be protected at all costs and should never be built on. Green belt land has so many uses such as absorbing rain water, protecting wildlife, creating new wildlife, stunning scenery, reducing air pollution from tree etc. Any development on green belt land will have a negative impact and should not be built on
1.7	West of Sandiacre	Green Belt	Kirsty Meredith	Response-01462	We must protect our greenbelt, not destroy it. There were reasons why planning permission has been refused in the past. these along with all the current objections cannot just be swept under the carpet.
1.7	West of Sandiacre	Green Belt	K Reynolds	Response-01916	This must be protected. Loosing it for development is so wrong. We ALL have to think of our planets health. Not just our greed for wealth!
1.7	West of Sandiacre	Green Belt	Kristie Rugers	Response-01864	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Kyle Jones	Response-01764	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	L A Keen	Response-01659	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Laura Hallam	Response-01711	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Laura Thompson	Response-00702	A clear breach of regulations to build on green belt land when it is supposed to be protected for local wildlife and people. We would lose a natural resource which is irreplaceable.
1.7	West of Sandiacre	Green Belt	Laurence Luck	Response-01727	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Lauren Rose	Response-01446	There are plenty of other sites to build upon without having to sacrifice this area of green belt. There are plenty of brownfield sites that could be developed instead, removing unsightly derelict buildings and bringing homes to areas where they are needed, rather than building on shrinking green space. Whilst we are being encouraged to be outside more for our mental health - remember during lockdown for example? - removal of these green spaces is limiting that. Myself and my dog walker use the current land for walking and getting outside, but if this is housed over, yet more green space will be lost.
			Leah morral	Response-00712	Stoney clouds is a much loved area of Sandiacre and its people are very proud of it! It needs protecting for our people and our wildlife

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Lee Wilcock	Response-01670	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Lesley Bruce	Response-01397	There is very little accessible green belt left on the Sandiacre side of the M1. This precious commodity of Stoney Clouds should not be even considered by the council given its position buffering the M1 and giving home to such a diverse range of wildlife. Sandiacre, Stapleford and Long Eaton are already a huge conurbation. To extend it further is wanton destruction of a natural wild area much needed by the community.
1.7	West of Sandiacre	Green Belt	Lesley Carter	Response-00536	Green belt should not be prioritised for development when there are brownfield sites available. This site is also adjacent to a nature reserve. It will cause significant harm to biodiversity. It is an important buffer from the motorway for pollution and nature.
1.7	West of Sandiacre	Green Belt	Lesley Morral	Response-01920	There are other available brown field sites to build on.
1.7	West of Sandiacre	Green Belt	Lia Thims	Response-01766	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Linda Castledine-Davies	Response-00850	There are sufficient brown or grey sites in this area all of which have better access and are closer to facilities. The council have reversed their decision to build on a huge brown field site just a mile or so down the road this site could take up to 1000 houses and there is sufficient infrastructure already in place or being built. Green Belt land must be protected. This site at 13.5 acres is a beautiful landscape that provide recreation for locals and visitors alike. You cannot replace green belt once it has gone and it is apparent that this is the thin end of the wedge and if breached phases 2 3 and more will gobble up all the land. The council refuse to say why they are so intent of destroying our green land and our heritage and why they are in favor of this rather than the many brown sites available to them. Having just driven through Risley towards Borrowash I am astonished by how many thousands of acres of green belt land is untouched and no sign whatsoever of any housing estates having been flung up since I moved to this area. How can that be? Why has Risley not been targeted bearing in mind the land is right next to a flat road that runs for miles towards Derby and Nottingham, has a great bus route, the school is not fully subscribed and services are right next to this road. Why is our small bit of leftover green belt being deliberately targeted.? Easier, safer less logistically difficult land yet not considered? If you have to target green belt then it should be shared across all parishes and not leave the richest to enjoy their lovely countryside. However there is no need for any green belt we know this, you know this./ Green Belt actually exists to serve five key purposes, as outlined in the National Planning Policy Framework (NPPF): To check the unrestricted sprawl of large built-up areas To prevent neighbouring towns merging into one another To assist in safeguarding the countryside from encroachment To preserve the setting and special character of historic towns To assist in urban regeneration, by encouraging the recycling of derelict and other urban land None of the above are being adhered to with this proposal. In accordance with your own commissioned report from Derbyshire Wildlife Trust "many mobile species are likely to be moving between these (nature reserve) sites through a matrix of brownfield land and countryside". "Unimproved acid grassland has been significantly reduced in extent and distribution in lowland Derbyshire and only an estimated 22ha now occurs in Erewash and only 250ha in lowland Derbyshire (outside of the Peak District). The presence of this habitat is therefore significant for the site."
1.7	West of Sandiacre	Green Belt	Linda Oscroft	Response-01927	We assume this land was entitled heritage land for a reason. Presumably people passed a motion for it to be categorised as such & exorcized some foresight. It requires time for generations to benefit for it to truly become a heritage & should be allowed that maturity.
1.7	West of Sandiacre	Green Belt	Lindsey Rawlinson	Response-01624	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	LISA ANNE GILLIGAN-LEE	Response-00710	Green Belt aims to prevent urban sprawl and protect the countryside from inappropriate development. It plays a crucial role in carbon sequestration, flood mitigation, and urban cooling. Removing it and replacing absorbent green land with hard surfaces will increase water/ surface runoff and make the area more vulnerable to flooding in extreme weather especially nearby areas such as the A52. Natural flood defences, such as undeveloped land, are being recklessly sacrificed. The proposal to lose green belt land for housing will have significant, long-lasting negative impacts to the environment and for current and future generations. This space serves as an important recreational area that contributes to mental health and physical well being.
1.7	West of Sandiacre	Green Belt	Lisa Heppell	Response-00878	The area is Green belt surely that should be taken into consideration.No building should happen on any green belt
1.7	West of Sandiacre	Green Belt	Lisa J Pearson	Response-01762	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Liz Woodhouse	Response-01584	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	L Mee	Response-01777	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Logan Fox	Response-00746	We need to protect our open spaces, not take them away. All wildlife needs to be protected and have a place to live. It helps with air quality and our mental health having these open spaces available. There is no good reason to take them away, not one.
1.7	West of Sandiacre	Green Belt	Lorraine Daly	Response-00495	The importance of the green belt for protecting biodiversity and for the importance of mental well being to residents is widely recognised. This development is just vandalism.
1.7	West of Sandiacre	Green Belt	Lorraine Hands	Response-00534	Pieces of land that are Green belt should be preserved!!!
1.7	West of Sandiacre	Green Belt	Louise dix	Response-00975	We can't keep on changing green belt to grey just when we want they are green for a reason and we need to keep our green spaces so we can enjoy in the future
1.7	West of Sandiacre	Green Belt	Louise Felfoldt	Response-01733	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Louise Harper	Response-01571	There should be green belts surviving, if all green belts go what about the amount of trees and wildlife will we have, places to walk when you want with no concrete, trees block some of the noise from the motorway, the grass soaks up the rainfall so it doesn't flood downhill
1.7	West of Sandiacre	Green Belt	Louise Harrison	Response-01719	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Louise Jacks	Response-01767	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Louise Libberton	Response-01693	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Louise Robinson	Response-00647	It's green belt for a reason. Other sites should be found first. Especially those which have better road infrastructure.
1.7	West of Sandiacre	Green Belt	Lucy Johnson	Response-01369	Green belts are sacred! More and more are getting built on! And it's heart breaking! To see them get destroyed! They are plenty and plenty of brownfield sites to build upon! Why choose green belt land? I just don't understand! What the purpose is to destroy our countryside? Have you no morals
1.7	West of Sandiacre	Green Belt	Lucy Victoria Garner	Response-00949	We note that the reference of type of land has been conveniently changed from green to grey belt. Destroying wildlife habitats and totally inappropriate area for development. Much research available on the importance of open space, access to countryside and green land to health, welfare and mental health. There are other options on brown and grey sites that would serve better purpose.
1.7	West of Sandiacre	Green Belt	Luke Chein	Response-01779	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Luke Hinchley	Response-00699	Green belt land should not be used for building houses, the conversion of this green belt to a grey belt is not acceptable & other brownfield sites in the local area should be utilised for housing.
1.7	West of Sandiacre	Green Belt	Lynda Morton	Response-01606	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Lynsey Blackburn	Response-01227	Stop selling off our greenbelt spaces for housing developments, this is a much loved green space.
1.7	West of Sandiacre	Green Belt	Macie Brothwell	Response-01633	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Malcolm Dillon	Response-00722	The value of greenbelt land in so many respects is already well known. We should not need to defend it but sadly profit and selfish, but powerful, people are willing to take away what is not theirs to take! Clearly this loss of greenbelt land should not be allowed. Physical, mental health of citizens must take priority of any other considerations for this greenbelt land.
1.7	West of Sandiacre	Green Belt	Malcolm Fox	Response-00215	Why remove a green belt??? This is still a question not answered when there are other sites available, including brown belt sites. Removing a green belt should not be considered, especially one that is linked to a local nature reserve which support a multitude of wildlife.
1.7	West of Sandiacre	Green Belt	Malcolm Riedlinger	Response-00743	The whole point of green belt land (apart from preventing urban sprawl) is to protect the countryside, that will clearly disappear with the introduction of this build. It is well known by the residents of Sandiacre that building housing on green belt land should be under special circumstances. I can personally think of more suitable sites that are available that wouldn't compromise the environment to this extent (so I am sure the planning department would know this too), and they should be explored instead.
1.7	West of Sandiacre	Green Belt	Malcolm Riggs	Response-01680	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Malc Orbiston	Response-01673	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mandy Rait	Response-01587	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites. There is a reason why the greenbelt is protected. It provides us with the countryside and home to natural habitats. The proposed development would undermine the purpose of the greenbelt and should be protected.
1.7	West of Sandiacre	Green Belt	Marcel Janovsky	Response-00481	Green belt=green belt !
1.7	West of Sandiacre	Green Belt	Mark Gough	Response-00888	Green belt is protected . That protection should not be removed. Our country is not that big and what Green belt we have should be preserved for future generations . There is land that's not Green belt , places with derelict factories and buildings , these should be used for building new housing . Once our Greenbelt has been built on , it will never return . Travesty for future generations , who will never know what it's like to walk across a field , see the wildlife and experience freedom on their door step . We cannot let that happen !
1.7	West of Sandiacre	Green Belt	Mark Leek	Response-01740	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mark Skelton	Response-01341	We can't keep biting away at it. This is so important to the area around us to help our wildlife.
1.7	West of Sandiacre	Green Belt	Mark Thompson	Response-00750	Green belt land should be preserved . There is a very small amount between sandiacre and the motorway and this will make it worse
1.7	West of Sandiacre	Green Belt	Mark Warton	Response-00693	Destroying beautiful Green Belt Land
1.7	West of Sandiacre	Green Belt	Martin Driver	Response-01387	Ruining green belt and protected species habitats. Once it's gone, it's gone forever!
1.7	West of Sandiacre	Green Belt	Martin Ford	Response-01908	Being lost.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Martin Hardy	Response-01413	I strongly believe that green belt land should be protected. Not just for wildlife, but as it acts as a buffer between urban areas and the M1, farmland and our nature reserve. It not only increases local biodiversity, but also helps to improve air quality, stormwater drainage and gives local somewhere to enjoy nature without trespassing on private land.
	West of Sandiacre	Green Belt	Martyn Locker	Response-00903	Mentioned above. The loss of green belt land is devastating and can not be overstated due to impact on wildlife and human life alike.
1.7	West of Sandiacre	Green Belt	Martyn Maxted	Response-00435	My objection pertains to the change of status from Green Belt to Grey Belt of the three horse fields that I understand will be site of the 180 house development. Can the council simply redesignate land at will? If so, could this redesignation be subsequently applied to the Stoney Clouds Local Nature Reserve or any other Green Belt in the EBC controlled area? I also object to the council using valued Green Belt to build houses, when there are several acres of Brown Belt on the Stanton site which were destined for 2000 homes but which appears now to being developed for only commercial use.
1.7	West of Sandiacre	Green Belt	M A Smith	Response-01889	No building on green belt.
1.7	West of Sandiacre	Green Belt	Matt Bancroft	Response-00916	Encroachment of the green belt is a last resort only. There are other options.
1.7	West of Sandiacre	Green Belt	Matt Hallam	Response-00476	You know your not supposed to build on greenbelt, especially when you have 100s of houses that are vacant but will need doing up. This is alot cheaper than just building houses and upsetting your community. For example, behind lidl has been accepted by the land owner in a area of disused warehouses.
1.7	West of Sandiacre	Green Belt	Matthew Buckland	Response-00615	I find it particularly disappointing that this has been proposed when there are other local areas of brown belt which could be used instead. The whole point of green belt was to preserve these areas from development. According to Local Government Association Empty Homes Week 2025, UK Currently, nearly 700,000 homes sit empty and unfurnished, with over 265,000 classed as long-term vacant. 1800 empty properties identified by Erewash Council. No doubt the empty houses would be small numbers spaced around the area, therefore there would be less impact on roads, schools, and healthcare.
1.7	West of Sandiacre	Green Belt	Maurice Mason	Response-01617	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Maxine Sutton	Response-00471	There is plenty of land to build on, less than 5% of land is the UK is present,y built on. Why choose green belt land? It seems to be a lazy solution and reckless for the environment. Using green belt land instead of other available land in Erewash, which will destroy the natural habitat of countless flora and fauna. The Council have a duty to protect the environment for residents and to not add to the problems of climate change.
1.7	West of Sandiacre	Green Belt	M Dougle	Response-01749	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	M Eastwood	Response-01757	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Melanie	Response-00586	This proposal conflicts directly with the Neighbourhood Plan and planning principles aimed at protecting the Green Belt. The site serves a clear role in maintaining the character and openness of the landscape and should not be compromised when alternative sites are available. Development here would result in irreversible loss of valuable green space. You already build on land off Longmoor Road.
1.7	West of Sandiacre	Green Belt	Melanie Caumont	Response-01272	This is a clear breach of longstanding greenbelt protections. The area provides environmental benefits including carbon capture, air purification, and recreational value. Government policy outlines that greenbelt should only be built on in ?exceptional circumstances,? which have not been demonstrated here. Once lost, greenbelt cannot be restored. This development would set a dangerous precedent for future urban sprawl and irrevocably damage the rural character of Sandiacre.
1.7	West of Sandiacre	Green Belt	Melanie Howarth	Response-01621	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Michael Anderson	Response-00461	This is Green Belt land. There will are many other ways to accommodate people. Utilise properties that are not being occupied. Are there any Brown Belt areas that could be used?
1.7	West of Sandiacre	Green Belt	Michael Darnell	Response-00648	There is enough building opportunities in the area without having to use green fields that have provided a pleasant walking area for locals for years. This development will also impact the nature reserve that is close by.
1.7	West of Sandiacre	Green Belt	Michael Oscroft	Response-01926	We assume this land was entitled heritage land for a reason. Presumably people passed a motion for it to be categorised as such & exorcized some foresight. It requires time for generations to benefit for it to truly become a heritage & should be allowed that maturity.
1.7	West of Sandiacre	Green Belt	Michell Birkin	Response-01657	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Michelle Alsop	Response-01645	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Michelle Cox	Response-01724	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Michelle Ledger	Response-00815	THIS IS A GREENBELT AREA WHICH YOU SHOULD BE PROTECTING!!!! During lockdown especially the increase of people out walking went up tenfold, and many walkers use this area, i often stroll over to walk into Stanton and enjoy a pub lunch there. You should be protecting the green belt, it provides recreation & wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Michelle Wenham	Response-01650	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mick Helm	Response-00021	Obviously theory trumps practice when this area is to be classed as "grey belt". Why please?

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Mick Hughes	Response-01701	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mike Darnell	Response-00698	This is GREENBELT AND NEEDS TO BE PROTECTED, NOT A DISUED GARAGE BROWNBELT SITE
1.7	West of Sandiacre	Green Belt	Miss Garratt	Response-00905	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Miss R Cordon	Response-01648	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Misty McGrath	Response-01556	We need to improve and expand the greenbelt, and this land would be ideal for the nature reserve.
1.7	West of Sandiacre	Green Belt	Mollie Snow	Response-01729	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Molly Newbold	Response-00486	Of course 180 new houses will ruin the area
1.7	West of Sandiacre	Green Belt	Mr & Mrs Turton	Response-01660	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mr and Mrs R Skelton	Response-01274	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mr and Mrs Wright	Response-01275	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mr Colin Key	Response-01841	Green Belt land must be protected especially when so many alternative sites are available and have been rejected.
1.7	West of Sandiacre	Green Belt	Mr David Ainsworth	Response-00621	Do not touch green belt when other areas are available, including brown belt and the grey belt. It is unnecessary and unacceptable.
1.7	West of Sandiacre	Green Belt	Mr Ivan Stevenson	Response-01875	Green belt land was created, so as not to build on.
1.7	West of Sandiacre	Green Belt	Mr John Hickingbotham	Response-01431	The primary function of land designated as Green Belt is to prevent continual development until the point is reached where existing separately identifiable settlements coalesce into continuous urban sprawl. I strongly object the redesignation of approximately 4.8 hectares of land which the Sandiacre Neighbourhood Plan clearly regarded as green open space. Indeed, why bother creating and adopting a Local Neighbourhood Plan if it is to be totally disregarded the moment that any parcel of land is suddenly considered to be a prime development location?
1.7	West of Sandiacre	Green Belt	Mr K Gubb	Response-01838	Green Belt land must be protected especially when so many alternative sites are available and have been rejected.
1.7	West of Sandiacre	Green Belt	Mr K Turton	Response-01706	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mr Luke	Response-01703	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mr P J Tanner	Response-01728	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mr R M Draper	Response-01856	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mr R Widdowson	Response-01734	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mr S. Haywood	Response-01585	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mrs Christina Pope	Response-00732	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mrs Donna C. Ball	Response-01594	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mrs Froggatt	Response-00449	If this goes ahead there will be hardly any greenbelt left in Sandiacre. People need greenbelt for their own welfare giving them somewhere to enjoy and a healthy environment to walk rest and play in
1.7	West of Sandiacre	Green Belt	Mrs Griffin	Response-01698	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mrs J. Cooper	Response-01596	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mrs Jennifer Fry	Response-00581	Stoney Clouds is an awesome place where I walk my dog and escape to the peace and quiet of nature, I've been walking there for 11 years and always think how lucky I am to have this on my doorstep
1.7	West of Sandiacre	Green Belt	Mrs Joanne Thompson	Response-01690	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mrs J Reeder	Response-01909	This will be destroyed for future generations.
1.7	West of Sandiacre	Green Belt	Mrs Lee Farabella	Response-01899	Approving such a project goes against national & local commitments to fight climate change & protect green spaces.
1.7	West of Sandiacre	Green Belt	Mrs Linda Cox	Response-01753	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mrs Luke	Response-01704	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Mrs M. Rose	Response-01583	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mrs Marie Draper	Response-01755	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites. We need to protect this landscape and green belt as little by little we are losing it in the area, especially due to the Stanton development.
1.7	West of Sandiacre	Green Belt	Mrs M Burke	Response-01887	Approving such a project goes against national & local commitment to fight climate change & protect green spaces.
1.7	West of Sandiacre	Green Belt	Mrs N Taylor	Response-01896	Approving this project could go against national & local commitment to fight climate change & protect green spaces.
1.7	West of Sandiacre	Green Belt	Mrs Rachel Coats	Response-01623	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mrs R Cordon	Response-01647	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mrs Rigby	Response-00641	You should be protecting the Green Belt, it provides recreation and well being for every ones mental health, as well for animals, insects, amphibians, lizards and birds. You can also benefit from wild berries, herbs and plants grown by nature.
1.7	West of Sandiacre	Green Belt	Mrs Shani Wainwright	Response-00754	In my opinion the council should be protecting this wonderful green belt as it provides recreation and well being to all residents and is heavily used. It The animals, insects, amphibians, lizards and many birds that inhabit the area should be protected for us and future generations to enjoy. There are many more suitable sites that will have a less devastating impact on our residents and wildlife in Sandiacre.
1.7	West of Sandiacre	Green Belt	Mrs Sheila Hickingbotham	Response-01338	This area was designated as Green Belt for good reason, including preventing urban sprawl, and is situated next to the Stoney Clouds Local Nature Reserve. This development goes against national and local commitments to protect green spaces and will result in the loss of a public amenity which benefits both people and wildlife.
1.7	West of Sandiacre	Green Belt	Mrs Shirley Victoria Riggs	Response-01685	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mrs Susan Bantle	Response-01612	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Mrs Turton	Response-01707	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Natalie Bentley	Response-01646	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Nicole Cooper	Response-01597	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Normn McCrea	Response-01754	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Oliver Marriott	Response-00679	Green Belt Landscape & Green belt I'm confused as to why this site was selected, it only is it very limiting in terms of the access but also the fact it's on a nature reserve. Surely, this is going to affect a whole area for people, animals and nature. We are so lucky to have such a special place on our doorstep the views are incredible and it's so widely used I'm sure there must be more suitable alternatives available.
1.7	West of Sandiacre	Green Belt	Paige Walker	Response-01669	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Pamela Bassett	Response-00608	Wildlife as I've already alluded to are affected in addition wildlife that's transitional that you don't register while checking the wildlife on this land in your consultation wasn't available at the time of this. It's my understanding that greenbelt is greenbelt for a reason not because we can change it to a grey belt at any of the government.
1.7	West of Sandiacre	Green Belt	Pat Hardy	Response-01739	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Patricia Ancliff	Response-00948	This area to the north east of Sandiacre is well used for exercise/ recreation. As an Erewash Tree Warden I have volunteered to improve the area. I object to its use for housing.
1.7	West of Sandiacre	Green Belt	Paula Darnell	Response-00665	To build on our greenbelt sites is tragic, we rely on these areas so much for our mental and physical health and we must do all we can to protect it for our sakes and our wildlife.
1.7	West of Sandiacre	Green Belt	Paula Luck	Response-01710	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Paula Sims	Response-01687	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Paul Randall	Response-00131	Well the proposal is to build in the green belt in direct conflict with the Neighbourhood Plan and your own guidance since brown field sites already exist that you choose to ignore. Build J25a and develop Stanton instead. This really is a no-brainer.
1.7	West of Sandiacre	Green Belt	Paul Vleeton	Response-01770	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	paul wheeldon	Response-00582	This is an essential piece of green belt land bordering on to a nature reserve, there is a public footpath running through the site. there is plenty of brown fields land still available at the former Stanton Iron works site
1.7	West of Sandiacre	Green Belt	Paul Wilkes	Response-00599	This area has not been developed before in this quantity and we do not have infrastructure to support this many homes.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Peter Anthony	Response-01866	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
			Peter brown	Response-00671	We need to preserve our Greenland and we use it everyday to walk our dogs and children play there
1.7	West of Sandiacre	Green Belt	Peter Nicholls	Response-01622	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Pete West	Response-01700	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Phil Creasey	Response-01342	Green belt should be protected from construction in order to provide recreation and wellbeing to everyone. Also to protect the habitat for all our animals, insects, birds and plants and trees.
1.7	West of Sandiacre	Green Belt	Philip Reed	Response-01449	I strongly object to the proposed development of new homes on greenbelt land. This area is vital for wildlife, local biodiversity, and community wellbeing. Destroying greenbelt sets a dangerous precedent, undermining environmental protections and sustainable planning principles. Alternative brownfield sites must be prioritised to preserve our natural heritage for future generations.
1.7	West of Sandiacre	Green Belt	Polly Cernelley	Response-00715	NO !!!!! Totally against the plan to build on Sandiacre green belt.
1.7	West of Sandiacre	Green Belt	P Sandes	Response-01682	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Rachel Crossley	Response-01661	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Rachel Skelton	Response-01241	There are more appropriate sites that are not in green belt land. Once built on it is lost forever. Future generations in the area will be detrimentally affected by a lack of green space.
1.7	West of Sandiacre	Green Belt	R Barratt	Response-01664	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Rcahel Sharp	Response-00652	I cannot believe this area is seriously being considered. Once greenbelt land is used it is gone forever and where will it end? Developers should be finding areas that are not greenbelt land. They just want to make larger scale developments to increase their profits. This area should be a definite no go given it's proximity to the nature reserve and also we already have too much concrete in the area with the M1 and Stanton Industrial Park.
1.7	West of Sandiacre	Green Belt	Rebecca Longmuir	Response-00253	Labour needs to listen! No to the build in Sandiacre! Protect the green belt. The nature reserve/stony clouds . Don't destroy the wildlife and our homes. We all love the nature reserve as it is, Unspoiled land without adding housing. Please leave Sandiacre alone! How much more greenbelt/nature are you prepared to ruin. And where does it stop? If you allow this, then No greenbelt or wildlife is safe. Stop before irreversible damage is done.
1.7	West of Sandiacre	Green Belt	Rhiannon Lowater	Response-01592	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	R Hibbitt	Response-01862	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Richard Broughton	Response-01352	There has already been encroachment on the green belt in this area,
1.7	West of Sandiacre	Green Belt	Richard Chambers	Response-00745	It will shrink the green belt, and their plenty of 'brown belt' land nearby - the old rail yard for example.
1.7	West of Sandiacre	Green Belt	Richard Deeprise	Response-00816	Please dont take away the green belt. Once its gone its lost for good
1.7	West of Sandiacre	Green Belt	Richard Haines	Response-01674	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Richard Jenkins	Response-00264	Once green belt is gone, it is gone forever. We have so little Green belt. Why cannot existing brownfield sites be developed?? The benefits to mental and physical well-being are well known and understood. (Else why are there parks in London when land is so expensive??) These benefits will diminish/disappear if existing Green Belt is developed. This development will reduce the recreational areas available for families and individuals and visitors alike. Allowing one development would set a precedent for further encroachments on green belt land, leading to a gradual loss of these essential spaces. The development would change the character of the local community and disrupt the aesthetic appeal of the area, which is often valued for its natural beauty. Green Spaces play an enormous part in combating climate change by absorbing carbon dioxide and reducing heat islands in urban areas. Conversion to housing would reduce these benefits. Building on this green belt land will eliminate vital green spaces that act as carbon sinks, contributing to increased carbon emissions and worsening local climate conditions."
1.7	West of Sandiacre	Green Belt	Richard Marriott	Response-00675	Green Belt Landscape & Green belt I'm confused as to why this site was selected, it only is it very limiting in terms of the access but also the fact it's on a nature reserve. Surely, this is going to affect a whole area for people, animals and nature. We are so lucky to have such a special place on our doorstep the views are incredible and it's so widely used I'm sure there must be more suitable alternatives available.
1.7	West of Sandiacre	Green Belt	Richard Naylor	Response-00066	You're destroying some of the green belt in Sandiacre, but you don't care about that.
1.7	West of Sandiacre	Green Belt	Richard Shrimpton	Response-01301	You should be protecting the green belt, it provides recreation & wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Robert Mee	Response-01791	My main reason for objecting to these developments is that I do not believe that the criteria set out in the NPPF has been met justifying any encroachment into the Green Belt at this time. The Core Strategy and this Amendment are developed in order to meet the housing targets allocated to the council by central government. I do not believe that the number of houses required by government constitutes, in itself, the ?exceptional circumstances? which are required under the Framework. This is particularly so in view of there being no published objective basis for the numbers allocated to each authority. The term ?exceptional circumstances? does include ?instances where an authority cannot meet its identified need for homes?. The waiting list for social housing in the general area might suggest that this is the case, but I do not accept that these plans will go far to address this issue ? the vast majority of the planned housing allocations are not even for affordable housing, let alone social housing. Additionally, I do not remember seeing evidence that Erewash has specifically quantified local (i.e. Erewash) housing needs. I also do not believe that much, if any, of the Green Belt selected for development would fit the definition of ?Grey Belt?. As a concept, I can support the idea of Grey Belt as originally reported, i.e. pieces of land within the Green Belt which have previously been developed ? indeed, I can think of a few locally, though they are all fairly small. I find the arguments that I have heard over distances between the edge of Derby and the edge of other towns, and how these distances will still be maintained, extremely spurious. The Green Belt in its entirety exists to prevent Nottingham and Derby from merging ? while building on any of these sites does not immediately make the two cities any closer to each other, it does reduce the green space between the two cities, which is precisely what the Green Belt was established to prevent. The Green Belt is a regional initiative, covering two counties and several local authorities. With Erewash having such a high proportion of its land earmarked as Green Belt it is incumbent on the region as a whole to find a solution to the housing shortage, rather than to expect our authority to have to sacrifice its green spaces.
1.7	West of Sandiacre	Green Belt	Robert Mee	Response-01506	My main reason for objecting to these developments is that I do not believe that the criteria set out in the NPPF has been met justifying any encroachment into the Green Belt at this time. The Core Strategy and this Amendment are developed in order to meet the housing targets allocated to the council by central government. With Erewash having such a high proportion of its land earmarked as Green Belt it is incumbent on the region as a whole to find a solution to the housing shortage, rather than to expect our authority to have to sacrifice its green spaces.
1.7	West of Sandiacre	Green Belt	Rob Lowe	Response-01768	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Roger Day	Response-00023	There are areas within Sandiacre that could be built on without using greenbelt land. What about the parcel of land behind Lidl? That is an eyesore and has been derelict for many years. The proposals to improve the canal side and create a park has never materialised so why not build houses on it. There are factory units around the area which may be able to absorb some of the additional population.
1.7	West of Sandiacre	Green Belt	Roger Farnsworth	Response-01910	Popular spot for local dog walkers, including us, offers a wide, fresh green space to walk pets & take mindfulness walks.
1.7	West of Sandiacre	Green Belt	Roger Fleck	Response-01083	There are a number of brownfield sites readily available to build these houses on which for some reason have been overlooked particularly a sute next to lidl which has already gone through public consultation. Why has the green belt been prioritised over these sites?
1.7	West of Sandiacre	Green Belt	Rosemarie Gough	Response-00997	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites. My husband and I have loved it and walked this area several times a week for many years. During Covid this nature reserve and surrounds was an absolute god send. Nature and being outdoors was what kept us sane during those dreadful days. Since then, more and more people are turning to the outdoors for their health and mental wellbeing. We should be cherishing this green belt.
1.7	West of Sandiacre	Green Belt	Roy Drew	Response-01614	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Ruby Sharp	Response-00886	I cannot believe this area is seriously being considered. Once greenbelt land is used it is gone forever and where will it end? Developers should be finding areas that are not greenbelt land. Greenbelt land is essential for our ecosystems and local wildlife, providing food and photosynthesis. This area should be a definite no go given it's proximity to the nature reserve and also we already have too much concrete in the area with the M1 and Stanton Industrial Park. This concrete is an eye sore, particularly in cloudy weather, all the grey. The green belt land gives Sandiacre colour and makes it vibrant.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Ryan Selby	Response-00479	We should be protecting the green belt areas, there isn't many left and destroying these is awful. Effects the local areas with flooding and rain fall, effects the wild life and eco system. The Knock on effect it has to everything
			S. Brailsford	Response-00598	Green belt land should be saved for our future generations.
1.7	West of Sandiacre	Green Belt	S. Jones	Response-01615	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
			Sally Davies	Response-01294	Green belt should be green belt. Should not be allowed to be built on.
1.7	West of Sandiacre	Green Belt	Sally Peake	Response-01893	Disappearing fast, yet another development on green field site. Why can't the new houses be built at the Stanton site - less impact locally.
			Samantha Anne Whitney	Response-00757	This land should be left as Green Belt, it's one of the prettiest places in Sandiacre, with lovely views. It's well used by local children to play on and dog walkers who walk their dogs everyday. This is exactly how it should be used and should stay as it is.
1.7	West of Sandiacre	Green Belt	Samantha Whildes	Response-01270	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Sam Buckland	Response-00600	I find it particularly disappointing that this has been proposed when there are other local areas of brown belt which could be used instead. The whole point of green belt was to preserve these areas from development. According to Local Government Association Empty Homes Week 2025, UK Currently, nearly 700,000 homes sit empty and unfurnished, with over 265,000 classed as long-term vacant. 1800 empty properties identified by Erewash Council. No doubt the empty houses would be small numbers spaced around the area, therefore there would be less impact on roads, schools, and healthcare.
1.7	West of Sandiacre	Green Belt	Sam Greatorex	Response-01695	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Sandra Cooke	Response-01613	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
			Sarah Favell	Response-00038	Green belts should never be built upon
1.7	West of Sandiacre	Green Belt	Sarah Harrison	Response-01658	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	S Bryne	Response-01677	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
			Sebastian Roberts	Response-01675	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Shanead Ligton	Response-01689	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Shannon moss	Response-00454	The fields in question are actively used by the community, with over 20+ people?runners, walkers, and families?frequenting the area daily. On certain days, local running clubs use the footpaths, which also serve as an essential link between the adjacent golf course and Stoney Clouds. The removal of this land for development would strip the community of an important recreational area, affecting both physical and mental well-being. Destruction of Greenbelt for Profit This proposal seeks to override existing greenbelt protections simply to push forward a profit-driven agenda. In the past, local residents have had planning applications rejected due to the area?s natural beauty. It is wholly unacceptable that large-scale developers are now attempting to circumvent these protections by reclassifying the land from greenbelt to grey. This is a blatant attempt to manipulate regulations, disregarding the community?s interests for financial gain.
1.7	West of Sandiacre	Green Belt	Shannon Robinson	Response-01635	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
			Sharon Grant	Response-00219	Why are we not building on other sites, why use the green belt. it was classified as this for a reason.
1.7	West of Sandiacre	Green Belt	sharon thornhill	Response-00448	Greenbelt areas should remain untouched. we are losing site of the necessity to keep these areas whilst rushing to fill every available space in this country with more and more housing
			Sharon weston	Response-00440	It's greenbelt land simple, is nothing sacred anymore.
1.7	West of Sandiacre	Green Belt	Shaun Green	Response-01773	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Sheila	Response-00587	This proposal conflicts directly with the Neighbourhood Plan and planning principles aimed at protecting the Green Belt. The site serves a clear role in maintaining the character and openness of the landscape and should not be compromised when alternative sites are available. Development here would result in irreversible loss of valuable green space. Once it is gone we can never get it back. The whole development is shameful.
1.7	West of Sandiacre	Green Belt	Sheila Payne	Response-01782	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Sian Knox	Response-01679	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	S Leek	Response-01737	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Sonya Birkin	Response-01656	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Sophie Bennett	Response-01631	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
			Sophie Farnsworth	Response-01913	Popular spot for local dog walkers, including us, offers a wide, fresh green space to walk pets & take mindfulness walks.
1.7	West of Sandiacre	Green Belt	Stephen Barlow	Response-01808	I understand the need for new houses to be built but feel that this site is really not suitable and should be kept as greenbelt.
1.7	West of Sandiacre	Green Belt	Stephen Davies	Response-00214	EBC appear to strongly support biodiversity and green spaces yet you want to build 180 homes on the only break between Larch Drive and M1. The site lies adjacent to a designated nature reserve and contains a significant number of mature trees. The development would result in the loss of both green space and trees and place additional pressure on the adjacent nature reserve. This conflicts with paragraph 180 which states that planning decisions should ensure that developments do not result in significant harm to biodiversity. Paragraph 179 requires planning authorities to protect and enhance sites of biodiversity value. Paragraph 131 further states that trees should be retained wherever possible. Given the proximity to the nature reserve the environmental cost of the proposed development would be high and irreversible
1.7	West of Sandiacre	Green Belt	Stephen Sacker	Response-01598	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Steve Bilbie	Response-00285	This is part of the small area of green belt left in sandiacre and should be preserved. This is the last remaining green belt of significance in Sandiacre.
1.7	West of Sandiacre	Green Belt	Steve Whittaker	Response-01781	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Stuart Pensom	Response-00049	Why has it got to be green belt land
1.7	West of Sandiacre	Green Belt	Sue Harrison	Response-01629	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Susan Heinke	Response-00468	Enough destruction of green spaces
1.7	West of Sandiacre	Green Belt	Susanne Beaven	Response-01618	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Sylvia Plampin	Response-00624	Green belt should remain green belt. There are plenty of other sites, and even empty houses that could be renovated.
1.7	West of Sandiacre	Green Belt	Tamara Partridge	Response-01780	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Tarnya Hinman	Response-01786	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Thomas Ilett	Response-01088	The NPPF states ?inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances? (paragraph 147) and ?when considering any planning application, local planning authorities should ensure that substantial weight is given to any harm to the Green Belt. Very special circumstances will not exist unless the potential harm to the Green Belt, by reason of inappropriateness, and any other harm resulting from the proposal, is clearly outweighed by other considerations? (paragraph 148). These statements alone justify rejection of the proposed housing allocation. However, within this context; Map 6e, Appendix E and chapter 12, paragraph 78 of the Sandiacre Neighbourhood Plan confirm that Stoney Cloud Nature Reserve meets the above NPPF criteria. As a result of the proposed housing allocation?s proximity to Stoney Cloud Nature Reserve and the surface water flood risk highlighted, the proposed housing allocation contravenes the NPPF criteria above (paragraphs 147 and 148). The proposed housing development is purported by Erewash Borough Council to increase social housing, in accordance with a target of 5000 new social housing solutions assigned by the current government. Currently, a maximum of 30% of the 180 houses to be built on this site are proposed for social housing. I propose that destroying the Green Belt to build a maximum of 54 houses towards a target in the Borough of 5000 is disproportionate and inappropriate, directly breaching the NPPF.
1.7	West of Sandiacre	Green Belt	Tim Derbyshire	Response-01681	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Tim Gough	Response-00996	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites. My wife and I have loved it and walked this area several times a week for many years. During Covid this nature reserve and surrounds was an absolute god send. Nature and being outdoors was what kept us sane during those dreadful days. Since then, more and more people are turning to the outdoors for their health and mental wellbeing. We should be cherishing this green belt.
1.7	West of Sandiacre	Green Belt	Tim Nichols	Response-00504	Eating up more green belt land that provides quality of views and separates housing and roads from countryside. The walk across to golf course is nice and will be destroyed with development
1.7	West of Sandiacre	Green Belt	Toby Moran	Response-01769	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Tom Ball	Response-01672	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Green Belt	Tony Weston	Response-00990	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites. Warn that allowing one development could set a precedent for further encroachments on green belt land, leading to a gradual loss of these essential spaces. developing green belt areas contributes to urban sprawl, leading to increased traffic congestion and strain on local infrastructure and services. If we allow this housing development, it sends a message that any green belt can be developed, which could lead to a domino effect damaging the entire region's green spaces.
1.7	West of Sandiacre	Green Belt	Tracey Howe	Response-01860	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Tracey Hughes	Response-01699	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Trevor Rowston	Response-01678	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Try church	Response-00033	The green belt land is one of the only green spaces left in sandiacre. It forms a space between the housing estate and the M1. This would be lost with the development. The land is used by ramblers, dog walkers, cyclists and many families. The footpath itself that goes across the land was diverted (officially) by the tenants on the land to make it easier for people to cross and enjoy. Labours 2024 election manifesto started quite clearly that NO greenbelt would be used for building on.
1.7	West of Sandiacre	Green Belt	Tyler Hobbs	Response-00879	Building on greenbelt land in Sandiacre would have a deeply damaging and irreversible impact on the environment, local character, and long-term sustainability of the area. The greenbelt exists specifically to prevent urban sprawl, protect natural landscapes, and preserve the character of rural and semi-rural communities like Sandiacre. Once this protected land is lost to development, it cannot be recovered?resulting in the permanent destruction of open countryside that provides vital habitat for wildlife, absorbs carbon, mitigates flooding, and offers residents a space for recreation and wellbeing. The loss of greenbelt would also weaken the natural buffer between built-up areas, leading to further creeping development in the future. Granting permission to build on this land sets a dangerous precedent that undermines national planning principles and the long-term protection of the countryside. In short, allowing this development to go ahead would sacrifice a unique and irreplaceable asset for short-term gain, at the cost of environmental health and community integrity.
1.7	West of Sandiacre	Green Belt	Verity Lamb	Response-01298	We can't keep building on every piece of land available especially when there are brown sites available
1.7	West of Sandiacre	Green Belt	Vickie Wright	Response-01552	The green belt stoney clouds is a place where we as residents enjoy walking our dogs. I do this twice a day every day for mine and my dogs wellbeing. It is also a place for community engagement. It is lovely walking around the nature reserve hearing all the birds and seeing many different types of wildlife. Approving such a project goes against national and local communities to fight climate change, protect green spaces and promote sustainable development
1.7	West of Sandiacre	Green Belt	Vicky	Response-00485	Why destroy more green belt when there are houses empty!! We already have the local hotels filled with immigrants where does it end
1.7	West of Sandiacre	Green Belt	Victoria Abraham	Response-01652	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Victoria Galpin-shrimpton	Response-01009	Green Belt ? You should be protecting the green belt, it provides recreation & wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Victoria Greateorex	Response-01730	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Victoria Marriott	Response-00674	Landscape & Green belt I?m confused as to why this site was selected, it only is it very limiting in terms of the access but also the fact it?s on a nature reserve. Surely, this is going to affect a whole area for people, animals and nature. We are so lucky to have such a special place on our doorstep the views are incredible snd it?s so widely used I?m sure there must be more suitable alternatives available.
1.7	West of Sandiacre	Green Belt	Vivien Davis	Response-01582	You should be protecting the greenbelt. It provides recreation and wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites.
1.7	West of Sandiacre	Green Belt	Wayne Major	Response-00408	I wish to object to the proposed development on the grounds that it would result in the loss of Green Belt land, which is protected by national planning policy. Green Belt land plays a vital role in preventing urban sprawl, protecting the countryside, and preserving the setting and special character of the area. The development of this site would undermine the fundamental purposes of Green Belt protection, as outlined in Paragraph 137 of the National Planning Policy Framework (NPPF), which states that development should only occur in the Green Belt in exceptional circumstances. I urge the planning authority to refuse this application in order to protect this important Green Belt land for future generations.
1.7	West of Sandiacre	Green Belt	William Marriott	Response-00676	Green Belt Landscape & Green belt I?m confused as to why this site was selected, it only is it very limiting in terms of the access but also the fact it?s on a nature reserve. Surely, this is going to affect a whole area for people, animals and nature. We are so lucky to have such a special place on our doorstep the views are incredible snd it?s so widely used I?m sure there must be more suitable alternatives available.
1.7	West of Sandiacre	Green Belt	Zoe Hughes	Response-01919	This is a beautiful area that people use for recreation & enjoyment, it's also home to wildlife. It should be protected.
1.7	West of Sandiacre	Healthcare Facilities	Adam Shooter	Response-01925	It is already challenging to get drs appointments and pharmacy lines are often into the street. Current services are insufficient for this increase.
1.7	West of Sandiacre	Healthcare Facilities	A Harby	Response-01684	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	Alex Corns	Response-01151	Healthcare facilities will of course be affected. Sandiacre has one small drs and dentist, which are already stretched as it is. Residents will struggle to get appointments with at least 500 extra residents needing appointments.
1.7	West of Sandiacre	Healthcare Facilities	Alex Lord	Response-00946	Adam's House is already at capacity, and terrible to fit appointments in, and are clearly over worked. Adding new patients for the area, would see an increase health care issues for the locals, especially the elderly.
1.7	West of Sandiacre	Healthcare Facilities	Alice Cooper	Response-01721	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Alice Ilett	Response-00571	I had free dental throughout my pregnancy but couldn't get a NHS dentist anywhere in Nottingham. I complained to PALS and was told that they were unable to assist and are telling people to call 111 if they are in pain. I've called the local doctors for my daughter and been sent to sawley as they have no appointments when the appointment line opened at 8am and I get through at 8.04. We don't have a pharmacy and often struggle to get local healthcare. What infostructure will be in place to support the new houses? We can't get healthcare now!
1.7	West of Sandiacre	Healthcare Facilities	Amanda Leech	Response-01625	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Amy Cray	Response-01223	Minimal GPs - it's 2 months for a phone call from a doctors currently!!
1.7	West of Sandiacre	Healthcare Facilities	Amy Skinner	Response-01447	There are very few healthcare facilities in Sandiacre itself, with the only pharmacy having recently closed. GP surgeries and dentists are at full capacity and even further afield in Stapleford you would be hard pressed to be able to register with any. Furthermore, it is already often extremely difficult to get a GP appointment and I fear this would only get worse with 180+ new households who would be needing to use these facilities.
1.7	West of Sandiacre	Healthcare Facilities	Anastasia Anthony	Response-01865	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available. Town + Country Planning Act 1990 indicates planning authorities must ensure developments are supported by adequate infrastructures. GPs, Dentists are already overcrowded but the public hasn't been presented with plans to combat this.
1.7	West of Sandiacre	Healthcare Facilities	Andrew Bishop	Response-01186	The local facility already cannot cope with the population within Sandiacre therefore we're sent to other areas - how can increasing the volume of housing help this?
1.7	West of Sandiacre	Healthcare Facilities	Andrew Davies	Response-01295	To access these would need journeys to Ilkeston, Long Eaton or Derby. The 14b will give access to the Community hospital and is a good hourly service however does not start until 9:30
1.7	West of Sandiacre	Healthcare Facilities	Andrew Marvin	Response-00255	We already have huge problems with doctors and dental appointments the area cannot cope now Its an absolute disgrace
1.7	West of Sandiacre	Healthcare Facilities	Andrew Meadwell	Response-01654	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Andria Nyilasi	Response-00672	We are currently struggling to access GP appointments as it is in Sandiacre, so unless a surgery is being built there, new residents will also have to travel elsewhere to access health services.
1.7	West of Sandiacre	Healthcare Facilities	Andy Martin	Response-01761	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Angela Whitehead	Response-00544	You can't get doctors or dentist appointments now this only increases the difficulty for existing residents
1.7	West of Sandiacre	Healthcare Facilities	Annabel Marriott	Response-00760	The local GP surgery is very small and doesn't offer a great service which is knowledge from local residents reviews/opinions. Many residents of Sandiacre actually use GP surgeries in surrounding areas. A good local health service is not what Sandiacre has to offer. We have no pharmacy either.
1.7	West of Sandiacre	Healthcare Facilities	Anne Butler	Response-00385	There are no full time doctors in Sandiacre, the local Pharmacy run by Boots has shut down, There are no local dentists taking on NHS patients. Ambulance access to the site will be slow.
1.7	West of Sandiacre	Healthcare Facilities	Anne Castledine	Response-00499	One doctors surgery for Sandiacre, try getting an appointment.
1.7	West of Sandiacre	Healthcare Facilities	Anne Jenkins	Response-00350	It's already to get appointments at the one gp surgery that serves the area. D the same goes for dentists
1.7	West of Sandiacre	Healthcare Facilities	Annette Jones	Response-00961	The doctors surgery cannot cope with the population this area. I already go the Stapleford Health Centre as the Sandiacre/Stapleford doctors formed a community medical service for Stapleford and Sandiacre many years ago. I cannot even see a doctor now at the surgery as bottom of the postcode list and should be using a doctors in the Derbyshire area. I was going to change over to the Sandiacre surgery but no joy. No good saying that a new surgery will be part of the deal as no doctors to fill the positions.
1.7	West of Sandiacre	Healthcare Facilities	Ann Harrison	Response-01602	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Anthony Ford	Response-01921	I already struggle to get a doctors appointment, despite having serious illnesses. Extra pressure on the surgery will make it worse.
1.7	West of Sandiacre	Healthcare Facilities	Anthony Pearson	Response-01760	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Antony M Ingram	Response-01626	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	April	Response-00469	The current healthcare infrastructure in our area is not equipped to handle the demands of a rapidly growing population. Local clinics and hospitals already face long wait times and limited availability of specialists and emergency services. Adding a large number of new residents without a parallel expansion of medical facilities and staffing will only worsen access to essential care. This is especially concerning for families like mine, where ongoing health issues require consistent and timely medical attention. Overburdening our healthcare system puts both new and existing residents at risk and threatens the overall well-being of the community.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	A R Gregory	Response-01918	
1.7	West of Sandiacre	Healthcare Facilities	Aleen Corns	Response-01146	I am concerned that the healthcare facilities will suffer, we have one small drs and one small dentist, that are already stretched. Very difficult to get appointments at either.
1.7	West of Sandiacre	Healthcare Facilities	Awson Wheldon	Response-01649	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Barbara and John Morrell	Response-00509	As a life long resident of Sandiacre I know how difficult it is to get to see a Doctor in this area! Should this development go ahead it would become more difficult, if not impossible, to get an appointment. I do hope this matter will be addressed.
1.7	West of Sandiacre	Healthcare Facilities	Barbara Michell	Response-01787	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Barbara Warton	Response-01886	Can't facilitate any more. Doctors will be even more overcrowded. No chemists in Sandiacre at all.
1.7	West of Sandiacre	Healthcare Facilities	Barry Partridge	Response-01778	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Ben Hollins	Response-01651	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Ben Snowdon	Response-00428	I moved to the area 2 years ago and struggled to get in with a GP. So much so I have had to go to Nottinghamshire to get in (stapleford)
1.7	West of Sandiacre	Healthcare Facilities	Bethany Oakes	Response-00960	Our local pharmacy was closed, and it's incredibly hard to get Doctor's appointments as well as dentist appointments in the village. How are we meant to support over 200 more people?!
1.7	West of Sandiacre	Healthcare Facilities	Beverly Gardner	Response-01692	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Beverly Green	Response-01686	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Bill Hartley	Response-01696	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Bill Meadwell	Response-00864	There is only one doctor and one dentist in Sandiacre. We have to ring at 8am to get an appointment and very often by the time we get through all the appointments are gone. It is virtually impossible to see a GP, only the nurse will see us. The nearest alternative surgery is in Stapleford, and they no longer take patients from Sandiacre. There is no chemist in Sandiacre any more, with Stapleford being the nearest.
1.7	West of Sandiacre	Healthcare Facilities	Britta Solloway	Response-00959	Infrastructure is bad now and you can't get appointments, no chance if additional 180 household need to use service
1.7	West of Sandiacre	Healthcare Facilities	B T Duke	Response-01900	No doctors.
1.7	West of Sandiacre	Healthcare Facilities	B T Keen	Response-01735	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	c/o The Equalised Club	Response-01603	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Callum binnall	Response-00460	Adams house is a joke at the moment so is any dental practice. How do expect it to carry on with more residents?
1.7	West of Sandiacre	Healthcare Facilities	Caroline Blackmore	Response-00451	Can you get a Dr's appointment ?? Again how are they meant to cope with the increase I refer back to the new home off Longmoor Lane and also ones being built on the old gas works
1.7	West of Sandiacre	Healthcare Facilities	Caroline Driver	Response-00618	Again when I moved to beech Avenue 5 years ago, had to go to doctors in stapleford and dentist in long Eaton. The current 1 GP practice and 1 dentist is insufficient for the number of people already living here, never mind potentially another 180 families. Total madness.
1.7	West of Sandiacre	Healthcare Facilities	Caroline Roy	Response-00945	Local Doctors are already a pain to get appointments at, adding this many extra residents to the area without additional GP facilities is just madness
1.7	West of Sandiacre	Healthcare Facilities	Carol Marshall	Response-00736	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Carolyn Hallam	Response-00489	It is already extremely difficult to get a GP appointment in Sandiacre. There is no pharmacy and no plans to have one
1.7	West of Sandiacre	Healthcare Facilities	Catherine Greenaway	Response-00429	We struggle already to get appointments at the doctors. There are only two in the area. How will these surgeries cope?
1.7	West of Sandiacre	Healthcare Facilities	Catherine Richardson	Response-00531	Doctors and dentist are already creaking at the seams. It is hard enough already to get an appointment. So many new patients could not be accepted so would have to travel further afield
1.7	West of Sandiacre	Healthcare Facilities	Charlotte Hunter	Response-01376	It's already hard enough trying to get a doctors appointment- having more houses means more of a LOTERY getting one!
1.7	West of Sandiacre	Healthcare Facilities	C Holmes	Response-01620	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Chris Hume	Response-01373	Getting a doctor for routine appointment takes a month, NHS dentists spaces don't exist, this development will make it worse for everyone
1.7	West of Sandiacre	Healthcare Facilities	Chris Jones	Response-01718	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Chris O Connor	Response-01641	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Christian Rearson	Response-01763	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	Christine Anderson	Response-00484	Our Doctors service is already fully stretched. We are unable to attain appointments without queuing at 8:00 on the day for a possible appointment. 180 new families will bring this service into a dangerous situation - they will not be able to offer a safe amount of medical care.
1.7	West of Sandiacre	Healthcare Facilities	Christine Gough	Response-00578	Only one doctors surgery in Sandiacre, where you can't get an appointment , no chemist , how do people look after their health when there are not enough facilities . One dentist who can't take on anymore . Sandiacre is bursting at the seams . Where are the facilities for new mothers and babies ? Where can they take their babies to be weighed and get their immunisations? Where can a child go for a health check up ? Have their teeth looked at ? Where can the people with diabetes go , to be checked and get their insulin ? With no chemist ! And there are potentially another 180 homes being built with people needing these non existent services . Absolutely crazy !!!!
1.7	West of Sandiacre	Healthcare Facilities	Christine Ridgway	Response-00465	I have had to register at Stapleford for my doctors even though it would be easier to be in Sandiacre however they have no availability and it is still a struggle to get a appointment when needed.
1.7	West of Sandiacre	Healthcare Facilities	Claire binnall	Response-00459	Absolute joke you cannot get a dra appointment at afam house and there are no NHS provisions locally if you want an appointment you have to wait until November and go to a different county you are an absolute shambles hang your heads In shame so called councillors lining your pockets you are all a disgrace
1.7	West of Sandiacre	Healthcare Facilities	Clair Ellis	Response-00475	Our local doctors struggle to fit you in for an appointment as it is. Will there be another surgery to accommodate the rest of the new residents?
1.7	West of Sandiacre	Healthcare Facilities	Clare Green	Response-01751	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Cole Hawkins	Response-01714	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Colin Cox	Response-01716	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Colin Marriott	Response-00686	One surgery, full in, one dentist that doesn't accept NHS patients, no pharmacy, A ?ot of residents use the facilities in Stapleford due to the lack of facilities in Sandiacre. Another reason for keeping the bus services
1.7	West of Sandiacre	Healthcare Facilities	Courtney Bennett	Response-00593	As like the schools, the healthcare sector is also already overran, underfunded, understaffed, unsupported. Are you building an additional 2 doctors practices and pharmacies to aid the increased proposed population? You are just adding and causing more physical and mental problems to the current residents by increasing the amount of people in the area when the education and health care sectors in this area are already struggling.
1.7	West of Sandiacre	Healthcare Facilities	C Owen	Response-01917	The area does not have the infrastructure for all the proposed construction & the people going to live there.
1.7	West of Sandiacre	Healthcare Facilities	Craig Freeman	Response-01561	Adam House is the only health service in Sandiacre and it is already almost impossible to get an appointment, especially if you work full time. Increasing the demand on this poor facility will only cause more frustration, more delays to primary care and increased cost for remedial action and treatments.
1.7	West of Sandiacre	Healthcare Facilities	Craig Richards	Response-01638	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Craig Thims	Response-01765	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Cristina Jenkins	Response-01588	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	C Thompson	Response-01634	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	DAllen	Response-00525	Doctors surgeries locally will be affected by this as at present there is an overload of dr to patient ratios
1.7	West of Sandiacre	Healthcare Facilities	Dana	Response-01173	Not even a chemist in Sandiacre now
1.7	West of Sandiacre	Healthcare Facilities	Daniel	Response-00545	GP surgeries and local NHS services are already overstretched, with long wait times and limited availability. Are you going to build a new GP office or hire more doctors?
1.7	West of Sandiacre	Healthcare Facilities	Daniel Downes	Response-01630	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Daniel Hands	Response-00057	All local doctors, dentists and other health care facilities such as mental health services and pediatricians are already overloaded. We already have to wait weeks or months to see professionals and receive the help and care needed to protect our families. QMC hospital often sees waiting time of several hours, with many residents reporting A&E waiting times exceeding 8 hours.
1.7	West of Sandiacre	Healthcare Facilities	Danielle Harrison	Response-00568	Adam House Surgery struggles to meet the needs of locals as it is. On average we have waited up two weeks to get a doctors appointment in our household and rely on the 111 helpline because the service is so poor. The dentists are also at total capacity and we are unable to have NHS appointments at all so have to travel outside Sandiacre, to Derby!

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	Daniel Naylor	Response-00680	Doctors, dentists and chemists (there already is no chemist in sandiacre) are already in short supply, without 180 new homes adding to this problem. Will guarantees be made create more doctors surgeries etc to handle the added residents to the area id this development got pushed through? In addition to schools, there's the issue with available doctors, dentist and chemists. There is already only 1 doctor and 1 dentist practice in sandiacre so the local residents already struggle to get a doctor's appointment in reasonable time, then have to travel to nearby Stapleford to collect their vital medication as there is no chemist in sandiacre. An extra 180 homes to add the this already existing problem would do the existing and the proposed new residents no favours whatsoever when requiring medical assistance.
1.7	West of Sandiacre	Healthcare Facilities	Darran and Emma Rea	Response-00597	Local residents already struggle to get into the doctors, the impact of this development will put further pressure on the healthcare facilities, even local dentists aren't able to take on NHS patients, the services are already stretched
1.7	West of Sandiacre	Healthcare Facilities	David Casey	Response-01608	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	David Cater	Response-01756	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	David Ruddock	Response-01776	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	David Tindsley	Response-00515	I wish to object to the proposed development due to the lack of sufficient healthcare provision in the local area. I currently use Adam House Medical Centre, and I am very aware of the challenges already facing our local GP services. Although there are no patient quotas at GPs, it is extremely difficult to get an appointment, and patients are often required to call at exactly 8am, or personally attend the surgery, to stand any chance of being seen. If you call even 30 minutes later, all available appointments for the day are typically gone. This has become the norm, not the exception, and it reflects the level of pressure the practice is already under. Adding another 180 homes to the area will place further strain on a system that is already at breaking point. Without additional investment in local healthcare infrastructure, this development risks worsening access for both existing and new residents. There is a similar situation relating to dentists, where it is almost impossible to register for an NHS dentist at any local dentist with the Erewash BC This concern aligns with Paragraph 95 of the National Planning Policy Framework (NPPF), which states that planning policies and decisions should ensure that developments are supported by the necessary infrastructure, including health facilities. It is also supported by Paragraph 8, which highlights the importance of promoting healthy and safe communities as part of sustainable development. Until there is a clear and funded plan to expand healthcare capacity locally whether through additional GP provision, clinic space, or staffing this development is premature and would place an unacceptable burden on already overstretched services. For these reasons, I strongly object to the application and urge the planning authority to ensure that adequate health infrastructure is in place before any further large-scale housing developments are approved.
1.7	West of Sandiacre	Healthcare Facilities	David Yeo	Response-01705	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Dean Bosworth	Response-01665	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Dean Lavelle	Response-01774	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Dean Michell	Response-01343	You cannot get appointments at the doctors now, so how will building more homes help.
1.7	West of Sandiacre	Healthcare Facilities	Dean Peake-Whitehurst	Response-00488	Getting an appointment at the local GP surgery is already hard enough. We do not need more competition for healthcare
1.7	West of Sandiacre	Healthcare Facilities	Debra Michell	Response-01346	Adam House doctors , it almost impossible to get an appointment if you are not on the phone at 8 am. We don't have no chemist no more which is very much needed. The dentist is good , but I don't know if they are taking on new patients.
1.7	West of Sandiacre	Healthcare Facilities	Debra Scully	Response-00288	Already no healthcare provisions for local residents with the local gp due to close. Already unable to get GP a appointments without adding further residents
1.7	West of Sandiacre	Healthcare Facilities	Debs Washer	Response-00487	Adam House is a joke and virtually impossible to get an appointment, adding more houses won't help.
1.7	West of Sandiacre	Healthcare Facilities	Denise bennett	Response-00030	There is one doctor at full capacity, no NHS dentist, no pharmacy
1.7	West of Sandiacre	Healthcare Facilities	Denise Creasey	Response-00786	Consideration needs to be made for health care facilities such as GP surgeries and dental practices. Currently there is only one of each which are both occurrently over subscribed.
1.7	West of Sandiacre	Healthcare Facilities	Denise Lingard	Response-01759	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Dennis Watts	Response-01726	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Derek Morton	Response-01607	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Derrick Hunt	Response-00437	The healthcare service is terrible you are very lucky if you can get an appointment at the doctor's if they'll register you. And good luck trying to even get registered with a NHS dentist So maybe add in some incentive for people to take out private medical insurance.
1.7	West of Sandiacre	Healthcare Facilities	Destiny Jade-Blake	Response-01636	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Diane Jones	Response-00852	We only have one Doctor's surgery in Sandiacre. There used to be two chemists, one on Station Road and one on Derby Road, now there are none . If more houses are to be built we need increased services.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	Diane Mcmorrow	Response-00433	Gp surgeries and Dentists are vastly overwhelmed Gp in Sandiacre really struggle to allocate you an appointment lines open at 8am by 8.05am all appointments have gone. Many of my friends have resorted to going to a surgery's in nearby Stapleford. I've not been able to get into a Dentist since lock down Health Care Facilities are not good at all
1.7	West of Sandiacre	Healthcare Facilities	Diane Meadwell	Response-00807	Sandiacre has only one doctor?s surgery and one dental surgery. There is no pharmacy. Our local health provision is over subscribed and there are no walk in centres or minor injury and illness centres in the near vicinity.
1.7	West of Sandiacre	Healthcare Facilities	Diane Turner	Response-01744	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Donna Steele	Response-00781	Our doctors surgeries and local dentist do not have the capacity to take more patients. I am still trying to find a dentist to take me as a patient.
1.7	West of Sandiacre	Healthcare Facilities	Dorothy Deeprise	Response-00817	I hope you will build more GP practices for these people. It already takes weeks to see a GP. Also, GP's are only open during the week meaning you cant be ill at weekends but yet you can by a TV! This is crazy
1.7	West of Sandiacre	Healthcare Facilities	D Pallett	Response-01627	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	D Simpson	Response-01712	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	E Cooper	Response-01923	Cannot access these already (family live in area). No dentist/doctor appointments already.
1.7	West of Sandiacre	Healthcare Facilities	Elaine Pickering	Response-00811	Have they provided extra health care services to cope the extra residents
1.7	West of Sandiacre	Healthcare Facilities	Eleanor Moseley	Response-00799	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Eleanor Newman	Response-00718	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.

1.7	West of Sandiacre	Healthcare Facilities	Emma	Response-00492	The doctor appointments are very hard to get into at the moment taking several days. This will add extra stress to the Doctors facilities making it even harder to get appointment.
1.7	West of Sandiacre	Healthcare Facilities	Emma Ryan	Response-00503	There is one GP in Sandiacre, one dentist and no pharmacy. At that a lot of residents are already accessing services like this from Stapleford. Again, there is a lack of services as it is for the current residents, let alone bringing in potentially 180 more families. When these people can't get seen at the GP they end up in the local emergency department which is then a further strain on the healthcare system.
1.7	West of Sandiacre	Healthcare Facilities	Emma Wall	Response-00319	I work in general practice and I know uniquely that all services in this area are overstretched and over registered already. The general practice is around this area will not cope with an influx of extra people. I very much doubt that the ICB have been consulted about this. Knowing the planning issues where I am practice manager at , there is no understanding by development or by planning officers that a single plot of land will be enough for one surgery. General practice cannot do branch surgery anymore. It cost too much money and if they are intimating that they will cover it with a plot just for a surgery. You are incorrect and completely out of date with how the health service can run in primary care.
1.7	West of Sandiacre	Healthcare Facilities	Emma Wilson	Response-01222	Can't get a GP appointment now without adding a further 3000 plus people to the area
1.7	West of Sandiacre	Healthcare Facilities	Esther Cook	Response-01861	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Fay Cresswell	Response-00701	We have no pharmacy in Sandiacre at all you have to travel to Stapleford the nearest to get your prescription. It?s difficult to get appointments now at the GP you have to phone at 8 am and queue. Frequently you are offered appointments at a different practice in Sawley which is great if you drive but not if you can?t as from this side of Sandiacre it?s 2 buses there and 2 back and when your unwell that is not appropriate at all
1.7	West of Sandiacre	Healthcare Facilities	Gail Berry	Response-01644	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Geoff Tindsley	Response-00755	I wish to object to the proposed development due to the lack of sufficient healthcare provision in the local area. 1. I understand that there is currently only one GP surgery and one dentist in the village. Although there are no patient quotas at GPs, I am told that is extremely difficult to get an appointment, and patients are required to call at exactly 8am, or personally attend the surgery, to stand any chance of being seen. If you call even 30 minutes later, all available appointments for the day are typically gone. This has become the norm, not the exception, and it reflects the level of pressure the practice is already under. Adding another 180 homes to the area will place further strain on a system that is already at breaking point. Without additional investment in local healthcare infrastructure, this development risks worsening access for both existing and new residents. 2. There is a similar situation relating to dentists, where it is almost impossible to register for an NHS dentist at any local dentist with the Erewash BC For these reasons, I strongly object to the application and urge the planning authority to ensure that adequate health infrastructure is in place before any further large-scale housing developments are approved.
1.7	West of Sandiacre	Healthcare Facilities	Georgia C	Response-01296	NHS is already on its knees and keeps getting worse under the Labour government. As a tax payer you cannot afford to be ill, as you will not receive the care you have contributed to all your working life.
1.7	West of Sandiacre	Healthcare Facilities	Georgia Marvin	Response-00261	The residents of Sandiacre still don?t all have a place within a GP or dentist. Dentists in the local area are not taking on any new patients. You have to wait 2+ months to even get a doctors appointment as it is. The current residents of Sandiacre are neglected so how is adding 180 new households going to solve this issue?

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	Gill West	Response-01725	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Glyn Holner	Response-01697	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Gordon Bruce	Response-01455	They are already over subscribed and Stapleford is not taking new patients from Sandiacre. This situation is already so difficult for locals.
1.7	West of Sandiacre	Healthcare Facilities	Gordon Daris	Response-01639	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Greg Cox	Response-01702	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Gregg Bartrum	Response-01591	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Greg Watts	Response-00733	The proposed number of houses would place unsustainable pressure on local infrastructure, including healthcare facilities
1.7	West of Sandiacre	Healthcare Facilities	Harriet Farnsworth	Response-01914	The residents of Sandiacre already can't get into the doctors/dentist, more residents will make this worse & detriment peoples health due to long wait times.
1.7	West of Sandiacre	Healthcare Facilities	Helen	Response-00883	Can't get a Drs appointment now so further housing will increase the issues. Provisions or plans to create another surgery need to be considered. If Drs aren't taking on new patients due to capacity then again there will be more vehicle movement within Sandiacre which is already congested
1.7	West of Sandiacre	Healthcare Facilities	Helen Gillain	Response-00964	Doctors are already struggling to cope with waits of approx 6 weeks for an appointment ... extra patients is not a viable proposition for this area
1.7	West of Sandiacre	Healthcare Facilities	Helen Richardson	Response-00432	My objection to this development is based on the apparent lack of consideration for the increased demand on healthcare services. The proposal for 108 new homes makes no mention of how the additional residents will be accommodated by local healthcare facilities. Without a clear plan and commitment to expanding the capacity of GP surgeries, dental practices, and other essential health services, this development is unsustainable and will negatively impact the health and well-being of the entire community.
1.7	West of Sandiacre	Healthcare Facilities	Helen whiteman	Response-00447	We have limited health resources. The local health centre is adamant house and already is no 10 out of 10 of the Erewash surgeries. Where are all the extra people going to go and be treated. Putting extra work on already overloaded doctors surgeries The less we say on the local dentists the better
1.7	West of Sandiacre	Healthcare Facilities	Ian	Response-00493	More strain on Adam house GP surgery which already struggles to see current patient numbers
1.7	West of Sandiacre	Healthcare Facilities	Ian Bailey	Response-00505	There are already no healthcare facilities in sandiacre suitable and stapleford as it is currently is difficult to get an appointment
1.7	West of Sandiacre	Healthcare Facilities	Ian herbert	Response-00939	the only medical service, adams house, is already full and overstretched.
1.7	West of Sandiacre	Healthcare Facilities	IAN TAYLOR	Response-00972	If the development goes ahead with 180 units, it is unlikely that the current healthcare providers in the area will be able to absorb the increased numbers of people expected to be living in a development of that size. There are currently no dentists places available.
1.7	West of Sandiacre	Healthcare Facilities	Ian telfer	Response-00991	Can't get in at the doctors already.
1.7	West of Sandiacre	Healthcare Facilities	Ian Ward	Response-01628	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Irina Anthony	Response-01867	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Isabelle Love	Response-00529	Again, an obvious issue but one that is more pressing. Adams house surgery has been running a dismal service for the past 20 years, a service that has gone from bad to worse with you not even being able to get through in the morning for an emergency appointment. Whilst pregnant (the midwife service thankfully was forced to make room for me) I witnessed no end of elderly patients who would walk into the facility begging to be seen. The one chemist we had in Sandiacre - at this surgery - has now closed. It is obvious that surrounding pharmacies are also struggling as they often have no stock, forcing patients to make multiple trips to pick up one prescription - and issue that will also only exasperate the traffic congestion this building site proposes.
1.7	West of Sandiacre	Healthcare Facilities	Isobel Ball	Response-01092	Adam house is sandiacres dominating GP choice. Now patients are already being redirected to sawley due to the strain and excess pressure on the NHS. Those in south sandiacre will almost 100% be sent to sawley permanently if these plans are followed through with, as they will be closest out of the catchment for adam house. This is absolutely unfair, we should not be building additional housing in a village already oversubscribed.
1.7	West of Sandiacre	Healthcare Facilities	J. E. Lord	Response-01601	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Jack Greatorex	Response-01731	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Jacob Whitt	Response-01748	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Jacqueline Marshall	Response-01436	We don't have enough Healthcare facilities in Sandiacre at present. A lack of GP surgeries, NHS Dentists. No Pharmacy Are Doctors advised in advance when new developments are proposed? What facilities have been included in the proposed plan?
1.7	West of Sandiacre	Healthcare Facilities	Jade Smith	Response-01783	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	James Meadwell	Response-01653	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	James Roberts	Response-01708	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	James Seward	Response-01683	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	James White	Response-01883	More pressure on local public services. Will local residents see better services or will the council just pocket the extra council tax???
1.7	West of Sandiacre	Healthcare Facilities	Jane Dennett	Response-00965	Where the Gps going to be Adam House will not cope. As a complicated patient I need to know I can use my GPs. Putting people at risk no resources to support building new homes. No Dentists disaster
1.7	West of Sandiacre	Healthcare Facilities	Jane Elizabeth Tindsley	Response-00669	I wish to object to the proposed development due to the lack of sufficient healthcare provision in the local area. I currently use Adam House Medical Centre, and I am very aware of the challenges already facing our local GP services. I have spoken directly to staff at Adams House, and they tell me that there are there are no patient quotas at GPs. However, it is extremely difficult to get an appointment, and patients are often required to call at exactly 8am, or personally attend the surgery, to stand any chance of being seen. If you call even 5 minutes later, all available appointments for the day are typically gone. This has become the norm, not the exception, and it reflects the level of pressure the practice is already under. I feel that any addition patients registering from this development would only exacerbate the current situation. Without additional investment in local healthcare infrastructure, this development risks worsening access for both existing and new residents. There is a similar situation relating to dentists, where it is almost impossible to register for an NHS dentist at any local dentist within the Erewash BC. There is currently only one dentist in Sandiacre, on Derby Road. Having contacted them, I am advised that there are three dentists about to leave, and only access to 2-3 private dentists. If successful in getting registered, you can go private and either pay-as-you-go or personalise a dental plan appropriate to your individual needs. This concern aligns with Paragraph 95 of the National Planning Policy Framework (NPPF), which states that planning policies and decisions should ensure that developments are supported by the necessary infrastructure, including health facilities. It is also supported by Paragraph 8, which highlights the importance of promoting healthy and safe communities as part of sustainable development. Until there is a clear and funded plan to expand healthcare capacity locally whether through additional GP provision, clinic space, or staffing this development is premature and would place an unacceptable burden on already overstretched services. For these reasons, I strongly object to the application and urge the planning authority to ensure that adequate health infrastructure is in place before any further large-scale housing developments are approved.
1.7	West of Sandiacre	Healthcare Facilities	Janet Edwards	Response-01906	Services are already overstretched & the proposed building would put even more pressure on them.
1.7	West of Sandiacre	Healthcare Facilities	Janet Whildes	Response-01869	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Jane Warton	Response-00662	A strain on GP's, dentist's
1.7	West of Sandiacre	Healthcare Facilities	Janice Taylor	Response-01743	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Janice West	Response-00989	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Janine Holmes	Response-01595	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Jason Deeprise	Response-00818	Where will the extra people go? There are too many people.
1.7	West of Sandiacre	Healthcare Facilities	Jason Harwood	Response-01667	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Jason Webb	Response-01637	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Jayne Rowley	Response-01279	There is just one doctors and one dental practice in Sandiacre. This development would potentially mean that a further 300-400 people would need to access healthcare putting the health and welfare of existing service users at risk due to appointments being at a premium. Also with the proposed developments in neighbouring towns their services too will see a significant increase in demand making it virtually impossible to register
1.7	West of Sandiacre	Healthcare Facilities	J Cates	Response-01750	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Jeanette O Connor	Response-01640	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Jeffrey Whittaker	Response-00594	Over stretched as it is you can not see a doctor in person anymore and gave to wait days for a call back
1.7	West of Sandiacre	Healthcare Facilities	Jennifer Bailey	Response-01857	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Jennifer Saville	Response-00516	Only one surgery in Sandiacre which is already struggling to cope, not chemist at all

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	Jennifer Tindsley	Response-00751	I wish to object to the proposed development due to the lack of sufficient healthcare provision in the local area. 1. I understand that there is currently only one GP surgery and one dentist in the village. Although there are no patient quotas at GPs, I am told that is extremely difficult to get an appointment, and patients are required to call at exactly 8am, or personally attend the surgery, to stand any chance of being seen. If you call even 30 minutes later, all available appointments for the day are typically gone. This has become the norm, not the exception, and it reflects the level of pressure the practice is already under. Adding another 180 homes to the area will place further strain on a system that is already at breaking point. Without additional investment in local healthcare infrastructure, this development risks worsening access for both existing and new residents. 2. There is a similar situation relating to dentists, where it is almost impossible to register for an NHS dentist at any local dentist with the Erewash BC For these reasons, I strongly object to the application and urge the planning authority to ensure that adequate health infrastructure is in place before any further large-scale housing developments are approved.
1.7	West of Sandiacre	Healthcare Facilities	Jenny Stephens	Response-01723	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Joanna hardy	Response-01304	Despite being a resident of sandiacre my family has been forced to keep our medical and dental places in stapleford due to a lack of availability of healthcare in the local area. More homes means more people so would overwhelm our already over stretched healthcare.
1.7	West of Sandiacre	Healthcare Facilities	Joanne Guyatt	Response-01784	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Joanne Johnson	Response-00765	Our healthcare provisions are already stretched , please don't put more pressure on them. We struggle to get seen some days as it is at the doctors when needed. There are no NHS dentist places anymore, be damned if we as a household are paying privately to see one! This pressure on these services will only increase, it isn't fair on the residents already living here.
1.7	West of Sandiacre	Healthcare Facilities	Joanne Lambert	Response-00494	It is already a challenge to get a gp appointment, there are queues on the phones when you need to be seen and even if you get through it is unlikely that you will be seen. 180 extra households could mean around 720 extra patients for the GP practice to care for. Extra strain will also be put on community nursing and dental practices.
1.7	West of Sandiacre	Healthcare Facilities	Jodie Owen	Response-01688	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Jodie Shrive	Response-00601	There is only ONE GP practice in Sandiacre, and they are not accepting new patients. The same as dentist - not accepting new patients. So where are you expecting the new people who will be moving to the area to go? Do you expect them to live without essential healthcare? Do you expect it's current residents to do the same? Local residents are already fighting for GP appointments, and that's with the high number of residents the town already has. Forcing this upon us will mean it will be impossible to get access to vital healthcare.
1.7	West of Sandiacre	Healthcare Facilities	Jo Gerhardt	Response-01286	There is only one doctors surgery, Adams House, for the population of Sandiacre. Its already very difficult to ring and get an appointment. Adding a possible 400 patients to there list would not be acceptable in an already busy surgery. Plus one Dentist leading to more problems as mentioned above.
1.7	West of Sandiacre	Healthcare Facilities	John Gardner	Response-01694	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	John G Brown	Response-01752	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	John Hibbitt	Response-01855	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	John Ledger	Response-01605	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	John Payne	Response-01785	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	John whiteman	Response-00450	The doctors are rammed already. Try getting an appointment it's bad enough now without hundreds of extra patients Don't even mention the dentists they are non existent
1.7	West of Sandiacre	Healthcare Facilities	Jon Burn	Response-01722	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Josh Williams	Response-01632	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	J Pearson	Response-01772	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	J Telfer	Response-01876	Can't get into doctors already.
1.7	West of Sandiacre	Healthcare Facilities	Judith A Pulfer	Response-01863	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Judith Blackburn	Response-01928	Non existent - do it yourself! No chemist in the area.
1.7	West of Sandiacre	Healthcare Facilities	Julie Hill	Response-01643	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Julie Taylor	Response-01503	Getting an appointment at the doctors is already a challenge without adding more people to the list.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	Karen Alldread	Response-01868	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Karen Blain	Response-01732	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Karen Evans	Response-00523	More pressure on already stretched services.
1.7	West of Sandiacre	Healthcare Facilities	Karen Harwood	Response-01668	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Karen Pitts	Response-00643	At the moment, it is almost impossible to get a doctors appointment, an increase in the number of people requiring health care will inevitably add to this problem. We have already lost the local pharmacy in Sandiacre which was adjacent to Adam House surgery.
1.7	West of Sandiacre	Healthcare Facilities	Kathryn Martin	Response-00527	It is already impossible to get a doctors and dentist appointment
1.7	West of Sandiacre	Healthcare Facilities	Katie Robinson	Response-00943	There is not enough doctors and appointments for this level of housing - 180 housing will have on average 2 people which is approx. 360 extra appts needed and that's not even including if there are children or elderly in the houses also. In addition there is a real issue with dental appointments across the country and has been in this area for some time. I have been without a dentist since 2023 - my dental practise went private and since then I have been looking for a new practice. I have now been put on a waiting list for one in Chilwell however one appointment was cancelled and now I don't expect to be seen until August at the earliest. I have to travel to see a dentist after a 2 year wait to find one that is excepting NHS patients and I currently still go to the practise in Long Eaton for my GP as well. There is just not enough in terms of health care to sustain this amount of houses to be built.
1.7	West of Sandiacre	Healthcare Facilities	Kelly Randall	Response-00591	The sole GP surgery in Sandiacre may lack the capacity to accommodate an influx of 400 new residents. Have healthcare providers been consulted? Cross-boundary impacts on Stapleford facilities must also be considered.
1.7	West of Sandiacre	Healthcare Facilities	Kelsey Green	Response-01666	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Kenneth Cooper	Response-01720	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Kern-Paul Lewis	Response-01715	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Kerry Meadwell	Response-01655	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Kerry Smith	Response-01271	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Kerry stokes	Response-00769	I have to go to a doctors in a neighbouring town because I can't get an appointment at the local doctors. Local doctors/ dentists are full to capacity & not taking on NHS patients. Adding more residents will only add so much pressure to our services. I already have to go to facilities out of the area to accommodate this.
1.7	West of Sandiacre	Healthcare Facilities	KH Taylor	Response-01663	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Kimberley Selby	Response-00478	You already can't get into a doctors or dentist in the local area never mind get an appointment. Is there going to be extra facilities built to support this?
1.7	West of Sandiacre	Healthcare Facilities	Kim Helm	Response-00632	An average family is 2.2 x 180 so over 400+ needing health care facilities It is hard to get GP appointments without these extra numbers and it is near impossible to get an NHS dentist
1.7	West of Sandiacre	Healthcare Facilities	Kirk Moss	Response-00439	Public services such as GP surgeries and dental clinics are already at capacity. Further residential development would increase pressure on these essential services, worsening wait times and reducing quality of care.
1.7	West of Sandiacre	Healthcare Facilities	Kirsty	Response-00970	Already too difficult to get a doctors appointment
1.7	West of Sandiacre	Healthcare Facilities	Kirsty Handa	Response-00445	Their is only 1 GP Surgery and 1 dentist in Sandiacre. The current GP can already not cope with the current residents in Sandiacre and many of the residents are already forced to go elsewhere such as Long Eaton and Stapleford. Having your GP in another area already causes different issues as the CCG is different These different areas are also having issues coping with the amounts of residents they have. There are more and more developments being built but no additional GP surgeries. It is already extremely difficult to get a GP appointment and this has forced people to go to A&E for problems they shouldn't have had to go for. This proposed development is not going to be sustainable in terms of GP surgeries, there simply is not enough of them nor space for their needs to be looked after as they should be. The same goes for dentists, there are no NHS patient appointments anymore and no space at dental surgeries often waiting months for appointments. This development is not sustainable
1.7	West of Sandiacre	Healthcare Facilities	Kirsty Meredith	Response-01462	I understand that the local dentists and doctors are already at nearly full or full capacity... where will all the people in these new houses be expected to register?
1.7	West of Sandiacre	Healthcare Facilities	Kristie Rugers	Response-01864	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Kyle Jones	Response-01764	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	L A Keen	Response-01659	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	Laura Hallam	Response-01711	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
			Laura Thompson	Response-00702	Lack of local gp, nhs dentists for new residents to access. Already very difficult for locals to get appointments.
1.7	West of Sandiacre	Healthcare Facilities	Laurence Luck	Response-01727	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
			Lauren Freeman	Response-01562	Sandiacre has one drs surgery and it is already incredibly difficult to get a drs appointment.
1.7	West of Sandiacre	Healthcare Facilities	Lauren Rose	Response-01446	1 dentist and 1 Doctors surgery currently serve the area of the proposed development, both of which struggle to cope with the current number of patients. A further 180 homes and people that come with those homes will simply find getting an appointment nigh-on impossible as current residents struggle!
1.7	West of Sandiacre	Healthcare Facilities	Leah morral	Response-00712	Getting an appointment at sandiacre doctors is hard enough now without adding hundreds of more patients
1.7	West of Sandiacre	Healthcare Facilities	Lee Wilcock	Response-01670	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Lesley Bruce	Response-01397	The chemist next to Sandiacre Health Centre has recently closed reducing amenity. Stapleford is not accepting Sandiacre overspill patients. Local dentists are full. To consider the stresses extra new housing would put on local services is completely unfair to all residents.
1.7	West of Sandiacre	Healthcare Facilities	Lesley Carter	Response-00536	The healthcare in this area is already failing. You have to queue outside by 8am if you want an appointment as the phones are so busy they cant answer them. Appointments are really hard to get. Some Sandiacre residents go to Stapleford surgery but I have been told that it is very bad there too. I don't believe that increasding the number of patients by 180 households will be a tenable situation. There are no local NHS dental places.
			Lesley Morral	Response-01920	Lack of infrastructure already unable to get a doctors appointment.
1.7	West of Sandiacre	Healthcare Facilities	Lia Thims	Response-01766	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
			lilly stokes	Response-00767	I struggle very much to get in an appointment in my local doctors and adding 180 more houses will certainly not help this point.
1.7	West of Sandiacre	Healthcare Facilities	Linda Castledine-Davies	Response-00850	There is only 1 doctor practice and 1 dental practice (private ). To obtain a doctors appointment patients have to queue from as early as 7.45am outside in all weathers, even the most atrocious, and wait for the surgery to open. At times there can be 12-20 people waiting outside. It is no point ringing the surgery at 8.00am as it stipulates because phones are not answered until the queue have been dealt with by which time no appointments are left. This ridiculous rigmarole has to be continued even if the doctor tells you to make another appointment. Some of the doctors at the practice only work limited hours/days and the main doctor, Dr Ali, at the Sandiacre and Stapleford practices rarely sees anyone these day. Personally despite being very ill I have repeatedly had to stand in the pouring rain, hurricane winds and snow to get seen to, There was a pharmacy attached to the surgery but this closed and the parish council refused to allow another to open. Total lack of health facilities without venturing into Stapleford. A bus now goes to Ilkeston Hospital from the bottom of Stanton Road but again because of the steepness of the hill most cannot negotiate the roads. Dentist is across the road both of which are on a steep hill with little parking and no bus service to from this site or area. Even though private and expensive it is difficult to obtain an appointment. There is no longer a pharmacy in Sandiacre medication and advice has to be sought from other towns. If you cannot get a doctors appointment there is nowhere to obtain help and advice.
1.7	West of Sandiacre	Healthcare Facilities	Linda Oscroft	Response-01927	We see no spare capacity in the health care facilities, nor schools to accommodate increased demand generated from the addition of high density housing residents.
1.7	West of Sandiacre	Healthcare Facilities	Lindsey Rawlinson	Response-01624	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Lisa Heppell	Response-00878	There is a doctors in Sandiacre that never has enough appointments for you if you need to see a doctor, and also no chemist
1.7	West of Sandiacre	Healthcare Facilities	Lisa J Pearson	Response-01762	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Liz Woodhouse	Response-01584	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	L Mee	Response-01777	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Logan Fox	Response-00746	MY parents have always struggled to get appointments at the doctor, even calling on the day, on most occasions we cannot get an appointment. And for a dentist, we have to travel outside the area. How will more people be helped when the current doctors are struggling and us as well?
1.7	West of Sandiacre	Healthcare Facilities	Lorraine Daly	Response-00495	There are no NHS dentists and access to services is patchy. There is no pharmacy either.
1.7	West of Sandiacre	Healthcare Facilities	Lorraine Hands	Response-00534	I don't? feel there are enough facilities in Sandiacre to take on such a volume of patients, again taking time away from residents in the area!
1.7	West of Sandiacre	Healthcare Facilities	Louise dix	Response-00975	The local doctor can't cope with the number they have now let alone another 180 house . Getting a appointment that none urgent is already a month waiting .
1.7	West of Sandiacre	Healthcare Facilities	Louise Felfoldt	Response-01733	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Louise Harper	Response-01571	The gp in sandiacre is very small with losing the pharmacy next to it, I use linden medical with not much hope of getting an appointment as I used to live in stapleford before moving to sandiacre 25 years ago

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	Louise Harrison	Response-01719	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Louise Jacks	Response-01767	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Louise Libberton	Response-01693	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Lucy Johnson	Response-01369	Our doctors on a whole aren't that bad! (Adam House Medical Centre) I've never personally had an issue with them, but I've read a lot of people's negative reviews about them! And adding more stress to this service isn't right! Don't let the people of Sandiacre struggle! Just for some houses!
1.7	West of Sandiacre	Healthcare Facilities	lucy victoria garner	Response-00949	what health care facilities. Sandiacre doesn't have an adequate surgery now. Last CQC report for Adam House advised needs improvement <a href="https://www.cqc.org.uk/location/1-553055514?referrer=widget3">https://www.cqc.org.uk/location/1-553055514?referrer=widget3</a> Pharmacy recently closed down. other local providers in stapleford also poor. QMC under pressure already and absolutely dire provision of health care. No one is able to get a GP appt now. Adding another 300-500 people to those unavailable resources.
1.7	West of Sandiacre	Healthcare Facilities	Luke Chein	Response-01779	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Lynda Morton	Response-01606	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Lynsey Blackburn	Response-01227	Extra developments cause extra strain on public services. No more GP places are made available for the additional housing being created.
1.7	West of Sandiacre	Healthcare Facilities	Macie Brothwell	Response-01633	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Malcolm Dillon	Response-00722	There is only one doctors surgery in the Sandiacre township. There used to be one dispensary in the township but this closed last year. The addition of 180 families to the area, without additional service facilities will inevitably put a strain on existing health care systems.
1.7	West of Sandiacre	Healthcare Facilities	Malcolm Fox	Response-00215	We all know the NHS is not just under pressure but failing. In the last year I have only needed the odd support from our registered GP - good luck! Even on the odd occasion, I simply gave up trying to secure an appointment and self medicated both myself and children. NHS dentist is non-existent as well. When we moved into the area, we were unable to register with a doctor that was within 3 miles, as we fell outside the catchment area. Again, limiting the options of a doctor and having to register at ones supporting a local area where appointments are at capacity as are many surgeries. Again, get infrastructure in first!
1.7	West of Sandiacre	Healthcare Facilities	Malcolm Riggs	Response-01680	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Malc Orbiston	Response-01673	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mandy Rait	Response-01587	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available. It is already impossible to book a doctors/dentist appointment. To build 180 homes is utterly impracticable.
1.7	West of Sandiacre	Healthcare Facilities	Mark Gough	Response-00888	Only one GP surgery in Sandiacre that you can't get appointments for, no chemist, no clinics for local mothers to take their babies to be weighed, and for help. Nothing for the elderly or clinics for diabetes, child healthcare, nothing for people suffering with mental health. Only one dental practice who can't take in any more NHS or even private. Absolutely ridiculous to think Sandiacre can cope with more people needing these services!!!
1.7	West of Sandiacre	Healthcare Facilities	Mark Leek	Response-01740	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	mark skelton	Response-01341	No space already for appointments and no dentist's appointments for NHS patients.
1.7	West of Sandiacre	Healthcare Facilities	Mark Warton	Response-00693	GP surgery's having to cope with even more patients. They currently cannot cope with the existing population of Sandiacre, this will put an even greater strain on a service which is already broken in Sandiacre. Dentists, NHS places are already at a premium
1.7	West of Sandiacre	Healthcare Facilities	Marta McManus	Response-00646	There's one GP surgery and no pharmacy in Sandiacre
1.7	West of Sandiacre	Healthcare Facilities	Martin Driver	Response-01387	No doctors or dentists available. Even if they say they can take them on, they won't be able to get an appointment. It's a mess!
1.7	West of Sandiacre	Healthcare Facilities	Martin Ford	Response-01908	We currently struggle with Dr & dentist appointments.
1.7	West of Sandiacre	Healthcare Facilities	Martin Hardy	Response-01413	There is limited healthcare in Sandiacre and the surrounding area. When we moved from Stapleford to Sandiacre we had to keep using the same doctors and dentists as there was no availability in Sandiacre. There are also no dentists taking NHS patients in the region. More houses means more people needing these services with no way to increase such healthcare provision.
1.7	West of Sandiacre	Healthcare Facilities	Martyn Locker	Response-00903	This one isn't exclusive to Sandiacre, but it's already a fight to get a doctor's appointment. 180 new houses puts hundreds more people onto the single doctor's surgery's register. How much capacity does it have to expand - both physically in terms of space, and budget in terms of hiring new doctors - to meet the requirements of new residents? Specific to Sandiacre, the local pharmacy has been closed down, hundreds of elderly residents have to catch the bus to Stapleford just to collect a prescription. To me, that doesn't signify a town that's thriving and ready to welcome hundreds of new residents.
1.7	West of Sandiacre	Healthcare Facilities	Matt Bancroft	Response-00916	Existing healthcare facilities are already oversubscribed with many residents already having to travel to neighbouring districts for health care.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
	West of Sandiacre	Healthcare Facilities	Matt Hallam	Response-00476	Try ringing up sandiacre and stapleford doctors at 8am and try and get a appointment as it is. Good luck with atleast 180 more people
1.7	West of Sandiacre	Healthcare Facilities	Matthew Buckland	Response-00615	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8a.m. Often no appointments are available. Local hospitals are currently at full capacity and are pleading with the general public not to attend, so adding to this is ill advised, and I wouldn't want to ring an ambulance from the proposed site as the chances of getting an ambulance through the estate is slim to none - especially at peak times.
1.7	West of Sandiacre	Healthcare Facilities	Maurice Mason	Response-01617	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	M Dougle	Response-01749	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	M Eastwood	Response-01757	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Melanie	Response-00586	There is currently only one GP surgery in Sandiacre, which is already operating near capacity. The addition of 180 households will place further strain on local healthcare services. No evidence has been presented to show that the Clinical Commissioning Group (CCG) has been consulted or that plans exist to expand capacity in line with the projected population increase. Our only pharmacy in Sandiacre was closed down too.
1.7	West of Sandiacre	Healthcare Facilities	Melanie Caumont	Response-01272	Healthcare services in the area are severely stretched. Securing GP appointments is already challenging, and local dental practices are not taking on new patients. The proposed development makes no mention of investment in health infrastructure. This would significantly burden the system and reduce access for current residents.
1.7	West of Sandiacre	Healthcare Facilities	Melanie Howarth	Response-01621	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Michael Anderson	Response-00461	We already have a severe problem in trying to get an appointment with our doctors. This additional number of people on this proposed site will cause even more problems.
1.7	West of Sandiacre	Healthcare Facilities	Michael Darnell	Response-00648	The golf course is a healthcare facility for a lot of local people and this will be affected. The course has been there since 1905 and provides a lot of recreation for locals. The increased footfall across the course and the incursion on to the area will be a health and safety issue, and put off people joining and using the facility.
1.7	West of Sandiacre	Healthcare Facilities	Michael Oscroft	Response-01926	We see no spare capacity in the health care facilities, nor schools to accommodate increased demand generated from the addition of high density housing residents.
1.7	West of Sandiacre	Healthcare Facilities	Michell Birkin	Response-01657	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Michelle Alsop	Response-01645	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Michelle Cox	Response-01724	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Michelle Ledger	Response-00815	we have 1 GP surgery, Adam House - it is almost impossible some days to get a same day appointment , i have been on the phone at 8am on hold till say 820am and they have no appointments left! how can it support these additional residents the surgery clearly cannot cope as it is
1.7	West of Sandiacre	Healthcare Facilities	Michelle Wenham	Response-01650	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mick Hughes	Response-01701	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mike Darnell	Response-00698	No pharmacy not enough drs appointments no nhs dentist woh places
1.7	West of Sandiacre	Healthcare Facilities	Miss Garratt	Response-00905	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Miss R Cordon	Response-01648	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mollie Snow	Response-01729	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mr & Mrs Turton	Response-01660	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mr and Mrs R Skelton	Response-01274	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mr and Mrs Wright	Response-01275	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mr Colin Key	Response-01841	Existing limited amenities that are already stretched to capacity and fully subscribed ie Doctor, Dentist

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	Mr David Ainsworth	Response-00621	Access to a local GP is already difficult. Derby Road are not accepting new patients. Stapleford is full. Waiting times for community services are already running at several months. I have a son waiting for carpal tunnel treatment for six months and can't access due to high demand. My parents have been kicked off an NHS dental service because they are only taking private patients. Ambulance response times are some of the worst in the UK in the Midlands. You are going to make access to healthcare worse; waiting times longer; ambulance delays leading to worsening health outcomes and poorer experience of the NHS.
1.7	West of Sandiacre	Healthcare Facilities	Mr John Hickingbotham	Response-01431	Attempting to access general healthcare facilities in Sandiacre, or in the adjacent town of Stapleford, is already very difficult - unless in an emergency situation. Adding several hundred more potential residents to the demand will simply make this situation worse, to the detriment of everyone.
1.7	West of Sandiacre	Healthcare Facilities	Mr K Gubb	Response-01838	Existing limited amenities that are already stretched to capacity and fully subscribed ie Doctor, Dentist
1.7	West of Sandiacre	Healthcare Facilities	Mr K Turton	Response-01706	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mr Luke	Response-01703	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mr P J Tanner	Response-01728	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mr R M Draper	Response-01856	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mr R Widdowson	Response-01734	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mr S. Haywood	Response-01585	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mrs Christina Pope	Response-00732	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mrs Donna C. Ball	Response-01594	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mrs Froggatt	Response-00449	Only one doctors surgery which at the moment is not taking new patients. No pharmacy in the area. Nearest pharmacy over a mile away. Only one dentist that is not taking new NHS patients. Where will the new residents get health care from
1.7	West of Sandiacre	Healthcare Facilities	Mrs Griffin	Response-01698	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mrs J. Cooper	Response-01596	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mrs Joanne Thompson	Response-01690	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mrs J Reeder	Response-01909	We currently struggle with appointments at our local Dr's so additional people will make things worse.
1.7	West of Sandiacre	Healthcare Facilities	Mrs Lee Farabella	Response-01899	180+ houses will put pressure on local services, & healthcare.
1.7	West of Sandiacre	Healthcare Facilities	Mrs Linda Cox	Response-01753	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mrs Luke	Response-01704	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mrs M. Rose	Response-01583	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mrs Marie Draper	Response-01755	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available. I now have to either walk or catch the bus to get what I need from the chemist after it closed - this will put further pressure on the already little services we have.
1.7	West of Sandiacre	Healthcare Facilities	Mrs M Burke	Response-01887	More houses will add more pressure on health care.
1.7	West of Sandiacre	Healthcare Facilities	Mrs N Taylor	Response-01896	More pressure on local services, schools & only one small GP surgery, no pharmacy.
1.7	West of Sandiacre	Healthcare Facilities	Mrs Rachel Coats	Response-01623	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mrs R Cordon	Response-01647	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mrs Rigby	Response-00641	Just one Doctor practice, one dentist and no pharmacy left in Sandiacre. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am leading to no appointments available.
1.7	West of Sandiacre	Healthcare Facilities	Mrs Shani Wainwright	Response-00754	We have just one Dr's surgery in Sandiacre and one dentist...and no chemist at all!!! It is already extremely difficult to get an appointment at either, with there often being no appointments available even for emergencies.....an additional 180 + homes will further exasperbate this issue sadly, making Sandiacres residents health care slip even further into a negative direction.
1.7	West of Sandiacre	Healthcare Facilities	Mrs Sheila Hickingbotham	Response-01338	The addition of 180 houses will place unsustainable pressure on local doctors and dentists.
1.7	West of Sandiacre	Healthcare Facilities	Mrs Shirley Victoria Riggs	Response-01685	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	Mrs Susan Bantle	Response-01612	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Mrs Turton	Response-01707	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Natalie Bentley	Response-01646	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Nicole Cooper	Response-01597	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Nikki Vincent	Response-00688	We have only one doctor?s surgery in Sandiacre and currently no chemist. The increase in new patients will put more strain on our healthcare services, particularly the doctor?s and dentist.
1.7	West of Sandiacre	Healthcare Facilities	Normn McCrea	Response-01754	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Oliver Marriott	Response-00679	Healthcare Facilities Healthcare - We only have one doctor?s surgery in sandiacre and from personal experience it?s impossible to get an appointment there. You either have to queue up for an hour outside or you have to continually phone up at 8am in order to get an appointment. Having an extra 250 people (minimum) will put too much extra pressure on an already strained service. Similarly with the dentist - they are at capacity currently so where are these extra people going to go? How will they access vital services? We currently don?t have a pharmacy in sandiacre which would make it very difficult for those residents who don?t drive to access these facilities, the nearest being the next town of Stapleford.
1.7	West of Sandiacre	Healthcare Facilities	Paige Walker	Response-01669	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Pamela Bassett	Response-00608	More people will be register at Doctors vets and dentist dentist and I?m worried about not being able to get an appointment for myself as a pensioner
1.7	West of Sandiacre	Healthcare Facilities	Pam shepherd	Response-00453	The GP surgeries are impossible to get into already, local hospital always at capacity with the A&E function being a standard 4-6 hour wait adding this amount of homes in the area will make this <del>20</del> worse
1.7	West of Sandiacre	Healthcare Facilities	Pat Hardy	Response-01739	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Paula Darnell	Response-00665	Well where do I start <del>12</del> My daughter has been on thr waiting list for a nhs dentist in the area for 4 years already without no sign of a place. The doctors cannot cope with any more patients and you cannot get an appointment for ages Also we have no local chemist or pharmacist
1.7	West of Sandiacre	Healthcare Facilities	Paula Luck	Response-01710	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Paula Sims	Response-01687	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Paul Randall	Response-00131	How much headroom does the single GP surgery in Sandiacre have on its books? Can they accommodate an extra 400 people? Have they been consulted? If not, then these extra people are likely to head to Stapleford and an adjacent Council. Have they been consulted? Noting that Sandiacre does not have a chemist, the nearest being 40min walk ? have you assessed the impact on local roads since these 180 new homes will not have direct walking access to any shops, health centres, leisure centres etc other than the local ?Post Office / convenience store?, and whilst accessible by cycle, no one does since the site is at the top of a hill. Local doctors and dentists are either full, or unable to cope with the volume of existing patients. The nearest doctor is a 25 minute walk from this area and is a very small practice ? this would drive people to Stapleford and the surgeries there that are unable to cope with the number of patients. The chemist on Derby Road Sandiacre has recently closed, and the private dentist is regularly shut to new patients, and is certainly not taking NHS patients. It is unlikely that a 180 house development would include new school and medical provision, yet it would need it.
1.7	West of Sandiacre	Healthcare Facilities	Paul Vleeton	Response-01770	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
		Healthcare Facilities	paul wheeldon	Response-00582	There are currently NO Dr's medical facilities in Sandiacre the nearest is at the far end of Stapleford
1.7	West of Sandiacre	Healthcare Facilities	Paul Wilkes	Response-00599	We do not have the doctors or dentist to take in the extra people from these homes. We are suffering ourselves getting appointments.
1.7	West of Sandiacre	Healthcare Facilities	Peter Anthony	Response-01866	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Peter brown	Response-00671	Already struggle to get appointments in the healthcare sector.
1.7	West of Sandiacre	Healthcare Facilities	Peter Nicholls	Response-01622	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Pete West	Response-01700	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Phil Creasey	Response-01342	Consideration needs to be made for health care facilities such as GP sugeries and dental practices. Currently there is only one of each which are both ocurrently over subscribed.
1.7	West of Sandiacre	Healthcare Facilities	P Sandes	Response-01682	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	Rachel Crossley	Response-01661	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Rachel Skelton	Response-01241	Where will the extra provision for GP services come from?
1.7	West of Sandiacre	Healthcare Facilities	R Barratt	Response-01664	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Rcahel Sharp	Response-00652	Increased population will mean more people accessing healthcare locally. Already people complain about the length of time it takes to get a routine appointment. I am also concerned about NHS dental provision in the area as my dentist is retiring this week.
1.7	West of Sandiacre	Healthcare Facilities	Rebecca Longmuir	Response-00253	Absolutely NO thought has gone into this properly! Let?s throw some houses up and fix the houses problem! Without first thinking about the serious consequences for the local residents! There IS NO ROOM at doctors for locals!! Currently and people struggling to be seen in general by a GP. Now you want to add fuel to the fire by building a huge housing estate?! This will only ADD to the PROBLEM! Not help. I am shocked and disgusted this is being forced onto us local residents. What about the serious ramifications on the already struggling nhs services. This will have a terrible impact on the locals health and wellbeing.
1.7	West of Sandiacre	Healthcare Facilities	Rhiannon Lowater	Response-01592	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	R Hibbitt	Response-01862	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Richard Broughton	Response-01352	Potentially around a 1000 people could live on this proposed development, with possibly 300 children, can the local practices and clinics absorb these numbers
1.7	West of Sandiacre	Healthcare Facilities	Richard Deeprise	Response-00816	More people will stretch health services
1.7	West of Sandiacre	Healthcare Facilities	Richard Haines	Response-01674	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Richard Jenkins	Response-00264	It is difficult to get a local GP appointment; the local chemist on Derby Road has closed; there is a paucity of NHS dentists in the area. This development will severely strain a struggling system. The only GP practice in Sandiacre is Adam House. It is difficult enough to get a GP appointment BEFORE the addition of 180 new households in the area and this development is a major concern to us with regard to our health and NHS support. Out of the 10 GP practices in Erewash, Adam House is rated 10th and has a ratio of patient to full-time GP much more than twice that of the second most ?full? practice. BEFORE the addition of 180 new households in the area. A copy of the report showing this is available at: <a href="https://www.healthsay.co.uk/articles/674-best-and-worst-nhs-gps-in-erewash">https://www.healthsay.co.uk/articles/674-best-and-worst-nhs-gps-in-erewash</a> I haven?t been able to get a same-day GP appointment at Adam House since January 2024 ? every time I need GP support, I have to see the practice nurse, the alternative being to wait for days to see a doctor. The last time I saw a GP (12th February 2025), I had to travel to Sawley Medical Centre ? a 15-minute walk plus 25-minute bus ride each way as this was the only option available. Bad enough for a fit person but I have documented mobility issues so quite a difficult situation and a much longer walk! NHS dentists are like hens? teeth ? We both have to travel to Long Eaton to get NHS dental treatment. There are no NHS slots available at the only dentist in the area. There is no way I can afford private dental care. 180 additional households will exacerbate the problem. Where will that leave us? NHS services (1 GP in Sandiacre, rated 10th out of 10 in Erewash; 1 dentist in Sandiacre, not taking NHS patients). No chemist in Sandiacre. What studies has EBC carried out with regard to NHS services capacity in the area?
1.7	West of Sandiacre	Healthcare Facilities	Richard Marriott	Response-00675	Healthcare Facilities Healthcare - We only have one doctor?s surgery in sandiacre and from personal experience it?s impossible to get an appointment there. You either have to queue up for an hour outside or you have to continually phone up at 8am in order to get an appointment. Having an extra 250 people (minimum) will put too much extra pressure on an already strained service. Similarly with the dentist - they are at capacity currently so where are these extra people going to go? How will they access vital services? We currently don?t have a pharmacy in sandiacre which would make it very difficult for those residents who don?t drive to access these facilities, the nearest being the next town of Stapleford.
1.7	West of Sandiacre	Healthcare Facilities	Richard Naylor	Response-00066	Adam House is the nearest GP, with limited GP appointments. Also there is no pharmacy.
1.7	West of Sandiacre	Healthcare Facilities	Richard Shrimpton	Response-01301	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8a.m. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Rob Lowe	Response-01768	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Roger Day	Response-00023	The medical facilities in Sandiacre are already rated as needing improvement and adding yet more patients will only mean fewer appointments for existing residents. Adam House has a very large turnover of doctors and inadequate number of them, how are they going to cope with the potential increase?
1.7	West of Sandiacre	Healthcare Facilities	Roger Farnsworth	Response-01910	The residents of Sandiacre already can't get into the doctors/dentist, more residents will make this worse & detriment peoples health due to long wait time.
1.7	West of Sandiacre	Healthcare Facilities	Rosemarie Gough	Response-00997	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Roy Drew	Response-01614	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	Ruby Sharp	Response-00886	Increased population will mean more people accessing healthcare locally. I have to go to Saxon Cross Surgery, which is in Stapleford. In Sandiacre, there is only one small medical centre which is just off a main road with not much parking. Increased patients here will mean dangerous parking and traffic. Already people complain about the length of time it takes to get a routine appointment. I am also concerned about NHS dental provision in the area as my dentist is retiring this week. Increased NHS patients at mydentist in Sandiacre will make appointments difficult to get. This dental practise is also small and on a main road with limited parking so also would not be able to handle extra patients.
1.7	West of Sandiacre	Healthcare Facilities	Ryan Selby	Response-00479	Extra homes is extra stress on the local health care system, it?s already hard to get an appointment currently. Without the extra houses
1.7	West of Sandiacre	Healthcare Facilities	S. Brailsford	Response-00598	You already can't get an appointment in the Doctors and they're already not taking any more patients on. No Dentist able to take on any patients in this area already too
1.7	West of Sandiacre	Healthcare Facilities	S. Jones	Response-01615	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Sally Davies	Response-01294	Healthcare facilities are already stretched. People often use the facilities in Stapleford and Sawley. Loss of our chemist is very poor for an area as large as Sandiacre.
1.7	West of Sandiacre	Healthcare Facilities	Samantha Anne Whitney	Response-00757	Where will the families access healthcare? If every house has 4 people living in it, that's an extra 720 people that need doctors and dentists? Are there that many spare places? It takes 2 weeks to get a doctors appointment and most people don't even have a nhs dentist anymore. You can't build all these extra houses without the infrastructure such as schools, doctors, dentists etc in place. Everything is already over subscribed.
1.7	West of Sandiacre	Healthcare Facilities	Samantha Whildes	Response-01270	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Sam Buckland	Response-00600	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8a.m. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Sam Fleck	Response-00821	The current healthcare providers locally are already under huge pressure and can not cope with the amount of residents on the books. Current residents can not get a same day drs appt unless we queue from before 8am outside the surgery. There are no nhs dentists locally that are taking on new patients. Another 180 houses relying on an already struggling system will mean people will go untreated and the health of the community will suffer. I strongly object to the proposal due to reasons stated above.
1.7	West of Sandiacre	Healthcare Facilities	Sam Greatorex	Response-01695	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Sandra Cooke	Response-01613	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Sarah Favell	Response-00038	The doctors cannot cater for the amount of residents now! We have no chemist to hand either
1.7	West of Sandiacre	Healthcare Facilities	Sarah Harrison	Response-01658	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	S Bryne	Response-01677	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Sebastian Roberts	Response-01675	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Shanead Ligton	Response-01689	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Shannon moss	Response-00454	Again the only dentist within the area is 'my dentist' again which has 0 NHS patients at the moment, our health care settings are over populated as it is
1.7	West of Sandiacre	Healthcare Facilities	Shannon Robinson	Response-01635	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Sharon Grant	Response-00219	I have to pay private for my dentist as you struggle to get appointments.
1.7	West of Sandiacre	Healthcare Facilities	sharon thornhill	Response-00448	our local GP and dentist is already struggling to provide a good service to residents of sandiacre without adding to the numbers !
1.7	West of Sandiacre	Healthcare Facilities	Sharon weston	Response-00440	There isn't a health care centre specifically for Sandiacre we share Stapleford's Saxon cross surgery of which is already at breaking point, no nhs places for dentists so only private with limited availability already, too add an extra 400 people to an already stretched service, please...
1.7	West of Sandiacre	Healthcare Facilities	Shaun Green	Response-01773	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Sheila	Response-00587	There is currently only one GP surgery in Sandiacre, which is already operating near capacity. The addition of 180 households will place further strain on local healthcare services. No evidence has been presented to show that the Clinical Commissioning Group (CCG) has been consulted or that plans exist to expand capacity in line with the projected population increase. Our only pharmacy was also removed and the closest pharmacy now is situated in Stapleford, not ideal when ill or infirm. No provision has been mentioned regarding the proposed new housing.
1.7	West of Sandiacre	Healthcare Facilities	Sheila Payne	Response-01782	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	Sian Knox	Response-01679	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	S Leek	Response-01737	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Sonny Bestwick	Response-00901	ALL PUBLIC SERVICES IN THE AREA ARE ALREADY MASSIVELY OVER STRETCHED!!! No matter who you speak to in the community nobody can get a doctor's appointment it has got to the point that it is constantly commented on online were already at the point of being in a 10 caller hold list at 08.00 to finally have the phone answered at 08.45 to be told sorry no appointments, how is a society supposed to have sustainable public services when already overloaded services such as gp's are being stretched to breaking
1.7	West of Sandiacre	Healthcare Facilities	Sonya Birkin	Response-01656	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Sophie	Response-00472	I think it goes without saying that the nhs is on its knees with waiting times etc. the gp is often difficult to get in with also, this would effect peoples helath more and more
1.7	West of Sandiacre	Healthcare Facilities	Sophie Bennett	Response-01631	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Sophie Farnsworth	Response-01913	The residents of Sandiacre already can?t get into the doctors/dentist, more residents will make this worse & detriment peoples health due to long wait times.
1.7	West of Sandiacre	Healthcare Facilities	Stephen Barlow	Response-01808	Also to be considered is the fact that when we moved we had to change GP and this was not easy. There was no availability in Sandiacre and we are now at a GP in Stapleford.
1.7	West of Sandiacre	Healthcare Facilities	Stephen Davies	Response-00214	Extremely difficult to see doctor. No NHS dentist in area. Sandiacre currently has circa 8,000 residents served by 1 medical centre, 1 dentist and no pharmacies. Adding 180 homes would place further strain on a system already at breaking point. Paragraph 95 states that planning policies and decisions should ensure that developments are supported by the necessary infrastructure including health facilities. It is also supported by paragraph 8 which highlights the importance of promoting healthy and safe communities as part of sustainable development
1.7	West of Sandiacre	Healthcare Facilities	Stephen Sacker	Response-01598	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Steve Bilbie	Response-00285	Health care in sandiacre is already at breaking point so couldn?t cope with the substantial increase of patients.
1.7	West of Sandiacre	Healthcare Facilities	Steve Whittaker	Response-01781	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Stuart Pensom	Response-00049	Doctor is bad enough to get a appointment. No pharmacy. And no NHS dentist anywhere
1.7	West of Sandiacre	Healthcare Facilities	Sue Harrison	Response-01629	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Susan Hales	Response-00212	There are already many difficulties in securing doctor appointments. Dentists providing NHS service are almost non existent. There are no pharmacies in this area of sandiacre.
1.7	West of Sandiacre	Healthcare Facilities	Susan Heinke	Response-00468	There are no doctors or dental surgeries taking patients on and those that are already registered struggle to get appointments
1.7	West of Sandiacre	Healthcare Facilities	Susanne Beaven	Response-01618	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Sylvia Plampin	Response-00624	You can't get appointments readily as it is, more families will just add to this chaos. Dentists are the same, noone taking on NHS patients locally.
1.7	West of Sandiacre	Healthcare Facilities	Tamara Partridge	Response-01780	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Tarnya Hinman	Response-01786	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Thomas Ilett	Response-01088	There are currently no dentists within Sandiacre accepting NHS registered patients. The Sandiacre Neighbourhood Plan highlights new housing requirement as being prevalent for the elderly and young working families (Chapter 17, paragraphs 144, 145 and 148). These demographics are likely to require NHS dentistry, opposed to private. Therefore, the proposed housing allocation is inappropriate considering dentist services in the village. Doctor surgeries are also strained; Adam House Surgery on Derby Road rarely have appointments on the same day and regularly outsource to Long Eaton and Sawley Health Centres for same day appointments, as well as having the attached pharmacy closed recently. This too, is inappropriate, particularly for the elderly, as many do not have direct access to travel options.
1.7	West of Sandiacre	Healthcare Facilities	Tim Derbyshire	Response-01681	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Tim Gough	Response-00996	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Toby Moran	Response-01769	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Tom Ball	Response-01672	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	Tony Weston	Response-00990	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Tracey Howe	Response-01860	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Tracey Hughes	Response-01699	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Tracy Jones	Response-00436	There is no capacity at either the stapleford or sandiacre GP practices
1.7	West of Sandiacre	Healthcare Facilities	Trevor Rowston	Response-01678	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Try church	Response-00033	Sandiacre has ONE doctors surgery, they cannot cope with the number of patients they currently have. Trying to get an appointment is impossible, the best you get is a telephone consultation. More sandiacre residents will stretch the service even more.
1.7	West of Sandiacre	Healthcare Facilities	Tyler Hobbs	Response-00879	Sandiacre currently has only one GP surgery?Adam House Medical Centre?which serves a growing population and may struggle to absorb the additional demand that hundreds of new residents would bring. Appointments are already difficult to secure in a timely manner, and an increase in patients could lead to longer waiting times, reduced access to care, and added pressure on medical staff. Furthermore, the recent closure of the local pharmacy has forced residents to travel to Stapleford for prescriptions and over-the-counter medication, creating accessibility issues, particularly for the elderly, disabled, and those without transport. Without significant investment in expanding local health services, this development could seriously undermine the health and well-being of both existing and future residents.
1.7	West of Sandiacre	Healthcare Facilities	Vanessa Asbach	Response-00700	We only have one gp in Sandiacre. You are lucky to see anyone there in 3 weeks. More people will negatively impact our surgery even further. We don't even have a pharmacy here anymore same with the dentist. Impossible to get an NHS dentist anywhere local and even going private you are on long wait lists. We don't need to extend that further
1.7	West of Sandiacre	Healthcare Facilities	Verity Lamb	Response-01298	You do realise the people who already live here cannot get in to see a doctor or dentist and you want even more people to pile into this broken system? You need to invest in the infrastructure for residents let alone adding more people
1.7	West of Sandiacre	Healthcare Facilities	Vickie Wright	Response-01552	Current healthcare facilities are over subscribed and cannot cope with current resident nos. So there is no capacity to support another 180 new homes.
1.7	West of Sandiacre	Healthcare Facilities	Vicky	Response-00485	Why destroy more green belt when there are houses empty!! We already have the local hotels filled with immigrants where does it end
1.7	West of Sandiacre	Healthcare Facilities	Victoria Abraham	Response-01652	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Victoria Galpin-shrimpton	Response-01009	Healthcare. Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing In all weathers at 8a.m. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Victoria Greateorex	Response-01730	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Victoria Marriott	Response-00674	Healthcare - We only have one doctor?s surgery in sandiacre and from personal experience it?s impossible to get an appointment there. You either have to queue up for an hour outside or you have to continually phone up at 8am in order to get an appointment. Having an extra 250 people (minimum) will put too much extra pressure on an already strained service. Similarly with the dentist - they are at capacity currently so where are these extra people going to go? How will they access vital services? We currently don?t have a pharmacy in sandiacre which would make it very difficult for those residents who don?t drive to access these facilities, the nearest being the next town of Stapleford.
1.7	West of Sandiacre	Healthcare Facilities	Vivien Davis	Response-01582	Just one doctors practice and one dentist. It is difficult to obtain an appointment at either and to do so requires standing in all weathers at 8am. Often no appointments are available.
1.7	West of Sandiacre	Healthcare Facilities	Wayne Major	Response-00408	I wish to object to the proposed development due to the lack of sufficient healthcare provision in the local area. As someone who uses Adam House Medical Centre, I am very aware of the challenges already facing our local GP services. It is extremely difficult to get an appointment, and patients are often required to call at exactly 8am to stand any chance of being seen. If you call even 30 minutes later, all available appointments for the day are typically gone. This has become the norm, not the exception, and it reflects the level of pressure the practice is already under. Adding another 180 homes to the area will place further strain on a system that is already at breaking point. Without additional investment in local healthcare infrastructure, this development risks worsening access for both existing and new residents. This concern aligns with Paragraph 95 of the National Planning Policy Framework (NPPF), which states that planning policies and decisions should ensure that developments are supported by the necessary infrastructure, including health facilities. It is also supported by Paragraph 8, which highlights the importance of promoting healthy and safe communities as part of sustainable development. Until there is a clear and funded plan to expand healthcare capacity locally whether through additional GP provision, clinic space, or staffing I believe this development is premature and would place an unacceptable burden on already overstretched services. For these reasons, I strongly object to the application and urge the planning authority to ensure that adequate health infrastructure is in place before any further large-scale housing developments are approved.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Healthcare Facilities	William Marriott	Response-00676	Healthcare Facilities Healthcare - We only have one doctor's surgery in sandiacre and from personal experience it's impossible to get an appointment there. You either have to queue up for an hour outside or you have to continually phone up at 8am in order to get an appointment. Having an extra 250 people (minimum) will put too much extra pressure on an already strained service. Similarly with the dentist - they are at capacity currently so where are these extra people going to go? How will they access vital services? We currently don't have a pharmacy in sandiacre which would make it very difficult for those residents who don't drive to access these facilities, the nearest being the next town of Stapleford.
1.7	West of Sandiacre	Healthcare Facilities	Zoe Hughes	Response-01919	Healthcare in Sandiacre is already oversubscribed & barely accessible, with residents having to access Stapleford & Sawley GP surgeries because of poor services.
1.7	West of Sandiacre	Landscape	Aaron Locksley	Response-00711	Obviously this will affect the landscape and thus property values, is there any remediation for current residents affected?
1.7	West of Sandiacre	Landscape	Adam Shooter	Response-01925	This green area is an attraction for dog walkers and visitors. The horizons in Stoney Clouds are fantastic. Personally I find it to be a great anxiety reliever and will be so disappointed to lose it.
1.7	West of Sandiacre	Landscape	A Harby	Response-01684	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Aimee	Response-00952	The green belt land around sandiacre offers residents a place to escape the urban sprawl of concrete, tarmac and pollution. Our countryside is beautiful and should be protected. Local residents need green spaces to relax, walk and use for leisure and sporting activities. As the space available for these sort of activities is reduced it will impact people's mental health and wellbeing. The area has in recent years suffered from severe flooding, building further homes and concrete will reduce the area rain can soak into. Especially with current trends of paving over entire gardens or having artificial grass. The flooding will continue to get worse.
1.7	West of Sandiacre	Landscape	Alexander Love	Response-00626	Ruining scenery of sandiacre
1.7	West of Sandiacre	Landscape	Alex Lord	Response-00946	This Green Belt and Reserve are the only thing that separates us from the M1, and filters a lot of noise from it and stops us from seeing the industrial complex on the other side of the M1, it allows us to feel at peace in nature, taking that away would ruin the good feeling of staring at the trees. I bet it would also affect how much our houses cost on the market too.
1.7	West of Sandiacre	Landscape	Alice Cooper	Response-01721	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Alice Ilett	Response-00571	This area is beautiful landscape filled with greenery and nature. It's used and loved- please don't take this away from us and our future generations.
1.7	West of Sandiacre	Landscape	Amanda Leech	Response-01625	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Amy Cray	Response-01223	It will ruin the lovely landscape, walls and view as well as destroy habitats
1.7	West of Sandiacre	Landscape	Anastasia Anthony	Response-01865	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out. According to Forestry Commission (2022) Natural England wants a 15m buffer between development + woodland. National Planning Policy Framework: section 16 paragraph 202 mandates authorities to record an advanced knowledge of heritage assets.
1.7	West of Sandiacre	Landscape	Andrew Davies	Response-01295	The development could very easily, unless very carefully designed, have an effect upon the village and it's identity
1.7	West of Sandiacre	Landscape	Andrew Marvin	Response-00255	The impact on the Landscape will be devastating The construction traffic alone is going to be horrendous So Wrong !!
1.7	West of Sandiacre	Landscape	Andrew Meadwell	Response-01654	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Andria Nyilasi	Response-00672	The landscape isn't suitable for a project of this size and scale. The land regularly floods in wet weather and slopes down to a point in the far corner. It backs up to the motorway where there's extreme noise and the possibility of subsidence. Residents whose property is adjacent to the field often experience flooding, particularly during extremely wet weather conditions and the added infrastructure will definitely exacerbate that.
1.7	West of Sandiacre	Landscape	Andy Martin	Response-01761	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Angela Whitehead	Response-00544	The historic site of Stoney Clouds is essential for Sandiacre residents it's reminiscent of our childhoods and what's left after the the M1 has cut through our countryside. It's our history it's what resonates with the locals. Such a shame to destroy and take that away
1.7	West of Sandiacre	Landscape	Anne Castledine	Response-00499	The landscape will be lost forever if this goes through, a small area being packed with housing.
1.7	West of Sandiacre	Landscape	Anne Jenkins	Response-00350	The landscape would be changed forever and how can we be sure the building wouldn't extend further
1.7	West of Sandiacre	Landscape	Annette Jones	Response-00961	This would change the landscape considerably and replaced with buildings and more traffic. The horses in the fields, wildlife, woodland will be gone and before we have time to voice our concern the next field will be built on and gradually that landscape will be eroded away.
1.7	West of Sandiacre	Landscape	Ann Harrison	Response-01602	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Anthony Pearson	Response-01760	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Antony M Ingram	Response-01626	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.

1.7	West of Sandiacre	Landscape	Awson Wheldon	Response-01649	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Barbara Michell	Response-01787	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Barry Partridge	Response-01778	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Ben Hollins	Response-01651	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Beverley Gardner	Response-01692	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Beverley Green	Response-01686	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Bill Hartley	Response-01696	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	B T Keen	Response-01735	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	c/o The Equalised Club	Response-01603	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
			Callum binnall	Response-00460	The place your going to destroy is a beautiful bit of land that we don't want destroyed
1.7	West of Sandiacre	Landscape	Caroline Driver	Response-00618	This proposal would change the existing beautiful landscape forever turning into a huge housing estate. The views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Carol Marshall	Response-00736	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Catherine Richardson	Response-00531	This landscape is the last bit of greenery between Sandiacre and the M1. It must be preserved
1.7	West of Sandiacre	Landscape	Charlotte Fry	Response-00583	Building more ugly new builds will ruin the beautiful countryside and be none left. All the wildlife will be gone too
1.7	West of Sandiacre	Landscape	Charlotte Hunter	Response-01376	There is a lot of wildlife including the endangered hedgehog which will be impacted by the building works.
1.7	West of Sandiacre	Landscape	C Holmes	Response-01620	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Chris Hume	Response-01373	This is the worst place to build, it holds water, it's next to the M1, who would buy a house there, it's green belt and used for grazing land, it's best propose
1.7	West of Sandiacre	Landscape	Chris Jones	Response-01718	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Chris O Connor	Response-01641	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Christian Rearson	Response-01763	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Christine Anderson	Response-00484	This area is used by so many members of the public to get out and relax - a very precious commodity in today's hectic rushing life. This is Green belt and should be conserved for future generations - we need to keep this.
1.7	West of Sandiacre	Landscape	Christine Gough	Response-00578	We know that the area around and on Stoney Cloud is beautiful, the landscape is well known. It's an area where people can walk without having to think about the roads and danger. The building of these houses will lose the beauty of this area. Wildlife will be gone forever and all we will see is a concrete jungle on the landscape.
1.7	West of Sandiacre	Landscape	Claire binnall	Response-00459	This will ruin the local environment
1.7	West of Sandiacre	Landscape	Clare Green	Response-01751	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Cole Hawkins	Response-01714	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Colin Cox	Response-01716	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Colin Marriott	Response-00686	Builders do not care about the landscape only how many houses they can cram on a piece of land, how much profit they will make and planting a few shrubs and trees would not replace what we have.
1.7	West of Sandiacre	Landscape	Courtney Bennett	Response-00593	Stop destroying beautiful landscapes and green areas! Sandiacre is so very lucky to have so many pockets of green open spaces with a variety of wildlife, trees and plants that people of all ages can enjoy. Where is the wildlife going to go when we destroy their home? Where are dog walkers going to go when we destroy the fields? Where are children going to play, learn and enjoy the outdoor natural spaces when it's all gone and there is nothing left.
1.7	West of Sandiacre	Landscape	Craig Richards	Response-01638	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Craig Thims	Response-01765	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.

1.7	West of Sandiacre	Landscape	Cristina Jenkins	Response-01588	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	C Thompson	Response-01634	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Daniel	Response-00545	The development will significantly alter the semi-rural character of the area. What is currently a quiet, low-density neighbourhood will become crowded and urbanised. Views across green space and the sense of openness will be permanently lost, diminishing the aesthetic and recreational value of the area.
1.7	West of Sandiacre	Landscape	Daniel Downes	Response-01630	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Danielle Harrison	Response-00568	This landscape is boggy in the winter and the water table being free from buildings allows the natural habitat to act as a permeable surface. If you build on this area, the landscape will have increased surface runoff which the local drainage system cannot sustain. Green belt should be a protected landscape.
1.7	West of Sandiacre	Landscape	Daniel Naylor	Response-00680	The geography of this area makes accessing this area of sandiacre really difficult in the winter months. Residents will inform you that driving up the proposed access route can be impossible when roads are icy.
1.7	West of Sandiacre	Landscape	Darran and Emma Rea	Response-00597	Stoney Clouds is a nature reserve, the landscape is going to change, it is going to ruin the views especially those right next to this proposed development
1.7	West of Sandiacre	Landscape	David Casey	Response-01608	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	David Cater	Response-01756	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	David Ruddock	Response-01776	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	David Thompson	Response-01324	Will look ugly
1.7	West of Sandiacre	Landscape	David Tindsley	Response-00515	The proposed development of 180 houses must be considered high-density (and very much in line with other sites developed by Peveril Homes in the area. This is totally out of character compared to the surrounding area.
1.7	West of Sandiacre	Landscape	David Yeo	Response-01705	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Dawn Glennis Smith	Response-00510	This is STONEY CLOUDS an historic part of the local landscape - PLEASE DO NOT DESTROY this precious part of Sandiacre by building on it. Build the houses on a Brown Field site.
1.7	West of Sandiacre	Landscape	Dean Bosworth	Response-01665	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Dean Lavelle	Response-01774	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Debra Scully	Response-00288	New build will destroy haven for local wildlife and areas of enjoyment from families who currently use the well trodden right of way
1.7	West of Sandiacre	Landscape	Debs Washer	Response-00487	Noone needs to see yet another blot on the landscape.
1.7	West of Sandiacre	Landscape	Denise Creasey	Response-00786	This proposal would permanently change this landscape, spoiling the wonderful views and destroying the lovely walks.
1.7	West of Sandiacre	Landscape	Denise Lingard	Response-01759	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Dennis Watts	Response-01726	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Derek Morton	Response-01607	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Derrick Hunt	Response-00437	These are open fields looking out across the motorway towards Ilkeston These fields hold water well to certain point but when flooded you get a good run off down the footpath onto cloudside road
1.7	West of Sandiacre	Landscape	Destiny Jade-Blake	Response-01636	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Diane Jones	Response-00852	The view from Stoney Clouds is amazing and the rocks are reputedly the end of the Pennines. This is a precious area and must be retained for future generations.
1.7	West of Sandiacre	Landscape	Diane Mcmorrow	Response-00433	Having nature on the doorstep is a wonderful thing we are so lucky in Sandiacre having this beautiful Nature Reserve within walking distance for many. The walks can educating relaxing and picturesque to unique to be destroyed
1.7	West of Sandiacre	Landscape	Diane Turner	Response-01744	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	D Pallett	Response-01627	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	D Simpson	Response-01712	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	landscape	E Cooper	Response-01923	Nature reserve next door, additional noise/light/traffic etc. All with proximity will ruin this reserve! Why build here? More suitable spaces in built up areas with less impact & an eyesore that could be used instead.
1.7	West of Sandiacre	landscape	Eleanor Moseley	Response-00799	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Eleanor Newman	Response-00718	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Emma Ryan	Response-00503	For me personally, I moved to Sandiacre in 2012 and Stoney Clouds Nature Reserve was one of my biggest appeals and has been somewhere myself and my family have frequented many times. It would be a shame to place a housing estate right by it like that and would actually put me off living here.
1.7	West of Sandiacre	landscape	Emma Wall	Response-00319	Building on this site will totally ruin the landscape
1.7	West of Sandiacre	landscape	Esmé Moss	Response-00592	Will be an eyesore. Decrease the aesthetic value of the area.
1.7	West of Sandiacre	landscape	Esther Cook	Response-01861	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out. Although I do not live in the area, moving away a few years ago but still visit regularly to Sandiacre and enjoy the open landscape and wonderful greenbelt of Stoney Clouds.
1.7	West of Sandiacre	landscape	Fay Cresswell	Response-00701	As above it's a landscape overlooking the Erewash golf course its tree lined and used for horses
1.7	West of Sandiacre	landscape	Gail Berry	Response-01644	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Geoff Tindsley	Response-00755	The proposed development of 180 houses must be considered high-density (and very much in line with other sites developed by Peveril Homes in the area. This is totally out of character compared to the surrounding area.
1.7	West of Sandiacre	landscape	Georgia C	Response-01296	United Kingdom is supposed to be our green and pleasant land, not grey concrete and red brick. So much of our established woodland has already been destroyed and now it seems they want fields to go the same way.
1.7	West of Sandiacre	landscape	Georgia Marvin	Response-00261	The deconstruction of such a beautiful area will be so heart wrenching and breaking. The quiet area will be no more - the traffic and disruption will ruin the area. What once had such scenic views will be overrun with the horrid door to door ratio. Sandiacre will never be peaceful and beautiful again
1.7	West of Sandiacre	landscape	Gill West	Response-01725	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Glyn Holner	Response-01697	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Gordon Daris	Response-01639	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Greg Cox	Response-01702	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Gregg Bartrum	Response-01591	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Greg Watts	Response-00733	The area west of Sandiacre, particularly near Stoney Clouds, is valued for its natural beauty, tranquillity, and accessibility to the public. It is used regularly for recreation, walking, and nature appreciation. A high-density housing estate in this location would irreversibly change the character of the landscape and diminish its environmental and amenity value.
		landscape	Helen Gillain	Response-00964	The landscape houses a wide variety of wildlife and biodiversity ... building here would affect this and also affect global warming
1.7	West of Sandiacre	landscape	Helen Thompson	Response-01356	This plan will replace attractive green fields with housing.
1.7	West of Sandiacre	landscape	Helen whiteman	Response-00447	The landscape of the area is not suitable for building more house right next to the m1 motorway with all the pollution
1.7	West of Sandiacre	landscape	Ian	Response-00493	Impacting the views on and around stoney clouds nature reserve
1.7	West of Sandiacre	landscape	Ian herbert	Response-00939	the present land borders and adds to the green space comprising the stoney clouds nature reserve. an important recreational area for wildlife and people.
1.7	West of Sandiacre	landscape	IAN TAYLOR	Response-00972	The site adjoins the Stoney Clouds Nature Reserve and is essentially part of the same ecosystem. Together with surrounding farmland they form part of the green belt around Sandiacre. The proposed development will inevitably damage the landscape.
1.7	West of Sandiacre	landscape	Ian Ward	Response-01628	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Irina Anthony	Response-01867	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Isabelle Love	Response-00529	The changes to landscape due to constant development in Erewash has been vast and detrimental. The entire area is becoming gridlocked and hideous. In the last 40 years Erewash has seen enough development and it is time mindless politicians turned their attention elsewhere.
1.7	West of Sandiacre	landscape	Isobel Ball	Response-01092	The green areas of west sandiacre, stoney clouds, the old and new golf courses are special places to many sandiacre residents. For me personally, as an owner of a golden retriever. The land in wish is projected to be built on is an area very special to me and my pup. It is a beautiful and safe area away from heavy population and busy areas and many of us treasure that. It's a place I grew up walking through, especially with my dad who passed away when I was 11. So for me and my family the area holds great weight and importance. We should be allocating houses to brown belt areas where there is no use for the land. Not green belts. Everyone deserves housing, but not here.

1.7	West of Sandiacre	landscape	J. E. Lord	Response-01601	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Jack Greateorex	Response-01731	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Jacob Whitt	Response-01748	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Jacqueline Marshall	Response-01436	Stones Clouds provides beautiful views over Erewash and is a well loved and well used site. Green spaces are necessary to our mental wellbeing and are part of social prescribing and you are planning to reduce and completely change the landscape
1.7	West of Sandiacre	landscape	Jade Smith	Response-01783	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	James Meadwell	Response-01653	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	James Roberts	Response-01708	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	James Seward	Response-01683	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Jane Dennett	Response-00965	Will ruin the outlook of the area. Especially for homes attached to land .
1.7	West of Sandiacre	landscape	Jane Elizabeth Tindsley	Response-00669	The proposed development of 180 houses must be considered high-density (and very much in line with other sites developed by Peveril Homes in the area. This is totally out of character compared to the surrounding area.
1.7	West of Sandiacre	landscape	Janet Whildes	Response-01869	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Janice Taylor	Response-01743	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Janice West	Response-00989	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Janine Holmes	Response-01595	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Jason Harwood	Response-01667	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Jason Webb	Response-01637	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Jayne Rowley	Response-01279	Stoney clouds is a valued nature reserve, this proposal would drastically change the area and its views across the parishes and the walks across this. The high density would just make it a mass of concrete with very little foliage and very little natural heat defence in the hotter months.
1.7	West of Sandiacre	landscape	J Cates	Response-01750	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Jeanette O Connor	Response-01640	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Jennifer Bailey	Response-01857	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Jennifer Tindsley	Response-00751	The proposed development of 180 houses must be considered high-density (and very much in line with other sites developed by Peveril Homes in the area. This is totally out of character compared to the surrounding area.
1.7	West of Sandiacre	landscape	Jenny Stephens	Response-01723	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Joanne Guyatt	Response-01784	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Joanne Johnson	Response-00765	This would be a crying shame to ruin this area further.
1.7	West of Sandiacre	landscape	Joanne Lambert	Response-00494	Building so close to the nature reserve will spoil the natural feeling around there. Currently the houses close by are obscured by trees/woodland.
1.7	West of Sandiacre	landscape	Jodie Owen	Response-01688	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Jodie Shrive	Response-00601	This area is a natural sanctuary for the existing residents of Sandiacre, it promotes well-being and serves as a safe haven for many struggling with their mental health. The landscape of the area is beautiful, and is a big part of the reason why people moved to this specific area, and you're willing to destroy that.
1.7	West of Sandiacre	landscape	Jo Gerhardt	Response-01286	It would alter the landscape massively, as it would impact on the nature reserve that has been there for decades.
1.7	West of Sandiacre	landscape	John Gardner	Response-01694	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.

1.7	West of Sandiacre	landscape	John G Brown	Response-01752	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	John Hibbitt	Response-01855	Priceless. This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	John Ledger	Response-01605	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	John Payne	Response-01785	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	John whiteman	Response-00450	The landscape is much better as it is now and has been for years. Leave well alone
1.7	West of Sandiacre	landscape	Jon Burn	Response-01722	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Josh Williams	Response-01632	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	J Pearson	Response-01772	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	J Telfer	Response-01876	Sandiacre is already very dense. Kids need somewhere to play & walk.
1.7	West of Sandiacre	landscape	Judith A Pultfer	Response-01863	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Judith Blackburn	Response-01928	It would again be a great pity if a large amount of walking area was to disappear.
1.7	West of Sandiacre	landscape	Julie Hill	Response-01643	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Karen Alldread	Response-01868	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Karen Blain	Response-01732	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Karen Harwood	Response-01668	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Karen Pitts	Response-00643	This wonderful green space will be lost for ever. I have walked my dogs here for the past 30 plus years often taking the track over to the golf course and on to Stanton by Dale. People who live on the adjacent estate will lose their current outlook onto fields and trees. That change in the landscape will have a huge effect on the ecosystem with loss of habitat throughout the food chain leading ultimately to loss of resident species.
1.7	West of Sandiacre	landscape	Kathryn Martin	Response-00527	Stunning land frequently used by all who live in the area
1.7	West of Sandiacre	landscape	Katie Morrice	Response-00664	This proposal would permanently change this landscape, spoiling the wonderful views and destroying the lovely walks.
1.7	West of Sandiacre	landscape	Katrina	Response-00628	I brought my house on cloudside with the knowledge that it had a greenbelt beside it and the fact that it wasn't overlooked was a major selling point for the house, it will also lower my house price to have more houses behind, will there be compensation?
1.7	West of Sandiacre	landscape	Kelsey Green	Response-01666	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Kenneth Cooper	Response-01720	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Kern-Paul Lewis	Response-01715	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Kerry Meadwell	Response-01655	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Kerry Smith	Response-01271	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Kerry stokes	Response-00769	We go walking across the fields where the build is to be proposed & enjoy walking in nature, seeing the views of the field & legendary sycamore tree. We enjoy taking our children to see the horses on the land & will be very upset at the thought of not being able to do this anymore. The area has a lot of memories/ sentiment attached to it & for many years has been a space that nourishes our mental well being as well as keeping our bodies moving. It would be a great loss to my family to have the landscape ruined.
1.7	West of Sandiacre	landscape	KH Taylor	Response-01663	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Kim Helm	Response-00632	An housing estate will not be in keeping with the rest of land and buildings around them
1.7	West of Sandiacre	landscape	Kirk Moss	Response-00439	The fields are regularly used by runners, walkers, families, and local clubs. They serve as an important recreational and wellbeing space for the community. Development would destroy this valued open space and negatively affect the area's visual character.
1.7	West of Sandiacre	landscape	Kirsty Handa	Response-00445	This development will look unsightly and destroy the green belt landscape that so many people visit this area to look at
1.7	West of Sandiacre	landscape	Kirsty Meredith	Response-01462	This would have a massive impact on the landscape of the area, especially Stony Clouds, a protected local green space. This development risks harming biodiversity and is a risk to the local habitat.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	landscape	Kristie Rugers	Response-01864	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Kyle Jones	Response-01764	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	L A Keen	Response-01659	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Laura Hallam	Response-01711	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Laura Thompson	Response-00702	Homes will mean fewer green spaces. Green spaces are known to have a positive impact on mental health and wellbeing.
1.7	West of Sandiacre	landscape	Laurence Luck	Response-01727	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Lauren Rose	Response-01446	The widening of the M1 took a number of trees and amounts of foliage out, replacing it with ugly, soul-less sound fencing. Please do not do the same here. People also do not want to look out of their windows to see straight into a neighbour's house or directly out on to the Motorway. Keep our unspoiled landscape as it is. We stopped HS2 because it would have ruined the local, ancient landscape. We will stop this development.
1.7	West of Sandiacre	landscape	Lee Wilcock	Response-01670	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Lesley Bruce	Response-01397	This vital zone buffering the M1 from housing is much needed, scarce in the area and should not be considered for any housing, let alone high density as proposed.
1.7	West of Sandiacre	landscape	Lia Thims	Response-01766	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Linda Castledine-Davies	Response-00850	The proposed site is primarily pasture land, shrub and woodland that undulates in a pleasing way providing stunning views across Sandiacre and Stanton village. It is currently used as pasture for a herd of retirement horses. A footpath cuts across the middle of the field and is used by so many. Housing on this site will dramatically impact the landscape.
1.7	West of Sandiacre	landscape	Lindsey Rawlinson	Response-01624	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	LISA ANNE GILLIGAN-LEE	Response-00710	The proposed development on Stoney Cloud poses a significant threat to the existing landscape, which currently comprises of unspoiled green land that contributes to the area's natural beauty, ecological value, and rural character. This green space provides an essential buffer between built-up areas, supports local biodiversity, and offers recreational and visual benefits to residents and visitors alike. The introduction of urban infrastructure would irreversibly alter the open, scenic views and degrade the tranquil rural atmosphere, undermining the environmental and aesthetic qualities that define the local landscape. Protecting this land from development is crucial to preserving the unique character and long-term environmental integrity of the area for current and future generations. When did saving green spaces become so radical?
1.7	West of Sandiacre	landscape	Lisa Heppell	Response-00878	It is a very beautiful area and I have had the pleasure of living in Sandiacre for over 50years
1.7	West of Sandiacre	landscape	Lisa J Pearson	Response-01762	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Liz Woodhouse	Response-01584	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	L Mee	Response-01777	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Logan Fox	Response-00746	not sure what to add
1.7	West of Sandiacre	landscape	Lorraine Hands	Response-00534	Building on the land could impact on residents at time of heavy rainfall, I have witnessed people on Maple being affected as rainfall was so heavy it was flooding through garages that backed onto Stoney Clouds, the landscape is important as more and more gardens are swapped for driveways,
1.7	West of Sandiacre	landscape	Louise Felfoldt	Response-01733	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Louise Harper	Response-01571	I look out of my windows and all I see is green , and trees, this is why I moved here in the first place from a ground floor flat with our young children, taking the dog on walks on stoney, not overlooked by anyone, , my piece of paradise, there are some things worth more than money, what will we do when they are all gone ? , it will be too late by then, it's not too late yet to save our green spaces
1.7	West of Sandiacre	landscape	Louise Harrison	Response-01719	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Louise Jacks	Response-01767	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Louise Libberton	Response-01693	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Lucy johnson	Response-01369	The landscape adds to the charm of our town! Don?t destroy it
1.7	West of Sandiacre	landscape	Luke Chein	Response-01779	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Landscape	Lynda Morton	Response-01606	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
			Lynsey Blackburn	Response-01227	This is such a beautiful part of town which will be ruined by a housing development
1.7	West of Sandiacre	Landscape	Macie Brothwell	Response-01633	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Malcolm Dillon	Response-00722	The duffer zone between developed land and townships must be enhanced were ever possible. This proposed development would have a detrimental effect of the identity of Sandiacre and would lead to urban sprawl. We are already to close to Stapleford township. The loss to Sandiacre citizens would also be the loss for Stapleford citizens. Social cohesion is the bedrock of good community life. This proposed development puts these concepts in danger.
1.7	West of Sandiacre	Landscape	Malcolm Fox	Response-00215	Simply put, green belts such as this site should not be considered. During winter months, the roads leading up to the area freeze due to the incline, resulting in vehicle access being impeded. Buses also stop accessing the immediate area. So although my comments on the actual landscape may not be applicable in your view, we must consume landscape leading up to the area as well.
1.7	West of Sandiacre	Landscape	Malcolm Riggs	Response-01680	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Malc Orbiston	Response-01673	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mandy Rait	Response-01587	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out. The proposed development would certainly lead to our natural landscape lost for ever. There are many brownfield sites to be considered first.
1.7	West of Sandiacre	Landscape	Mark Gough	Response-00888	The landscape around the proposed area of Stoney clouds is the most scenic in the area . It has views of local wildlife , trees , green grass , fields . This landscape is crucial to the health and well being of the residents and visitors around . If taken away , people will become depressed , won't be able to walk their dogs, children won't have the freedom to play and walk in a safe environment away from traffic , life will be upturned . The landscape will be ruined and turned into a concrete jungle .
1.7	West of Sandiacre	Landscape	Mark Leek	Response-01740	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	mark skelton	Response-01341	Beautiful site for walkers to stoney clouds and golf course. Would be so sad to loose it.
1.7	West of Sandiacre	Landscape	Mark Warton	Response-00693	Losing our Heritage and Countryside
1.7	West of Sandiacre	Landscape	Martin Hardy	Response-01413	Without full site plans I cannot comment. These have not been provided.
1.7	West of Sandiacre	Landscape	Martyn Locker	Response-00903	Imagine the serene landscape of a vibrant green field, where horses frolic, wild plants sway in the wind, dog walkers stroll through to embark on an adventure into the gorgeous Erewash countryside. And now imagine a row of terraced houses, a Vauxhall Corsa with an enlarged exhaust pipe and tinted windows bounces over the speed bumps, while children play football in the road. It's no surprise that Sandiacre's had the largest opposition to these proposals.
1.7	West of Sandiacre	Landscape	M A Simpkin	Response-01882	When our family was young we spent hours up the clouds, and the lads and their pals loved going down cardboard hill. My husband passed away last June. If he was here today I don't think he would be happy with building houses up there. Where will you be building next the playing fields? What barmpot come up with the idea of building up the clouds anyway. Nowhere for ramblers or dog walkers to go. Don't suppose you will take a blind bit of notice anyway, even if everyone in Sandiacre voted against it. You will just go ahead and build.
			M A Smith	Response-01889	Walking for health.
1.7	West of Sandiacre	Landscape	Matthew Buckland	Response-00615	It's beautiful up there - why put a load of houses on there when there are more than enough empty properties.
1.7	West of Sandiacre	Landscape	Maurice Mason	Response-01617	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	M Dougle	Response-01749	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	M Eastwood	Response-01757	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Melanie	Response-00586	This proposal conflicts directly with the Neighbourhood Plan and planning principles aimed at protecting the Green Belt. The site serves a clear role in maintaining the character and openness of the landscape and should not be compromised when alternative sites are available. Development here would result in irreversible loss of valuable green space.
1.7	West of Sandiacre	Landscape	Melanie Caumont	Response-01272	The development would be intrusive, altering the landscape character and impacting views from both the conservation area and residential homes. The proximity to the M1 also raises noise and pollution issues for any new homes, which compromises the desirability and sustainability of the site.
1.7	West of Sandiacre	Landscape	Melanie Howarth	Response-01621	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Michael Anderson	Response-00461	To build services for this area, such as water gas electricity sewers are bound to breakdown the landscape to this Green Belt site.
1.7	West of Sandiacre	Landscape	Michell Birkin	Response-01657	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Michelle Alsop	Response-01645	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Landscape	Michelle Cox	Response-01724	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Michelle Ledger	Response-00815	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Michelle Wenham	Response-01650	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mick Hughes	Response-01701	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mike Darnell	Response-00698	Totally wrong area for an estate, out of character and damaging to the biodiversity of the nature reserve. Obstructing the beautiful views. We need more green spaces for our physical and mental wellbeing. I use this area daily and know this is not the place for housing. It is up a steep windy hill with narrow roads. It is totally the wrong place
1.7	West of Sandiacre	Landscape	Miss Garratt	Response-00905	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Miss R Cordon	Response-01648	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Misty McGrath	Response-01556	Why do we insist on placing cheap housing for people so close to the M1. The health impacts themselves are not good, plus the negative mental aspects on the existing residents.
1.7	West of Sandiacre	Landscape	Mollie Snow	Response-01729	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Molly Newbold	Response-00486	Houses vs our greenery. Of course it will ruin the landscape
1.7	West of Sandiacre	Landscape	Mr & Mrs Turton	Response-01660	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mr A Monk	Response-01905	
1.7	West of Sandiacre	Landscape	Mr and Mrs R Skelton	Response-01274	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mr and Mrs Wright	Response-01275	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mr K Turton	Response-01706	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mr Luke	Response-01703	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mr P J Tanner	Response-01728	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mr R M Draper	Response-01856	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mr R Widdowson	Response-01734	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mr S. Haywood	Response-01585	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mrs Christina Pope	Response-00732	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mrs Donna C. Ball	Response-01594	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mrs Griffin	Response-01698	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mrs J. Cooper	Response-01596	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mrs Joanne Thompson	Response-01690	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mrs Linda Cox	Response-01753	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mrs Luke	Response-01704	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mrs M. Rose	Response-01583	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Mrs Marie Draper	Response-01755	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	landscape	Mrs M Jones	Response-01884	We have had generations of this small towns people use that land for walks, the nature there and it is a great source of relaxation to our community. I am 60 now and have grown up and met my husband on that land and kept horses for many years there. My children and many other people have had happy memories on that land. And its been part of Sandiacres heritage for many years. It is a very sad state of affairs when something so precious to us all in Sandiacre is going to be bulldozed over and ruined forever.
1.7	West of Sandiacre	landscape	Mrs Rachel Coats	Response-01623	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Mrs R Cordon	Response-01647	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Mrs Rigby	Response-00641	This proposal will change the existing beautiful landscapes forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walks used daily by the local people will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Mrs Shani Wainwright	Response-00754	This proposal will sadly negatively impact our beautiful landscape forever and turn a once beautiful green belt area into a sterile concrete jungle.....the loss of this area could well increase flood risk in Sandiacre as tjis natural drainage area will be lost.The fantastic views across the parish and its beautiful walk will be destroyed with the skyline being blotted out too.
1.7	West of Sandiacre	landscape	Mrs Sheila Hickingbotham	Response-01338	The site is situated next to the Cloudside Conservation Area and Local Nature Reserve and the proposed development will have an adverse effect on the character of the area, including views into and out of the Conservation Area.
1.7	West of Sandiacre	landscape	Mrs Shirley Victoria Riggs	Response-01685	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Mrs Susan Bantle	Response-01612	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Mrs Turton	Response-01707	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Nasim Rashid	Response-01103	Area of beauty that benefits the physical and mental well being of local people.
1.7	West of Sandiacre	landscape	Natalie Bentley	Response-01646	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Nicole Cooper	Response-01597	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Nikki Vincent	Response-00688	It would be a huge shame to lose such a wonderful landscape. My children love going to stoney clouds and exploring our local green areas.
1.7	West of Sandiacre	landscape	Normn McCrea	Response-01754	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Oliver Marriott	Response-00679	Landscape Landscape & Green belt I?m confused as to why this site was selected, it only is it very limiting in terms of the access but also the fact it?s on a nature reserve. Surely, this is going to affect a whole area for people, animals and nature. We are so lucky to have such a special place on our doorstep the views are incredible snd it?s so widely used I?m sure there must be more suitable alternatives available.
1.7	West of Sandiacre	landscape	Paige Walker	Response-01669	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Pam shepherd	Response-00453	This goes side by side with the damage of the protect species in the area, damage the environment their animals habitats the natural walk people use the area for it?s a disgrace that you want to try and turn a beautiful town into a city environment
1.7	West of Sandiacre	landscape	Pat Hardy	Response-01739	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Paula Darnell	Response-00665	To build here on this site at the top of sandiacre up small windy narrow congedted roads with hairpin bends on our greenbelt precious nature reserve is not acceptable
1.7	West of Sandiacre	landscape	Paula Luck	Response-01710	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Paula Sims	Response-01687	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Paul Randall	Response-00131	You are proposing to build on green belt, so?
1.7	West of Sandiacre	landscape	Paul Vleeton	Response-01770	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	paul wheeldon	Response-00582	This field has drop of straight down to the motorway along one edge this could cause serious issues if the banking were to give way
1.7	West of Sandiacre	landscape	Peter Anthony	Response-01866	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Peter Nicholls	Response-01622	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Pete West	Response-01700	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Phil Creasey	Response-01342	This proposal would perminantly change this landscape, spoiling the wonderful views and destroying the lovely walks.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Landscape	P Sandes	Response-01682	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Rachel Crossley	Response-01661	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Rachel Skelton	Response-01241	Changing of the landscape - destroying the open green spaces
1.7	West of Sandiacre	Landscape	R Barratt	Response-01664	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Rebecca Longmuir	Response-00253	The landscape will be destroyed by the awful housing estate you wish to enforce on us. There is brown belt land in Sandiacre you could use behind Lidl was one area!
1.7	West of Sandiacre	Landscape	Rhiannon Lowater	Response-01592	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	R Hibbitt	Response-01862	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Richard Chambers	Response-00745	The houses will impinge on the views from Stoney Clouds
1.7	West of Sandiacre	Landscape	Richard Haines	Response-01674	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Richard Marriott	Response-00675	Landscape Landscape & Green belt I?m confused as to why this site was selected, it only is it very limiting in terms of the access but also the fact it?s on a nature reserve. Surely, this is going to affect a whole area for people, animals and nature. We are so lucky to have such a special place on our doorstep the views are incredible snd it?s so widely used I?m sure there must be more suitable alternatives available.
1.7	West of Sandiacre	Landscape	Richard Naylor	Response-00066	Your plans affect the landscape around Sandiacre.
1.7	West of Sandiacre	Landscape	Richard Shrimpton	Response-01301	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Rob Lowe	Response-01768	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Rosemarie Gough	Response-00997	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Roy Drew	Response-01614	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Ruby Sharp	Response-00886	The land in question has historical significance, and developing it could risk damaging archaeological sites or landscapes that carry cultural value for the community.
1.7	West of Sandiacre	Landscape	Ryan Selby	Response-00479	The landscape will not be the same, less greenery. More traffic, more noise, more pollution in a quiet village.
1.7	West of Sandiacre	Landscape	S. Jones	Response-01615	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Sally Davies	Response-01294	This development will ruin the nature of the area and will be in detrimental to the houses already in the area.
1.7	West of Sandiacre	Landscape	Samantha Anne Whitney	Response-00757	The landscape should stay untouched, Stoney Clouds has had enough development on it already.
1.7	West of Sandiacre	Landscape	Samantha Whildes	Response-01270	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Sam Greateorex	Response-01695	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Sandra Cooke	Response-01613	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Sarah Harrison	Response-01658	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	S Bryne	Response-01677	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Sebastian Roberts	Response-01675	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Shanead Ligton	Response-01689	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Shannon moss	Response-00454	The landscape is a huge selling point for all houses that back onto the open fields with the beautiful views of horses, this development will not only destroy the views, the landscape, it will decrease the value of properties that back onto here
1.7	West of Sandiacre	Landscape	Shannon Robinson	Response-01635	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Sharon weston	Response-00440	The landscape out of my rear windows behind my garden is the reason I brought my house in the first place, so I'll have to endure staring at a house instead of a tree line and watching the wildlife.
1.7	West of Sandiacre	Landscape	Shaun Green	Response-01773	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	landscape	Sheila	Response-00587	The proposed development would cause a significant and lasting detriment to the character and visual quality of the local landscape. Situated within the Green Belt, this site currently serves as a vital buffer between urban settlements and contributes meaningfully to the rural identity of Sandiacre. Its open and undeveloped nature offers visual continuity with the surrounding countryside, supports local tranquillity, and provides important long-range views for residents and visitors alike. The construction of high-density housing in this location would result in the urbanisation of a valued green space, permanently eroding the sense of openness and undermining the area's distinct landscape character. You are destroying a nature reserve.
1.7	West of Sandiacre	landscape	Sheila Payne	Response-01782	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Sian Knox	Response-01679	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	S Leek	Response-01737	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Sonya Birkin	Response-01656	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Sophie	Response-00472	Stones clouds is a local beauty spot which has been very much loved and appreciated by the local community and visitors for many years, this would be a real eyesore to this and the wildlife
1.7	West of Sandiacre	landscape	Sophie Bennett	Response-01631	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Stephen Barlow	Response-01808	We see lots of people walk up our road with thier dogs to walk on Stoney Cloud and obviously this would not happen if houses were built.
1.7	West of Sandiacre	landscape	Stephen Davies	Response-00214	The existing houses on Larch Drive bordering proposed development are all bungalows. Any other type of properties would have detrimental effect on view. Proximity to existing nature reserve is likely to result in significant disruption to wildlife and tree / vegetation This is the only green space between the existing properties and the M1, thus providing a break in air and noise pollution
1.7	West of Sandiacre	landscape	Stephen Sacker	Response-01598	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Steve Bilbie	Response-00285	This would be a scar on the most beautiful part of Sandiacre enjoyed by the residents and visitors. A total disaster for the landscape of this beautiful area.
1.7	West of Sandiacre	landscape	Steve Whittaker	Response-01781	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Sue Harrison	Response-01629	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Susan Heinke	Response-00468	Enough destruction of our landscapes. Our new generation are not going to have anywhere that isn't built up to go
1.7	West of Sandiacre	landscape	Susanne Beaven	Response-01618	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Tamara Partridge	Response-01780	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Tara Marshall	Response-01890	I walk up there everyday it helps with my mentel health and refresh my brain.
1.7	West of Sandiacre	landscape	Tarnya Hinman	Response-01786	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Thomas Ilett	Response-01088	Due to the proposed site's prominence at the top of an incline, the proposed development will result in a significantly detrimental impact on the landscape. Stoney Clouds Nature Reserve is adjacent to the proposed development. The landscape and aesthetics of this beautiful nature reserve, integral to the Sandiacre community will be ruined by a housing estate looming over it from the West. This will also potentially limit sunlight in the afternoon and evening to Stoney Clouds limiting its landscape and beauty further. As mentioned under flooding, Stoney Clouds is also a flood plain for Sandiacre. With increased hardstanding and at the top of an incline, increased flooding could result in damage to the landscape, including the medieval furrows - a key historical landmark.
1.7	West of Sandiacre	landscape	Tim Derbyshire	Response-01681	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Tim Gough	Response-00996	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Toby Moran	Response-01769	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Tom Ball	Response-01672	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	landscape	Tony Weston	Response-00990	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out. The land in question has historical significance, and developing it could risk damaging archaeological sites or landscapes that carry cultural value for the community.
1.7	West of Sandiacre	landscape	Tracey Howe	Response-01860	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Landscape	Tracey Hughes	Response-01699	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Trevor Rowston	Response-01678	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Try church	Response-00033	The current landscape is pleasant both for residents and visitors walking over the land. Many houses have a boundary onto the land and enjoy the open view. Many of the houses being purchased for that reason. It is not acceptable to be using this land for building when they're are many more suitable brown sites
1.7	West of Sandiacre	Landscape	Tyler Hobbs	Response-00879	Building on the greenbelt land in Sandiacre would dramatically alter the landscape in a negative way, eroding the rural character of the area and replacing open, natural spaces with urban sprawl. The greenbelt provides vital green spaces that contribute to the scenic beauty of the area, offering expansive views of the countryside and maintaining a peaceful, tranquil environment for residents. Development of 180 houses would not only diminish these visual aesthetics but also create a permanent disruption to the landscape's natural contours. Trees, hedgerows, and open fields that currently support local wildlife would be replaced by concrete, roads, and housing estates, resulting in habitat loss and fragmented ecosystems. This change would not only affect the natural beauty of the area but also reduce the overall quality of life for residents, as the green, open spaces that once provided a buffer from urban life would be lost. The development would essentially transform a vibrant, rural landscape into a crowded, suburban sprawl, permanently altering the area's character and environmental health.
1.7	West of Sandiacre	Landscape	Verity Lamb	Response-01298	Is a full archaeological survey to get carried out on the site which covers the origins of Sandiacre.
1.7	West of Sandiacre	Landscape	Victoria Abraham	Response-01652	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Victoria Galpin-shrimpton	Response-01009	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Victoria Greateorex	Response-01730	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	Victoria Marriott	Response-00674	Landscape & Green belt I?m confused as to why this site was selected, it only is it very limiting in terms of the access but also the fact it?s on a nature reserve. Surely, this is going to affect a whole area for people, animals and nature. We are so lucky to have such a special place on our doorstep the views are incredible and it?s so widely used I?m sure there must be more suitable alternatives available.
1.7	West of Sandiacre	Landscape	Vivien Davis	Response-01582	This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Landscape	William Marriott	Response-00676	Landscape Landscape & Green belt I?m confused as to why this site was selected, it only is it very limiting in terms of the access but also the fact it?s on a nature reserve. Surely, this is going to affect a whole area for people, animals and nature. We are so lucky to have such a special place on our doorstep the views are incredible and it?s so widely used I?m sure there must be more suitable alternatives available.
1.7	West of Sandiacre	Number of Houses	Aaron Locksley	Response-00711	We live on Cloudside Road in a house that directly butts onto the proposed land, it's currently a lovely view of horses and green open space. I can see that perhaps the land is a good use for houses but 180 is excessive. We are increasingly becoming aware of the need for green spaces in our lives, inevitably with that many houses their private gardens will be tiny and due to the overcrowding they won't feel private, has anyone thought about the long term impacts on mental health this will have for the new build residents? Plonking them right next to the motorway with basically no garden is a recipe for ill health. I would think if the number was lowered to ~100, you would meet much lower opposition, especially if you provision for current residents (i.e. afford a nice gap between current houses and the new builds with a nice long garden), you might not reach the numbers sought after, but they might actually get built this decade.
1.7	West of Sandiacre	Number of Houses	Adrian Randall	Response-00463	The number of houses proposed is ridiculous, and not in keeping with the existing property in the area.
1.7	West of Sandiacre	Number of Houses	A Harby	Response-01684	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Alex Corns	Response-01151	Of course 180 houses is going to bring in potentially 700 odd people to Sandiacre. There are few facilities in the area, no major supermarket, small drs, small dentist, NO CHEMIST, hardly any public parking and very very little room for further development to expand, the schools are full to capacity. Many people already have to travel outside the area for schools.
1.7	West of Sandiacre	Number of Houses	Alice Cooper	Response-01721	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Alice Ilett	Response-00571	180 houses on our greenbelt in such a small area is ludicrous. It's massively out of keeping with the rest of the area.
1.7	West of Sandiacre	Number of Houses	A Malinski	Response-00620	This number of homes in such a small area will impact on the local character and infrastructure. Schools, doctors, dentists to name but a few resources are already stretched and as I don't see any allowance for additional services I can only assume that the planner is placing the additional numbers on the existing services.
1.7	West of Sandiacre	Number of Houses	Amanda Leech	Response-01625	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Amy Skinner	Response-01447	The proposal of 180 houses for this space is ridiculous - the infrastructure simply isn't there and there is not enough space for vehicular access. There is not enough room to house that many people especially when the only access into the site is at the end of a very small drive.
1.7	West of Sandiacre	Number of Houses	Anastasia Anthony	Response-01865	It is the highest density of all the proposals and will give rise for concern for further phases in the future. NPPF Para. 60-62 warrants a Strategic Housing Market Assessment (SHMA). Will the houses meet the needs of our community? What impact will they have on crime + cultural identity?

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Number of Houses	Andrew Marvin	Response-00255	180 houses = approx 250 Cars The amount of houses in that plot is disgusting
1.7	West of Sandiacre	Number of Houses	Andrew Meadwell	Response-01654	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Andrew Solloway	Response-00958	Small area, large number of houses, poor concept
1.7	West of Sandiacre	Number of Houses	Andria Nylasi	Response-00672	The volume of housing on the site is ridiculous and will mean that the houses are extremely close together. If every house had two cars to each property, there would be close to an extra 400 cars in the area and at least that many extra people, although I suspect we'd be probably looking at closer to an extra 1000, with a minimum of 4 per family.
1.7	West of Sandiacre	Number of Houses	Andy Martin	Response-01761	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Annabel Marriott	Response-00760	The amount of houses is just unimaginable in the proposed area. It ruins the suburban town we are this side of Sandiacre. It feels like these houses are being squeezed into the most ridiculous space.
1.7	West of Sandiacre	Number of Houses	Anne Castledine	Response-00499	Far too many for the infrastructure that there is. Heavy rain causes flooding from the main sewer on Derby Road, it's struggling now.
			Anne Jenkins	Response-00350	No houses should be built there
1.7	West of Sandiacre	Number of Houses	Annette Jones	Response-00961	Too many to start with as more than the street I live on which backs directly onto the proposed site! How high are these houses supposed to be and will they accommodate two cars per household or will they end up parking on the pavement. Bungalows are not suitable due to the steep hills and therefore older or people with limited mobility will be dependent on a car or other transport. Will they be just a house with a drive with no garden so further impact on the environment.
1.7	West of Sandiacre	Number of Houses	Ann Harrison	Response-01602	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Anthony Pearson	Response-01760	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Anthony Smedlewick	Response-01877	No houses should be on this little site.
1.7	West of Sandiacre	Number of Houses	Antony M Ingram	Response-01626	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
			A R Gregory	Response-01918	
1.7	West of Sandiacre	Number of Houses	Awson Wheldon	Response-01649	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
			Barbara Michell	Response-01787	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Barbara Warton	Response-01886	NONE on green belt land.
			Barry Partridge	Response-01778	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Ben Hollins	Response-01651	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Beverley Gardner	Response-01692	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Beverley Green	Response-01686	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
			Bill Hartley	Response-01696	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	B T Duke	Response-01900	Don't want them. Build on grey/brown belt.
			B T Keen	Response-01735	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	c/o The Equalised Club	Response-01603	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Callum binnall	Response-00460	We don't want anymore houses being built!
1.7	West of Sandiacre	Number of Houses	Caroline Blackmore	Response-00451	Refer back to all the above area's how are they meant to cope with the increase. Councils are already at breaking point with the services they provide
1.7	West of Sandiacre	Number of Houses	Caroline Driver	Response-00618	It is the highest density of all the proposals and not in keeping with current housing
1.7	West of Sandiacre	Number of Houses	Carol Marshall	Response-00736	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Carolyn Hallam	Response-00489	Far too many houses on a narrow strip of greenbelt, right next to the motorway. It really isn't a good place to build
1.7	West of Sandiacre	Number of Houses	Catherine Greenaway	Response-00429	Will there be 180 in sandiacre or is this number split over several areas? If so how many are planned for sandiacre?
			Catherine Richardson	Response-00531	Far too many houses being proposed for this site
1.7	West of Sandiacre	Number of Houses	Charlotte Fry	Response-00583	Too many houses are being built in that area and to get access to them you have to go up such a narrow little road that can't handle that much traffic
			Charlotte Hunter	Response-01376	This is going to cause noise pollution to the surrounding houses.
1.7	West of Sandiacre	Number of Houses	C Holmes	Response-01620	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Chris Hume	Response-01373	The number of proposed houses is frankly ridiculous, for all the reasons mentioned, make use of all the empty properties before building more. There are viable sites within Erewash, this site is not viable for access alone
1.7	West of Sandiacre	Number of Houses	Chris Jones	Response-01718	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
			Chris O Connor	Response-01641	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Christian Rearson	Response-01763	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Christine Gough	Response-00578	180 homes too many for this space . We don't have the infrastructure to cope with them and the people who are going to potentially live there .
1.7	West of Sandiacre	Number of Houses	Claire binnall	Response-00459	0 we need 0 new houses
1.7	West of Sandiacre	Number of Houses	Clare Green	Response-01751	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Cole Hawkins	Response-01714	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
			Colin Billington	Response-00227	Far too many houses on green belt
1.7	West of Sandiacre	Number of Houses	Colin Cox	Response-01716	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Colin Marriott	Response-00686	The density far outnumber those in adjacent areas. The current population of Sandiacre is approximately 8000 but you are trying to increase it by over 5%. Where are these people coming from.
1.7	West of Sandiacre	Number of Houses	Courtney Bennett	Response-00593	The number of house needs to be reduced by a minimum of half if not more! It would be even better if no houses were built at all.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Number of Houses	Craig Freeman	Response-01561	180 dwellings in such a narrow space so close to the motorway is not very desirable for the residents, and will potentially create a future problem if not attracting a healthy diversity of income families.
1.7	West of Sandiacre	Number of Houses	Craig Richards	Response-01638	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Craig Thims	Response-01765	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Cristina Jenkins	Response-01588	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	C Thompson	Response-01634	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Daniel	Response-00545	180 is an obscene amount for the type of land were talking about for such a small amount of land which such massive disadvantages.
1.7	West of Sandiacre	Number of Houses	Daniel Downes	Response-01630	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Daniel Hands	Response-00057	To add another 180 residencies to this area seems unrealistic and not in keeping with the wants, needs or opinions of the current residents. 30 - 50 would be more realistic and could be built to be more inkeeping with the area
1.7	West of Sandiacre	Number of Houses	Danielle Harrison	Response-00568	180 houses are disproportionate the the houses already built along the surrounding roads. The scale of this planning application far exceeds the housing surrounding it.
1.7	West of Sandiacre	Number of Houses	Daniel Naylor	Response-00680	Sandiacre and neighbouring towns and villages seem to be taking the brunt in Erewash's allocation o required new developments where other areas of the borough seems largely untouched.
1.7	West of Sandiacre	Number of Houses	Darran and Emma Rea	Response-00597	It is double the density of what is currently in the area which will not be in keeping, even if it was half the housing they want to build, it would still not be in keeping with the area
1.7	West of Sandiacre	Number of Houses	David Casey	Response-01608	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	David Cater	Response-01756	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	David Ruddock	Response-01776	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	David Thompson	Response-01324	Too many
1.7	West of Sandiacre	Number of Houses	David Thompson	Response-00826	I would like to object to the proposed house building on green belt land at Stoney clouds, Sandiacre, why build here when 1800 houses are empty in the Borough
1.7	West of Sandiacre	Number of Houses	David Tindsley	Response-00515	It is my strongly held view, and mirrored by neighbours and residents in the affected areas, that NO houses should be built on this land whatsoever. It is completely inappropriate given the significant access and traffic issues, and I therefore strongly object to the suggested development.
1.7	West of Sandiacre	Number of Houses	David Yeo	Response-01705	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Dean Bosworth	Response-01665	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Dean Lavelle	Response-01774	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Dean Michell	Response-01343	To many house of any type.
1.7	West of Sandiacre	Number of Houses	Debra Michell	Response-01346	There are a lot of empty houses in sandiacre, 180 new homes on that lands is far to many houses, for the area.
1.7	West of Sandiacre	Number of Houses	Debra Scully	Response-00288	Too many for the site suggested
1.7	West of Sandiacre	Number of Houses	Debs Washer	Response-00487	None is the correct answer.
1.7	West of Sandiacre	Number of Houses	Denise Creasey	Response-00786	It is the highest density of all the proposals and if this is allowed, will give raise to concerns for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Denise Lingard	Response-01759	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Dennis Watts	Response-01726	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Derek Morton	Response-01607	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Derrick Hunt	Response-00437	The site doesn't seem to be large enough for 180 houses unless they are going to be shoe horned in. There has to be room for roads and infrastructure and each house will need 2 car parking spaces minimum
1.7	West of Sandiacre	Number of Houses	Destiny Jade-Blake	Response-01636	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Diane Jones	Response-00852	No houses nshould be built on this land.
1.7	West of Sandiacre	Number of Houses	Diane Mcmorrow	Response-00433	I've lived in Sandiacre all my life and 42 of them at my present address I personally don't want to see any houses built
1.7	West of Sandiacre	Number of Houses	Diane Turner	Response-01744	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Dorothy Deeprise	Response-00817	Please dont build new houses. I would ask you to fix the buildings we already have or knock them down and build on them. We should future proof what we have. Insulate, add solar panneling, EV chargers and heat pumps if we are going to future proof Britain.
1.7	West of Sandiacre	Number of Houses	D Pallett	Response-01627	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	D Simpson	Response-01712	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	E Cooper	Response-01923	Too many for current infrastructure of area without additional services also being added.
1.7	West of Sandiacre	Number of Houses	Eleanor Moseley	Response-00799	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Eleanor Newman	Response-00718	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Emily	Response-01880	Too many houses for that area.
1.7	West of Sandiacre	Number of Houses	Emma Ryan	Response-00503	Too many home for an already full area. I understand the 'need' for housing, but 10% being 'affordable' ...18 out of 180 just feels shocking. It isn't supporting people needing homes. It's unnecessary greed.
1.7	West of Sandiacre	Number of Houses	Emma Wall	Response-00319	180 houses on that space of land is utterly ridiculous. It's not big enough for that and certainly the infrastructure will not cope with it in terms of drainage, water, electricity supply communication supply et cetera et cetera
1.7	West of Sandiacre	Number of Houses	Esme Moss	Response-00592	Not a sustainable number of houses for the small area of land.
1.7	West of Sandiacre	Number of Houses	Esther Cook	Response-01861	It is the highest density of all the proposals and will give rise for concern for further phases in the future.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Number of Houses	Ewan Snowdon	Response-00766	With so many houses, there worry that there won't be enough parking provision. So the newly built roads will be clogged with cars parked on the roads, making access for emergency services even more difficult and endangering pedestrians.
1.7	West of Sandiacre	Number of Houses	Fay Cresswell	Response-00701	There is not area for 180 houses to meet government standards.
1.7	West of Sandiacre	Number of Houses	Gail and Tony Orme	Response-00805	I feel it is unnecessary for Sandiacre we already have lots of new builds. Plus I'm told there are 1800 empty houses!!
1.7	West of Sandiacre	Number of Houses	Gail Berry	Response-01644	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Geoff Tindsley	Response-00755	It is my strongly held view, and mirrored by neighbours and residents in the affected areas, that NO houses should be built on this land whatsoever. It is completely inappropriate given the significant access and traffic issues, and I therefore strongly object to the suggested development.
1.7	West of Sandiacre	Number of Houses	Georgia C	Response-01296	We have an aging population, so how is there a housing crisis now when for decades the number of houses has more than sufficed? The death rate is higher than the birth, so why do we require so many new builds?
1.7	West of Sandiacre	Number of Houses	Georgia Marvin	Response-00261	180 houses is ridiculous. Triple the residents, triple the cars, triple the strain it will put onto our town. Triple the wildlife threat. Triple the accidents this will cause.
1.7	West of Sandiacre	Number of Houses	Gill West	Response-01725	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Glyn Holner	Response-01697	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Gordon Daris	Response-01639	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Greg Cox	Response-01702	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Gregg Bartrum	Response-01591	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Harriet Farnsworth	Response-01914	Way too many.
1.7	West of Sandiacre	Number of Houses	Harry Fleck	Response-01084	The proposed 180 houses is highly dense and is not in keeping with the surrounding estate.
1.7	West of Sandiacre	Number of Houses	Helen Gillain	Response-00964	The number of houses proposed is unservicable in this area
1.7	West of Sandiacre	Number of Houses	Helen Richardson	Response-00432	It is unclear how the proposal for 108 new homes on Green Belt aligns with a strategy that prioritizes the efficient use of existing housing stock, particularly in light of the significant number of existing vacant homes in the Erewash area. It appears that a more sustainable and resource-efficient solution would be to focus on incentivizing and facilitating the re-occupation of the over 700 empty properties currently standing within the borough. This approach would address housing needs without the detrimental impact of developing valuable Green Belt land.
1.7	West of Sandiacre	Number of Houses	Helen Thompson	Response-01356	The council has recently adopted the Sandiacre neighbourhood plan which was prepared in consultation with residents and voted for. This identifies other sites for housing development and advocates for protection of our green spaces.
1.7	West of Sandiacre	Number of Houses	Helen whiteman	Response-00447	The whole scheme should be stopped and no houses built at all
1.7	West of Sandiacre	Number of Houses	Ian herbert	Response-00939	180 houses is excessive and only 50 to 70 would be appropriate
1.7	West of Sandiacre	Number of Houses	IAN TAYLOR	Response-00972	A recent study indicates that the density of the proposed housing will be twice the density of existing developments. This is neither desirable nor acceptable.
1.7	West of Sandiacre	Number of Houses	Ian telfer	Response-00991	180!! Way too many in my opinion
1.7	West of Sandiacre	Number of Houses	Ian Ward	Response-01628	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Irina Anthony	Response-01867	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Isabelle Love	Response-00529	Too many houses for such a small area - obviously. One house is too much given where it is proposed, but 180 is utterly ridiculous
1.7	West of Sandiacre	Number of Houses	Isobel Ball	Response-01092	Everything I have already said in every comment, except quadrupled. Because this is not a few houses it is housing to live hundreds of residents.
1.7	West of Sandiacre	Number of Houses	J. E. Lord	Response-01601	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Jack Greatorex	Response-01731	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Jacob Whitt	Response-01748	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Jacqueline Marshall	Response-01436	The number of houses is too large and SHOULD NOT be allowed on THE GREEN BELT it will have a detrimental impact on people living close to the proposed development and will spoil a beautiful place loved by many residents of both Sandiacre and Stapleford.
1.7	West of Sandiacre	Number of Houses	Jade Smith	Response-01783	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	James Meadwell	Response-01653	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	James Roberts	Response-01708	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	James Seward	Response-01683	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Jane Dennett	Response-00965	Zero from me
1.7	West of Sandiacre	Number of Houses	Jane Elizabeth Tindsley	Response-00669	It is my strongly held view, and mirrored by neighbours and residents in the affected areas, that NO houses should be built on this land whatsoever. It is completely inappropriate given the significant access and traffic issues, and I therefore strongly object to the suggested development.
1.7	West of Sandiacre	Number of Houses	Janet Edwards	Response-01906	There should be no building allowed on this part of Sandiacre.
1.7	West of Sandiacre	Number of Houses	Janet Whildes	Response-01869	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Janice Taylor	Response-01743	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Janice West	Response-00989	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Janine Holmes	Response-01595	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Jason Deeprise	Response-00818	Dont need more houses. Get rid of the people then the houses we have will do
1.7	West of Sandiacre	Number of Houses	Jason Harwood	Response-01667	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Jason Webb	Response-01637	It is the highest density of all the proposals and will give rise for concern for further phases in the future.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Number of Houses	Jayne Rowley	Response-01279	This development is one of the highest density of the proposals and is not in keeping with the existing area
1.7	West of Sandiacre	Number of Houses	J Cates	Response-01750	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Jeanette O Connor	Response-01640	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Jeffrey Whittaker	Response-00594	Enough hoses on that area as it us
1.7	West of Sandiacre	Number of Houses	Jennifer Bailey	Response-01857	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Jennifer Tindstley	Response-00751	It is my strongly held view, and mirrored by neighbours and residents in the affected areas, that NO houses should be built on this land whatsoever. It is completely inappropriate given the significant access and traffic issues, and I therefore strongly object to the suggested development.
1.7	West of Sandiacre	Number of Houses	Jenny Stephens	Response-01723	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Joanna hardy	Response-01304	This site is proposing 180 new homes. I simply don't see how so many properties could be comfortably built in the proposed area.
1.7	West of Sandiacre	Number of Houses	Joanne Guyatt	Response-01784	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Joanne Johnson	Response-00765	Way too many for the area, they will be too close to each other with hardly any garden space.
1.7	West of Sandiacre	Number of Houses	Joanne Lambert	Response-00494	180 is too much of an increase for our small community
1.7	West of Sandiacre	Number of Houses	Jodie Owen	Response-01688	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Jodie Shrive	Response-00601	We should not have to be objecting and trying to reason with the utter lunacy that this council has become and attempting to negotiate how many houses should be built, because the answer has and always will be ZERO. 180 houses is NOT sustainable. 180 houses is LUNACY. Where are the plans for road improvements to help facilitate this development? 180 houses will be a complete eye sore, a complete 180 turn around for what this country is claiming it's trying to achieve in regards to climate change and saving our planet. Where is the demand coming from for an extra 180 houses? Why do we need it?
1.7	West of Sandiacre	Number of Houses	Jo Gerhardt	Response-01286	It would lead to an increase in the all ready populated area, causing all sorts of problems as already mentioned in the other sections. Why build on green belt when there is a vast space on the old ironworks at Stanton. They could make the so called contaminated land, ready for use and build as many houses as they wish. A whole community could be built including a school, GP surgery etc. Building houses require the right infrastructure and the West of Sandiacre on the Green Belt is not the answer. Land behind Lidl could also be used without ruining the Green Belt.
1.7	West of Sandiacre	Number of Houses	John Gardner	Response-01694	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	John G Brown	Response-01752	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	John Hibbitt	Response-01855	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	John Ledger	Response-01605	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	John Payne	Response-01785	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	John whiteman	Response-00450	No comment as they should not be built
1.7	West of Sandiacre	Number of Houses	Jon Burn	Response-01722	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Josh Williams	Response-01632	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	J Pearson	Response-01772	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	J Telfer	Response-01876	Who dreamt up that number. Way too many.
1.7	West of Sandiacre	Number of Houses	Judith A Pulfer	Response-01863	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Judith Blackburn	Response-01928	Question drainage, roadwidths, access to estates, need details on proposed builds and gardens, recreation areas.
1.7	West of Sandiacre	Number of Houses	Julie Hill	Response-01643	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Karen Alldread	Response-01868	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Karen Blain	Response-01732	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Karen Harwood	Response-01668	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Karen Pitts	Response-00643	The current housing estate is roughly twice the size of the proposed area, yet it contains 180 houses. How can a further 180 houses be built in an area of half the size? The sewage produced from this extra number of houses will affect the already overstretched systems. Look at the flooding that has occurred over the last few year in both Sandiacre and Risley. The capacity to cope just isn't there. Extra street lighting will also have an environmental effect.
1.7	West of Sandiacre	Number of Houses	Kathryn Martin	Response-00527	Area the same size or smaller in surrounding area have 50 houses maximum
1.7	West of Sandiacre	Number of Houses	Katrina	Response-00628	The proposed density isn't in keeping with the surrounding area, 180 houses is too dense, it would be better if it was around 100 with some open areas to preserve some of the green areas
1.7	West of Sandiacre	Number of Houses	Kelsey Green	Response-01666	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Kenneth Cooper	Response-01720	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Kern-Paul Lewis	Response-01715	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Kerry Meadwell	Response-01655	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Kerry Smith	Response-01271	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Kerry stokes	Response-00769	1 house on the land proposed is too many nether mind 180 houses. The land is too small for this many houses.
1.7	West of Sandiacre	Number of Houses	KH Taylor	Response-01663	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Kim Helm	Response-00632	180 on that site is ridiculous. They will all be on top of each with very little or no garden. Some will probably be 3 storey , affecting the landscape

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Number of Houses	Kirsty Handa	Response-00445	180 houses is a very big development for such a small area. The houses in this area are a mixture of semi detached and detached properties with large gardens. This amount of houses is not keeping with the area, this development will look out of place, cramped and unsightly
1.7	West of Sandiacre	Number of Houses	K Reynolds	Response-01916	There is the old with the new, & plenty for the area. And there is already a complex of uninhabited flats ect. going derelict.
1.7	West of Sandiacre	Number of Houses	Kristie Rugers	Response-01864	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Kyle Jones	Response-01764	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	L A Keen	Response-01659	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Laura Hallam	Response-01711	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Laurence Luck	Response-01727	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Lauren Freeman	Response-01562	I am familiar with the proposed area and I cannot visualise 180 houses with useable gardens and parking. Also the only entry point is in no way wide enough for vehicles to pass each other going in and out.
1.7	West of Sandiacre	Number of Houses	Lauren Rose	Response-01446	180 houses in such a small area is a ridiculous idea. People we have spoken to have said the maximum they would recommend would be 50. Gardens will be limited and tiny, so residents will have little to no green space.
1.7	West of Sandiacre	Number of Houses	Lee Wilcock	Response-01670	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Lesley Bruce	Response-01397	This land should not be touched as it is a valuable local facility for a very built-up area. Development is detrimental to people and environment in so many ways.
1.7	West of Sandiacre	Number of Houses	Lesley Morral	Response-01920	180 houses does not align with the surrounding estate.
1.7	West of Sandiacre	Number of Houses	Lia Thims	Response-01766	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	lilly stokes	Response-00767	The mass number of houses that they are building are going to be immensely cramped in and the pressure on local services is going to be huge. This will make it extremely stressful for me to even come out of my house,
1.7	West of Sandiacre	Number of Houses	Linda Castledine-Davies	Response-00850	Quite simply a ridiculous number of houses is proposed. The proposal for this site is a much higher density than any of the other green belt sites and no reason has been given. By their own admission Erewash know of 1800 houses that lie empty and have done so for as long as 2 years. There are a considerable number of houses for sale and the market is flat with most being reduced in price. There is no data to substantiate why this many houses need to be built it appears to just be towing the party line. Number of houses Local Government Association state Empty Homes Week 2025, UK Currently, nearly 700,000 homes sit empty and unfurnished, with over 265,000 classed as long-term vacant. 1800 in Erewash alone. This proposal is not in keeping with the area. Such a rapid population growth in high-density areas will strain limited existing services like transportation, healthcare, and education, add to congestion, longer wait times, and inadequate service provision. The total fertility rate (TFR), which measures the average number of children a woman is expected to have over her lifetime, has been in overall decline since 2010. In 2023, the TFR in England and Wales fell to 1.44, the lowest on record (ONS) and Life expectancy is down. The need for such an aggressive housing policy is not understandable,
1.7	West of Sandiacre	Number of Houses	Linda Oscroft	Response-01927	The description high density housing indicates an alternative way of saying - cram on as many as can be put & build them to accommodate as many as possible. This does nothing to promote social cohesion.
1.7	West of Sandiacre	Number of Houses	Lindsey Rawlinson	Response-01624	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	LISA ANNE GILLIGAN-LEE	Response-00710	Such a development will put immense pressure on local infrastructure i.e. schools; GP surgeries; public transport and emergency services. 1.7	West of Sandiacre	Number of Houses	Lisa J Pearson	Response-01762	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Liz Woodhouse	Response-01584	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	L Mee	Response-01777	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Logan Fox	Response-00746	I have heard almost 200 house. That would increase the amount of houses using a single road 4 times over! Any amount of houses would simply add more problems to our area.
1.7	West of Sandiacre	Number of Houses	Lorraine Hands	Response-00534	If I say the amount proposed is to many this sounds like a lower number would be acceptable!! I am sorry but I don't feel houses on that piece of land are a good idea! Again I can't imagine how this will affect residents on Cloudside and Larch! I do have family who live on Cloudside!!!
1.7	West of Sandiacre	Number of Houses	Louise Felfoldt	Response-01733	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Louise Harper	Response-01571	I would prefer no houses at all on the site, I am not choosing any number of houses, 0 would be the number for me
1.7	West of Sandiacre	Number of Houses	Louise Harrison	Response-01719	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Louise Jacks	Response-01767	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Louise Libberton	Response-01693	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Louise Robinson	Response-00647	180 houses is a large number for such a small site. Maximising profit over living standards.
1.7	West of Sandiacre	Number of Houses	Lucy johnson	Response-01369	Like I've said before adding 180 houses to that small area of land is just plain stupid! I walk up stoney every morning with my dogs and I just have no words other than it's stupid! They will be packed in like a tin of sardines! That's no life, with a next to nothing garden and neighbours overlooking. It's just asking for trouble!
1.7	West of Sandiacre	Number of Houses	lucy victoria garner	Response-00949	currently 77 houses for sale in sandiacre ranging from £80-700K to suit a range of options. Also 397 within a 1 mile radius as per Rightmove website. No indication there is no options for housing in the local area and no indication that another 180 houses are required
1.7	West of Sandiacre	Number of Houses	Luke Chein	Response-01779	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Lynda Morton	Response-01606	It is the highest density of all the proposals and will give rise for concern for further phases in the future.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Number of Houses	Macie Brothwell	Response-01633	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Malcolm Dillon	Response-00722	There are no guarantees that 180 houses will be the only number of properties ultimately built on this greenbelt piece of land. The benefits of greenbelt land both as an amenity and an irreplaceable resource for plants, people and all forms of life should be enough to halt this proposal. The value of open space was starkly highlighted during the dark days of the recent Covid pandemic. There will be another pandemic, we just do not know when. The retention of this area of greenbelt is vitally important and should be acknowledged and should prevent any building on this land.
1.7	West of Sandiacre	Number of Houses	Malcolm Fox	Response-00215	180 homes will equate to a an additional 200+ vehicles, 400+ residents, of which more than half will be children. This is not a small inclusion into the area but a drastic change that will negatively impact all currently living here. So the number of house proposed is grossly overinflated and unsuitable.
1.7	West of Sandiacre	Number of Houses	Malcolm Riggs	Response-01680	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Malc Orbiston	Response-01673	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
			Mandy Rait	Response-01587	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mark Gough	Response-00888	180 houses too many for the reasons mentioned . Even half that will be too many , that space is not big enough . The roads and access to it not suitable .
1.7	West of Sandiacre	Number of Houses	Mark Leek	Response-01740	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	mark skelton	Response-01341	Far too many in a small space. Estate will suffer from such a larger development
1.7	West of Sandiacre	Number of Houses	Martin Driver	Response-01387	180. Ridiculous. Build somewhere else!
1.7	West of Sandiacre	Number of Houses	Martin Ford	Response-01908	150+ Houses!!
1.7	West of Sandiacre	Number of Houses	Martin Hardy	Response-01413	180 houses in the proposed area is excessive. Homes need proper access, off road parking to limit congestion, gardens for residents and space between houses. Seeing the site I can't see how 180 properties could fit.
1.7	West of Sandiacre	Number of Houses	Martyn Locker	Response-00903	I touched on this previously, but my initial reaction upon reading about the plans was surprise and bewilderment that it'd even be possible to fit 180 houses into that small plot of land. And that reaction doesn't seem to be unfounded. I have to question whether the medium-to-long-term impact on the livelihoods of thousands of existing residents have been considered at all, as the evidence points towards this being an urgent attempt to tick some boxes and turn some green space grey.
1.7	West of Sandiacre	Number of Houses	Matt Bancroft	Response-00916	The density of houses proposed is absurdly and unsustainably high. This site has the worst access yet the highest proposed density, why?
1.7	West of Sandiacre	Number of Houses	Matthew Buckland	Response-00615	It'll be very tight to build that amount of houses in that amount of space. Personally I can't see it, but then it won't matter as the developers will just move onto the next destructive project and leave the problem to yourselves.
1.7	West of Sandiacre	Number of Houses	Maurice Mason	Response-01617	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Maxine Sutton	Response-00471	There are already 1800 houses lying empty in Erewash. I appreciate the Council are attempting to contact the owners so surely building 180 new homes when ten times that amount already exist is foolhardy and a waste of public money.
1.7	West of Sandiacre	Number of Houses	M Dougle	Response-01749	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	M Eastwood	Response-01757	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Melanie	Response-00586	The proposed density of 38 dwellings per hectare significantly exceeds existing residential densities in Sandiacre (typically 22 per hectare). This is not in keeping with the surrounding character of the area and will create an isolated, high-density enclave with limited access?raising concerns over community integration and long-term sustainability. It seems it's about hitting targets, it's unrealistic with its goals. It's all about hitting targets, not considering residents.
1.7	West of Sandiacre	Number of Houses	Melanie Caumont	Response-01272	180 homes crammed into 4.8 hectares equates to a density of nearly 38 homes per hectare?far higher than typical suburban developments in the area. This risks overdevelopment, with insufficient green space, privacy, or infrastructure to support such a concentrated population increase.
1.7	West of Sandiacre	Number of Houses	Melanie Howarth	Response-01621	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Michael Oscroft	Response-01926	The description high density housing indicates an alternative way of saying - cram on as many as can be put & build them to accommodate as many as possible. This does nothing to promote social cohesion.
1.7	West of Sandiacre	Number of Houses	Michell Birkin	Response-01657	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Michelle Alsop	Response-01645	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
			Michelle Cox	Response-01724	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Michelle Ledger	Response-00815	building 180 homes will have to be quite dense and this is just not in keeping with the local area whatsoever, Sandiacre will totally lose its village type of area that we all love
			Michelle Wenham	Response-01650	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mick Hughes	Response-01701	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Miss Garratt	Response-00905	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Miss R Cordon	Response-01648	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mollie Snow	Response-01729	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Molly Newbold	Response-00486	180 is too many and it will affect everything in the area from traffic to schools.
1.7	West of Sandiacre	Number of Houses	Mr & Mrs Turton	Response-01660	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mr and Mrs R Skelton	Response-01274	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
			Mr and Mrs Wright	Response-01275	It is the highest density of all the proposals and will give rise for concern for further phases in the future.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Number of Houses	Mr Colin Key	Response-01841	High density housing is not in keeping with the current housing. It will give rise to many problems and cause severe disruption to both residents and wildlife. The number proposed of 180 exceeds all other proposed sites and no reason or justification has been given for this.
1.7	West of Sandiacre	Number of Houses	Mr David Ainsworth	Response-00621	180 is the biggest scheme for the entire council plan with the poorest access and greatest impact upon existing residents. Its ticking the housing plan box and missing the voters point. You need to listen to what people are saying. Those who voted Labour in with trust. There should be no houses on green belt land. Angela Raynor promised not to touch green belt and this is why I voted Labour. Now you've gone against this manifesto and sadly losing me as a future voter.
1.7	West of Sandiacre	Number of Houses	Mr Ivan Stevenson	Response-01875	We would not need to build more houses, if the price of existing houses were made affordable.
1.7	West of Sandiacre	Number of Houses	Mr John Hickingbotham	Response-01431	The density of housing proposed for this development is considerably in excess of that in the surrounding neighbourhood and is therefore considered to be inappropriate in this location.
1.7	West of Sandiacre	Number of Houses	Mr K Gubb	Response-01838	High density housing is not in keeping with the current housing. It will give rise to many problems and cause severe disruption to both residents and wildlife. The number proposed of 180 exceeds all other proposed sites and no reason or justification has been given for this.
			Mr K Turton	Response-01706	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mr Luke	Response-01703	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mr P J Tanner	Response-01728	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mr R M Draper	Response-01856	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mr R Widdowson	Response-01734	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mr S. Haywood	Response-01585	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
			Mrs Christina Pope	Response-00732	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mrs Donna C. Ball	Response-01594	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
			Mrs Griffin	Response-01698	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mrs J. Cooper	Response-01596	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mrs Joanne Thompson	Response-01690	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mrs Lee Farabella	Response-01899	A large estate - style development could fail to integrate with surrounding character in this area.
1.7	West of Sandiacre	Number of Houses	Mrs Linda Cox	Response-01753	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mrs Luke	Response-01704	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
			Mrs M. Rose	Response-01583	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mrs Marie Draper	Response-01755	It is the highest density of all the proposals and will give rise for concern for further phases in the future. Too many houses on this site!
			Mrs M Burke	Response-01887	180+ houses will not integrate with the surrounding area.
1.7	West of Sandiacre	Number of Houses	Mrs M Jones	Response-01884	Everyone says no to the proposed building it will only destroy our community not only by the houses being erected there but it will affect our doctors and dentists. So we've got bob hope if this plan goes ahead.
1.7	West of Sandiacre	Number of Houses	Mrs N Taylor	Response-01896	A large estate style development could fail to integrate with the character of the area.
1.7	West of Sandiacre	Number of Houses	Mrs Rachel Coats	Response-01623	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mrs R Cordon	Response-01647	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mrs Rigby	Response-00641	It is the high density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mrs Shani Wainwright	Response-00754	The fact that it is the highest density of all of the erewash proposals is very concerning and disappointing.....there seems to be no regard for the residents of Sandiacre health and well being.....The loss of our public amenity, this wonderful nature reserve, needed for recreation, mental well being and community engagement is abhorrent.
1.7	West of Sandiacre	Number of Houses	Mrs Sheila Hickingbotham	Response-01338	The number of houses proposed is too many for a site of this size, resulting in high density housing with very little amenity space. When the original Coronation Avenue estate was laid out, there were only 153 houses built on a much larger area at a time of very low car ownership.
1.7	West of Sandiacre	Number of Houses	Mrs Shirley Victoria Riggs	Response-01685	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mrs Susan Bantle	Response-01612	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
			Mrs Turton	Response-01707	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Mrs Whittaker	Response-00595	The current plan for 180 houses is far too many for the site.
1.7	West of Sandiacre	Number of Houses	Nasim Rashid	Response-01103	Disproportionate amount of houses for small site. Other brown sites should be considered with better access and size of plot
1.7	West of Sandiacre	Number of Houses	Natalie Bentley	Response-01646	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Nicole Cooper	Response-01597	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Normn McCrea	Response-01754	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Oliver Marriott	Response-00679	Number of Houses Number of houses It is the highest density of housing of all the proposals and will give rise for concern for future phases. Have you not considered other more suitable sites for this housing? Ones that aren't on a nature reserve.
1.7	West of Sandiacre	Number of Houses	Paige Walker	Response-01669	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Pamela Bassett	Response-00608	180 houses seems too many for the size of the plot
1.7	West of Sandiacre	Number of Houses	Pam shepherd	Response-00453	To many simple as not required
			Pat Hardy	Response-01739	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Paula Darnell	Response-00665	180 is totally ridiculous. To put any houses on this site is totally wrong. Wrong site, wrong place

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
	West of Sandiacre	Number of Houses	Paula Luck	Response-01710	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Paula Sims	Response-01687	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Paul Randall	Response-00131	The Sandiacre site is 4.8ha for 180 homes ? 38 houses per hectare. This density is some 20% greater than the next dense proposal. Indeed, it is significantly denser than any existing part of Sandiacre (c. 22 per ha) and therefore at odds with the surrounding area. This will create an isolated community especially with only single road access to high density housing. 180 houses on this area would make it more densely populated than the rest of the Sandiacre estate. This would change the local standard of living significantly.
1.7	West of Sandiacre	Number of Houses	Paul Vleeton	Response-01770	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	paul wheeldon	Response-00582	The number of proposed houses on the site would be highly excessive and over crowded
1.7	West of Sandiacre	Number of Houses	Peter Anthony	Response-01866	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Peter Nicholls	Response-01622	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Pete West	Response-01700	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Phil Creasey	Response-01342	It is the highest density of all the proposals and if this is allowed, will give rise to concerns for further phases in the future.
1.7	West of Sandiacre	Number of Houses	P Sandes	Response-01682	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Rachel Crossley	Response-01661	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Rachel Skelton	Response-01241	180 houses on such a small site is too much
1.7	West of Sandiacre	Number of Houses	R Barratt	Response-01664	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Rchael Sharp	Response-00652	Please see my comment about the type of housing.
			Rebecca Longmuir	Response-00253	0 NO HOMES NO SOCIAL HOUSES/ COUNCIL HOUSES
1.7	West of Sandiacre	Number of Houses	Rhiannon Lowater	Response-01592	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	R Hibbitt	Response-01862	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Richard Haines	Response-01674	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
			Richard Jenkins	Response-00264	The number of houses proposed is completely out of character with the surrounding area
1.7	West of Sandiacre	Number of Houses	Richard Marriott	Response-00675	Number of Houses Number of houses It is the highest density of housing of all the proposals and will give rise for concern for future phases. Have you not considered other more suitable sites for this housing? Ones that aren't on a nature reserve.
1.7	West of Sandiacre	Number of Houses	Richard Naylor	Response-00066	There's too many houses proposed in this area.
1.7	West of Sandiacre	Number of Houses	Richard Shrimpton	Response-01301	it is the highest density of all the proposals and will give rise for concern for further phases in the future.
			Rob Lowe	Response-01768	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Roger Farnsworth	Response-01910	Way too many.
			Rosemarie Gough	Response-00997	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Roy Drew	Response-01614	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Ruby Sharp	Response-00886	180 houses is far too many to build on the small area of land. Everybody should be entitled to a place where they feel safe and able to be themselves without any body watching, however this will not be the case as you will be able to see in everyone's gardens. I am 25 and starting to look at houses. A reasonable sized driveway and garden would be ideal for me, along with good infrastructure and a well spaced estate. Unfortunately, the number of houses and the size of these houses due to the number would put me off the area.
1.7	West of Sandiacre	Number of Houses	S. Jones	Response-01615	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Sally Davies	Response-01294	As stated previously - these houses are not required. Many empty homes in the area.
1.7	West of Sandiacre	Number of Houses	Samantha Anne Whitney	Response-00757	This land isn't suitable for any number of houses due to access and where it's situated. There are better places to build if you're adamant you're going to build extra housing.
1.7	West of Sandiacre	Number of Houses	Samantha Whildes	Response-01270	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Sam Greatorex	Response-01695	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Sandra Cooke	Response-01613	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Sarah Harrison	Response-01658	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	S Bryne	Response-01677	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Sebastian Roberts	Response-01675	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
			Shanead Ligton	Response-01689	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Shannon moss	Response-00454	If your plans where to get approved it is not going to be a 180 plot, once all factors have been considered and borders put in place you'd be lucky to get half the houses on there, you'd have to leave a clear buffer to both the residents, the motorway and the nature reserve 180 houses will mean small gardens, practically on top of each other meaning our house will be massively overlooked
1.7	West of Sandiacre	Number of Houses	Shannon Robinson	Response-01635	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Sharon Grant	Response-00219	Far too many houses for such small roads. If the proposed access is Larch drive, how will you get two vehicles through, what is now, the gate to the horse field ???
1.7	West of Sandiacre	Number of Houses	Sharon weston	Response-00440	Far too many and this isn't going to happen overnight so we will have to endure this for at least 5 years, there are alternative sites.
1.7	West of Sandiacre	Number of Houses	Shaun Green	Response-01773	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Sheila	Response-00587	The proposed density of 38 dwellings per hectare significantly exceeds existing residential densities in Sandiacre (typically 22 per hectare). This is not in-keeping with the surrounding character of the area and will create an isolated, high-density enclave with limited access?raising concerns over community integration and long-term sustainability.
1.7	West of Sandiacre	Number of Houses	Sheila Payne	Response-01782	It is the highest density of all the proposals and will give rise for concern for further phases in the future.

1.7	West of Sandiacre	Number of Houses	Sylvia Plampin	Response-00624	There is no way 180 houses could be safely placed on this site.
1.7	West of Sandiacre	Number of Houses	Tamara Partridge	Response-01780	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Tanya Hinman	Response-01786	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Thomas Ilett	Response-01088	The housing allocation is currently proposing a maximum of 180 houses on the site. The maximum allocation of social housing is proposed at 30%. As such a maximum allocation of social housing will be 54 of a proposed target of 5000 for the Borough of Erewash. Destroying the Green Belt to build approximately 1% of EBC's target of 5000 in the Borough is disproportionate and inappropriate.
	West of Sandiacre	Number of Houses	Tim Derbyshire	Response-01681	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Tim Gough	Response-00996	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Toby Moran	Response-01769	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Tom Ball	Response-01672	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Toni hopkins	Response-00539	Too many too crowded insufficiency amenities nearby
1.7	West of Sandiacre	Number of Houses	Tony Weston	Response-00990	It is the highest density of all the proposals and will give rise for concern for further phases in the future. Assert that the development would change the character of the local community and disrupt the aesthetic appeal of the area, which is often valued for its natural beauty.
1.7	West of Sandiacre	Number of Houses	Tracey Howe	Response-01860	It is the highest density of all the proposals and will give rise for concern for further phases in the future. The area is elsewhere peaceful, I can't believe this build is even been considered, 180 houses will surely not be in keeping with the type/quality of houses currently around.
1.7	West of Sandiacre	Number of Houses	Tracey Hughes	Response-01699	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Tracy Kerry-Cliff	Response-00801	The whole community (and it is a community) will be lost with the building of 180 high density houses - this is unacceptable, we need to protect our children's future's. Green spaces are essential! It's unnecessary, when there are so may more suitable (brown) land areas that can be built on - let alone all the "empty" houses and factories in both Derby and Nottingham, that could and should be repurposed into suitable accommodation.
1.7	West of Sandiacre	Number of Houses	Trevor Rowston	Response-01678	It is the highest density of all the proposals and will give rise for concern for further phases in the future.
1.7	West of Sandiacre	Number of Houses	Try church	Response-00033	With the number of houses proposed, they will be too close together making a rabbit Warren like area. This will encourage crime and anti social behaviour where offenders can make a quick exit over the m1 to the golf course and if course can also enter from that way too
1.7	West of Sandiacre	Number of Houses	Tyler Hobbs	Response-00879	The sheer number of houses proposed?180?is simply not appropriate for a village the size of Sandiacre, particularly when considering the strain it would place on local infrastructure, services, and the environment. This scale of development is disproportionate and would represent a significant and abrupt expansion of the village, altering its character and overwhelming the community. Local roads, schools, healthcare facilities, and public transport are already under pressure, and such a large influx of new residents would push these services beyond their limits without substantial and unlikely investment. Smaller, more carefully planned developments that take into account the existing capacity of the area might be manageable, but a proposal of this size risks causing long-term harm to the sustainability and livability of Sandiacre. The number is not just excessive?it?s incompatible with the village?s current infrastructure and its ability to grow responsibly.
1.7	West of Sandiacre	Number of Houses	Vicky	Response-00485	Why destroy more green belt when there are houses empty!! We already have the local hotels filled with immigrants where does it end Houses are empty, fill them first
1.7	West of Sandiacre	Number of Houses	Victoria Abraham	Response-01652	It is the highest density of all the proposals and will give rise for concern for further phases in the future.

1.7	West of Sandiacre	Number of Houses	Victoria Marriott	Response-00674	Number of houses It is the highest density of housing of all the proposals and will give rise for concern for future phases. Have you not considered other more suitable sites for this housing? Ones that aren?t on a nature reserve.
1.7	West of Sandiacre	Number of Houses	Vivien Davis	Response-01582	It is the highest density of all the proposals and will give rise for concern for further phases in the future.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Number of Houses	Wayne Major	Response-00408	See housing type: I wish to object to the proposed development on the grounds that it does not appear to be in accordance with the local Neighbourhood Plan, particularly in terms of housing scale, type, and density. The area currently benefits from a Neighbourhood Plan, developed in consultation with the local community to guide appropriate and sustainable development. This plan sets clear expectations that new development should reflect the character of the area, including the type and density of housing, and should be proportionate to the existing built environment. A proposal for 180 dwellings on this site would represent a significant increase in density compared to the surrounding area. It would result in a development that appears out of scale and out of keeping with the established residential character. Such a large number of homes in a single location also risks undermining the carefully considered planning policies agreed through the Neighbourhood Plan process. This conflicts with Paragraph 15 of the National Planning Policy Framework (NPPF), which recognises the legal status of Neighbourhood Plans and supports giving local communities the power to shape development in their area. It also contradicts Paragraph 127, which states that developments should be sympathetic to local character and align with the expectations set out in local design guides or codes. In light of the above, I believe the proposal in its current form fails to comply with the Neighbourhood Plan and should be reconsidered. A reduced number of homes, designed in a way that respects the established form and layout of the community, would be far more appropriate for this site.
1.7	West of Sandiacre	Number of Houses	William Marriott	Response-00676	Number of Houses Number of houses It is the highest density of housing of all the proposals and will give rise for concern for future phases. Have you not considered other more suitable sites for this housing? Ones that aren't on a nature reserve.
1.7	West of Sandiacre	Number of Houses	Zack Snowdon	Response-00764	180 houses into that small of an area will create unhappy living conditions similar to a ghetto. This is absolutely unacceptable
1.7	West of Sandiacre	Other	Aaron Locksley	Response-00711	Personally, I would consider dropping my opposition if: - the number of houses was more in keeping with the neighbouring area (and allowing the new builds to have decent sized gardens) - new build houses that would be directly adjacent to current residents are required to have a long garden - financial restitution for those whose property values will be affected by the new builds
1.7	West of Sandiacre	Other	Alice Ilett	Response-00571	Please reconsider this area, it's loved and used by locals and has been for generations. There's far more suitable options for social housing and many empty houses.
1.7	West of Sandiacre	Other	Andrew Davies	Response-01295	As outlined above with the pressure on the facilities in the village would not be a forward step. Many of our facilities are in Borrowash , Long Eaton and Ilkeston (or travelling into Derby) and extra housing will put extra stress on these facilities, also as outlined above for a number of these journeys it could lead to additional car journeys
1.7	West of Sandiacre	Other	Andrew Marvin	Response-00255	I seriously don't think you understand how bad the traffic around this area is now I suggest you take some time to monitor traffic at school Time at all 3 schools it's horrendous Also the entry point into coronation avenue and Cloudside Road is horrendous the corner turning into Cloudside Road is also very dangerous now 2. Cars CANNOT PASS EACH OTHER ITS A BLIND CORNER !!!!!!!!! Very dangerous
1.7	West of Sandiacre	Other	Andrew Solloway	Response-00958	Infrastructure is poor now, will be even worse with these houses
1.7	West of Sandiacre	Other	Andria Nylasi	Response-00672	It's just a ridiculous proposal in a very hard to reach backwater. None of it has been thought through enough and the councillors proposing it are trying to tick a box to make the Labour Party look good in their target to build more houses. None of the councillors proposing the development live near the site and have no idea how detrimental it would be to those already living there.
1.7	West of Sandiacre	Other	Anne Castledine	Response-00499	The small access road on Larch Drive and Cloudside are not large enough to take heavy lorries carrying building materials, let alone the probable extra 400 cars that would come with 180 new hoses.
1.7	West of Sandiacre	Other	Anne Jenkins	Response-00350	This is a ridiculous scheme and I am appalled that the council have tried to push this through with no proper investigation or consultation
1.7	West of Sandiacre	Other	Annette Jones	Response-00961	The road conditions are already strained and will only be added with to the additional heavy vehicles if this goes ahead as it will not be able to cope with the stress. No funds are allocated to improve road conditions on the surrounding roads so developers should be made to contribute to this. We should not be made to accept these proposals if not done fairly and proper consultation has not been made with the people it impacts on.
1.7	West of Sandiacre	Other	A R Gregory	Response-01918	Very concerned about the amount of traffic using Derby Road, way to like M1, also getting to see the doctor.
1.7	West of Sandiacre	Other	Barbara and John Morrell	Response-00509	I feel it is totally wrong to build houses on this greenbelt land. The implications of it will cause numerous complications to this area and local residents for various reasons, not least of which is the SAFETY ASPECT of extra traffic, which is of paramount importance.
1.7	West of Sandiacre	Other	Barbara Warton	Response-01886	Lived in Sandiacre all my life (was a lovely VILLAGE not now). The council should think again and look after the residents who are already living in Sandiacre they have already allowed to much country side be gone forever.
1.7	West of Sandiacre	Other	Bill Meadwell	Response-00864	I understand that housing is required in the borough, but it cannot be on a 'find a piece of land and build on it' basis. Without suitable access, medical facilities, schools and public transport, a site cannot be deemed to be in any way appropriate
1.7	West of Sandiacre	Other	Callum binnall	Response-00460	Stop this ridiculous project You clearly aren't a sandiacre resident. You clearly don't have our best interests at heart. Stop
1.7	West of Sandiacre	Other	Caroline Blackmore	Response-00451	We don't want or need these house's, 2 development's is enough in Sandiacre. People can find else where to live don't ruin Sandiacre. Bad enough all the migrants we have to tolerate in the hotels as well. Consider the wildlife as well what are we teaching our children???
1.7	West of Sandiacre	Other	Caroline Driver	Response-00618	Totally inappropriate proposal. I have listed objection under every heading and all hugely relevant. What's worse is we, the tax payers, are expected to foot the bill yet again for things we don't want. I suggest saving any further waste of our money and scrap the plan altogether. Concentrate instead in relieving the further congestion that is going to be coming from Stanton park before trying to inflict further travesties on the local people.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Other	Chris Hume	Response-01373	There are reasons why planning has never been granted on this land, nothing has changed, go back and look why it's never been granted. This is green belt, once it's gone it's gone, use the empty property in Erewash, then brown field land first.
1.7	West of Sandiacre	Other	Christine Anderson	Response-00484	The roads that would give access to this proposed new site were built nearly 100 years ago and are too narrow to accommodate any extra traffic. We have an ageing population now in this area and walking and crossing the roads is quite difficult. I use a stick and it is sometimes treacherous to get across the roads - I can't imagine how dangerous and stressful this would be with the proposed 180 new homes (400+ cars) and associated transport using these small old roads. Please think about the current residents.
1.7	West of Sandiacre	Other	Christine Gough	Response-00578	Even the people moving into the proposed new homes will suffer from pollution from the Motorway , as well as the residents suffering with more pollution from their cars . Trees and hedges will be torn down so no protection from carbon . There will be health problems as I mentioned before , and more strain on the NHS. Depression and mental health will increase due to anxiety with the constant juggling of parking , the noise of added vehicles and heavy construction. It will also make children ill with the pollution , and no green space to play and enjoy the outdoors . There is a park at St Giles but again to get there , there is busy roads with no crossings .
1.7	West of Sandiacre	Other	Claire binnall	Response-00459	Stop thos development immediately
1.7	West of Sandiacre	Other	Colin Billington	Response-00227	Thhre are surely other areas of land to build houses on and not on green belt causing congestion
1.7	West of Sandiacre	Other	Colin Marriott	Response-00686	Official figures state that over 1800 properties lie empty in Erewash, why aren't they being utilised. 5000 on the housing list but only 10% social housing. There are alternative brownfield sites in the area that would be more suitable and cause less disruption. And as a Labour supporter all my life I am disgusted that you are taking the easy option.
1.7	West of Sandiacre	Other	Connor Murfin	Response-00926	These houses will most are most probably being built for migrants who are illegally in this country, so your housing people that are not even contributing to society, never will and draining the countries money.
1.7	West of Sandiacre	Other	Courtney Bennett	Response-00593	Stop killing wildlife, stop killing trees, stop killing plants. Please be mindful, sustainable and responsible for keeping our environment clean, environmentally friendly and pleasurable to the eye, soul and mind.
1.7	West of Sandiacre	Other	Daniel	Response-00545	Let me be absolutely clear: this proposed development is not just inappropriate, it is an insult to the local community. Every single point raised in this objection, traffic chaos, lack of infrastructure, strained schools and GP services, environmental destruction, flooding risk, and irreversible harm to our local landscape, has been echoed by countless residents who live here and care about this area. If this application is approved despite the overwhelming and reasoned objections from those who actually live, work, and raise families here, it will serve as undeniable proof that public consultation is nothing more than a checkbox exercise. If community voice holds no weight in the planning process, then what we have is not democracy, it is dictatorship under the guise of due process. Let's talk plainly. This land was sold approximately four years ago. It is glaringly obvious that the current owner, likely a developer or an entity working with one, purchased this land with the intent of pushing through a housing scheme, regardless of the suitability or local needs. This isn't a community-driven initiative. This isn't local regeneration. This is opportunism, pure and simple, and trying to pass it off as beneficial or necessary is not only disingenuous, it is outright dishonest. You do not need a degree in planning to see what is going on here: a green buffer next to a motorway is being targeted for high-density housing, with zero meaningful investment in infrastructure to support it. And you expect residents to accept this under the illusion of progress? We are watching. And should this be approved, it will be remembered as a blatant example of a council putting profit and policy ahead of people. If you push forward with this plan, despite the logic, the reasoning, and the overwhelming public outcry, then let history show that you didn't just ignore us, you damaged the democratic system.
1.7	West of Sandiacre	Other	Daniel Hands	Response-00057	This entire process has seemed underhand by Erewash borough Council and it seems they have done their utmost to minimise the consultations and engagement from residences. It is clear that those supporting these developments either have alteria motives and incentives , or are completely out of touch with their constituents and deny that their views are worth considering. I have yet to meet another local resident that supports this development. I feel betrayed by this council and the government that supports it. It is not the first time this Council has faced scrutiny over its planning decisions and the effects its incompetence has had on the local communities. I for one would welcome a full public enquiry into Erwash Council and it's operations, as they seem more interested in profitability than community.
1.7	West of Sandiacre	Other	Danielle Harrison	Response-00568	Councillors should fight for green belt and its protection at all costs. It is deplorable to think we would sacrifice such a huge site of green belt in this way, when there is absolutely no demand for it
1.7	West of Sandiacre	Other	Daniel Naylor	Response-00680	Existing traffic needs to be monitored at an appropriate time (ie, peak times) to understand how awful the traffic already is, without the added traffic from 180 new homes and the 2300 homes approved for development in the 2022 Erewash core strategy in neighbouring kirk hallam and Stanton, and the currently developing industrial units in Stanton .
1.7	West of Sandiacre	Other	Darran and Emma Rea	Response-00597	This new development will increase traffic, congestion, strain on the local services and schools which are already at full capacity, as pet owners we use the nature reserve daily, this will have a huge impact on the area especially the work that has to be carried out for the development, the quiet streets will have an increase of traffic, pollution and noise, this development could also have an impact on the house prices of the area not to mention the detrimental effect on the wildlife and the environment, Sandiacre is a close knit community, we object to the development as we love the area as it is, we do not need more houses in the area

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Other	David Tindsley	Response-00515	1. I understand that in the appendix to the local Neighbourhood Plan, an alternative housing site has already been proposed. This site, on derelict land behind Lidl, has undergone public consultation, been reviewed by a planning inspector, and was approved through a referendum, with broad community support. This alternative site would deliver a similar number of homes to the Sandiacre area but is far better suited to the community's needs and local infrastructure. Given the extensive process already undertaken, which included public input and scrutiny, I believe this site represents a much more appropriate and sustainable option for development than the currently proposed site. In light of this, I strongly urge the planning authority to prioritise this alternative site and reject the current proposal, which does not align with the outcomes of the Neighbourhood Plan process. 2. I find it difficult to accept that any councillor that has voted to support the scheme has actually visited the site, and taken time to assess properly the significant problems and issues it would cause. Common sense would show that the proposed single site access is both too narrow, and only approached from a series of narrow, congested residential streets that have many blind right-angle bends which are totally unsuitable for HGV construction traffic. 3. As this portal does not seem to support the attachment of files, I will be submitting a series of photographs by email to supplement this objection, to demonstrate some of the key areas that I have outlined. 4. Overall, I regard it as absolutely disgraceful that the council is even considering this site for possible development, when perfectly acceptable brownfield sites are available. It has no redeeming features, and I object to the proposal in the strongest terms.
1.7	West of Sandiacre	Other	Debra Michell	Response-01346	I am very concerned about more traffic coming through sandiacre especially with all the work happening at Stanton. There are far too many lorries using our roads. We need a new junctions on the motor way to take this traffic out of Sandicre. How about sorting out this problem first,
1.7	West of Sandiacre	Other	Debs Washer	Response-00487	A ridiculous idea which has not been thought through correctly at all. Just don't. For once, consider the landscape, wildlife and don't go grabbing the money. You cannot create more green space so don't lose the ones you have
1.7	West of Sandiacre	Other	Denise Creasey	Response-00786	Access for emergency vehicles needs to be addressed especially when construction traffic is blocking already difficult to navigate roads.
1.7	West of Sandiacre	Other	Derrick Hunt	Response-00437	I would like to say this just seems a very poorly thought out scheme of housing. Which just seems to be purely about political box ticking rather than being in any body's interest apart from maybe a developer Access and traffic to this part of sandiacre is already very heavy and restricted.
1.7	West of Sandiacre	Other	Diane Mcmorrow	Response-00433	The infrastructure of Sandiacre isn't there to sustain the building of the houses roads schools health care and the emergency service would not cope
1.7	West of Sandiacre	Other	Emily Milnes	Response-00470	Currently no access to the site and would likely result in changing road layout and infrastructure that is already struggling.
1.7	West of Sandiacre	Other	Emma Ryan	Response-00503	I honestly don't know how the schools or the healthcare can survive another 180 families accessing them in the area. It's difficult to get a dentist appointment, you have to travel to Stapleford to access a pharmacy. There is one small doctors surgery. We have two small schools that already are full to capacity as are most other schools within the locals towns. I currently really love living in Sandiacre, have been living here since 2012. If more houses get built I really would be considering moving because I just don't feel my family will be able to get the services they need (education and healthcare) from the local area that we should be able to access.
1.7	West of Sandiacre	Other	Emma Wall	Response-00319	I'm very much objecting to any kind of building on that piece of land for structural reasons around infrastructure healthcare transport, air quality protecting wildlife drainage water supply communications and everything else. It's a very bad place to build on from that perspective. And we will lose a lot of wildlife and it will spoil stony clouds.
1.7	West of Sandiacre	Other	Ewan Snowdon	Response-00766	Access to the site is really tight at the moment, busses get stuck and emergency services struggle at the moment to get up there. When you add even more traffic and even more streets off the network of existing streets, how will a fire engine get to the houses in the back of the estate in time to save lives, or an ambulance.
1.7	West of Sandiacre	Other	Geoff Tindsley	Response-00755	1. I understand that in the appendix to the local Neighbourhood Plan, an alternative housing site has already been proposed. This site, on derelict land behind the Lidl superstore, has undergone public consultation, been reviewed by a planning inspector, and was approved through a referendum, with broad community support. This alternative site would deliver a similar number of homes to the Sandiacre area but is far better suited to the community's needs and local infrastructure. Given the extensive process already undertaken, which included public input and scrutiny, I believe this site represents a much more appropriate and sustainable option for development than the currently proposed site. In light of this, I strongly urge the planning authority to prioritise this alternative site and reject the current proposal, which does not align with the outcomes of the Neighbourhood Plan process. 2. I find it difficult to accept that any councillor that has voted to support the scheme has actually visited the site, and taken time to assess properly the significant problems and issues it would cause. Common sense would show that the proposed single site access is both too narrow, and only approached from a series of narrow, congested residential streets that have many blind right-angle bends which are totally unsuitable for HGV construction traffic. 3. Overall, given the serious traffic congestion and safety issues, together with significant access issues, (plus the fact that the land is currently green belt and borders a nature reserve I regard it as absolutely disgraceful that the council is even considering this site for possible development. It has no redeeming features, and I strongly object to the proposal.
1.7	West of Sandiacre	Other	Georgia Marvin	Response-00261	I used to reside on cloudside road, I was born there. I spent 24 years there and was always rewarded by such beautiful views. I now reside on Taft Avenue, which is round the corner to cloudside school - the parking there is horrendous as it is during school pick up times/drop off. I don't see how adding 180 houses will make this any better.
1.7	West of Sandiacre	Other	Gordon Bruce	Response-01455	This goes entirely against the Sandiacre Plan which is a shameful way of ignoring the local people.
1.7	West of Sandiacre	Other	Harry Fleck	Response-01084	There are 1970 houses currently unoccupied in the area so why is there a need to build another 180 houses on green belt land while these other properties are standing vacant?

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Other	Helen Gillain	Response-00964	EMERGENCY SERVICES .... With roads that are already barely passable this number of increased population would create an even bigger strain on the emergency services .. if Ambulances and Fire Engines cannot pass through and could lead to fatalities!
1.7	West of Sandiacre	Other	Helen Thompson	Response-01356	I think you fail to understand the importance of the Stoney Clouds area to local people - there is a very strong attachment to this just like the importance of Sycamore Gap to people in that area.
1.7	West of Sandiacre	Other	Helen whiteman	Response-00447	We are being bulldozed into this scheme by the labour government and their house building ideas with no thought for the local residents Once again they are being thoughtless about any one but themselves We do not need these houses Angela raynor wants them so the council jumps
1.7	West of Sandiacre	Other	IAN TAYLOR	Response-00972	I object to the proposed development which will damage the environment, increase pollution and add pressure to existing services such as schools and medical facilities. It will also cause significant traffic disruption to the area both during construction and if the houses are built. Notwithstanding the proposed Section 106 obligations to be imposed, there is simply insufficient space to alter the existing road system to accommodate this.
1.7	West of Sandiacre	Other	Isabelle Love	Response-00529	I am incredibly confused and concerned that this area has even been put forward for development. Sandiacre has recently just had a new build site off Longmoore lane, into an area that already has stretch or nonexistent facilities. The lack of awareness or compassion for residents is evident and feels like nothing more than a shameless attempt at yet more money for Erewash council. I'm frankly disgusted and sincerely hope that common sense prevails and is rejected by planning as much as it is rejected by the residents.
1.7	West of Sandiacre	Other	Jack McQueenie	Response-01823	Title? Wrong. Land earmarked is Due North of Sandiacre town centre.
1.7	West of Sandiacre	Other	Jacqueline Marshall	Response-01436	On a personal level I am at a loss with the reasoning behind this development. We need our green spaces for our mental wellbeing. We need trees to offset carbon footprints and to help keep towns and cities cool and act as a buffer to air pollution. It's no good ticking a box just to fulfill Government figures without looking at the bigger picture and the detrimental impact on landscape, loss of green spaces, and an increase in air pollution, This development should not be allowed under any circumstances.

This site, on derelict land behind Lidl, has undergone public consultation, been reviewed by a planning inspector, and was approved through a referendum, with broad community support. This alternative site would deliver a similar number of homes to the Sandiacre area but is far better suited to the community's needs and local infrastructure. Given the extensive process already undertaken, which included public input and scrutiny, I believe this site represents a much more appropriate and sustainable option for development than the currently proposed site. In light of this, I strongly urge the planning authority to prioritise this alternative site and reject the current proposal, which does not align with the outcomes of the Neighbourhood Plan process. 2. I find it difficult to accept that any councillor that has voted to support the scheme has actually visited the site, and taken time to assess properly the significant problems and issues it would cause. I have been made aware that there is a councillor who currently lives in the area and is supporting the Revised Strategic Plan. I find this, as a long-standing resident of Larch Drive, astonishing given the very obvious existing daily problems residents have to encounter and navigate. 3. Common sense would show that the proposed single site access is both too narrow, and only approached from a series of narrow, congested residential streets that have many blind right-angle bends which are totally unsuitable for HGV construction traffic. 4. As this portal does not seem to support the attachment of files, I will be submitting a series of photographs by email to supplement this objection, to demonstrate some of the key areas that I have outlined. 5. Overall, I regard it as absolutely disgraceful that the council is even considering this site for possible development, when perfectly acceptable brownfield sites are available. It has no redeeming features, and I object to the proposal in the strongest terms.
1.7	West of Sandiacre	Other	Janet Edwards	Response-01906	If building went ahead it would spoil a beautiful part of Sandiacre which is enjoyed by many.

This site, on derelict land behind the Lidl superstore, has undergone public consultation, been reviewed by a planning inspector, and was approved through a referendum, with broad community support. This alternative site would deliver a similar number of homes to the Sandiacre area but is far better suited to the community's needs and local infrastructure. Given the extensive process already undertaken, which included public input and scrutiny, I believe this site represents a much more appropriate and sustainable option for development than the currently proposed site. In light of this, I strongly urge the planning authority to prioritise this alternative site and reject the current proposal, which does not align with the outcomes of the Neighbourhood Plan process. 2. I find it difficult to accept that any councillor that has voted to support the scheme has actually visited the site, and taken time to assess properly the significant problems and issues it would cause. Common sense would show that the proposed single site access is both too narrow, and only approached from a series of narrow, congested residential streets that have many blind right-angle bends which are totally unsuitable for HGV construction traffic. 3. Overall, given the serious traffic congestion and safety issues, together with significant access issues, (plus the fact that the land is currently green belt and borders a nature reserve I regard it as absolutely disgraceful that the council is even considering this site for possible development. It has no redeeming features, and I strongly object to the proposal.
1.7	West of Sandiacre	Other	Joanna hardy	Response-01304	The state of the roads in sandiacre is already a major problem. Poor maintenance and heavy traffic have damaged the roads and little work is being done to rectify the problem. Construction traffic and increased traffic from new residents would increase this issue. Leading to more cost for the local council and more road work traffic and increasing road dangers for drivers.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Other	Joanne Johnson	Response-00765	The extra housing would increase the crime rate - for example in Sandiacre Jan 2025 - 63 crimes Feb 2025 - 51 crimes <a href="https://www.erewash.gov.uk/sites/default/files/2025-02/ca_sandiacre_conservation_areas_character_appraisal.pdf">https://www.erewash.gov.uk/sites/default/files/2025-02/ca_sandiacre_conservation_areas_character_appraisal.pdf</a> The neighbourhood would go even further downhill, we would need more policing, they struggle atm. Everyone I've spoken to, alot if people are against this development.
1.7	West of Sandiacre	Other	Jodie Shrive	Response-00601	The existing residents of the local area DO NOT want this to go ahead, we are fighting with absolutely everything that we have to put a stop to what has become a very corrupt, sly local government and shame on ALL OF YOU. Many of the residents in this area moved here for it's access to green spaces and it's peaceful environment and we can not believe that any government would want to destroy that. Forcing this development on us is making us angry, you are alienating the community and ruining our trust in local planning processes, local government and it's representatives. Everyone can see what you are trying to do here, you have tried to push through an entire development and worked hard to prevent us from knowing that you are actively trying to destroy our community. I'm not sure when Labour became more about a quick payday than it did anything else, but it's a great shame.
1.7	West of Sandiacre	Other	Joe Sells	Response-01924	I strongly object to the proposed development of 180 homes in this area. The scale of construction will significantly increase traffic congestion, strain local infrastructure & public services, & negatively impact the character & environment of our community. The planning should prioritise sustainable growth that aligns with the areas capacity & residents well being.
1.7	West of Sandiacre	Other	Jo Gerhardt	Response-01286	Quite simply' there are other options to build all these proposed houses and by just sticking some houses in an already densely populated area, next to a nature reserve, and on green belt land is definately not the answer. I fully support the anguish of many many people that live within the area opposing the development.
1.7	West of Sandiacre	Other	John whiteman	Response-00450	It is the labour government that wants these houses. Once again I am sure the council will be the labour governments poodles and roll over shame on you
1.7	West of Sandiacre	Other	Kathryn Martin	Response-00527	This is such a shame and very upsetting anyone would want to do this to sandiacre
1.7	West of Sandiacre	Other	Katrina	Response-00628	Water pressure on cloudside is already rather low, new systems would be needed to ensure the new houses aren't using the same pressure system.
1.7	West of Sandiacre	Other	Kelly Randall	Response-00591	According to the Sustainability Assessment, this site scores negatively overall and ranks ninth. Full disclosure of the assessment methodology and justification for proceeding with this site is requested.
1.7	West of Sandiacre	Other	Kim Helm	Response-00632	I have lived in Sandiacre 20+ yrs. we have renovated our house over the years. We had every stumbling block possible and projects turned down. We wanted a triple garage and we told there were certain places we couldn't have it because we would be parallel to a high way, one being the motorway although there was two fields in between, this now the proposed site of 180 houses!!
1.7	West of Sandiacre	Other	Kirk Moss	Response-00439	Access to the site does not meet legal requirements due to narrow entry points. Improving access would require the demolition of existing buildings, further impacting the community. Similar proposals have previously been rejected due to environmental and social concerns. Approving this application would contradict previous decisions and national planning policies such as the National Planning Policy Framework (NPPF), which only allows changes to greenbelt boundaries in exceptional circumstances ? which this development does not meet.
1.7	West of Sandiacre	Other	Lauren Freeman	Response-01562	We love where we live. I grew up in Sandiacre and feel honoured that my children are doing the same. I do not want to fear for their safety on the roads more than I already do and they should be able to get to and from school safely. My oldest daughter is 11 and will soon be at the age where she is going out with her friends unsupervised. I do not want to live in fear of her being involved in a traffic accident. We are so blessed to have such a Beautiful, unspoilt nature reserve on our doorstep which generations have enjoyed and hopefully still will for many more.
1.7	West of Sandiacre	Other	Lauren Young	Response-00522	Object
1.7	West of Sandiacre	Other	Lesley Bruce	Response-01397	I strongly object to this proposal. The Sandiacre Neighbourhood Plan agrees community objectives "To protect and improve the parks and other green spaces that are highly valued assets for local people". This proposal blatantly ignores this Plan and it's objectives. I am shocked that the Council is even remotely considering inflicting this on residents as the disruption on these older narrow roads which would need to be dug up to lay pipes, cables and facilities would be horrendous short term, and the stress on the current inadequate infrastructure would be detrimental to all long term when the full impact of the hundreds of extra residents is felt on schools, medical facilities, services, roads and infrastructure, plus the huge loss of a precious local asset and amenity. It is now well known that open green space is good for mental health and physical wellbeing. It is already a scarce commodity in this highly populated area,
1.7	West of Sandiacre	Other	Lesley Morral	Response-01920	I reject this proposal.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Other	Linda Castledine-Davies	Response-00850	This proposal is already having a detrimental affect on my health. I have a condition that is exacerbated by stress and I am already feeling the strain with symptoms returning. I have had two nightmares recently of heavy goods vehicles plowing through my bedroom wall which is situated right next to this proposed access route. This site is used by myself and many others for their wellbeing and to alleviate day to day stress the loss of this valuable pressure valve will impact us dramatically. We need green spaces and recreational areas. These developers show little or no innovation to the housing they erect cramming as many rectangular boxes together as they can and leave a sterile uninhabitable environment behind for animals, insects, birds etc. They have no interest in the environment and pay lip service to the ineffectual laws that have been laid down . This is their mission statement no mention of bio diversity they are more interested in interior design to snag buyers . "Our approach to selecting the right locations is always focused on upholding our continued commitment to the needs and requirements of local landowners, authorities, key stakeholders and local communities" No mention of existing residents either because they dont care about residents or wildlife or green belt its just easy money for them. As per your own commissioned report from Derbyshire Wildlife Trust "The local community The local nature reserve is close to residential neighbourhoods in Sandiacre with a population of several thousand in the locality. The site is the main area of public open space for recreation in the immediate locality and as such is used regularly by sections of the public" This applies to the proposed site too. I dont believe we were consulted or notified sufficiently putting a notice 3.5 miles away on a town hall that few have every visited is not sufficient notification are we expected to go to the town hall every single day just in case?
1.7	West of Sandiacre	Other	Linda Oscroft	Response-01927	Surprised the use of green belt land is even being considered when there is derelict dis-used land available.
1.7	West of Sandiacre	Other	LISA ANNE GILLIGAN-LEE	Response-00710	I ask that the Council focus instead on sustainable planning that protects Stoney Ground's green spaces and prioritises the wellbeing of its residents?present and future. I urge you to reconsider allowing any further urban development on this land. Our community values its green spaces?not just for what they are, but for what they mean to our quality of life, our environment, and our future. The land targeted for development is one of the few remaining green spaces in our community and I believe that this decision will have significant, long-lasting negative impacts on the environment, local infrastructure, and the quality of life for current and future generations. There are several underutilised brownfield sites that could support housing development without damaging green belt land. The Council should prioritise the use of these existing urban sites to meet housing needs while protecting natural landscapes.
1.7	West of Sandiacre	Other	Lisa Heppell	Response-00878	If houses are built on the area ,I believe fly tipping will be come a problem and the whole area will never be the same quiet place I grew up in .It is only a matter of time til other fields are built on ,I urge you for the sake of future generations not to build on it
1.7	West of Sandiacre	Other	Logan Fox	Response-00746	We love our area and the peaceful surroundings, don't take this away from us living here, it is simply unfair. This is causing stress for a lot of people living here and we should realise this. protect the area by keeping the open spaces and avoid increasing traffic with m ore cars which WILL result in accidents.
1.7	West of Sandiacre	Other	Lorraine Hands	Response-00534	To have the added volume of houses and traffic could also seriously affect emergency vehicles that could be called! Or refuge collection! On Moores Avenue we often have to wait for a small lorry to empty our bins as the regular lorry cannot turn into the road due to cars parked on Starch Lane!
1.7	West of Sandiacre	Other	Louise Harper	Response-01571	This green belt piece of land has been empty for a very long time, it should stay empty , there needs to be balance between housing and fields , use and improve all the empty housing across the borough , use the brown field sites instead of ruining something you cannot replace
1.7	West of Sandiacre	Other	Luke Hinchley	Response-00699	Many people see this greenbelt site as part of the surrounding areas beauty and it is as though it is a part of the nature reserve. The protections outlined in the proposal do not secure confidence that the green belt land of the nature reserve will also be converted to grey field in the future.
1.7	West of Sandiacre	Other	Malcolm Dillon	Response-00722	The recent 10 year development programme, for Sandiacre, made no mention of the proposed development. The 10 year plan was presented to every Sandiacre citizen as a consultation document. Provision was made for the provision of additional housing in Sandiacre on a brownfield site. I voted to accept the proposals made in the 10 year consultation document for Sandiacre. I did not, and do not, accept the proposal for 180 houses to be built on Sandiacre Greenbelt Land !
1.7	West of Sandiacre	Other	Malcolm Fox	Response-00215	The manner in which this entire process has been handled by the council has been nothing but disappointing and border line appalling. Having seen the one meeting at the council, it was made clear that this council simply wish to tick a box and ensure they are the council body that meets a housing target. The impression given by the council, in particular those that are pro development, use social housing and children living in poverty as plausible reasons to move forward. With all due respect, this development will not solve that! The local infrastructure and supporting services cannot support this suggested development. We are not against housing and understand the importance, but why this area when others are available? Why the lack of clarity, why the stealth meetings and lack of communication with residents. We have email, post, door knocks, text messages all available, yet the council have deliberately chosen to move forward, almost in secret, and this proves that this development is one they wish to move forward with in order to fulfil their professional desires. The people put faith in the those elected, and all they have proven is their lack of respect for the people. On the other hand, the local councillors who understand the negative impact, speak with true detail and relevant stats on how this will affect all. Why is it that when it is time to vote, we get door knocks and emails and letter asking for support? Why then, do we hear from those wanting our support? But in this instance we get no communication? The entire population living in this area is against the development due to the negative impact this will have on all! We can name all the issues this will result in - traffic, further service pressures, removal of the green belt and wildlife impact.. yet the excuse used will be 'we have to meet our target'. Can the council look at the impact on those already living here, those that pay their taxes every month, those that should be heard and are clearly being ignored.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Other	Mark Gough	Response-00888	We have heard , as well as others that sewage is pumped down at night from the top Larch drive area . Because it backs up . If this is true then surely building cannot go ahead due to the lack of drainage already . This would be an health issue . I would propose that environmental health to check this out before building .
1.7	West of Sandiacre	Other	mark skelton	Response-01341	The homes and roads leading into the proposed site really can't cope with the traffic in and out. Already very busy and dangerous some times of the day. Speeding up the narrow road of Beech ave. Lots of parked cars during peak times. Young families with children crossing the road and walkers heading towards the nature reserve . Please reconsider this site for lots of reasons. We want to stay living in the area as we've lived here all my lives. Both our families live on the street and if this becomes busier will be looking to leave the area for somewhere quieter but really would like to stay here. Beech ave really can't cope with another possibility 200+ vehicles in and out the estate, especially during school time and home time. Noise and pollution would increase and also risk to life. Not the right site for this kind of development.
1.7	West of Sandiacre	Other	Marta McManus	Response-00646	We need to stop turning green spaces into housing developments. There are plenty derelict buildings or old factories which are in my opinion better option for development than green space which is used and loved by people and wildlife.
1.7	West of Sandiacre	Other	Martin Driver	Response-01387	DONT DO IT. DO THE RIGHT THING FOR LOCAL PEOPLE! NOT WHAT THE PUPPETS AT WESTMINSTER ORDER YOU TO DO!
1.7	West of Sandiacre	Other	Martin Hardy	Response-01413	I would question the viability of the logistics of getting construction materials to the proposed site. To access the site you must drive around several 90° bends which already have access issues for large delivery vehicles. Also maneuvering large HGVs would put excessive strain of the roads, turning a large vehicle around a sharp bend put extra load on the edges of the road and would cause damage to the road and possibly structural damage to houses already built.
1.7	West of Sandiacre	Other	M A Simpkin	Response-01882	Where have all the shops gone? The factories? Nothing Now. Just finished building all those houses on Longmoor Lane.
1.7	West of Sandiacre	Other	Matt Hallam	Response-00476	My house is 1 affected by the new build application on the current horse field and my house backs on it. I have been living here for 33 years which both my parents, myself and my children have lived here so this is deeply distressing especially as the view is second to none and my auntie next door has lived there for 55 years and has had the horses there since then. If we ever moved, we wouldn't be able to get the views like this for anywhere near our house prices Firstly I was understanding that around 25-30 years ago, Westermans owned the field. They tried to build on there but had an application rejected. 1 of those reasons was that they tried to buy houses 31 and 33 chestnut grove (I live at 33) because they wanted to build a road there as larch would be to much traffic. planning was accepted for 180 houses to be built behind lidl but then was changed to behind me. This is greenbelt land and shouldn't be anything else. This is the first time I have wanted to move and it's Deeping stressing and upsetting to us all
1.7	West of Sandiacre	Other	Maxine Sutton	Response-00471	Every time I drive through the old Stanton and Staveley site I wonder why so many huge warehouses have been allowed to be built there. As previously mentioned Sandiacre really can't cope with much more traffic, especially heavy lorries. Why wasn't this land used for a solar panel farm? There are only two houses which might overlook the large site, it is conveniently flat, and there are already mature trees that form a screen from the road. This was a very sadly missed opportunity to help with green power generation and protect the environment. Please try to make a better decision this time.
1.7	West of Sandiacre	Other	Melanie	Response-00586	There is no clear evidence that local infrastructure?including roads, schools, healthcare, drainage, and public services?can accommodate the additional demand generated by this development. Without concrete commitments and a detailed delivery plan, the proposal is unsustainable. The proposal appears to conflict with multiple aspects of the Sustainability Assessment Criteria. Many critical factors?including environmental impact, infrastructure capacity, and community needs?have not been satisfactorily addressed. It is unclear how the site has been assessed as sustainable or how it aligns with the Council?s stated objectives. This will be the death of Sandiacre as we once knew it. This is not progress. It?s a box ticking exercise that will destroy Sandiacre especially once the lorry park is in full swing. You should be ashamed.
1.7	West of Sandiacre	Other	Melanie Caumont	Response-01272	Subject: Formal Objection to Strategic Policy 1.7 ? West of Sandiacre (Land West of Cloudside) Dear Sir/Madam, I am writing to strongly object to the proposed residential development of 180 homes on greenbelt land west of Sandiacre (Strategic Policy 1.7), directly behind my property. This land is the last remaining portion of greenbelt in our area and provides critical environmental, infrastructural, and community value. The Council should explore more suitable brownfield or under-utilised land before considering greenbelt development. The industrial estate behind Lidl in Sandiacre represents a far more appropriate site for new housing and infrastructure, without the extensive ecological and community costs associated with building on greenbelt. In summary, this proposal is poorly conceived, environmentally damaging, and infrastructurally unsustainable. It fails to meet the needs of existing residents while compromising the character, safety, and wellbeing of the community. I urge the Council to reject Strategic Policy 1.7 and protect this vital greenbelt land for future generations.
1.7	West of Sandiacre	Other	Michael Anderson	Response-00461	We are living in a more ageing community and more consideration should be given to this. More traffic on narrow roads surely is not the answer in a heavily populated town that was planned nearly a century ago.
1.7	West of Sandiacre	Other	Michael Darnell	Response-00648	This would be a major planning mistake to allow to development on such a much loved area of Sandiacre. Over the years development has been nibbling away on this area and enough is enough. Use brown field sites and get homes that are unutilised back in use before thinking of using green fields.
1.7	West of Sandiacre	Other	Michael Ocroft	Response-01926	Surprised the use of green belt land is even being considered when there is derelict dis-used land available.
1.7	West of Sandiacre	Other	Misty McGrath	Response-01556	There are other pieces of land that would better serve for housing. The piece of land adjacent to Lidl for example. There are also numerous empty properties/buildings that would provide the good quality housing that is so desperately needed. Smaller non-profit developments would provide a better balance for existing residents and new residents. Even smaller numbers of properties on the land identified, with an emphasis on sustainable development would be beneficial.

1.7	West of Sandiacre	Other	Mr John Hickingbotham	Response-01431	1. Preference should be given to existing brownfield sites rather than causing the irreplaceable loss of Green Belt land which currently soaks up storm water and helps to prevent flooding. 2. With alternative brownfield land already earmarked for almost 2,000 homes at the former Stanton Ironworks redevelopment area, which is less than one mile away on the opposite side of the M1 motorway, why is such an ill-conceived plan for building 180 homes on such an inaccessible plot land off Larch Drive even being considered?
1.7	West of Sandiacre	Other	Mrs Froggatt	Response-00449	I have been a resident of Sandiacre for over 70 years and was always a lovely safe, peaceful and friendly village. However these last few years the council appear to be hell bent into making it an area of discontent from its residents.
1.7	West of Sandiacre	Other	Mrs M Jones	Response-01884	There are so many other reasons also where are the kids going to play. More fly tipping its disgusting rubbish being dumped around the lanes and never cleaned up unless the locals do it themselves.
1.7	West of Sandiacre	Other	Mrs Shani Wainwright	Response-00754	Approving such a project goes against national and local commitments to fight climate change, protect green spaces and promote sustainable developments. Ref Sandiacre Neighbourhood plan policy 1. Sustainable development... It is not on brownfield land, risks harming biodiversity near Stoney Clouds LNR, and affects the rural edge of the green belt. Ref policy 2. Protecting and enhancing heritage assets.... The site borders the Cloudside conservation area, and it's scale & setting could well damage protected views and heritage character. This plan disregards the views of current residents completely, many of whom moved to the area for its access to green space and peaceful environment. So ref Policy 5. Local green spaces... Stoney Clouds is protected as a local green space. Development next to it could harm its tranquility, wildlife and public value. Ref policy 7a. Protecting biodiversity... The site is right by a local wildlife site. Proposals must show 10% biodiversity net gain, but this one risks habitat loss and fragmentation. Ref policy 12. Pedestrian & cycle movement... Poor access, weak connectivity and car dependence go against the aim for active, sustainable travel. Forcing this development through risks alienating the community and eroding trust in the local planning procedures. Sandiacre is already suffering enough with the Stanton Park New development..... do not make our residents suffer further.... our quality of lives should matter.
1.7	West of Sandiacre	Other	Mrs Sheila Hickingbotham	Response-01338	The site has a single point of access through Larch Drive which is a narrow residential street. This could lead to a conflict between motorists and pedestrians as well as commercial and emergency vehicles. It is hard to see how this development will not have an unacceptable impact on highway safety and neighbouring properties. Sandiacre Parish Council has produced a Neighbourhood Plan which appears to have been overlooked in this instance.
1.7	West of Sandiacre	Other	Nasim Rashid	Response-01103	Too small a site for so many houses. Potential danger at school at just times. Other brown belt sites in area should be considered that will have less impact on the quality of life if the residents and with better access via road and local services that potentially will benefit local economy. Fumes from cars will be an added negative to an area of local natural beauty with a connection to the past and local people
1.7	West of Sandiacre	Other	Oliver Marriott	Response-00679	I've lived here all my life. I've been part of both sandiacre football club, sandiacre cricket club, plus cubs and scouts held in the rooms on Stanton road. What I love is the fact there are two parks within walking distance, plus the nature reserve. We use it a lot as I go walking with my grandparents and parents. We use it in the winter for sledging. It's always been part of my life. I think the extra traffic and the Lorry's would be quite a worry as it would be more dangerous to cross the roads, plus it would make it a lot busier making it hard to get anywhere or for people to visit, I think I would feel quite cut off and I would feel very anxious about how this would affect me and my mental health. I really don't want this project to go ahead plus the extra stress and noise while I'm doing my exams is something I'm extremely worried about.
1.7	West of Sandiacre	Other	Pamela Bassett	Response-00608	I find it hard to believe people would choose to live right next to the motorway.
1.7	West of Sandiacre	Other	Paul Randall	Response-00131	On the Sustainability Assessment Criteria, exactly how many of the questions need to be answered ?negatively? before you actually consider the proposal as being unsuitable? I find it difficult to score any of the criteria positively, so am curious as to how you've reached a positive decision. The scoring appears to total -5 and the proposal is ranked 9th. Please can you share the rationale as to how each of the criteria have been scored specifically for Sandiacre and how this results in a positive decision? The Local Neighbourhood Plan was recently voted through. This contains a specific requirement to protect green spaces. This proposal is therefore in direct contravention of the Neighbourhood Plan. Have the council done a full environmental and infrastructure assessment? This would immediately show why this development cannot go ahead, and that stopping further work at this stage would save the council a significant amount of money.
1.7	West of Sandiacre	Other	paul wheeldon	Response-00582	A very ill thought idea which seems to be politically motivated
1.7	West of Sandiacre	Other	Phil Creasey	Response-01342	Access for emergency vehicles needs to be considered, its already difficult to navigate the roads due to the bends and narrow areas as well as the multitude of cars parked on street.
1.7	West of Sandiacre	Other	Philip Reed	Response-01449	I'm all for building houses. I build infrastructure for a living but to build on the suggested greenbelt land in Sandiacre makes no sense. The access to Cloudside is rubbish. I can only presume that those proposing this work haven't made the commute through Sandiacre to what would be the site entrance
1.7	West of Sandiacre	Other	Rachel Skelton	Response-01241	This development would be disastrous for the local area and I am shocked that this location has been chosen over much more suitable brown belt land with better transport links in the local area.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Other	Rebecca Longmuir	Response-00253	After the shamelessly poor ?meeting? in march where residents were invited to have an opinion/voice. On massive changes proposed in their area affecting them. This was a lie!! No council members allowed the public into a public meeting. Our voices, concerns, worries, went unheard, unanswered. Our voices silenced by the very council we pay for, the council that is meant to listen, help and support its residents. All the member who voted in favour of this proposal. If you're so concerned with housing. Maybe you should open up your homes to people in need?! Build in your back gardens?..
1.7	West of Sandiacre	Other	Richard Jenkins	Response-00264	This development would lead to a potentially unacceptable strain on local infrastructure, such as schools, roads, and emergency services, which are not equipped to handle an influx of new residents. What studies has EBC carried out with regard to local infrastructure capacity and the potential impact of this proposal?
1.7	West of Sandiacre	Other	Richard Marriott	Response-00675	Personal - Myself and my wife have lived in Sandiacre on Stanton road for 22 years. We have raised our two children here (now 20 and 15). We both grew up in a village (Hemington and Breaston respectively) and this is what first attracted us to Sandiacre. We love Stoney clouds, we can recall coming as children and now we take our own children. It's part of our community, it's part of our life. I'm not sure you realise what impact this will have on our village and how it will impact us all personally. Mental health - The extra traffic, noise and people are going to increase the pressure on an already overloaded area. This in turn is going to have a massive impact on our mental health and create a lot of extra stress. Logistics is going to become impossible making it hard for us to not only go anywhere but for people to visit us. This can become very isolating and not the best environment to raise a teenage son. I strongly object to this proposal for ourselves, our family, our future. Please, please reconsider this proposal, I cannot express to you the negative impact it will have on our community. Particularly in this time of financial uncertainty community is the one resource we have to pull together and make life better. If you do this you will be destroying the heart of this special place.
1.7	West of Sandiacre	Other	Richard Naylor	Response-00066	You don't care about removing green belt land from Sandiacre. This is typical of Labour councillors and government. You do realise that when it's gone then it's gone.
1.7	West of Sandiacre	Other	Roger Day	Response-00023	I have not seen any proof that new homes are required. We keep hearing that there are 5000 people on the waiting list for houses but this does not mean the housing stock does not exist. They aren't exactly living on the street are they, so where are they? We hear about temporary accommodation but why can't that be made permanent? Do a better job of getting empty property into use again. Send the illegal boat people currently in the hotel on Bostocks Lane back so they can apply for asylum in the correct manner.
1.7	West of Sandiacre	Other	Ruby Sharp	Response-00886	I only heard about this development from the community, not the council. It was rushed and many residents do not know about this. The cost of upkeep for this development from the council will prevent money going to more important causes elsewhere such as Sandiacre Scout Group and our green spaces.
1.7	West of Sandiacre	Other	Sally Davies	Response-01294	Building on this area will be detrimental to our mental health, with lack of countryside to enjoy. Sandiacre has very poor facilities - too many barbers, hairdressers and nail bars. A community centre is desperately needed.
1.7	West of Sandiacre	Other	Sam Fleck	Response-00821	under other: I understand that in the appendix to the local Neighbourhood Plan, an alternative housing site has already been proposed. This site has undergone public consultation, been reviewed by a planning inspector, and was approved through a referendum, with broad community support. This alternative site would deliver a similar number of homes to the Sandiacre area but is far better suited to the community's needs and local infrastructure. Given the extensive process already undertaken, which included public input and scrutiny, I believe this site represents a much more appropriate and sustainable option for development than the currently proposed site. In light of this, I strongly urge the planning authority to prioritise this alternative site and reject the current proposal, which does not align with the outcomes of the Neighbourhood Plan process.
1.7	West of Sandiacre	Other	Shannon moss	Response-00454	The current entry point to the site does not meet legal requirements for development access due to its narrow constraints. Expanding access would require demolishing existing buildings, further disrupting the community and violating planning policies. Previous Planning Rejections: Similar proposals have been rejected before on the grounds of environmental and community impact. Approving this development would contradict previous rulings and demonstrate an inconsistency in planning policy. Precedent and Policy Violations The UK government has consistently reaffirmed its commitment to protecting greenbelt land. The National Planning Policy Framework (NPPF) states that greenbelt boundaries should not be altered unless in exceptional circumstances, which this development clearly does not constitute. Allowing this project to proceed would set a dangerous precedent for further greenbelt erosion across the country. The footpaths that connects clousaide road to the fields will become a human footpath, creating more antisocial behaviour similar to that of which we are seeing a rise of at the bottom park next door to the library
1.7	West of Sandiacre	Other	Sharon Grant	Response-00219	When it snows up here, most cars can't get down and if they can, they then can't get back up. Many people have to abandon their vehicles. or people park on the road further down; with 180 houses built that would be utter chaos. Also with the housing development on Rushy Lane, it's going to be utter bedlam on the lane. It's often back up right past Friesland Farm at rush hour.
1.7	West of Sandiacre	Other	Sheila	Response-00587	This development represents an unjustified incursion into Green Belt land and would place undue pressure on already strained local infrastructure. There are more appropriate brownfield sites available, and until these are fully explored, development on this site should not proceed. I respectfully urge the Council to reject this proposal and uphold its commitment to sustainable development and the protection of our valued Green Belt. Once gone, it's gone for good. We should be preserving Sandiacre not adding to its destruction for future generations.
1.7	West of Sandiacre	Other	Sophie	Response-00472	It would be a real shame to try and extend sandiacre in this way with such a large amount of extra housing. The local services are all very much at capacity at is. Let alone the devastating effects this will have on the wildlife. There has also been a recent rise in flooding throughout Sandiacre, and this would surely cause more issues with that. There is a lot of history to the area that should be left kept as it is. I hope you reconsider this.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Other	Stephen Davies	Response-00214	I believe Erewash as a whole has extensive brownfield sites as indeed does Sandiacre itself which are surely more appropriate, sustainable and in line with national policy? I believe that in the appendix to the Neighbourhood Plan an alternative site has already been proposed which would deliver a similar number of homes but is far better suited to the community's needs and local infrastructure. The site in question is to the side of Lidl Sandiacre and has broad community support and has been reviewed by a planning inspector
1.7	West of Sandiacre	Other	Steve Bilbie	Response-00285	I'm am very sad to see this site suggested and hope the council will do the right thing and remove it from the list. I speak as a representative of Sandiacre, and a retired Builder and know this is an unsuitable plot for development. Steve Bilbie. Ward Councillor for Sandiacre.
1.7	West of Sandiacre	Other	Thomas Ilett	Response-01088	Paragraph 98 of the NPPF states 'access to a network of high-quality open spaces and opportunities for sport and physical activity is important for the health and well being for communities?'. Stoney Clouds Local Nature Reserve, part of the Sandiacre Cloud Conservation area, is a key open space for the Sandiacre community. Exposing it to increased risk of surface water flooding limits access to it as an open space for the Sandiacre community, reducing their health and well being and contravenes the NPPF.
1.7	West of Sandiacre	Other	Tony Weston	Response-00990	Mental and physical health benefits provided by access to green spaces, which will diminish if such areas are developed. Studies show that access to green spaces is crucial for mental health, and this development will reduce the recreational areas available for families and individuals to enjoy both within and visitors alike. The role green spaces play in combating climate change by absorbing carbon dioxide and reducing heat islands in urban areas. Conversion to housing could reduce these benefits. Many affected residents are not adequately informed about the potential impacts of the development this proposal was rushed through without thought for the town. New developments often lead to additional upkeep costs for local councils or residents, which can strain public resources that might otherwise go toward community services. Often, the necessary infrastructure such as roads, sewage, and public transport needs to be developed first, which can be financially burdensome and delay the project indefinitely
1.7	West of Sandiacre	Other	Try church	Response-00033	To lose this last piece of green belt would be detrimental to the people of sandiacre and I would urge the council to think twice before allowing such destruction especially as it goes against the very pledge that the Labour Party gave in the election manifesto.
1.7	West of Sandiacre	Other	Victoria Marriott	Response-00674	Personal - Myself and my husband have lived in Sandiacre on Stanton road for 22 years. We have raised our two children here (now 20 and 15). We both grew up in a village (Hemington and Breaston respectively) and this is what first attracted us to Sandiacre. We love Stoney clouds, we can recall coming as children and now we take our own children. It's part of our community, it's part of our life. I'm not sure you realise what impact this will have on our village and how it will impact us all personally. Mental health - The extra traffic, noise and people are going to increase the pressure on an already overloaded area. This in turn is going to have a massive impact on our mental health and create a lot of extra stress. Logistics is going to become impossible making it hard for us to not only go anywhere but for people to visit us. This can become very isolating and not the best environment to raise a teenage son. I strongly object to this proposal for ourselves, our family, our future. Please, please reconsider this proposal. I cannot express to you the negative impact it will have on our community. Particularly in this time of financial uncertainty community is the one resource we have to pull together and make life better. If you do this you will be destroying the heart of this special place.
1.7	West of Sandiacre	Other	Wayne Major	Response-00408	I understand that in the appendix to the local Neighbourhood Plan, an alternative housing site has already been proposed. This site has undergone public consultation, been reviewed by a planning inspector, and was approved through a referendum, with broad community support. This alternative site would deliver a similar number of homes to the Sandiacre area but is far better suited to the community's needs and local infrastructure. Given the extensive process already undertaken, which included public input and scrutiny, I believe this site represents a much more appropriate and sustainable option for development than the currently proposed site. In light of this, I strongly urge the planning authority to prioritise this alternative site and reject the current proposal, which does not align with the outcomes of the Neighbourhood Plan process.
1.7	West of Sandiacre	Other	William Marriott	Response-00676	I've grown up here and lived here my whole life. I cannot imagine not having access/ restricted access to Stoney clouds. I am currently serving in the Royal Navy, I really value my time off and Stoney clouds is very much part of my down time. I have also been a member of both sandiacre football club and sandiacre cricket club. At a younger age I was in Scouts and later explorers before going on to my career. Really valued being part of these clubs and the community I've forged lifelong relationships that I owe to these clubs. These are such vital parts of our community your proposal threatens to affect these precious commodities. With the increased traffic and disruptions caused by the extra vehicles and lorry's there is a real risk people will stop using these facilities. This would be a huge loss to the village and community impacting many peoples lives. I urge you to reconsider this proposal, the access isn't viable, the roads aren't viable, the project isn't viable.
1.7	West of Sandiacre	Road Safety	Aaron Locksley	Response-00711	I worry about my children playing on the street, which is a key reason we purchased a property in a quiet neighborhood, with all the extra traffic about.
1.7	West of Sandiacre	Road Safety	Adam Shooter	Response-01925	The proposed access roads are steep and not wide enough for the construction proposal nor for the increased traffic when complete. I expect accidents when snowy/icy with this proposal.
1.7	West of Sandiacre	Road Safety	A Harby	Response-01684	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Alex Corns	Response-01151	Road safety will be compromised. How on earth will all the construction traffic get upto the proposed development with the amount of traffic/parked vehicles already on the road and when the children are coming out/going to school I believe it is an accident waiting to happen.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Alex Lord	Response-00946	Likewise: The roads around there already have parking issues and are tight to maneuver through [Stanton, Beech & Coronation] adding an entire housing estate that would have to pass through these roads, will increase the dangers of the road as people dart in and around parked cars, near a school, & school walking route.
1.7	West of Sandiacre	Road Safety	Alice Cooper	Response-01721	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Alice Ilett	Response-00571	The roads are dangerous already especially around school times. More houses will lead to more chaos and I'm really concerned that it's only a matter of time before this leads to terrible accidents. I'm not sure how the lorries will get anywhere near the site with limits one side and a school the other. We already can't cope with the traffic we have in the area.
1.7	West of Sandiacre	Road Safety	Amanda Leech	Response-01625	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Amy Skinner	Response-01447	Increased traffic congestion both during and after the works would significantly increase the safety of the roads in the area especially for the many children and elderly who live here. Currently some of the streets such as Larch Drive are relatively quiet but this would change dramatically with heavy vehicles going in and out of the site. This would most certainly make the roads less safe.
1.7	West of Sandiacre	Road Safety	Anastasia Anthony	Response-01865	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions. Highways Act 1980 Section 41: Imposes duty on local authorities to maintain safety. With the primary school + post office it is difficult and dangerous as it is, nevermind having to accommodate an additional 100+ vehicles.
1.7	West of Sandiacre	Road Safety	Andrew Bishop	Response-01186	The volume of traffic, especially HGV's, at all times of day and night is excessive for a residential area and needs to be reduced, not increased with additional housing - the current road structure cannot cope.
1.7	West of Sandiacre	Road Safety	Andrew Davies	Response-01295	See above the junctions between Stanton Rd and Rushy Lane also Stanton Rd and Town St could become more hazardous, the latter especially can already be problematic.
1.7	West of Sandiacre	Road Safety	Andrew Marvin	Response-00255	Massive concern regarding Road safety The roads are not wide enough So many parked cars already on the road and pavement, driving into coronation Road and Cloudside Road ?.. madness !!
1.7	West of Sandiacre	Road Safety	Andrew Meadwell	Response-01654	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Andria Nyilasi	Response-00672	The volume of traffic this site would create would overwhelm the local area. There is only one proposed access route which would put an immense strain on the surrounding roads, particularly during term time and rush hour. The local schools are minutes away and are already experiencing extreme traffic congestion. This would exacerbate the problem and cause danger to the students and elderly residents.
1.7	West of Sandiacre	Road Safety	Andy Martin	Response-01761	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Angela Whitehead	Response-00544	In a tight housing development where cars park wherever they can this inly increases traffic accidents. I'd also be concerned about access for emergency vehicles
1.7	West of Sandiacre	Road Safety	Anne Butler	Response-00385	The on road parking leading up to the site means there is poor visibility for a motorist negotiating the roads. Children on the pavements cannot be seen. Poor parking often means people have to walk in the road. Increased traffic will mean an increase in likelihood of accidents.
1.7	West of Sandiacre	Road Safety	Anne Castledine	Response-00499	As a pedestrian difficult as cars are often parked on pavements, if they didn't roads would be at a standstill.
1.7	West of Sandiacre	Road Safety	Anne Jenkins	Response-00350	There are many families living in the area and the possibility of more traffic particularly construction traffic is very dangerous
1.7	West of Sandiacre	Road Safety	Annette Jones	Response-00961	Road safety is getting worse and an accident waiting to happen on Stanton Road especially during school and football club events. Road safety awareness is not a priority in schools now and lollipop people are rare to see now. The knock on effect is that it causes drivers to speed up the neighbouring roads and not taking care posing even more risk to safety. Parking on the pavement is normal because not enough parking spaces and people don't want to risk their car being damaged so also a hazard to pedestrians and people with limited mobility. Emergency services have had difficulty accessing certain parts of the roads and parking close to the actual address. Cyclists have to take into account the current state of the roads which is getting harder and extra traffic. Don't see the cycling proficiency tests now near the school as it's not safe.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Ann Harrison	Response-01602	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Anthony Pearson	Response-01760	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Anthony Smedlewick	Response-01877	There are too many bends on these roads around here & are dangerous because of the school.
1.7	West of Sandiacre	Road Safety	Antony M Ingram	Response-01626	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	April	Response-00469	The proposed development poses serious concerns regarding road safety. A significant population increase will lead to more vehicles on the road, amplifying the risk of traffic accidents, especially in areas not built to handle high volumes of traffic. Narrow roads, limited pedestrian crossings, and insufficient traffic control measures could become hazardous, particularly for children, the elderly, and cyclists. Without proper investment in safety infrastructure?such as sidewalks, street lighting, and speed regulation?the likelihood of collisions and injuries will rise, putting both new and existing residents at greater risk.
1.7	West of Sandiacre	Road Safety	A R Gregory	Response-01918	
1.7	West of Sandiacre	Road Safety	Arleen Corns	Response-01146	As mentioned previously, road safety is compromised because of the volume of traffic and where people park, especially at school opening/closing time. People are literally pulling out blind as vehicles park on the pavement. I once witnessed a vehicle try to reverse back up the hill on Beech Avenue because a large vehicle was struggling to get through and it hit another parked car on the street.
1.7	West of Sandiacre	Road Safety	Awson Wheldon	Response-01649	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Barbara Michell	Response-01787	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Barbara Warton	Response-01886	Only a matter of time before a pupil from Freizlands School gets run over & killed.
1.7	West of Sandiacre	Road Safety	Barry Partridge	Response-01778	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Ben Hollins	Response-01651	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Ben Snowdon	Response-00428	The roads are not wide enough for cars to pass and cars often drive on the pavements to get past nearly running me and my children over
1.7	West of Sandiacre	Road Safety	Bethany Oakes	Response-00960	During pick up time, Stanton Rd and Rushy Lane are already hazardous, they cannot support any more vehicles without compromising safety.
1.7	West of Sandiacre	Road Safety	Beverley Gardner	Response-01692	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Beverley Green	Response-01686	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Bill Hartley	Response-01696	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Bill Meadwell	Response-00864	The roads leading from the proposed development are used as walking routes by children going to and from school. It is also a very popular dog walking route. Adding to the number of vehicles using them on a daily basis will inevitably lead to more danger from road traffic accidents. The junctions on these roads are narrow with visibility often hampered by parked vehicles. The construction vehicles would be cause extra danger when turning into these roads and will need to mount the pavement in order to manoeuvre round the junctions. They will also further destroy the surface of the roads creating even more potholes making a trip hazard for pedestrians and possible damage to cars.
1.7	West of Sandiacre	Road Safety	B T Duke	Response-01900	Roads not suitable for HGV's.
1.7	West of Sandiacre	Road Safety	B T Keen	Response-01735	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	c/o The Equalised Club	Response-01603	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Callum binnall	Response-00460	If this was to go ahead where would the new roads be built? What would happen to stoney clouds..
1.7	West of Sandiacre	Road Safety	Caroline Driver	Response-00618	During school start and finish there is dangerous parking, roads reduced to single file. It is already dangerous for motorists and pedestrians often having to edge out blindly before any extra vehicles. The bus gets stuck regularly with the driver honking their horn and knocking on doors. The additional congestion that Stanton park will already cause on the main roads to the motorway will already leave us gridlocked in the estate and the queues back up into the estate causing hazards to pedestrians crossing between cars. My cat got run over and killed last year. Volume of traffic important as roads are twisted, VERY narrow and blind corners (exacerbated by park cars from school and football club) creating little visibility, especially hazardous to the many children living on the estate.
1.7	West of Sandiacre	Road Safety	Carol Marshall	Response-00736	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Carolyn Hallam	Response-00489	Large HGVs will not be able to get up to the site. People will be forced to park on pavements causing danger to our many elderly and children.
1.7	West of Sandiacre	Road Safety	Catherine Greenaway	Response-00429	Beech Avenue is already treated like a race track, the extra traffic will make this worse and dangerous for the residents.
1.7	West of Sandiacre	Road Safety	Catherine Richardson	Response-00531	The area is adjacent to a nature reserve frequently used by many dog walkers and pedestrian walkers. The access near Larch Avenue would become dangerous for these people. Also Cloudside road is already tricky to access and would become so much more dangerous. Chestnut Grove would become a rat run for traffic trying to avoid this so would also become dangerous for pedestrians
1.7	West of Sandiacre	Road Safety	Charlotte Fry	Response-00583	As said before, roads are already narrow from parked and there is bound to be more accidents of people getting hit from cars and buses trying to drive by.
1.7	West of Sandiacre	Road Safety	Charlotte Hunter	Response-01376	This is also a route for young families that children use to get to school as well as access to nature reserve with higher risk of accidents happening due to the amount of people coming in and out of the road at the start and end of school day.
1.7	West of Sandiacre	Road Safety	C Holmes	Response-01620	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Chris Hume	Response-01373	Volume of traffic on the estate at busy times makes it difficult and dangerous with all the parked cars to pass.
1.7	West of Sandiacre	Road Safety	Chris Jones	Response-01718	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Chris O Connor	Response-01641	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Christian Rearson	Response-01763	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Christine Anderson	Response-00484	This is already a problem area as we have the Cloudside school, Sandiacre town football club all vying for parking on a very small busy road. Extra children from the 180 new houses will make this even more dangerous and difficult.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Christine Gough	Response-00578	Road safety is a huge issue , people can't see the road with all cars parked on Stanton Road, there is a school on there and the amount of cars used each day is a problem and will only get worse with more houses built . There will be a serious accident one day . Beech Ave is a nightmare to get out off , when you drive down you cannot see when pulling out due to the amount of cars parked on Stanton Road , I have already had a car bump into me whilst pulling out . A child or infant anyone can get injured with the amount of traffic . There's no road crossing and you would not see them anyway if there was! There's cars parked all up Beech Avenue, blocking buses . Nightmare for emergency vehicles to get up , they would have a job and of course that would endanger lives more !
1.7	West of Sandiacre	Road Safety	Christine Ridgway	Response-00465	I worry in the road safety aspect, due to it already being a busy area and struggling to cross the roads. If proposed housing development goes ahead it will make it worse.
1.7	West of Sandiacre	Road Safety	Claire binnall	Response-00459	The road is already too busy and narrow this is near to a local primary school which already served by a road that should be one way as its dangeroud
1.7	West of Sandiacre	Road Safety	Clare Green	Response-01751	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Cole Hawkins	Response-01714	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Colin Cox	Response-01716	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Colin Marriott	Response-00686	As in the previous comment an increase in traffic movement increases the risk of accidents especially past either Cloudside Academy or Friesland school
1.7	West of Sandiacre	Road Safety	Corrina loosemore	Response-00589	As before
1.7	West of Sandiacre	Road Safety	Courtney Bennett	Response-00593	The roads in the area are already dangerous with no or very little safe pavement / paths. There is already a danger to the public because of this and this is going to increase the footflow as well as increase the chance of potential accidents and deaths. Increased traffic volumes, improper footpaths, crossing spaces, overgrown & damaged footpaths meaning increased chance of accident.
1.7	West of Sandiacre	Road Safety	Craig Freeman	Response-01561	It is already very congested to drive anywhere towards Larch Drive for the handful of cars that have to go this far back from Stanton Road. Increasing the volume of traffic these access roads would be dangerous and cause bottlenecks for all users. Often cars are already frequently driving onto pavements to avoid blockages and this will only increase causing singinifacnt danger to pedestrians and frustrations to drivers.
1.7	West of Sandiacre	Road Safety	Craig Richards	Response-01638	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Craig Thims	Response-01765	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Cristina Jenkins	Response-01588	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	C Thompson	Response-01634	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Daniel	Response-00545	Further to my comments on traffic, the blind corner and kerb parked cars are a really problem when considering the volume of traffic you are insisting upon
1.7	West of Sandiacre	Road Safety	Daniel Downes	Response-01630	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Daniel Hands	Response-00057	At the bottom of the estate is Cloudside junior school, at the is Friesland comprehensive. These area and the surrounding roads are an accident waiting to happen, with cars parked on pavements, blind bends, turning spaces, double parked and/or blocking residents access and egress to their properties. The number of vehicles trying to access the area often creates gridlock and creates increased risks for both pedestrians and drivers alike as both are put under more pressure due the standoffs created. It is not unusual for drivers to mount and drive on the footpath simply to relieve the stalemate in traffic. To further increase the number of vehicles on and off this estate is not only dangerous, but also a further frustration for residents who battle these streets on a daily basis
1.7	West of Sandiacre	Road Safety	Danielle Harrison	Response-00568	Cloud side school congestion at drop-off and pick-up times makes Stanton Road impassible. If you extend the estate, with more families accessing this education provision, the local roads will become more hazardous.
1.7	West of Sandiacre	Road Safety	Daniel Naylor	Response-00680	The planned access to this proposed site is an absolute non starter. working in the construction industry, I have vast experience what transport is required to complete this development. The tight corners and small roads would make delivering materials and plant to this site near impossible making everyday life for residents along this route a living nightmare. I have no confidence the integrity of the roads could be maintained due to the weight of daily industrial traffic whilst the long drawn out development would take place. The roadworks that would take place offsite to install required utilities ( electricity, water, gas, fibre) all the way to the proposed site to add to the traffic needs to be also addressed. Residents who live in this area did so as its a quiet area and the volume of traffic that would be required to build these houses would make roads unsafe, especially for families and the elderly. This area of sandiacre is a quiet area and as such, this has been a huge factor when families and elderly people choose to live here. The risk of harm from extra traffic would multiply, with this area taking heavy traffic not common in this area during development, then afterwards with 180 homes adding to the area permanently. The unnecessary nuisance and risks the residents would have to endure during the vast roadworks required to install required utilities (electricity,gas, water and fibre) to the new development needs to be taken into consideration as these works would be major works, that will go on for weeks, if not months. Emergency vehicles already struggle to access some parts of the proposed route in sandiacre, especially in the winter months when the roads are at high risk of icy conditions. Anybody living in the proposed new development would do so with the risk of emergency assistance reaching them in adequate timescales due to the steep incline to the proposed development.
1.7	West of Sandiacre	Road Safety	Darran and Emma Rea	Response-00597	Current traffic is already dangerous, cars are parked on junctions which is restricting clear views, cars go way above the speed limit already (check Stanton Road and also Sycamore Crescent) there are a lot of elderly and disabled people in the area alongside those who have dogs, it is difficult enough already with the current traffic in the area, not to mention cars parked obstructing views
1.7	West of Sandiacre	Road Safety	David Casey	Response-01608	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	David Cater	Response-01756	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	David Fry	Response-00596	The school operates additional facilities every evening and all weekend and the traffic for residents is overwhelming as it's difficult to get off the drive some days The football club also means lots of traffic. Additional housing will only compound the traffic problems
1.7	West of Sandiacre	Road Safety	David Ruddock	Response-01776	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	David Tindsley	Response-00515	Stanton Road is the ?main? access road to the proposed site, with Beech Avenue and Coronation Avenue feeding off it. There are only two wider approaches to Stanton Road ? from the west from Rushey Lane, and from the east from Town Street/Ikkeston Road. Given that Rushey Lane has a weight restriction on it of 7.5 tonnes (unless for access) to prevent HGVs travelling on to Stanton via Stanton by Dale, so it would seem inevitable that any construction traffic will have to enter from Town Street/Ikkeston Road. This is already difficult, with tight, blind bends immediately you access Stanton Road, another when to turn right close to the Blue Bell pub, and particularly so when you turn left by Sandiacre Football Club/St Giles Park. Within 100m of the football club, on the opposite side of the road, is Cloudside Academy Primary School. Both are key facilities/amenities for the village, and extremely important. However, on practice nights, match days and on evenings when football matches are being screened on TV, Stanton Road is extremely congested. It must not be forgotten that the football club provides facilities for children as well, and this causes serious safety concerns for them, particularly as they are less aware of the safety hazards caused by the congestion. School drop-offs and pickups are even worse. Whilst there is a temporary restricted speed of 20mph during these times, the congestion is awful, with congestion on street corners creating further blind bends for people trying to turn left out of Beech Avenue, and with parking extending well up Beech Avenue as well. Whilst most drivers are considerate and careful, I have seen several instances where drivers have had to mount the school-side kerb to avoid vehicles coming in the opposite direction. With very young children in the vicinity, I think is already a major safety issue which can only be exacerbated by an increase in traffic numbers from the proposed development. This is particularly the case when large construction traffic is added to the situation. I consider the road safety issues involved with this proposal to be extremely serious, and I therefore strongly object to the proposal.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	David Yeo	Response-01705	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Dawn Glennis Smith	Response-00510	Road safety would increase as the infrastructure to this area will not be improved.
1.7	West of Sandiacre	Road Safety	Dean Bosworth	Response-01665	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Dean Lavelle	Response-01774	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Dean Michell	Response-01343	When the bus has stop ,car use the pavement to get round. I have nearly been hit coming out my gate.
1.7	West of Sandiacre	Road Safety	Dean Peake-Whitehurst	Response-00488	See comments on Traffic Congestion. The thought is the same, more vehicles will result in increased danger for a small, quiet village
1.7	West of Sandiacre	Road Safety	Debra Michell	Response-01346	When the bus is at the bus stop car mount the pavement to get round. Children use this Avenue to get to and from school. parent that bring there children in car park everywhere on pavement and corner and don?t consider anyone, it?s a nightmare driving at these times.
1.7	West of Sandiacre	Road Safety	Debra Scully	Response-00288	Due to the amount of road parking there are severe concerns as to road safety .
1.7	West of Sandiacre	Road Safety	Debs Washer	Response-00487	More cars equals more risks to children getting knocked down
1.7	West of Sandiacre	Road Safety	Denise Creasey	Response-00786	The roads on and around Cloudside are steep, twisting and with blind narrow comers already difficult to navigate with poor visibility with parked cars. This area could not contend safely with additional traffic or indeed construction traffic. At peak times there is congestion of traffic making road safty for padestrians very difficult. Access via the narrow cart track at the top of Larch Drive and Cloudside Road is unsuitabe for this volume of traffic. The increase in the volume of traffic and construction vehicles would also be detrimental to the road safety of the children and parents at the peak times when children are arriving and leaving schools in the area.
1.7	West of Sandiacre	Road Safety	Denise Lingard	Response-01759	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Dennis Watts	Response-01726	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Derek Morton	Response-01607	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Derrick Hunt	Response-00437	The roads around the existing estate are pretty dangerous already for children With Cloudside infants on Stanton road And children for senior school having to walk to Friesland at Ripley or a drop off journey for parents causing more danger to the ones walking .
1.7	West of Sandiacre	Road Safety	Destiny Jade-Blake	Response-01636	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Diane Jones	Response-00852	The proposed development is very near to local schools and therefore construction traffic on Stanton Road, which is already very busy , is an added danger.
1.7	West of Sandiacre	Road Safety	Diane Mcmorrow	Response-00433	The traffic at the moment is very busy cars parking on the pavement buses struggling to pass additional traffic would be dangerous to school children walking to school along with all other pedestrians I've struggled walking my dog trying to pass parked cars
1.7	West of Sandiacre	Road Safety	Diane Meadwell	Response-00807	The roads around the proposed development are narrow and there are always vehicles parked on them. They are used regularly by children on their way to and from school and as access to Stoney Clouds. They are also used frequently by dog walkers at all times of day. The additional traffic would not only be increased by the residents of the houses, but also by the numerous courier services which often use larger vehicles. These delivery companies are already very frequent users of our local roads, and that number will only increase as people use internet shopping more and more. Add to this an additional 180 addresses requiring access through these narrow roads, and the risk of road accidents of all kinds would undoubtedly increase. We should be encouraging people, children in particular, to walk and cycle, but this added danger will result in too many misgivings.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Diane Turner	Response-01744	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Donna Steele	Response-00781	Traffic congestion is already a nightmare around the proposed area, this will only add to this.
1.7	West of Sandiacre	Road Safety	Dorothy Deeprise	Response-00817	The road will become a traffic jam and therefore make safety an issue for the people here.
1.7	West of Sandiacre	Road Safety	D Pallett	Response-01627	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	D Simpson	Response-01712	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	E Cooper	Response-01923	Difficulty already accessing homes. Parked cars already make road crossing difficult.
1.7	West of Sandiacre	Road Safety	Eleanor Moseley	Response-00799	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Eleanor Newman	Response-00718	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Elisha Gunn	Response-00585	As the proposed plans are close to a school the road safety will be reduced as more cars cause further congestion getting out of the small town which can lead to dangerous driving and accidents to our young and venerable residents
1.7	West of Sandiacre	Road Safety	Emily	Response-01880	Small road for access for the amount of traffic.
1.7	West of Sandiacre	Road Safety	Emma	Response-00492	The roads are extremely difficult to get up and down in winter and icy snowy conditions. Several times I've had to have days off work due to icy conditions where other colleagues who live locally aren't on top of the hill don't have any issues.
1.7	West of Sandiacre	Road Safety	Emma Peterson	Response-00491	School nearby
1.7	West of Sandiacre	Road Safety	Emma Ryan	Response-00503	I don't think you can add somewhere between 180-360 cars to a small town and not expect the roads to be more congested and more dangerous, especially given the school located a short distance away. The area around the school struggles enough daily as it is, without putting extra people and their cars into the town.
1.7	West of Sandiacre	Road Safety	Emma Wall	Response-00319	Cars already parked on either side of the roads around this area and prevents ambulances and buses is getting through it quite a number of places it's not suitable for an increase of traffic. It's dangerous for children people drive fairly fast through these roads already adding to that it will only cause more problems.
1.7	West of Sandiacre	Road Safety	Esme Moss	Response-00592	Will increase the number of cars, road users in the local area contributing to increased traffic congestion, pollution and poses a greater risk to children and elderly people in the area.
1.7	West of Sandiacre	Road Safety	Esther Cook	Response-01861	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions. I would also point out access to the site would be difficult as steep hills and damage would be done to all roads leading to the site.
1.7	West of Sandiacre	Road Safety	Ewan Snowden	Response-00766	Currently the traffic isn't light and on certain days it becomes very heavy with traffic and vehicles mounting pavement to get through the traffic. With the new flow of traffic that will come through means further drivers making unsafe decisions just for the sake of pushing through traffic rather than waiting. I shouldn't have to further add to my anxiety by worrying if vehicles are going to mount the curb and hit me, just to get around the additional parked cars.
1.7	West of Sandiacre	Road Safety	Fay Cresswell	Response-00701	As above there are so many dangerous roads double parking, parking on pavements parking on corners where visibility is already poor. In winter Chestnut Grove Larch Drive Cloudside Road become very difficult to drive as the hill of Cloudside is steep and cars skid frequently in ice and snow. I myself got stuck and it took 3 men from local houses to push my car up to my property on Chestnut Grove. Buses run through the estate and frequently get stuck because of badly parked vehicles. This estate was Council and when built rules were work vans were not allowed to park on streets at home addresses but now 3 of my nearest neighbours have personal cars and work vans 2 houses sold across from mine without drives one family have 2 Estates and a Transit Van and the other a MPV and a works van there is not space for 2 vehicles outside the property yet alone 3 and this is common place on the Estate. The proposed path and that's what it is to the development is too small to take 180 houses worth of vehicles let alone construction traffic. There is a 7.5 tonne weight limit

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Gail Berry	Response-01644	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Geoff Tindsley	Response-00755	1. Stanton Road is the ?main? access road to the proposed site, with Beech Avenue and Coronation Avenue feeding off it. There are only two wider approaches to Stanton Road ? from the west from Rushey Lane, and from the east from Town Street/Ilkeston Road. I believe that Rushey Lane has a weight restriction on it of 7.5 tonnes (unless for access) to prevent HGVs travelling on to Stanton via Stanton by Dale, so it would seem inevitable that any construction traffic will have to enter from Town Street/Ilkeston Road. 2. When coming from the other side of Nottingham, via Moorbridge Lane, there is a difficult right-hand turn into Stanton Road, particularly when there are large HGVs coming in the opposite direction. There are tight, blind bends immediately you access Stanton Road, another when to turn right close to the Blue Bell pub, and particularly so when you turn left by Sandiacre Football Club/St Giles Park. Within 100m of the football club, on the opposite side of the road, is Cloudside Academy Primary School. 3. I am sure that both are important facilities/amenities for the village. However, when there are practice nights, match days and on evenings when football matches are being screened on TV, I have experienced Stanton Road being extremely congested. It must not be forgotten that the football club provides facilities for children as well, and this causes serious safety concerns for them, particularly as they are less aware of the safety hazards caused by the congestion. 4. I am aware that school drop-offs and pickups are even worse. Whilst there is a temporary restricted speed of 20mph during these times, the congestion is awful, with congestion on street corners creating further blind bends for people trying to turn left out of Beech Avenue, and with parking extending well up Beech Avenue as well. 5. Whilst most drivers are considerate and careful, I have seen instances where drivers have had to mount the school-side kerb to avoid vehicles coming in the opposite direction. With very young children in the vicinity, I think there already is a major safety issue which can only be worsened by an increase in traffic numbers from the proposed development. This is particularly the case when large construction traffic is added to the situation. I consider the road safety issues involved with this proposal to be extremely serious, and I therefore strongly object to the proposal.
1.7	West of Sandiacre	Road Safety	Georgia C	Response-01296	The roads are already unsafe as is, poor quality of driving can be observed every journey you go on. We don't need more cars on the road.
1.7	West of Sandiacre	Road Safety	Georgia Marvin	Response-00261	I do feel that there will 100% be more accidents if this goes ahead. Cloudside road has such a tight blind corner, and if two cars are met head to head I'm concerned for the safety of drivers, pedestrians and pets.
1.7	West of Sandiacre	Road Safety	Gill West	Response-01725	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Glyn Holner	Response-01697	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Gordon Bruce	Response-01455	There are already huge problems with parking for schools and nurseries as the roads in that area were not built to accommodate the number of cars parked and cars delivering children to schools etc, so problems already occur. Busses and vans struggle to get through already. There would also be a major issue with Coronation AVE and Larch drive being dug up to allow services to be laid for new housing. Parking and access are already very difficult. The extra traffic for a project of this size on an unserviced green field site is huge, as would the disruption to locals be if this were to go ahead. Safety is inevitably compromised if people who already fight for parking near their homes are given even less access if their road is dug up. The proposed entrance from Lark Drive is woefully inadequate, far too small for the volume of construction traffic, and unsafe for existing residents.
1.7	West of Sandiacre	Road Safety	Gordon Daris	Response-01639	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Greg Cox	Response-01702	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Gregg Bartrum	Response-01591	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Greg Watts	Response-00733	Access across or near the Stoney Clouds escarpment could be technically challenging.
1.7	West of Sandiacre	Road Safety	Harriet Farnsworth	Response-01914	Roads are already too busy & will lead to the inevitable increase in accidents (& potholes).

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Harry Fleck	Response-01084	The roads up to the access site will make it unsafe for pedestrians as the road network is not wide enough to accomadate 2 passing cars and sufficient pathways. Large construction vehicles will be having to mount the pavements in order to navigate the narrow right hand bends which will cause a huge safety issue for anyone using pathways particularly with small children or the elderly
1.7	West of Sandiacre	Road Safety	Helen	Response-00883	Parking and traffic in this area is horrendous now with many blind spots for crossing roads. The school on Stanton Road is a nightmare at collection and drop off times. With increased traffic this is an issue with children and parents attempting to cross the road. I am already genuinely concerned a serious accident will happen without adding to this with increased traffic movements
1.7	West of Sandiacre	Road Safety	Helen Gillain	Response-00964	with vehicles parked either side of road and on pavement visibility is poor and poses a danger for for vehicles and pedestrian
1.7	West of Sandiacre	Road Safety	Helen Richardson	Response-00432	I object to the proposed development of 108 new homes due to the significant increase in traffic and the consequent detrimental impact on road safety. The existing road network in Sandiacre, already burdened and poorly maintained, will be further strained by a substantial increase in vehicular movements, leading to a heightened risk of accidents for pedestrians, cyclists, and other road users.
1.7	West of Sandiacre	Road Safety	Helen Thompson	Response-01356	There are existing road safety concerns in this area which will be increased by more traffic and people. You should study the traffic safety issues around Cloudside school when the children come out at 3.15. Walking on the school side of Stanton Road can be hazardous as traffic comes very near or on the pavement - this includes the bus. Also people park on the pavement at the bottom of Beech Avenue. The junction of Church Street and Town street/Ikeston road is hazardous already due to the number of lorries coming to and from the Stanton site which have problems on the corner without crossing onto the wrong side of the road.
1.7	West of Sandiacre	Road Safety	Helen whiteman	Response-00447	It would be impossible for it to be safe walking up coronation road with all the extra traffic it would cause so much inconvenience and it would not be safe
			Ian	Response-00493	High levels of traffic will in turn lead to more accidents, especially during school transit hours
1.7	West of Sandiacre	Road Safety	Ian herbert	Response-00939	the access road to this site is totally unsuited to heavy construction vehicle access and then high residential movements as the area is only suitable for car based commuting.
			Ian Steele	Response-00780	The roads are narrow and tight even for the amount of residents here already
1.7	West of Sandiacre	Road Safety	IAN TAYLOR	Response-00972	For the reasons stated at 1, increased congestion means less safety on the roads and adjoining footpaths.
1.7	West of Sandiacre	Road Safety	Ian telfer	Response-00991	Cars trying to get past school traffic is dangerous. More houses = more cars!!
1.7	West of Sandiacre	Road Safety	Ian Ward	Response-01628	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Irina Anthony	Response-01867	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Isabelle Love	Response-00529	With further traffic obviously comes the greater risk to pedestrians (particularly children).
1.7	West of Sandiacre	Road Safety	Isobel Ball	Response-01092	Similar to the traffic congestion notes i entered. Small children and dogs live in this area as it is close to the local primary schools. An increase of lorry?s and equipment being carted up there everyday is in no way safe for the families/ habitats/farm animals that reside in this area. It is incredibly dangerous and someone will get hurt.
1.7	West of Sandiacre	Road Safety	J. E. Lord	Response-01601	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Jack Greatorex	Response-01731	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Jacob Whitt	Response-01748	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Jacqueline Marshall	Response-01436	Cloud side Academy is on Stanton Road in Sandiacre and is close to the proposed development. I walk this road regularly and witness first hand road safety issues on a daily basis Allowing approximately another 360 cars onto this road from the proposed development will increase the dangers for young children and older residents and must be taken into consideration. There is also an infant school on Victoria Road which will also be affected by increased traffic along with Albert Road, King Edward Street and Butt Street as drivers from the proposed development search for easy access to major roads there are no controlled crossings on the residential roads, cars already cause safety problems at drop off and pick up times. Allowing another 360 cars onto to these roads are putting young and old lives at risk.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Jade Smith	Response-01783	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	James Meadwell	Response-01653	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	James Roberts	Response-01708	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	James Seward	Response-01683	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	James White	Response-01883	Roads accessing proposed build land is not fit for purpose e.g. Beech Avenue, Larch Drive puts pedestrians at greater risk.
1.7	West of Sandiacre	Road Safety	Jane Dennett	Response-00965	Too near Friesland more traffic more incidents. Derby Road Bostocks dangerous already.
1.7	West of Sandiacre	Road Safety	Jane Elizabeth Tindsley	Response-00669	Stanton Road is the ?main? access road to the proposed site, with Beech Avenue and Coronation Avenue feeding off it. There are only two wider approaches to Stanton Road ? from the west from Rushey Lane, and from the east from Town Street/Ilkeston Road. Given that Rushey Lane has a weight restriction on it of 7.5 tonnes (unless for access) to prevent HGVs travelling on to Stanton via Stanton by Dale, so it would seem inevitable that any construction traffic will have to enter from Town Street/Ilkeston Road. This is already difficult, with tight, blind bends immediately you access Stanton Road, another when to turn right close to the Blue Bell pub, and particularly so when you turn left by Sandiacre Football Club/St Giles Park. Within 100m of the football club, on the opposite side of the road, is Cloudside Academy Primary School. Both are key facilities/amenities for the village, and extremely important. However, on practice nights, match days and on evenings when football matches are being screened on TV or there is a social event, Stanton Road is extremely congested. It must not be forgotten that the football club provides facilities for children as well, and this causes serious safety concerns for them, particularly as they are less aware of the safety hazards caused by the congestion. School drop-offs and pickups are even worse. Whilst there is a temporary restricted speed of 20mph during these times, the congestion is awful, with congestion on street corners creating further blind bends for people trying to turn left out of Beech Avenue, and with parking extending well up Beech Avenue as well. Whilst most drivers are considerate and careful, I have seen several instances where drivers have had to mount the school-side kerb to avoid vehicles coming in the opposite direction. With very young children in the vicinity, I think is already a major safety issue which can only be exacerbated by an increase in traffic numbers from the proposed development. This is particularly the case when large construction traffic is added to the situation. More traffic would create an increase in hazardous zones for children, cyclists, disabled and elderly residents. I consider the road safety issues involved with this proposal to be extremely serious, and I therefore strongly object to the proposal.
1.7	West of Sandiacre	Road Safety	Janet Whildes	Response-01869	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Jane Warton	Response-00662	heavy construction traffic having to use roads that are already in a poor condition
1.7	West of Sandiacre	Road Safety	Janice Taylor	Response-01743	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Janice West	Response-00989	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Janine Holmes	Response-01595	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Jason Deeprise	Response-00818	I hope you will put in good crossings and cycle lanes.
1.7	West of Sandiacre	Road Safety	Jason Harwood	Response-01667	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Jason Webb	Response-01637	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Jayne Rowley	Response-01279	The existing roads are narrow and there are several blind corners which often cause those vehicles using those roads near misses with other oncoming traffic, one of the main ones being at the top of Cloudside where access to the proposed site would need to pass through. There is limited visibility due to parked cars making it dangerous for other road users, pedestrians, pets and local wildlife. There is a local school which at peak times already means that it is difficult to pass through to exit the estate, a further rise in traffic would put children trying to get to school at a higher risk. The proposed access to the site is unsuitable for the increases in both cars and the building traffic, this risk would be even greater in the winter months as it is not on the main gritting routes and the sharp corners already make travel in snow and ice a high risk
1.7	West of Sandiacre	Road Safety	J Cates	Response-01750	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Jeanette O Connor	Response-01640	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Jeffrey Whittaker	Response-00594	Very concerned at cloud side school & Friesland where the most traffic would be
1.7	West of Sandiacre	Road Safety	Jenna Mitchell	Response-01407	An excess of cars and no measures to curb speeding in the area would make additional f hundreds more cars dangerous
1.7	West of Sandiacre	Road Safety	Jennifer Bailey	Response-01857	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions. I do fear the roads will become so parked up that buses will not be able to get through. I do think the increase in traffic will lead to accidents. Its already difficult to get round this estate.
1.7	West of Sandiacre	Road Safety	Jennifer Saville	Response-00516	Roads around Sandiacre are already crowded and anothe 200+ cars from the new development would only add to the dangers, especially predestrians including school children
1.7	West of Sandiacre	Road Safety	Jennifer Tindsley	Response-00751	1. Stanton Road is the ?main? access road to the proposed site, with Beech Avenue and Coronation Avenue feeding off it. There are only two wider approaches to Stanton Road ? from the west from Rushey Lane, and from the east from Town Street/Ilkeston Road. I believe that Rushey Lane has a weight restriction on it of 7.5 tonnes (unless for access) to prevent HGVs travelling on to Stanton via Stanton by Dale, so it would seem inevitable that any construction traffic will have to enter from Town Street/Ilkeston Road. 2. When coming from the other side of Nottingham, via Moorbridge Lane, there is a difficult right-hand turn into Stanton Road, particularly when there are large HGVs coming in the opposite direction. There are tight, blind bends immediately you access Stanton Road, another when to turn right close to the Blue Bell pub, and particularly so when you turn left by Sandiacre Football Club/St Giles Park. Within 100m of the football club, on the opposite side of the road, is Cloudside Academy Primary School. 3. I am sure that both are important facilities/amenities for the village. However, when there are practice nights, match days and on evenings when football matches are being screened on TV, I have experienced Stanton Road being extremely congested. It must not be forgotten that the football club provides facilities for children as well, and this causes serious safety concerns for them, particularly as they are less aware of the safety hazards caused by the congestion. 4. I am aware that school drop-offs and pickups are even worse. Whilst there is a temporary restricted speed of 20mph during these times, the congestion is awful, with congestion on street corners creating further blind bends for people trying to turn left out of Beech Avenue, and with parking extending well up Beech Avenue as well. 5. Whilst most drivers are considerate and careful, I have seen instances where drivers have had to mount the school-side kerb to avoid vehicles coming in the opposite direction. With very young children in the vicinity, I think there already is a major safety issue which can only be worsened by an increase in traffic numbers from the proposed development. This is particularly the case when large construction traffic is added to the situation. I consider the road safety issues involved with this proposal to be extremely serious, and I therefore strongly object to the proposal.
1.7	West of Sandiacre	Road Safety	Jenny Stephens	Response-01723	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Joanna hardy	Response-01304	As a mother of young children I am concern about construction traffic rolling past cloudside junior school. The area is congested already at dropnoff and pick up times, but an increase in traffic would pose a greater risk to our children. I know 1st hand the dangers of lorries travelling past schools. When i was in primary school in asfordby in Leicestershire a girl a year or 2 older than me was killed by a lorry while crossing the road outside school. I remember the aftermath. Fortunately the local council finally took steps after this tragedy and a bypass was built. This is not possible in sandiacre so I fear increased traffic and more large vehicles on our roads will be a danger to local children. I live on Coronation avenue and have young children. I am concerned that increased traffic from construction and new residents would pose an increased danger to my young children.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Joanne Guyatt	Response-01784	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Joanne Johnson	Response-00765	I am concerned that the extra traffic during construction will pose danger to the residents of Sandiacre, especially the children going to and from the local schools. Also with the extra traffic that will be generated by the building of the new houses, the UK average being 1.2 cars per household in the UK this could mean conservatively an extra 216 vehicles on these roads daily adding to safety concerns. The road by The Blue Bell pub is on Church Street being windy already sees collisions and near miss' regularly.
1.7	West of Sandiacre	Road Safety	Joanne Lambert	Response-00494	Traffic outside schools at drop off and pick up times are already stopping on yellow zig zags due to there not being enough safe parking spaces, extra traffic will increase the incidences of this. Visibility will be impacted so crossing roads will become more unsafe for our young people.
1.7	West of Sandiacre	Road Safety	Jodie Owen	Response-01688	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Jodie Shrive	Response-00601	As mentioned previously, adding more traffic to already very narrow roads highly increases the risks of accidents, especially to vulnerable local residents such as the elderly and children. Sandiacre is a quiet neighbourhood which is one of the most valuable things about this area, people wander freely as within their rights and to impose such a drastic change to the area puts our residents at risk and WILL lead to deaths involving RTA's, can you live with that?
1.7	West of Sandiacre	Road Safety	Joe Sells	Response-01924	A single access point poses serious road safety & emergency response concerns.
1.7	West of Sandiacre	Road Safety	Jo Gerhardt	Response-01286	As mentioned in the Traffic congestion comments, the safety of the roads would become an issue due to the increased influx of HGV's, lorries and cars etc. construction traffic leading to the site. The roads are very narrow approaching the proposed site, with residential cars being parked on the sides, which would make access difficult to manoeuvre. Its a residential area with children playing, elderly folk crossing roads etc so they would all have to be wary of the increased traffic. As mentioned, HGV's often speed past the bottom of Starch Lane, making it treacherous to cross.
1.7	West of Sandiacre	Road Safety	John Gardner	Response-01694	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	John G Brown	Response-01752	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	John Hibbitt	Response-01855	Very poor now. Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	John Ledger	Response-01605	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	John Payne	Response-01785	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	John Whiteman	Response-00450	Road safety is non-existent as it stands especially at school times. It will be absolutely dangerous with hundreds of extra trips up and down the hill every day.
1.7	West of Sandiacre	Road Safety	Jon Burn	Response-01722	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Josh Williams	Response-01632	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	J Pearson	Response-01772	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Judith A Pulfer	Response-01863	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions. I cannot believe that is site will only have the one access/exit road of Larch Drive. The road infrastructure to this entrance has not ben built for the amount of traffic it will get. The entrance itself is very narrow taking into consideration the necessary footpaths needed for pedestrians. It would be interesting to see what is/isn't adopted highway at that point. The narrow roads leading up to Larch Drive and always the parked cars on them would cause problems. I believe the drivers on the i4 bus have a few problems.
1.7	West of Sandiacre	Road Safety	Judith Blackburn	Response-01928	The bus service is often delayed which can be very difficult for attending appointments or waiting in cold weather at the stop. Heavy vehicles and traffic along Town Street and Derby Road make crossing safely very difficult for pedestrians.
1.7	West of Sandiacre	Road Safety	Julie Hill	Response-01643	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Julie Taylor	Response-01503	If theres already an issue with parking and driving around that area how is it safe for people crossing the road when visability is an issue.
1.7	West of Sandiacre	Road Safety	Karen Alldread	Response-01868	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions. The roads surrounding the schools are currently extremely hazardous with the volume of traffic and unsafe parking and at times illegal parking. The influx of additional traffic that would result from further development in Sandiacre would exacerbate this already precarious situation.
1.7	West of Sandiacre	Road Safety	Karen Blain	Response-01732	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Karen Evans	Response-00523	Busier round schools.
1.7	West of Sandiacre	Road Safety	Karen Harwood	Response-01668	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Karen Pitts	Response-00643	With increased volume of traffic, the children attending both Cloudside and Ladycross schools would be put at risk. The quiet roads in the nearby estate where children can often be seen playing will be a thing of the past. We should be encouraging them to spend more time outdoors but parents will be fearful to allow this with the increase in traffic. Cars park on all of the roads around the schools and those near the shop on Stanton Road making it difficult to cross the road at times especially if children cannot see the road properly due to parked vehicles. Then there are impatient drivers. You often have to give way many times when driving near the football club and Cloudside school but there are some who can inconsiderate leading to confrontation and arguments.
1.7	West of Sandiacre	Road Safety	Kathryn Lovatt	Response-00497	I feel that the increased number of vehicles on Beech Avenue, Stanton Road, Coronation Avenue and Cloudside Road which would occur due to the proposed housing develoment, would make these roads more dangerous. There are many sharp bends and blind spots in the roads leading to the proposed new housing development - these bends/blind spots include Coronation Avenue onto Cloudside Road (hill), top of Cloudside hill onto Cloudside Road, and Cloudside Road onto Larch Drive. The danger would be considerably increased with the many large construction vehicles needing to access the new housing construction site over a long period of time.
1.7	West of Sandiacre	Road Safety	Kathryn Martin	Response-00527	Access is poor. Children struggle to play out and this will only increase the risk.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Katie Morrice	Response-00664	There is a significant amount of on street parking throughout larch drive, cloudside Road, chestnut Grove, coronation avenue, beech avenue and maple avenue. With these streets being part of the main and only proposed route towards the new builds this will significantly increase the amount of cars going through daily. This will heighten the risk of accidents, as more cars navigate through these already congested roads. Additionally, the area is frequented by pedestrians, including families with children and dog walkers, who access the green fields and nature reserve via the twitchell areas. The increase in traffic raises serious safety concerns for the pedestrians trying to cross the roads and avoid any potential accidents on the roads. The roads on and around Cloudside are steep, twisting and with blind narrow corners already difficult to navigate with poor visibility with parked cars. This area could not contend safely with additional traffic or indeed construction traffic. At peak times there is congestion of traffic making road safety for pedestrians very difficult. Access via the narrow cart track at the top of Larch Drive and Cloudside Road is unsuitable for this volume of traffic. The increase in the volume of traffic and construction vehicles would also be detrimental to the road safety of the children and parents at the peak times when children are arriving and leaving schools in the area.
1.7	West of Sandiacre	Road Safety	Katie Robinson	Response-00943	Roads are very busy with parked cars but you can cross the roads without fear as the top of the estate is a quiet part of the estate. However adding on average 180 cars (that's at least one per new house) would completely change this. The roads would become a lot busier and at this stage the roads are very small in this area also - this would cause congestion on the roads which would also cause safety concerns for people wanting to cross the roads. There are a number of elderly residents at the top of the estate and a number of families with young children. In addition to this cars already have to reverse and make way to allow on coming cars to exit these small roads just adding to this would cause further safety concerns. The school is at the bottom of the estate also - already busy on school runs or events on a Saturday however adding further cars to this area will also make this unsafe for the children/school and for the planned activities on the weekends that they attend. We are not talking 1/2 extra cars on the road - we are talking 180 at least and then times this by how many journeys they make in cars makes the roads busier and unsafe.
1.7	West of Sandiacre	Road Safety	Katrina	Response-00628	The amount of heavy duty vehicles that will be driving round during construction will cause major amounts of damage to the roads. Also the amount of blind corners there are on this estate, example at the top of cloudside and in front of the football club especially while primary school children are being picked up and dropped off will cause a major risk for children with the added vehicles on the road
1.7	West of Sandiacre	Road Safety	Kelly Randall	Response-00591	Strategic Policy 1.7 requires junction improvements; however, physical constraints, particularly along Cloudside Road and Coronation Avenue, make such upgrades impractical. Increased construction and residential traffic will endanger pedestrians, particularly near local schools. Has the impact on school safety been formally assessed?
1.7	West of Sandiacre	Road Safety	Kelsey Green	Response-01666	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Kenneth Cooper	Response-01720	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Kern-Paul Lewis	Response-01715	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Kerry Meadwell	Response-01655	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Kerry Smith	Response-01271	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Kerry stokes	Response-00769	The increased traffic will cause an increase in risk, to not only my children, but all of the children that attend cloud side school & the park play area just off Stanton road. My children are finding it increasingly difficult to cross roads safely due to the increase in traffic in Sandiacre. We live on Stanton road & I feel the need to cross them over the road still (they're teenagers) to get to the park because at times we've had vehicles mount the pavements to get past one another because of the increase in cars. How are emergency vehicles going to get to the proposed site quick enough & how is a fire engine meant to get through the area that should be a road to enter the site. The width of the road & proposed pavement areas is just far too small.
1.7	West of Sandiacre	Road Safety	KH Taylor	Response-01663	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Kim Helm	Response-00632	Narrow roads being blocked by lorries and bus, adults and children having go on the roads or round parked cars Horse riders at risk with increased heavy traffic
1.7	West of Sandiacre	Road Safety	Kirk Moss	Response-00439	Existing bus routes struggle with narrow roads near the proposed development. Heavy machinery will have difficulty navigating streets already tight for standard cars. Construction traffic will likely cause further congestion, damage to road surfaces, and increased safety hazards for pedestrians and road users.
1.7	West of Sandiacre	Road Safety	Kirsty	Response-00970	My partner was involved in an accident due to lack of vis ability from parked vehicles on bend
1.7	West of Sandiacre	Road Safety	Kirsty Handa	Response-00445	This proposed development is going to have a sever negative impact on the road safety in the area. The roads surrounding the development are already all single file due to parking, there are a lot of blind corners which cannot be improved and there are severe access issues to this proposed development of only 1 vehicle at a time. The safety of any potential residents of the development cannot be kept safe with such a single access to that estate. The roads are already very small and struggle to cope with the current traffic without adding additional cars to the roads and that is without considering the road safety of the vehicles that will be trying to access the development whilst it is being built. The streets are far too small and dangerous for this to be sustainable. In winter these roads are really bad due to the incline. They become very icy, the council do not deice or grit any of the surrounding roads and it is already very dangerous coming down the hills and trying to stop at the bottom. They cannot cope with additional vehicles
1.7	West of Sandiacre	Road Safety	Kirsty Meredith	Response-01462	Cloudside academy is on Stanton Road, and it is already extremely dangerous with the amount of traffic at school times. It causes congestion and there are cars mounted on pavements and blocking driveways. Adding extra volume to the area is madness. Let alone the type of vehicles required for the building works.
1.7	West of Sandiacre	Road Safety	K Reynolds	Response-01916	There's already people racing around on motorbikes dangerously, and cars speeding. Really don't need to add more traffic.
1.7	West of Sandiacre	Road Safety	Kristie Rugers	Response-01864	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Kyle Jones	Response-01764	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	L A Keen	Response-01659	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Laura Hallam	Response-01711	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Laura Thompson	Response-00702	Worried about close nature to school. Lots of children walking home through the estate.
1.7	West of Sandiacre	Road Safety	Laurence Luck	Response-01727	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Lauren Freeman	Response-01562	This is one of my biggest concerns with the proposal. My children attend Cloudside school, and my eldest will be moving up to Friesland in September. Despite living on Stanton Road opposite the shop I do not let my children walk to or from school alone. I already struggle to cross the road with them because of safety issues with parking and traffic at school start and end times so I cant guarantee they could safely cross the road alone. The sheer number of vehicles passing along Stanton Road is enormous already there is really no safe place cross so adding to this is a terrible accident waiting to happen.
1.7	West of Sandiacre	Road Safety	Lauren Rose	Response-01446	Increased vehicles = reduced road safety. An elderly lady was sadly killed in 2019 due to a heavy goods vehicle not being able to see her at a crossing near the Co-Op. Current roads in the area are steep, some have close or blind bends. There are school children locally who may take risks crossing roads and increased children from the proposed development will only add to this risk. The proposed development has an access point at Larch Drive via the surrounding roads which already currently struggle with existing traffic. Larch Drive simply is not fit for access purposes and could increase the risk of traffic collisions due to the narrow nature of the access point.
1.7	West of Sandiacre	Road Safety	Leah morral	Response-00712	People have chosen to buy houses on larch drive and surrounding areas as a safe place to raise young children, making this a through route is going to make this so much unsafer
1.7	West of Sandiacre	Road Safety	Lee Wilcock	Response-01670	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Lesley Bruce	Response-01397	The pavements in much of the route which children would be walked to school at Ladycross, Cloudside and Friesland are narrow, and many are used by residents to park as the roads are not wide enough to accommodate the number of homes which now have 1 or more cars. 180 houses would potentially generate around 200 more children on these already inadequate routes. The volume of traffic and length of time during required for heavy plant and machinery, multiple daily deliveries plus the metres width of digging required to install new services through this area would cause a great deal of danger on already inadequate roads which were never built to come with this. The proposed entrance from Larch Drive is entirely inadequate to service the needs of both construction and living.
1.7	West of Sandiacre	Road Safety	Lesley Carter	Response-00536	The roads leading through the estate to the proposed site are not suitable for increased traffic. Due to lack of drives, and multiple car ownership, there are cars parked along all streets and passing is difficult. Increased traffic would lead to more congestion and be unsafe. Particularly at school drop off and pick up times, putting children at increased risk. There is also a blind bend on Cloudside Road which causes problems with parked vehicles meaning cars are often on wrong side of the road. One access point and increased pedestrians will lead to poor pedestrian safety. This is due to increased traffic and blocked footpaths by parked cars. Cars pull onto the pavements to try not to block the roads but this means pedestrians, prams, buggies, mobility scooters and wheelchairs etc often have to use the road.
1.7	West of Sandiacre	Road Safety	Lesley Morral	Response-01920	The roads around the access to proposed site are already over crowded & extremely narrow.
1.7	West of Sandiacre	Road Safety	Lia Thims	Response-01766	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Lilly stokes	Response-00767	the number of big lorries on the road will increase making the roads more cramped initially making it hard for cars to fit on the road with the lorry's there.
1.7	West of Sandiacre	Road Safety	Linda Castledine-Davies	Response-00850	Town street is a constant cacophony of noise, dirt and fumes as a never ending cavalcade of lorries and trucks hurtle up and down the road from Wards Recycling and Johnsons Aggregates to name a few. To pull out of the blind corner on Stanton Road waiting for a gap in the traffic is frightening especially at peak times of the day. The enormous build that is taking place at Stanton just outside the parish will add hundreds of more heavy duty vehicles to this same route so to add even further public traffic will turn this into one big congested and dangerous area to either drive in or negotiate on foot. The access to this proposed site is too narrow for heavy use and heavy vehicles. The current pavement is shorter than legal requirements of 2meter and so is the gap for vehicles. Even for light vehicle use this is unacceptable.
1.7	West of Sandiacre	Road Safety	Linda Oscroft	Response-01927	With road safety compromised by on-pavement parking even on the corners of junctions, pulling out from driveways & junctions is dangerous & carried out blind. The proposals add to this danger.
1.7	West of Sandiacre	Road Safety	Lindsey Rawlinson	Response-01624	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	LISA ANNE GILLIGAN-LEE	Response-00710	The addition of hundreds of new homes will drastically increase vehicle numbers in an area already struggling with traffic congestion. Local roads are narrow and not built to handle such heavy use, raising the risk of accidents and making it dangerous for pedestrians and cyclists. Children walking to school, elderly residents, and people with mobility issues will all be affected. Increased traffic will also lead to more vehicle damage in residential streets already limited by on-street parking. More traffic will significantly increase the risk of accidents especially near schools; quiet suburban roads not designed to cope with high levels of traffic and will ultimately make them unsafe and noisy for residents.
1.7	West of Sandiacre	Road Safety	Lisa Coates	Response-00695	Already busy on Stanton road during school hrs
1.7	West of Sandiacre	Road Safety	Lisa Heppell	Response-00878	The roads are congested especially at certain times of the day
1.7	West of Sandiacre	Road Safety	Lisa J Pearson	Response-01762	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Liz Woodhouse	Response-01584	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	L Mee	Response-01777	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Logan Fox	Response-00746	The roads are narrow and tight, cars already park everywhere, which means you sometimes walk in the street. If we had more houses we will see many more vehicles which will result in accidents with people and animals. Even with the current amount of residents, we see so many near misses with cars around the bends. Adding more to the equation will not be favourable for anyone's safety

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Lorraine Hands	Response-00534	Traffic is already an issue on many roads in the surrounding area, buses at times have real difficulties getting round Coronation Avenue and down Beach Avenue! In particular when school traffic is added during the day where many cars park on surrounding rounds???.Safeguarding of children going to and leaving school is already a challenge, to build such houses is going to have an impact on classroom sizes too!
1.7	West of Sandiacre	Road Safety	Louise Felfoldt	Response-01733	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Louise Harper	Response-01571	Narrow entrance on larch leading to sleep roads with plenty of parked cars
1.7	West of Sandiacre	Road Safety	Louise Harrison	Response-01719	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Louise Jacks	Response-01767	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Louise Libberton	Response-01693	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Louise Robinson	Response-00647	An increase in the number of cars in an area already busy with cars and industrial vehicles (some extremely large) will only result in more road safety issues. Especially considering the schools in the area and the size of the roads expected to accommodate the traffic. It is not fit for purpose at the moment and more houses = more cars, which will only increase issues.
1.7	West of Sandiacre	Road Safety	Lucy johnson	Response-01369	Like I said above, the roads aren't safe enough as it is! The conditions on the road are terrible, people driving like idiots and getting away with it, is disgusting! Think of the children and elderly in Sandiacre!
1.7	West of Sandiacre	Road Safety	lucy victoria garner	Response-00949	Already significant risks at Cloudside School with careless dangerous parking and poor parenting and children with no road sense.
1.7	West of Sandiacre	Road Safety	Luke Chein	Response-01779	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Luke Hinchley	Response-00699	Additional traffic on narrow roads with already parked cars makes it difficult to see round corners
1.7	West of Sandiacre	Road Safety	Lynda Morton	Response-01606	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Lynsey Blackburn	Response-01227	Already unsafe toad for cyclists which would be made worse with additional traffic from this development, plus toad surface is poor and lorries delivery supplies to this development will make it worse
1.7	West of Sandiacre	Road Safety	Macie Brothwell	Response-01633	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Malcolm Dillon	Response-00722	The access roads to the development are narrow and below the statutory width requirements for a new development. Access to the development access roads in one case is via a double, blind bend, from a road that is not even a "B" class road. The access rout is littered with junctions and ninety degree bends on narrow roads that regularly have vehicles parked either side of the road.
1.7	West of Sandiacre	Road Safety	Malcolm Fox	Response-00215	Small, tight roads with blind spots due to current parking and bends. Vehicle collisions will be a regular occurrence simply down to the increased traffic. Dog walkers and pedestrians will need to be highly aware and we will see an accident. The current roads are not a drive through, so there is relative safety for all with most traffic being residential. So when accidents occur, and they will simply down to the amount of traffic that you will introduce, who do we hold accountable?
1.7	West of Sandiacre	Road Safety	Malcolm Riedlinger	Response-00743	A few months ago, a large sink hole fell in on the pavement outside number 34 Stanton Road. This caused a significant danger to anyone using the pavement directly opposite Cloudside Academy. With my wife, we personally had to barricade this hole until it was attended to by the council. This clearly shows that the pavement and roads should be properly assessed for safety and strength, and I am concerned that the increased traffic and heavy machinery that will use Stanton Road during the long duration of this build and beyond, will compromise this further.
1.7	West of Sandiacre	Road Safety	Malcolm Riggs	Response-01680	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Malc Orbiston	Response-01673	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mandy Rait	Response-01587	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions. The existing roads are unsuitable to accommodate such a development.
1.7	West of Sandiacre	Road Safety	Mark Gough	Response-00888	Stanton Road and Beech Avenue congested with cars , lorries, deliveries to the shop , cars parked double near the school , traffic coming from Stanton by Dale to the shop . I have had trouble trying to get my van out of Beech Avenue at the bottom and cannot see very well any oncoming traffic , I've nearly had several accidents . I am extremely concerned for the safety of the children going to the Cloudside school, there?s no crossing for them to get across the road and with the cars they can?t see . It?s going to be an absolute tragedy if some child gets knocked over , or anyone wise for that matter . No mobility scooters can get by due to parking on the pavement?s . Another 180 houses built will be absolute hell !
1.7	West of Sandiacre	Road Safety	Mark Leek	Response-01740	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	mark skelton	Response-01341	Narrow road up beech ave where we live. Cars already have to park half on curb due to bus route and amounts of vehicles vs households. Road gets jammed regularly already when cars double park for bus. School at bottom corner gets busy. Cars speed up the road as on hill to get to the top with a run up. My children often crossing the road to visit neighbours and really have to be so careful. This will be a nightmare either there another 180 properties with cars heading our way!!
1.7	West of Sandiacre	Road Safety	Mark Thompson	Response-00750	It is already dangerous for children outside the cloudside School due traffic . This make it more dangerous
1.7	West of Sandiacre	Road Safety	Martin Driver	Response-01387	Re the comments regarding congestion. This additional development brings more danger for local children playing on the streets. If this was correctly risk assessed this development wouldn?t go ahead!
1.7	West of Sandiacre	Road Safety	Martin Ford	Response-01908	Heavy vehicles using main road increasing during building.
1.7	West of Sandiacre	Road Safety	Martin Hardy	Response-01413	As a parent I am concerned that increased traffic, both for construction and eventually residential, will increased the risk for my children. They walk to school and have to cross several roads with no pedestrian crossings. More traffic and larger vehicles increases the risk of them being hurt.
1.7	West of Sandiacre	Road Safety	Martyn Locker	Response-00903	My thoughts on this tie in with my traffic thoughts. One concern I have is with the quality and longevity of the local roads. The narrow Beech Avenue in particular seems to be struggling with the demand of the local thoroughfare. Again, I dread to think how this would be impacted with another 180 households (potentially 200+ new cars) using that single road to commute in and out of the estate.
1.7	West of Sandiacre	Road Safety	Martyn Maxted	Response-00435	This proposed development would further increase road traffic and generate increased risk to both road users and pedestrians along the proposed access route as well as impacting the local residents.
1.7	West of Sandiacre	Road Safety	Matt Bancroft	Response-00916	As stated earlier the existing access is too narrow twisty and covered in blind bends to be safe with the proposed four or five fold increase of the traffic
1.7	West of Sandiacre	Road Safety	Matt Hallam	Response-00476	Having more traffic would make more risk too anyone especially doing the school run at cloudside. At the minute it's a nightmare with busses getting stuck on Beech avenue and stanton Road with cars flying up and down it and the amount of traffic. Its chaos. Traffic in sandiacre town centre is bad as it is
1.7	West of Sandiacre	Road Safety	Matthew Buckland	Response-00615	Already, I have to avoid driving past the school on Stanton Road, during the morning drop off time. It isn?t safe to drive through, as cars are parked all the way along, from the off license, to the football club. Often parking is on the pavement, and blocking the view if trying to exit Beech Avenue. Cloudside Road, Larch Drive, Chestnut Grove , Sycamore Crescent and Coronation Avenue all have parked cars all the way along at all times of the day, which makes it difficult to navigate along at the moment. There is a blind bend at the top of Cloudside Road which you can't pass another car safely when driving round the corner, and I have had a number of near misses here, as I drive this way every day.
1.7	West of Sandiacre	Road Safety	Maurice Mason	Response-01617	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Maxine Sutton	Response-00471	Sandiacre is a small village with small village roads. The amount of traffic going through the village is already considerable and the main junction is a small three way light bridge over the Erewash canal. Unless the road infrastructure is improved it will not be able to cope with the extra traffic.
1.7	West of Sandiacre	Road Safety	M Dougle	Response-01749	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	M Eastwood	Response-01757	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Melanie	Response-00586	Strategic Policy 17 acknowledges that the local road network requires upgrading. However, there is limited physical space to accommodate such improvements, particularly at known bottlenecks such as Clowes Road and the junction with Coronation Avenue. These areas are already hazardous, especially for schoolchildren walking to Risley School. Increased vehicular traffic would significantly heighten the risk to pedestrians, including vulnerable road users such as children. There is no clear plan to mitigate these risks. There have been deaths from people being run over in Sandiacre already.
1.7	West of Sandiacre	Road Safety	Melanie Caumont	Response-01272	The increased vehicle volume poses a direct safety risk, especially to pedestrians and schoolchildren. Larch Drive and surrounding roads are not designed to accommodate heavy traffic or construction vehicles. Access for emergency services, delivery vans, or public service vehicles is already compromised by parked cars; further traffic will exacerbate this and increase the risk of accidents. Additionally, in winter months, grit lorries cannot service the estate due to its narrow layout and parked vehicles, making roads treacherous. It is unclear how construction vehicles or eventual homeowners will navigate this safely.
1.7	West of Sandiacre	Road Safety	Melanie Howarth	Response-01621	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Michael Anderson	Response-00461	With the extra residents of this suggested new development. There will be more children going to the schools in the area and with the already busy narrow roads one can only assume more accidents will happen in all of the local area. An example of this is Stanton Road and the entrance to Cloudside Academy. The road is absolutely packed with parked cars dropping off or picking up children from the school. This is a major bus route which serves Ilkeston, Sandiacre, Nottingham, Derbyshire but are delayed because they can't get through because of congestion.
1.7	West of Sandiacre	Road Safety	Michael Oscroft	Response-01926	With road safety compromised by on-pavement parking even on the corners of junctions, pulling out from driveways & junctions is dangerous & carried out blind. The proposals add to this danger.
1.7	West of Sandiacre	Road Safety	Michell Birkin	Response-01657	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Michelle Alsop	Response-01645	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Michelle Cox	Response-01724	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Michelle Ledger	Response-00815	TOO MANY VEHICLES IN THE AREA AS IT IS, NARROW ROADS MEAN TRAFFIC CANNOT FLOW FREELY IN THE AREA AS IT IS BEFORE ANY DEVELOPMENT KEY AREAS OF CONCERN - OUTSIDE THE SCHOOL ON STANTON ROAD, SCHOOL DROPOFF TIMES IT IS UNBEARABLE FAR TOO MANY CARS AND ITS NOT SAFE FOR THE KIDS, NEVER MIND ADDING TO THIS NUMBER
1.7	West of Sandiacre	Road Safety	Michelle Wenham	Response-01650	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mick Helm	Response-00021	The i4 bus that services the estate already has trouble negotiating a safe passage with existing road parking. With the building traffic and the cars from the potential new houses I can imagine it would be withdrawn. Would that be right?
1.7	West of Sandiacre	Road Safety	Mick Hughes	Response-01701	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mike Darnell	Response-00698	As in the previous comment these factors make at least 200 or more cars coning out of the junction in to a school road
1.7	West of Sandiacre	Road Safety	Miss Garratt	Response-00905	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Miss R Cordon	Response-01648	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mollie Snow	Response-01729	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Molly Newbold	Response-00486	Adding 180 houses could mean up to 360 new cars in the area if each house averages 2 cars per household. Of course it?s going to increase the risk of car accidents and scratched cars as they move to our streets for parking
1.7	West of Sandiacre	Road Safety	Mr & Mrs Turton	Response-01660	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mr and Mrs R Skelton	Response-01274	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mr and Mrs Wright	Response-01275	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mr David Ainsworth	Response-00621	With Stanton development along with this, there will be way too much volume of traffic. There are not enough speed humps; or traffic calming schemes in place and this endagers people's lives. I have now formally recorded my warning that both health effects on worsening air pollution and resident safety is being put at risk. If this goes ahead and proves me to be correct, I will have to pursue a legal challenge on decision making and risk assessments.
1.7	West of Sandiacre	Road Safety	Mr John Hickingbotham	Response-01431	Increased risks to pedestrian safety, especially in the vicinity of the local school, is a consequential effect of traffic generated from this proposed development. It is also most unlikely that there will be any significant number of sustainable cycle journeys to or from this development, given the steep gradients on Coronation Avenue, Beech Avenue and particularly Cloudside Road.
1.7	West of Sandiacre	Road Safety	Mr K Turton	Response-01706	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mr Luke	Response-01703	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mr P J Tanner	Response-01728	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mr R M Draper	Response-01856	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions. The increase of traffic along Stanton Road would pose a clear and present danger to pupils attending Cloudside School.
1.7	West of Sandiacre	Road Safety	Mr R Widdowson	Response-01734	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mr S. Haywood	Response-01585	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mrs Christina Pope	Response-00732	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Mrs Donna C. Ball	Response-01594	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mrs Froggatt	Response-00449	Congested roads. A lot of houses do not have off street parking. Many roads are blocked up with parked vehicles. Any more residents will enhance this problem causing road safety problems
1.7	West of Sandiacre	Road Safety	Mrs Griffin	Response-01698	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mrs J. Cooper	Response-01596	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions. Existing roads are steep, narrow and have blind corners, cars are often parked leaving little visibility to cross the road safely.
1.7	West of Sandiacre	Road Safety	Mrs Jennifer Fry	Response-00581	Traffic on this side of Sandiacre is already horrendous, more cars will cause even more problems
1.7	West of Sandiacre	Road Safety	Mrs Joanne Thompson	Response-01690	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mrs J Reeder	Response-01909	I am over 90 & feel scared with all the proposed traffic using our roads.
1.7	West of Sandiacre	Road Safety	Mrs Lee Farabella	Response-01899	More risk of accidents. Narrow streets could become hazardous for children & elderly.
1.7	West of Sandiacre	Road Safety	Mrs Linda Cox	Response-01753	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mrs Luke	Response-01704	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mrs M. Rose	Response-01583	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mrs Marie Draper	Response-01755	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mrs M Burke	Response-01887	Risk of accidents on narrow streets, for children & the elderly.
1.7	West of Sandiacre	Road Safety	Mrs N Taylor	Response-01896	Risk of accidents on narrow roads & surrounding streets for children/elderly.
1.7	West of Sandiacre	Road Safety	Mrs Rachel Coats	Response-01623	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mrs R Cordon	Response-01647	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mrs Rigby	Response-00641	Existing roads are steep rising to 80m, twisted and narrow blind corners, little visibility and parked cars to contend with. At peak times traffic congregates along Stanton Road and is dangerous to attempt to cross the roads by the especially the elderly, disabled wheelchair users and children crossing roads. Access via the narrow cart track at top of larch Drive and Cloudside Road is unsuitable for this volume of traffic.
1.7	West of Sandiacre	Road Safety	Mrs Shani Wainwright	Response-00754	Existing roads are twisting and narrow with blind corners, little visibility and many parked cars to contend with. Some roads are steep and rise to approx 80m in places. At peak times congestion on the corner of Beech Ave and along Stanton Rd is already terrible and is both dangerous for drivers and pedestrians (especially the school children trying to get safely to and from school). The proposed access to the new development along Larch Drive and Cloudside road is totally unsuitable for the number of cars and construction traffic it will bring. No consideration given to nearby residents at all, re the danger, pollution and disruption to their lives.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Mrs Sheila Hickingbotham	Response-01338	The development of this site will result in more traffic using the only two access roads from Stanton Road - Coronation Avenue and Beech Avenue. There are already road safety issues around Cloudside School and the junction of Stanton Road and Spencer Avenue with inconsiderate parking increasing the risk of accidents.
1.7	West of Sandiacre	Road Safety	Mrs Shirley Victoria Riggs	Response-01685	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mrs Susan Bantle	Response-01612	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mrs Turton	Response-01707	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Mrs Whittaker	Response-00595	The increase in traffic to an already busy road near a school.
1.7	West of Sandiacre	Road Safety	Nasim Rashid	Response-01103	Potential accidents narrow road 2 very tight corners leading to site
1.7	West of Sandiacre	Road Safety	Natalie Bentley	Response-01646	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Nicole Cooper	Response-01597	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Nigel Percy	Response-00524	Increased traffic will bring obvious increases in safety especially for schoolchildren and young people accessing the sports and social club
1.7	West of Sandiacre	Road Safety	Nikki Vincent	Response-00688	I have 3 children who walk to school and road safety is already a huge concern of mine. The traffic and parking issues will only increase with this proposed build, particularly in the vicinity of Cloudside Academy. The blind corner near to the blue bell pub/Sandiacre town football club is an accident waiting to happen and I dread to think if heavy load vehicles are using this route, not to mention the increase in household cars accessing this road too.
1.7	West of Sandiacre	Road Safety	Normn McCrea	Response-01754	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Oliver Marriott	Response-00679	Road Safety Existing roads are steep, rising to 80m, twisted and narrow road with blind corners, little visibility and parked cars to contend with. At peak times traffic congregates on Stanton road and it's dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloudside road is unsuitable for the volume and size of vehicles required to complete this project.
1.7	West of Sandiacre	Road Safety	Paige Walker	Response-01669	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Pamela Bassett	Response-00608	There is already an issue on Stanton Road and other roads around the proposed plot around speed. Dangerous levels of speed where children and high traffic of pedestrians is a real issue in addition the HGV drivers are not taking into account the smaller roads
			Pam shepherd	Response-00453	This goes without saying more cars and buses in an already extremely busy area with increase the amount of tias in the area
1.7	West of Sandiacre	Road Safety	Pat Hardy	Response-01739	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Paula Darnell	Response-00665	The narrow windy roads with many 90 degree bends and parked cars are an accident waiting to happen the roads around that area just cannot take any more vehickes. The children near the school are especially vulnerable as the traffic is so bad already without the extra two hundred or so more vehicles
1.7	West of Sandiacre	Road Safety	Paula Luck	Response-01710	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Paula Sims	Response-01687	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Paul Randall	Response-00131	Strategic Policy 1.7 states that local junctions will need upgrading ? how? There is not the space to do so. Indeed Cloudside Road is at best single lane when residents are parked, and the corner is already problematic and the junction with Coronation Avenue is tight. Residents already park on pavements causing pedestrians to walk in the road. Cloudside Road is popular with dog walkers accessing Stoney Clouds, so more traffic here is a risk. Access is also required for the developers. Do you expect heavy plant and HGVs to access the site via Larch Drive? If so, does this mean a temporary removal of the 7.5t weight limit on Rushy Lane / Stanton Road? If not, are you routing this traffic past the local junior school? Has the school been consulted on the increased risk posed to their students? The Church Street exit is hampered by its configuration, and the large number of HGVs that frequent Lenton Street. This junction is already dangerous (large accident only last week) and further vehicles using it will make the situation worse. Consequently, the existing rat-run of Spencer Avenue and Travers Road would become more used, presenting a clear and present danger to those that use it, and especially the children who walk that route to get to the local schools. Stanton Road has a 7.5 tonne weight limit. This would prevent large construction plant and deliveries accessing the area. Both the Stanton Road / Rushy Lane junction, and the Church Street bends are unsuitable for large vehicles. Indeed the local buses regularly have trouble negotiating these roads. Additionally, the school run for Cloudside Academy causes traffic congestion, and any sort of HGV in that area would cause enormous problems and pose real danger to the children attending the school. NOTE: I received an apology from TrentBarton (after they reviewed their in-bus CCTV) when a bus nearly hit my son walking home from Cloudside school as it was driven down the pavement on Beech Ave. Additionally a bus side swiped my parents' car at the top of Beech which resulted in a significant insurance claim that TrentBarton paid. Access can ONLY be via Larch Drive since alternative access would require the demolition of an existing property. Almost all properties bordering this area are semi-detached. Access via Larch Drive would require plant, machinery and large vehicles negotiating Cloudside Road. In the winter this is a difficult to negotiate road as it is not on the gritting route. Bin lorries have been known to miss areas in this estate due to access.
1.7	West of Sandiacre	Road Safety	Paul Vleeton	Response-01770	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	paul wheeldon	Response-00582	many children live in this area adding to the traffic burden will only increase the risk of death or injury
1.7	West of Sandiacre	Road Safety	Paul Wilkes	Response-00599	We fair for our children and grandchildren with the extra cars ei: at least 1800 if not more. With no raid infrastructure put in place and no additional junction for the M1
1.7	West of Sandiacre	Road Safety	Peter Anthony	Response-01866	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Peter Nicholls	Response-01622	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Pete West	Response-01700	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Phil Creasey	Response-01342	There is a significant amount of on street parking throughout larch drive, cloudside Road, chestnut Grove, coronation avenue, beech avenue and maple avenue. With these streets being part of the main proposed route towards the new builds this will significantly increase the amount of cars going through daily. This will heighten the risk of accidents, as more cars navigate through these already congested roads. Additionally, the area is frequented by pedestrians, including families with children and dog walkers, who access the green fields and nature reserve via the twitchell areas. The increase in traffic raises serious safety concerns for the pedestrians trying to cross the roads and avoid any potential accidents on the roads. The roads on and around Cloudside are steep, twisting and with blind narrow corners already difficult to navigate with poor visibility with parked cars. This area could not contend safely with additional traffic or indeed construction traffic. At peak times there is congestion of traffic making road safe for pedestrians very difficult. Access via the narrow cart track at the top of Larch Drive and Cloudside Road is unsuitable for this volume of traffic. The increase in the volume of traffic and construction vehicles would also be detrimental to the road safety of the children and parents at the peak times when children are arriving and leaving schools in the area.
1.7	West of Sandiacre	Road Safety	Philip Reed	Response-01449	I have concerns for the safety of local residents. With many school children, elderly residents, and other vulnerable individuals using these roads daily, the addition of heavy construction vehicles during the build phase?and permanent increases in traffic thereafter?will significantly heighten danger.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	P Sandes	Response-01682	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Rachel Crossley	Response-01661	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Rachel Skelton	Response-01241	Dangerous congestion especially around school times is a major issue, the increase in traffic would make this exponentially worse. This is particularly a problem for children to and from the school site.
1.7	West of Sandiacre	Road Safety	R Barratt	Response-01664	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Rcahel Sharp	Response-00652	Road safety has always been a concern in the area. My children are in their twenties and both attended Ladycross and Cloudside Schools. At the time I complained to the school and the police about the school drop off and pick up traffic and how dangerous this is. Motorists mounting the kerb, parking wholly on pavements and close to junctions. Sometimes parking on the zig zag lines. The development would mean more cars and as they would be family homes more school traffic. The bend near Sandiacre Town Football Club is also problematic and them towards Town Street.
1.7	West of Sandiacre	Road Safety	Rebecca Longmuir	Response-00253	How can there be road safety?? when you plan to increase congestion by adding more housing and blocking with more parked cars and traffic?s flow coming in and out of Sandiacre. This will only add to possible accidents. And put people/children at risk.
1.7	West of Sandiacre	Road Safety	Rhiannon Lowater	Response-01592	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	R Hibbitt	Response-01862	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions. Like a slalem course now.
			Richard Broughton	Response-01352	The increase in traffic in this previously quiet area is bound to increase the chances of accidents occurring
1.7	West of Sandiacre	Road Safety	Richard Haines	Response-01674	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Richard Jenkins	Response-00264	With several local schools in the area I have real concerns for child safety due to increased traffic. School traffic means children ? walking/running/meeting siblings/going to the local parks etc. In quiet times it is not uncommon to see ?boy racers? on Stanton Road (a problem known to PSCO Ian Hawksworth 13089, Erewash, Derbyshire Constabulary). These are certainly not advocated, nevertheless they are a real issue. The road infrastructure is not only incapable of supporting the required construction traffic and post development, the residential traffic, I believe that the narrow access and tight corners leading to/from the site mean that even with the removal of trees the widest possible opening to access the site would be 5.7 metres. Given the required amount of space for safe pedestrian access I believe that the access would not be in compliance with NPPF Paragraph 110. Also, I fail to see how the access as proposed and taking into account the roads leading up to the proposed site could possibly comply with NPPF Paragraph 111, and given the current traffic loading in the area I do not believe it possible for this development to fulfil the requirements of NPPF Paragraph 112. The proposals for this site appear to have taken no account of the safety of individuals living in the locality and I consider this a serious breach of trust.
1.7	West of Sandiacre	Road Safety	Richard Marriott	Response-00675	Road Safety Existing roads are steep, rising to 80m, twisted and narrow road with blind corners, little visibility and parked cars to contend with. At peak times traffic congregates on Stanton road and it?s dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloudside road is unsuitable for the volume and size of vehicles required to complete this project.
1.7	West of Sandiacre	Road Safety	Richard Naylor	Response-00066	The access road is very poor. The road is currently a small cul-de-sac and is not suitable for an additional 180 houses, with 2 cars each, that's an extra 360 cars in a very small area.
1.7	West of Sandiacre	Road Safety	Richard Shrimpton	Response-01301	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at top of Larch Drive and Cloudside Rd is unsuitable for this volume of traffic.
1.7	West of Sandiacre	Road Safety	Rob Lowe	Response-01768	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Roger Farnsworth	Response-01910	Roads are already too busy & will lead to the inevitable increase in accidents (& Potholes).
1.7	West of Sandiacre	Road Safety	Rosemarie Gough	Response-00997	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Roy Drew	Response-01614	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Ruby Sharp	Response-00886	Road safety has always been a concern in the area. Sandiacre is a dangerous place to drive and to cross the road. On every street you see parked cars making it harder to see oncoming traffic and cross the road. I often have to cross in between parked cars and rely on engine noises to see if the road is clear, which is becoming increasingly harder with new cars. There are no crossings near our schools and our children are not safe.
1.7	West of Sandiacre	Road Safety	Ryan Selby	Response-00479	The roads would be less safe as there would be more through-fare traffic, once cul-de-sac would now be a busy road to a new estate, increasing the risk of a road accident. Would be busier going past the local school which would pose a risk to the children there.
1.7	West of Sandiacre	Road Safety	S. Brailsford	Response-00598	Observed: Overly congested with cars parking in undesignated parking spaces, Busses that have to mount the pavement to get through, Constant traffic waiting, causing impatient drivers to drive too fast when they do get space to go, Not enough safe spaces to cross Drivers already ignoring anyone wanting to cross the road, Additional cars will make this even more unsafe Lorries going to and fro in the building process will make the area extremely unsafe Visibility between parked cars is already dangerously bad
1.7	West of Sandiacre	Road Safety	S. Jones	Response-01615	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Sally Davies	Response-01294	Traffic through Sandiacre is already a problem. Adding all these houses will make the area busier. Roads will not be able to cope with the additional vehicles.
1.7	West of Sandiacre	Road Safety	Sally Peake	Response-01893	Poor access with lots of cars already parked on access roads. I can see there being an accident involving children.
1.7	West of Sandiacre	Road Safety	Samantha Anne Whitney	Response-00757	Due to the traffic congestion mentioned in my first comment it's going to make the roads very unsafe in the local area. Specifically around Cloudside School when your adding another 360 cars travelling down that road going to work, it's already not safe with the current traffic, let alone extra. There are going to be so many collisions and stuck cars/busses and bin lorries on the estate due to extra traffic.
1.7	West of Sandiacre	Road Safety	Samantha Whildes	Response-01270	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Sam Buckland	Response-00600	Already, I have to avoid driving past the school on Stanton Road, during the morning drop off time. It isn't safe to drive through, as cars are parked all the way along, from the off license, to the football club. Often parking is on the pavement, and blocking the view if trying to exit Beech Avenue. Cloudside Road, Larch Drive, Chestnut Grove, Sycamore Crescent and Coronation Avenue all have parked cars all the way along at all times of the day, which makes it difficult to navigate along at the moment. There is a blind bend at the top of Cloudside Road which you can't pass another car safely when driving round the corner, and I have had a number of near misses here, as I drive this way every day.
1.7	West of Sandiacre	Road Safety	Sam Fleck	Response-00821	A 2 way road requires a width of 5.5 to 7.3 metres plus space for pedestrian footpath. Therefore even with the minimum width after bend fails to allow safe access alongside vehicular movement for residents to access a safe route in our out the site. This conflicts with NPPF paragraph 110 which requires developments give priority to pedestrians and cycle movements and create places that are safe, secure and attractive for all users. There is also a huge worry on emergency vehicles having access to the site in a timely manner. Serious concerns regarding access for emergency services and safety management of construction traffic is in conflict with NPPF paragraph 111 which advises that development should only be prevented or refused on highway grounds if there would be an unacceptable impact on highway safety or the residual cumulative impacts on the road network would be severe. NPPF paragraph 112 which stresses the need for developments to enable safe and suitable access for all users and minimise conflicts between vehicles and pedestrians is not being met as stated in my reasons therefore I strongly object to the proposed vehicular access and ask the planning authority to reconsider a solution that ensures both safe pedestrian connectivity and appropriate vehicle access without compromising the surrounding residential streets.
1.7	West of Sandiacre	Road Safety	Sam Greatorex	Response-01695	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Sandra Cooke	Response-01613	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Sarah Favell	Response-00038	Again, sandiacre is not fit for the amount of traffic going through the village, there are a number of schools in the local area
1.7	West of Sandiacre	Road Safety	Sarah Harrison	Response-01658	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	S Bryne	Response-01677	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Sebastian Roberts	Response-01675	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Shanead Ligton	Response-01689	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Shannon moss	Response-00454	Similar to my previous point, the roads are not wide enough and in need of repair due to pot holes etc, you've allowed a huge construction site of warehouses, factories to take place between ilkeston and sandiacre with the only through route to the m1 being sandoacre meaning this alongside the extra traffic from this housing will cause the roads to even worse
1.7	West of Sandiacre	Road Safety	Shannon Robinson	Response-01635	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Sharon Grant	Response-00219	Pulling out and around bends you are doing so blind, it's very dangerous. With all the extra traffic that will be generated, the roads are so congested, people are turning around on the lanes to find an alternative route, again. very dangerous as vehicles do tend to drive as speed on the lanes.
1.7	West of Sandiacre	Road Safety	sharon thornhill	Response-00448	roads are already busy around the proposed site and there is the safety on roads to consider especially around the primary school just down from the site
1.7	West of Sandiacre	Road Safety	Sharon weston	Response-00440	To many cars which results in children not being safe on paths,kids walking on rds cus cars are parked on paths,wheelchairs n disabled people struggle,dog walkers walking in rds n struggle to cross the easiest of rds because of traffic
1.7	West of Sandiacre	Road Safety	Shaun Green	Response-01773	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Sheila	Response-00587	Strategic Policy 17 acknowledges that the local road network requires upgrading. However, there is limited physical space to accommodate such improvements, particularly at known bottlenecks such as Clowes Road and the junction with Coronation Avenue. These areas are already hazardous, especially for schoolchildren walking to Risley School. Increased vehicular traffic would significantly heighten the risk to pedestrians, including vulnerable road users such as children. There is no clear plan to mitigate these risks. There have already been RTC deaths in sandiacre. When the Lorry park has been completed there will be added road safety concerns too.
1.7	West of Sandiacre	Road Safety	Sheila Payne	Response-01782	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Sian Knox	Response-01679	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	S Leek	Response-01737	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Sonya Birkin	Response-01656	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Sophie Bennett	Response-01631	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Sophie Farnsworth	Response-01913	Roads are already too busy & will lead to the inevitable increase in accidents (& potholes).
1.7	West of Sandiacre	Road Safety	Stephen Davies	Response-00214	Cloudside Road and Larch Drive already seriously congested with parked vehicles and road layout (sharp bend)
1.7	West of Sandiacre	Road Safety	Stephen Sacker	Response-01598	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Steve Bilbie	Response-00285	The roads are narrow and sharp bends with public access to the ancient wood on a blind bend. The risk to the public is going to be huge and could lead to serious injuries and potentially death.
1.7	West of Sandiacre	Road Safety	Steven Wiseman	Response-00452	With narrow roads and more parked cars on the pavements, this is making roads already difficult to traverse especially for wheelchair users. Increasingly you have to mount the curb to let buses pass
1.7	West of Sandiacre	Road Safety	Steve Whittaker	Response-01781	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Stuart Pensom	Response-00049	Not enough safe place to cross roads near schools. Speed of some of vehicles is horrendous and speed cameras not working
1.7	West of Sandiacre	Road Safety	Sue Harrison	Response-01629	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Susanne Beaven	Response-01618	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Sylvia Plampin	Response-00624	No road safety measures in place. Lots of young children around, cars always parked dangerously.
1.7	West of Sandiacre	Road Safety	Tamara Partridge	Response-01780	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Tarnya Hinman	Response-01786	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Thomas Ilett	Response-01088	As highlighted in Traffic Congestion, parking congestion is a already a prevalent issue in Sandiacre, with emphasis on the surrounding area to the proposed housing development. In particular the parking outside the shop on Stanton Road, Cloudside school on Stanton Road (at drop off/pick up times), Sandiacre Town Football Club on Stanton Road (during match days/events) and the Scout Hut on Stanton Road is very poor and often illegal at times. The parking in its current state is dismal and often results in dangerous situations and near misses. The proposed housing would further exacerbate this problem parking, further increasing potential to dangerous situations. Furthermore Cloudside School currently has no Road Safety mitigation in place. There are no Zebra Crossings, Pelican Crossings, Traffic Lights or any approved crossings. 180 new houses nearby will result in increased traffic on Stanton Road and higher demand on Cloudside school itself. With no improvement in approved Crossings, this exposes children, parents, carers and the general public to a greater danger risk to what can already be a dangerous situation. In order to remedy this, it is likely the council will be required to improve Road Safety solutions in the area at potential great financial cost.
1.7	West of Sandiacre	Road Safety	Tim Derbyshire	Response-01681	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Tim Gough	Response-00996	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Toby Moran	Response-01769	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Tom Ball	Response-01672	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Tony Weston	Response-00990	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Tracey Howe	Response-01860	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Tracey Hughes	Response-01699	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Tracy Jones	Response-00436	The access brings most of the new cars past the junior school which is an accident waiting to happen each day
1.7	West of Sandiacre	Road Safety	Trevor Rowston	Response-01678	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Tricia Herbert	Response-00944	Traffic around the local school in the area is already causing safety concerns and these roads simply cannot take anymore traffic
1.7	West of Sandiacre	Road Safety	Try church	Response-00033	Heavy traffic in the Larch Drive and Cloudside areas will put children at risk who currently enjoy a relatively quiet area in which to play.
1.7	West of Sandiacre	Road Safety	Tyler Hobbs	Response-00879	An increase of this scale could introduce hundreds of additional vehicles to local roads daily, significantly raising the risk of accidents?particularly on narrow residential streets like Cloud Side Road and Larch Drive, which are already struggling with congestion. These roads often lack proper pedestrian pathways, traffic calming measures, or sufficient visibility at junctions, making them unsafe under current conditions, let alone with a surge in traffic. More cars also mean more potential conflicts with pedestrians, school children, cyclists, and emergency services trying to navigate the area quickly and safely. Without substantial improvements to infrastructure, the influx of vehicles would increase the likelihood of collisions, pose a greater risk to vulnerable road users, and reduce the overall safety and livability of the community.
1.7	West of Sandiacre	Road Safety	Vanessa Asbach	Response-00700	The roads are not designed for the amount of cars coming and going in this area. Peak times such as school pick up and drop off are already ridiculous with people parking all over and illegally, making the walk for children unnecessarily dangerous
1.7	West of Sandiacre	Road Safety	Verity Lamb	Response-01298	probability says that more cars on the road increases the chances of an accident in some way
1.7	West of Sandiacre	Road Safety	Vickie Wright	Response-01552	More traffic increased the risk of accidents, particularly in areas near schools, pedestrian crossings and narrow residential streets. The added pressure could turn quiet, safe neighbourhoods into hazardous zones for children, cyclists, elderly residents and pets.
1.7	West of Sandiacre	Road Safety	Vicky	Response-00485	Why destroy more green belt when there are houses empty!! We already have the local hotels filled with immigrants where does it end . Already a cut through to Stanton , local schools are going to be impacted on added road usages
1.7	West of Sandiacre	Road Safety	Victoria Abraham	Response-01652	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Victoria Galpin-shrimpton	Response-01009	Green Belt ? You should be protecting the green belt, it provides recreation & wellbeing to everyone as well as animals, insects, amphibians, lizards and birds. There are plenty of alternative more suitable sites. Landscape- This proposal will change the existing beautiful landscape forever and turn it into a sterile concrete jungle. The fantastic views across the parishes and its beautiful walk will be destroyed and the skyline blotted out.
1.7	West of Sandiacre	Road Safety	Victoria Greatorex	Response-01730	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Road Safety	Victoria Marriott	Response-00674	My main concern is the suitability of the access to the proposed site. It's a very narrow road with several sharp bends and a sharp incline. I use this road on a daily basis to collect my friend's son to take him to school. It's always a struggle to get up the road, I find it very hard to believe that any type of commercial lorry would be able to get up there safely. The bus route misses this area for this very reason. Existing roads are steep, rising to 80m, twisted and narrow road with blind corners, little visibility and parked cars to contend with. At peak times traffic congregates on Stanton road and it's dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloudside road is unsuitable for the volume and size of vehicles required to complete this project.
1.7	West of Sandiacre	Road Safety	Vivien Davis	Response-01582	Existing roads are steep rising to 80m, twisted and narrow with blind corners, little visibility and parked cars to contend with. At peak time traffic congregates along Stanton Road and it is dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloud side Road is unsuitable for this volume of traffic. The presence of heavy duty construction vehicles would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Road Safety	Wayne Major	Response-00408	Please see comments on congestion. I wish to object to the currently proposed vehicular access for this development. Based on the plans, the access appears to be significantly constrained. Even with the removal of trees and the construction of the highway over existing root zones which should be protected the widest achievable opening is only 5.7 metres with the current gate being only 2.7m. This also assume they own the current land to achieve the 5.7m. A two-way road typically requires a width of 5.5 to 7.3 metres, plus space for a pedestrian footpath. Therefore even with the absolute minimum road width just after a bend this proposal fails to allow for safe pedestrian access alongside vehicle movement. As a result, the development of 180 homes would leave residents without a safe pedestrian route in or out of the site. This conflicts with NPPF Paragraph 110, which requires developments to give priority to pedestrian and cycle movements and create places that are safe, secure and attractive for all users. Additionally, the route leading to the site from the main road consists of narrow residential streets, which are frequently lined with parked cars. There is existing evidence of buses getting stuck, indicating that large vehicles including construction traffic would be unable to safely navigate these roads. I am also concerned that a fire engine or ambulance would struggle to access the site in a timely manner due to these same constraints, particularly where parked cars restrict manoeuvrability. This raises serious concerns regarding access for emergency services and the safe management of construction traffic, in conflict with NPPF Paragraph 111, which advises that development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety or the residual cumulative impacts on the road network would be severe. The proposed development will also increase the number of vehicles using these currently quiet roads. At present, drivers patiently wait for one another to pass parked vehicles. However, with significantly more traffic generated by 180 homes, the parked cars that currently cause little disruption are likely to create congestion and hazards for pedestrians. This runs counter to NPPF Paragraph 112, which stresses the need for developments to enable safe and suitable access for all users and to minimise conflicts between vehicles and pedestrians. For all of these reasons, I strongly object to the proposed vehicular access arrangement and urge the planning authority to reconsider a solution that ensures both safe pedestrian connectivity and appropriate vehicle access, without compromising the surrounding residential streets.
1.7	West of Sandiacre	Road Safety	William Marriott	Response-00676	Road Safety Existing roads are steep, rising to 80m, twisted and narrow road with blind corners, little visibility and parked cars to contend with. At peak times traffic congregates on Stanton road and it's dangerous to attempt crossing the road. Access via the narrow cart track at the top of Larch Drive and Cloudside road is unsuitable for the volume and size of vehicles required to complete this project.
1.7	West of Sandiacre	Road Safety	Zoe Hughes	Response-01919	Access will not be viable via Cloudside Road due to the narrow & steep nature. No bus access. Restricted parking. Dangerous & not accessible in snow and ice.
1.7	West of Sandiacre	School Capacity	Aaron Locksley	Response-00711	I have heard the nearby schools are already at capacity, what is being done around the local area to increase capacity of the education system?
1.7	West of Sandiacre	School Capacity	Alexander Love	Response-00626	Schools full already
1.7	West of Sandiacre	School Capacity	Alice Ilett	Response-00571	My daughter is too young to know too much about the school capacity. However building that amount of houses in a small area without any infrastructure improvements is concerning.
1.7	West of Sandiacre	School Capacity	Amy Cray	Response-01223	My kids school is already oversubscribed
1.7	West of Sandiacre	School Capacity	Amy Skinner	Response-01447	Schools in the area are, I believe at or close to full capacity and potential residents would struggle to find places for their children at the local schools.
1.7	West of Sandiacre	School Capacity	Anastasia Anthony	Response-01865	Town + Country Planning Act 1990 indicates planning authorities must ensure developments are supported by adequate infrastructures. Schools are already overcrowded but the public hasn't been presented with plans to combat this.
1.7	West of Sandiacre	School Capacity	Andrew Marvin	Response-00255	I have no ideas how the three local schools can cope with this capacity !!! The parking outside the schools is already so dangerous So much illegal parking when children are being dropped off and collected at present causes gridlock
1.7	West of Sandiacre	School Capacity	Andria Nyilasi	Response-00672	Local schools are full and there are no plans for a school in this development, which will increase parents' need to drive to other areas.
1.7	West of Sandiacre	School Capacity	Angela Whitehead	Response-00544	The schools in Sandiacre have not increased in size in the 50years I have lived in Sandiacre we've seen the Springfield Park development, Bridge Street development how much more can these schools absorb
1.7	West of Sandiacre	School Capacity	Annabel Marriott	Response-00760	Cloudside Academy's current new year 3 group is at full capacity. Will extra residents in this small town be able to cope with the pressure of more children? Will my children's education be negatively affected by this increase?
1.7	West of Sandiacre	School Capacity	Anne Butler	Response-00385	Local schools are already full.
1.7	West of Sandiacre	School Capacity	Anne Castledine	Response-00499	The schools are full of now, dropping off and picking up times on Stanton Road should be avoided now.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
	West of Sandiacre	School Capacity	Anne Jenkins	Response-00350	Scrolls are already over subscribed
1.7	West of Sandiacre	School Capacity	Annette Jones	Response-00961	The schools are already to capacity in this area and further influx is bound to impact on the quality of education delivered. It is not right that children have to be split up to go to different schools of the same age group.
	West of Sandiacre	School Capacity	Ann Foxall	Response-00748	overloading facilities such as schools
1.7	West of Sandiacre	School Capacity	Anthony Smedlewick	Response-01877	Lady down the road says her kids class is already stretched.
1.7	West of Sandiacre	School Capacity	April	Response-00469	An influx of new residents will place a serious strain on our local schools, many of which are already operating near or at full capacity. Without significant investment in new facilities, staff, and resources, the quality of education will decline as classrooms become overcrowded and teachers are stretched too thin. This impacts not only the incoming families but also the current students, who may face larger class sizes, reduced individual attention, and fewer extracurricular opportunities. For families like mine who are already part of the school system, this raises serious concerns about the long-term educational outcomes for our children.
1.7	West of Sandiacre	School Capacity	A R Gregory	Response-01918	
	West of Sandiacre	School Capacity	Barbara and John Morrell	Response-00509	Building these houses will surely have an impact on schools in the area. I hope this factor will be taken into consideration.
1.7	West of Sandiacre	School Capacity	Barbara Warton	Response-01886	Can't facilitate any more.
	West of Sandiacre	School Capacity	ben riley	Response-00607	Adding housing comes with the need of providing extra infrastructure to the community. I doubt there are plans to support this.
1.7	West of Sandiacre	School Capacity	Bill Meadwell	Response-00864	The local junior school, Cloudside, is full. If children have to attend other schools, they will not be willing or able to walk that distance and would have to rely on parents? cars to get there and back.
1.7	West of Sandiacre	School Capacity	Britta Solloway	Response-00959	Not enough capacity at schools now
1.7	West of Sandiacre	School Capacity	Callum binnall	Response-00460	Another perfect reason to not want any more houses built as how would my son get a placement in ladycross or cloudside.
	West of Sandiacre	School Capacity	Caroline Blackmore	Response-00451	Schools are already seeing an increase due to the new homes built off Longmoor Lane which is mainly social housing
1.7	West of Sandiacre	School Capacity	Caroline Driver	Response-00618	I live on Beech Avenue and when we moved here over 5 years ago, I couldn't get places for my 4 children at cloudside school at the bottom of the street, they had to go to school in stapleford.
1.7	West of Sandiacre	School Capacity	Catherine Greenaway	Response-00429	The local schools are already at capacity and with the extra children from the new houses could make it that not all children in the catchment area will get a place.
1.7	West of Sandiacre	School Capacity	Catherine Richardson	Response-00531	The local school would not be able to accommodate so many new pupils
1.7	West of Sandiacre	School Capacity	Charlotte Hunter	Response-01376	Not enough space for further families to live here - schools have reached max capacity.
1.7	West of Sandiacre	School Capacity	Chris Hume	Response-01373	The congestion at School start and finish times is horrendous now, I avoid going out at these times, the cars park everywhere, this development with make it worse
	West of Sandiacre	School Capacity	Christine Anderson	Response-00484	Our schools are already full to capacity and lack of teachers is an ongoing problem.
1.7	West of Sandiacre	School Capacity	Christine Gough	Response-00578	We have 3 schools in Sandiacre . All full and after speaking to some people who say that they cannot get their children into these and have to travel to other ones in neighbouring areas . How can these cope with more children !? There is no more room ! If they have to be ferried to other schools that would be more problems for traffic already critical here .
1.7	West of Sandiacre	School Capacity	Claire binnall	Response-00459	There are no spaces for these extra children you are having brothers and sisters split up from the same families and sent to other school because we cannot accommodate the children in the area
1.7	West of Sandiacre	School Capacity	Clair Ellis	Response-00475	Another 180 house with the possibility of 180 children, which school are they going to go to? Our local infants and junior schools will not have the capacity.
1.7	West of Sandiacre	School Capacity	Clare franks	Response-00498	Cloudside academy has had to increase the number of classes this year to cope with the increased number of children, how much more can they accommodate. Ladycross has had previous years of full capacity. What provision is being made for new children going to school in the area?
1.7	West of Sandiacre	School Capacity	Colin Billington	Response-00227	Schools not big enough
1.7	West of Sandiacre	School Capacity	Colin Marriott	Response-00686	All the local schools are full. Some Sandiacre residents are having to send their children to schools in Stapleford and beyond.
1.7	West of Sandiacre	School Capacity	Courtney Bennett	Response-00593	schools are already underfunded, overran, uncontrollable students, under resourced so presumably a least a minimum of 2 nurseries, 2 primary schools and 2 secondary schools are going to be built and included in this plan to accommodate for the increase education needs as well as help with the already struggling education sectors in the area? Education is so important. Why don't we spend the time educating the current residents and children on the green spaces we have left. Provide education on how to look after our planet environment and wildlife. Provide a public greenhouse or allotments for the residents to have and use to assist with mental & physical health, to provide education to the younger generations to provide education to growing fruit and vegetables while keeping a safe space for wildlife to thrive.
1.7	West of Sandiacre	School Capacity	Craig Freeman	Response-01561	Cloudside Academy is a great school and already seems to be bursting at the seams to accommodate the number of children that wish to attend. I don't see how this could accommodate more children from the new development without having to extend and reduce the green space the children enjoy on the existing school premises.
1.7	West of Sandiacre	School Capacity	DAllen	Response-00525	School placement always an issue and class sizing will also be affected and not conducive to learning
1.7	West of Sandiacre	School Capacity	Daniel	Response-00545	Local primary and secondary schools are already at or near capacity. The influx of families from 180 new homes will put unsustainable pressure on these facilities. There is no evidence in the planning documents that new educational infrastructure will be created or that schools have room to expand.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	School Capacity	Daniel Hands	Response-00057	Where will the extra children go? The schools we have, are already very nearly at full capacity. To increase this capacity would mean exceeding their already over stretched resources. Classes are already overwhelmed, teachers do not have enough time to dedicate quality 1-2-1 support for students as it is. The resources schools have available and the budgets allowed do not lend themselves to delivering quality curriculum and development of our youngsters as they are now. To simply add to these dynamics will only serve to further dilute and weaken an already overstretched system.
1.7	West of Sandiacre	School Capacity	Danielle Harrison	Response-00568	Cloudside primary school and Friesland Secondary School are already popular and over subscribed schools. The local amenities do not support an additional 180 family unit in the area.
1.7	West of Sandiacre	School Capacity	Daniel Naylor	Response-00680	Current school allocations are already in short supply without an extra 180 new homes to add to that. Youngsters from nearby towns are students at sandiacre freisland school due to this problem and with 2300 homes approved for development in the 2022 Erewash core strategy in neighbouring kirk hallam and Stanton, parents getting their children into their first choice school would be an impossibility. As I've stated above, I live in nearby Ilkeston where first choice secondary school places are not a guarantee, as I found out when my children didn't get their first-choice school, but they were lucky enough to get their second-choice school in the same town. Some children in my area had to go as far as their third choice which means daily commutes over to the secondary school in sandiacre (sandiacre friesland school). As you could imagine, this has a knock-on effect to the children of sandiacre as they're forced to travel further afield to schools in neighbouring towns due to schools' capacity unable to meet the local population demands. 180 new homes in the area would exacerbate this issue further which would mean more children having to commute to other towns at peak times, adding to the traffic problem I stated at the start of this objection.
1.7	West of Sandiacre	School Capacity	Darran and Emma Rea	Response-00597	The local schools in the area are already at full capacity, even local residents struggle to get their child into these schools, the development will house families so where will their children go
1.7	West of Sandiacre	School Capacity	David Fry	Response-00596	The local schools are already at full capacity and in use evenings and weekends too. The Cloudside Academy on Stanton Road is open until the early evening for after school and swimming clubs.
1.7	West of Sandiacre	School Capacity	David Tindsley	Response-00515	I wish to object to the proposed development on the grounds of insufficient local school capacity to accommodate the likely increase in pupil numbers. I believe that Cloudside School is currently operating at capacity, and I understand that other nearby schools are in a similar position. While there is some indication that pupil numbers may fall in the future, we have yet to see any significant evidence of this locally, and any such changes would take time to materialise. An additional 180 dwellings would undoubtedly bring more families to the area, many with school-aged children. Without proper forward planning and investment in additional classroom space, local schools will be unable to provide the places required. This could result in children being allocated places far from their homes, creating further strain on transport infrastructure and undermining the principle of community-based education. This situation is contrary to Paragraph 95 of the National Planning Policy Framework (NPPF), which states that "it is important that a sufficient choice of school places is available to meet the needs of existing and new communities" and that local authorities should take a proactive approach to ensuring this. I therefore urge the planning authority to ensure that any future development is matched by appropriate investment in education infrastructure, including the expansion of existing schools such as Cloudside, so that we are in a position to accommodate new pupils without impacting the quality of education provided. Until such assurances and plans are in place, I must object to this development on the basis that the local education system is not currently equipped to support it.
1.7	West of Sandiacre	School Capacity	Dean Peake-Whitehurst	Response-00488	Having just started a family, this is a major concern for us. School places are already low and adding close to 200 new homes will inevitable worsen this situation
1.7	West of Sandiacre	School Capacity	Debra Michell	Response-01346	Only having 3 schools which are over subscribed, how do you make more spaces for more children.
1.7	West of Sandiacre	School Capacity	Debra Scully	Response-00288	Very limited spaces at Cloudside academy and Ladycross school. However Friesland school is always over subscribed
1.7	West of Sandiacre	School Capacity	Debs Washer	Response-00487	Cloudside school is already over subscribed, additional housing will cause more pressure on an already at capacity school
1.7	West of Sandiacre	School Capacity	Denise bennett	Response-00030	There are only 2 primaries and high school they will struggle to maintain standards
1.7	West of Sandiacre	School Capacity	Denise Creasey	Response-00786	Consideration needs to be made for increased capacity at the local schools for years ahead.
1.7	West of Sandiacre	School Capacity	Derrick Hunt	Response-00437	I don't think we have capacity In the schools if these are homes built for family's with average 2 children per household
1.7	West of Sandiacre	School Capacity	Diane Mcmorrow	Response-00433	Schools are already overwhelmed local children having to go alternative schools surely they should be prioritise
1.7	West of Sandiacre	School Capacity	Diane Meadwell	Response-00807	The local junior school is fully subscribed and other schools in the area are a long way from the proposed development. This would lead to more car journeys and greater congestion in an already over used road system in the surrounding area.
1.7	West of Sandiacre	School Capacity	Donna Steele	Response-00781	Building 180 houses will put so much pressure on our local schools which are already over stretched. There just isn't the places in our local schools for more children who could possibly move into the area.

1.7	West of Sandiacre	School Capacity	Emma Wall	Response-00319	There's no way the schools can cope with this
1.7	West of Sandiacre	School Capacity	Emma Wilson	Response-01222	If you are planning to build schools as part of it then it's mad. Class sizes are already huge and children are not getting into preferred schools
1.7	West of Sandiacre	School Capacity	Fay Cresswell	Response-00701	Unknown if the school can cope

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	School Capacity	Geoff Tindsley	Response-00755	I wish to object to the proposed development on the grounds of insufficient local school capacity to accommodate the likely increase in pupil numbers. 1. I believe that Cloudside Academy is currently operating at capacity, and I understand that other nearby schools are in a similar position. While there is some indication that pupil numbers may fall in the future, we have yet to see any significant evidence of this locally, and any such changes would take time to materialise. 2. An additional 180 dwellings would undoubtedly bring more families to the area, many with school-aged children. Without proper forward planning and investment in additional classroom space, local schools will be unable to provide the places required. This could result in children being allocated places far from their homes, creating further strain on transport infrastructure and undermining the principle of community-based education. I must object to this development on the basis that the local education system is not currently equipped to support it.
1.7	West of Sandiacre	School Capacity	Georgia Marvin	Response-00261	There are three schools in the town of Sandiacre. An infant, primary and secondary. Which partners have to fight for a place for their children to attend. The schools are overran, overworked, overpopulated as it is. With 180 new homes being built, how many more children will we need to make room for? How are teachers supposed to stretch their very already limited time for? And what about the children the schools already host? Will they be neglected and overlooked to make way for new children? I will be interested how the government plan to solve this creeping issue?
1.7	West of Sandiacre	School Capacity	Gordon Bruce	Response-01455	Residents already struggle and worry about there being a place for their child in over subscribed schools and nurseries. This would make the problem worse.
1.7	West of Sandiacre	School Capacity	Greg Watts	Response-00733	The proposed number of houses would place unsustainable pressure on local infrastructure, including schools
1.7	West of Sandiacre	School Capacity	Helen	Response-00883	Schools are already up to capacity. Further housing will bring more children which when the schools are full will need to go to schools further afield causing more traffic issues
			Helen Gillain	Response-00964	Schools would be stretched to cope with the extra pupils this would create
1.7	West of Sandiacre	School Capacity	Helen whiteman	Response-00447	The local schools are full to capacity already. Where are all the extra children going to go
1.7	West of Sandiacre	School Capacity	Ian	Response-00493	Increase in population will put further strain on freisland school which already has high class numbers and not enough classrooms
1.7	West of Sandiacre	School Capacity	Ian herbert	Response-00939	cloudside school is already at capacity with an ever widening catchment area and significant traffic issues on stanton road.
1.7	West of Sandiacre	School Capacity	IAN TAYLOR	Response-00972	If the development goes ahead with 180 units, it is unlikely that the current schools in the area will be able to absorb the increased numbers of students expected to be living in a development of that size.
1.7	West of Sandiacre	School Capacity	Ian telfer	Response-00991	Schools here are already at capacity and taking kids from ockbrook and Spondon now
1.7	West of Sandiacre	School Capacity	Isabelle Love	Response-00529	Obvious issues with the introduction of 180 houses. Stretch services stretch even thinner, the schools seem to only just be recovering (I have lived here my whole life and attended Friesland school from 2004-2009 - the teachers struggled back then with classes of 30, pupils are failed there).
1.7	West of Sandiacre	School Capacity	Isobel Ball	Response-01092	Our schools are already far above max capacity, especially with the recent influx of asylum seekers taking up housing in erewash. There simply isn't enough room, children living here already are struggling to secure spots in our schools and are having to redirect to the next closest catchment areas. It is unfair to have more children who currently and have always lived here being moved to various other schools because of a sudden increase in population. Particularly for cloudside. It is equally unfair for families moving into these new planned houses to have to send their children to school far away because they cannot rely on convenience.
1.7	West of Sandiacre	School Capacity	Jacqueline Marshall	Response-01436	Have local schools and childcare facilities been advised in advance of the influx of children and are they fully equipped and financially stable enough to handle the increase.
1.7	West of Sandiacre	School Capacity	Jane Dennett	Response-00965	Worried re school placements as most at capacity . Where's funding for new schools !!! I know how hard for schooling as my granddaughter does 4 bus journeys a day.

I believe that Cloudside School is currently operating at capacity, and I understand that other nearby schools are in a similar position. While there is some indication that pupil numbers may fall in the future, we have yet to see any significant evidence of this locally, and any such changes would take time to materialise. An additional 180 dwellings would undoubtedly bring more families to the area, many with school-aged children. Without proper forward planning and investment in additional classroom space, local schools will be unable to provide the places required. This could result in children being allocated places far from their homes, creating further strain on transport infrastructure and undermining the principle of community-based education. This situation is contrary to Paragraph 95 of the National Planning Policy Framework (NPPF), which states that 'It is important that a sufficient choice of school places is available to meet the needs of existing and new communities?' and that local authorities should take a proactive approach to ensuring this. I therefore urge the planning authority to ensure that any future development is matched by appropriate investment in education infrastructure, including the expansion of existing schools such as Cloudside, so that we are in a position to accommodate new pupils without impacting the quality of education provided. Until such assurances and plans are in place, I must object to this development on the basis that the local education system is not currently equipped to support it.
1.7	West of Sandiacre	School Capacity	Janet Edwards	Response-01906	Services are already overstretched & the proposed building would put even more pressure on them.
1.7	West of Sandiacre	School Capacity	Jane Warton	Response-00662	A strain on schools
1.7	West of Sandiacre	School Capacity	Janice West	Response-00989	School places will be much harder to secure with more residents.
1.7	West of Sandiacre	School Capacity	Jeffrey Whittaker	Response-00594	Three local schools are at full capacity as it is

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	School Capacity	Jennifer Tindley	Response-00751	I wish to object to the proposed development on the grounds of insufficient local school capacity to accommodate the likely increase in pupil numbers. 1. I believe that Cloudside Academy is currently operating at capacity, and I understand that other nearby schools are in a similar position. While there is some indication that pupil numbers may fall in the future, we have yet to see any significant evidence of this locally, and any such changes would take time to materialise. 2. An additional 180 dwellings would undoubtedly bring more families to the area, many with school-aged children. Without proper forward planning and investment in additional classroom space, local schools will be unable to provide the places required. This could result in children being allocated places far from their homes, creating further strain on transport infrastructure and undermining the principle of community-based education. I must object to this development on the basis that the local education system is not currently equipped to support it.
1.7	West of Sandiacre	School Capacity	Joanna hardy	Response-01304	Both ladycross infant school and cloudside junior school are at capacity. Building so many new homes would bring more families into the area who would need school places. Ladycross, in particular, has little to no capacity for expansion so would be unable to accommodate more children. So forcing more traffic onto the roads with parents having to drive their children further afield for a placement.
1.7	West of Sandiacre	School Capacity	Joanne Johnson	Response-00765	The capacities for our local schools are nearly full, class sizes are already too large generally.
1.7	West of Sandiacre	School Capacity	Joanne Lambert	Response-00494	Friesland school is planning on building a new school, when this is completed the class sizes are going to be around 40 pupils. Extra housing in the area is going to impact our children's education as resources are going to have to go even further.
1.7	West of Sandiacre	School Capacity	Jodie Shrive	Response-00601	As you will be aware Sandiacre is a small town with very few schools, the school system in this area is already experiencing too high of a demand for the level of children in the area. Adding another 180 homes will put an enormous amount of pressure on schools and children will end up missing out on crucial education. Cloudside school is the only junior school within this catchment area and already in the mornings & afternoons almost entirely closes the road with the amount of traffic that already exists while parents are dropping off and collecting their children, there isn't physically room for any more.
1.7	West of Sandiacre	School Capacity	Jo Gerhardt	Response-01286	Overcrowding of schools in an already overly populated area.
1.7	West of Sandiacre	School Capacity	John whiteman	Response-00450	Schools are bursting to capacity already where will the extra children go
1.7	West of Sandiacre	School Capacity	Karen Alldread	Response-01868	The 3 local schools in Sandiacre are at full capacity, therefore could not take the strain of additional numbers. The consequences of this oversubscription are significant. Our schools are struggling to provide the individual attention and resources that our children deserve. Further strain on these already stretched resources will undoubtedly impact the quality of education and the overall learning environment.
1.7	West of Sandiacre	School Capacity	Karen Evans	Response-00523	More pressure on already stretched services.
1.7	West of Sandiacre	School Capacity	Karen Pitts	Response-00643	Ladycross, Cloudside and Friesland schools are already full to the brim with teachers totally overloaded and at times unable to cope. My daughter completed her PGCE internship at one of these schools so has first hand knowledge. She was there to learn the craft of teaching however her mentor rarely had time to give advice or reflect on practice (a vital part of the learning) due to the large class sizes and workload. There is also a high turnover of staff because these issues are making retention of good teachers harder and harder. An inevitable increase in the number of children to this catchment will only add to this predicament.
1.7	West of Sandiacre	School Capacity	Kathryn Martin	Response-00527	Schools already at capacity
1.7	West of Sandiacre	School Capacity	Katie Morrice	Response-00664	The area surrounding beech avenue and station Road are significantly higher during school times and the traffic around the area already is an issue due to the on street parking just across from the school. The potential of adding a number of homes with families in will increase the commotion around this area especially during school times and elevating the risk of pedestrian safety, particularly for children.
1.7	West of Sandiacre	School Capacity	Kelly Randall	Response-00591	Ladycross Infant School is already oversubscribed and spatially constrained. No clear plans exist to expand school capacity. Have local schools outside the borough been consulted?
1.7	West of Sandiacre	School Capacity	Kerry stokes	Response-00769	We have spoken to the school near us (cloud side) & they are already at full capacity. Where are more children going to attend school?
1.7	West of Sandiacre	School Capacity	Kim	Response-00473	Not enough local schools to cope with extra children to educate
1.7	West of Sandiacre	School Capacity	Kimberley Selby	Response-00478	Means more families fighting to get their kids into their local school and having to travel further afield when they can't
1.7	West of Sandiacre	School Capacity	Kim Helm	Response-00632	Schools will be oversubscribed and giving substandard education
1.7	West of Sandiacre	School Capacity	Kirk Moss	Response-00439	Local schools are already overburdened. The proposed development will increase demand on school places, resulting in longer waiting lists and stretched resources.
1.7	West of Sandiacre	School Capacity	Lauren Freeman	Response-01562	I know from enrolling my year 3 age daughter at Cloudside that this school year is at capacity. These children have another 3 years at the school so no other children can join this school year. I cannot comment on whether the other years are full.
1.7	West of Sandiacre	School Capacity	Lauren Rose	Response-01446	There is only 1 secondary school and a handful of primary and pre-school settings for the existing children in the area. A further 180 homes would place further strain on already underfunded education settings. There is also an ongoing teaching recruitment and retention crisis in education which may mean that students do not have the qualified staff in front of them.
1.7	West of Sandiacre	School Capacity	Leah morral	Response-00712	Schools are already at capacity, where are the children to these families going to go?
1.7	West of Sandiacre	School Capacity	Lesley Bruce	Response-01397	Local parents already wait with bated breath to see if their child has been awarded a place at a school they can walk to. How much worse would the situation be if the children applying from an extra 180 homes are factored in? There is simply no capacity in schools or nurseries.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	School Capacity	lilly stokes	Response-00767	In my school all of my classes are already so full and adding 180 more houses with no other school this will massively increase the amount of students here and make the school quality even worse than it already is. At the moment my lunch time is only 30 minutes as they don't have enough space for a lot of people in the hall at a time, if there is more students coming to the school our lunch time will decrease after it already being such a short amount of time and the classes will become increasingly difficult to study in.
1.7	West of Sandiacre	School Capacity	Linda Allen	Response-01904

1.7	West of Sandiacre	School Capacity	Lisa Heppell	Response-00878	Cloudside school and Friesland school are running at full capacity
1.7	West of Sandiacre	School Capacity	Logan Fox	Response-00746	I go to school at Bramcote College and I think the school is full. Classrooms have a lot of kids already.
1.7	West of Sandiacre	School Capacity	Lorraine Hands	Response-00534	Having Granchildren and also teachers in the family knowing how schools are already stretched the idea of such an increase even if it was on 2-3 a class would effect there education!
1.7	West of Sandiacre	School Capacity	Louise dix	Response-00975	Where are all the extra kids gonna go with most local schools at capacity
1.7	West of Sandiacre	School Capacity	Louise Harper	Response-01571	The schools are at capacity and more increase will be detrimental to the area, more cars dropping kids off as nobody seems to walk to school anymore, kids never look when getting out of school , more traffic on already crowded roads will be an increase in accidents
1.7	West of Sandiacre	School Capacity	Louise Robinson	Response-00647	Schools in the area are already very busy.
1.7	West of Sandiacre	School Capacity	Lucy johnson	Response-01369	My son attends Cloudside Academy! He is currently in year 4 and he is in a class of 32! To me that is absolutely absurd! He and his classmates aren't going to get the full benefit of what they need to learn to further their educations! It's absolutely mental to add more children to the already overcrowded schools!
1.7	West of Sandiacre	School Capacity	lucy victoria garner	Response-00949	local schools already at capacity risk of quality of learning and teaching being reduced by over filled school classes and dilution of support for teaching
1.7	West of Sandiacre	School Capacity	Lynsey Blackburn	Response-01227	Extra developments cause extra strain on public services. No more school places are made available for the additional housing being created.
1.7	West of Sandiacre	School Capacity	Malcolm Dillon	Response-00722	The schools in the Sandiacre township are already running at maximum capacity. This proposed development does nothing to provide additional resources to the township and would create hardship to all current, and new, residents with families requiring school services.
1.7	West of Sandiacre	School Capacity	Malcolm Fox	Response-00215	Most schools in the area are already at capacity and although there will almost always be some spaces, 180 homes with an average of 1.74 per children per home equals almost 320 extra places. All this will result in, is a lack of required school spaces locally and people having to travel further out to get their children to school. More traffic, more travelling only supporting more CO2 emissions linked to poor air quality, more congestion on the already struggling roads in peak time. Again, infrastructure needs to be in place, not simply adding more pressure on the local area.
1.7	West of Sandiacre	School Capacity	Marcel Janovsky	Response-00481	No school capacity
1.7	West of Sandiacre	School Capacity	Mark Gough	Response-00888	Where are the children going to go from the 180 proposed houses ? The schools are already at full capacity, locals are having trouble getting their children in . I spoke to someone who lives on Maple Avenue and they cannot get their children into the schools in Sandiacre and have to travel out of the area . It's so not thought out at all !
1.7	West of Sandiacre	School Capacity	mark skelton	Response-01341	Already very busy schools. Not much space left.
1.7	West of Sandiacre	School Capacity	Mark Warton	Response-00693	Schools: how is the current Education System in the area going to cope, it will be playing with our children's education, this cannot be right.
1.7	West of Sandiacre	School Capacity	Marta McManus	Response-00646	There are other property developments at the moment in Sandiacre (Gas street, Longmoor lane) which will contribute to the school numbers which are already stretched. Cloudside school already lost lots of funding for SEN pupils
1.7	West of Sandiacre	School Capacity	Martin Driver	Response-01387	Schools are already oversubscribed and classes oversized! . Where's are these children going to go to school
1.7	West of Sandiacre	School Capacity	Martin Hardy	Response-01413	Ladycross infant school and cloudside junior school are both full to capacity. Ladycross is a small site and as a result has no additional space to expand. So cannot increase the number of children it could take. 180 extra houses would naturally include families with young children. Where would these children go to school?
1.7	West of Sandiacre	School Capacity	Martyn Locker	Response-00903	I'm not a parent and so I can't speak for how easy or hard it may be to place a child into a school, or average class sizes etc, but additional residents will of course increase demand and put a strain on schools. 180 houses could in theory bring 360 children into the area - do our local schools have the capacity, facilities and staff to give these young people, that will form our future, a fighting chance to excel during these crucial years of their lives? Even one or two years of delays in bringing school capacity and quality up to a required standard to accommodate the additional children would not only have a huge knock on effect on their lives, but think about the long-term. Poorly educated children are more likely to end up in less skilled and lesser paying jobs, or unemployed, which has the twofold impact on our local economy and additional reliance on government services for decades to come.
1.7	West of Sandiacre	School Capacity	Matt Hallam	Response-00476	This could cause schools to be possible over capacity and with the likes of ladycross being a small school, they cannot build bigger. Cloudside and friesland might be ok tho
1.7	West of Sandiacre	School Capacity	Matthew Buckland	Response-00615	The schools in the area are already at capacity, with no possibility of increasing. This will mean additional traffic on the roads, as children will need to be driven to alternative schools.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	School Capacity	Melanie	Response-00586	Ladycross Infant School is already operating at or near capacity and cannot be easily expanded due to site constraints. The nearby Cloudside Academy is also under pressure. The proposed development would significantly increase demand for school places, and no concrete plans or funding commitments have been provided to address this issue. Traffic from parents is unmanageable currently never mind adding to it.
1.7	West of Sandiacre	School Capacity	Melanie Caumont	Response-01272	Local schools are already at or near capacity. With 180 new homes, potentially housing over 300 children, there will be significant strain on school places. No provision has been made for new educational infrastructure, meaning families may be forced to send children far outside the area, undermining community cohesion and increasing traffic.
1.7	West of Sandiacre	School Capacity	Michael Anderson	Response-00461	Will the schools be able to accommodate more students with the problem of insufficient teachers?
1.7	West of Sandiacre	School Capacity	Michael Oscroft	Response-01926	We see no spare capacity in the health care facilities, nor schools to accommodate increased demand generated from the addition of high density housing residents.
1.7	West of Sandiacre	School Capacity	Michelle Ledger	Response-00815	there a few schools in the area, having spoken personally to some of the mums there is major concerns that there simply is not enough capacity to support additional children should 180 houses be built, they would indeed end up having to travel outside the area for schooling, this in addition means driving as walking them wouldnt be an option, which then only adds to traffic conjection
1.7	West of Sandiacre	School Capacity	Mike Darnell	Response-00698	Cloudside junior school is full to capital
1.7	West of Sandiacre	School Capacity	Molly Newbold	Response-00486	Our kids will probably no longer get into the local school because there will be no extra school or development to take another 360 kids, if each household has average of 2 per family.
1.7	West of Sandiacre	School Capacity	Mr Colin Key	Response-01841	Existing limited amenities that are already stretched to capacity and fully subscribed ie Schools.
1.7	West of Sandiacre	School Capacity	Mr K Gubb	Response-01838	Existing limited amenities that are already stretched to capacity and fully subscribed ie Schools.
1.7	West of Sandiacre	School Capacity	Mrs Froggatt	Response-00449	Schools are already at full capacity. More pupils will effect our children's education
1.7	West of Sandiacre	School Capacity	Mrs Lee Farabella	Response-01899	180+ houses will put pressure on schools.
1.7	West of Sandiacre	School Capacity	Mrs M Burke	Response-01887	More houses will add more pressure on schools.
1.7	West of Sandiacre	School Capacity	Mrs Shani Wainwright	Response-00754	The local schools are already under immense strain and are over subscribed,. They do not have the capacity to accommodate the places required that an additional 180 + homes will bring.
1.7	West of Sandiacre	School Capacity	Mrs Sheila Hickingbotham	Response-01338	The type of housing proposed would suggest an increase in the number of school age children. Is there sufficient capacity in the three Sandiacre schools to accommodate an increase in pupil numbers?
1.7	West of Sandiacre	School Capacity	Mrs Whittaker	Response-00595	The local school is already over subscribed, additional children from the new housing may well mean that children are forced to travel further to obtain places
1.7	West of Sandiacre	School Capacity	Nikki Vincent	Response-00688	Local school?s are likely to struggle to accommodate the influx of families this build will bring. With schools already at capacity and particularly Ladycross infant school which is small and unable to be extended, this is going to cause more problems.
1.7	West of Sandiacre	School Capacity	Oliver Marriott	Response-00679	School Capacity School - We only have two schools in sandiacre, one infant, one junior. My understanding is they're current both at capacity - assuming within the new development there will be a percentage of children, where will they go to school? How will you accommodate the, and future children from that development?
1.7	West of Sandiacre	School Capacity	Pam shepherd	Response-00453	The schools are already at capacity surely this will only make it worse?
1.7	West of Sandiacre	School Capacity	Paula Darnell	Response-00665	Cloudside School is full to capacity
1.7	West of Sandiacre	School Capacity	Paul Randall	Response-00131	Ladycross Infant School is physically constrained in size and often over subscribed. How will you gain extra places? Who will fund them? Other schools are nearby but outside of Erewash. Have you consulted them? Cloudside Academy is on the main road. Have you or the school conducted a risk assessment against traffic increases during construction and later? The local schools (Ladycross, Cloudside) are already at full capacity.
1.7	West of Sandiacre	School Capacity	paul wheeldon	Response-00582	Schools are already at capacity
1.7	West of Sandiacre	School Capacity	Philip Reed	Response-01449	Building 180 new homes will significantly strain local schools, leading to overcrowded classrooms and reduced quality of education. Current infrastructure cannot accommodate the likely increase in student population, risking compromised learning environments, stretched resources, and pressure on staff. Adequate planning and investment must precede any housing expansion to protect educational standards.
1.7	West of Sandiacre	School Capacity	Rachel Skelton	Response-01241	Capacity at the local schools is likely to be an issue with an extra 180 houses, meaning children already in the local area may be forced to go out of area for education
1.7	West of Sandiacre	School Capacity	Rcahel Sharp	Response-00652	I hear that school capacity is at a premium locally. Adding more potential pupils will not help this.
1.7	West of Sandiacre	School Capacity	Rebecca Longmuir	Response-00253	There is barely enough capacity for the already established people who've been living in Sandiacre for years! Schools and Doctors included. Locals can't get in themselves. Now you want to add in more people when there isn't the room! What about the impact on the locals and the families already here.?!? Good to know ?our local council putting its self first above its PAYING residents??? and ignoring our worries and concerns!
1.7	West of Sandiacre	School Capacity	Richard Broughton	Response-01352	Potentially around a 1000 people could live on this proposed development, with possibly 300 children, can the local schools absorb these numbers
1.7	West of Sandiacre	School Capacity	Richard Deeprise	Response-00816	Extra people will put more strain on schools
1.7	West of Sandiacre	School Capacity	Richard Jenkins	Response-00264	Our primary schools are already at capacity, and adding 180 new homes will overload the system.
1.7	West of Sandiacre	School Capacity	Richard Marriott	Response-00675	School Capacity School - We only have two schools in sandiacre, one infant, one junior. My understanding is they're current both at capacity - assuming within the new development there will be a percentage of children, where will they go to school? How will you accommodate the, and future children from that development?
1.7	West of Sandiacre	School Capacity	Richard Naylor	Response-00066	Where will all of the additional children go to school? Is there capacity?

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	School Capacity	Ruby Sharp	Response-00886	We only have one infant school, one junior school and one secondary school in the area. If all 180 houses occupy 2 children, that's 360 school places. Schools do not have the teachers, rooms or funding to deal with this. They also do not have the capacity of 180 cars parked around them for school pick ups/drop offs!
1.7	West of Sandiacre	School Capacity	Ryan Selby	Response-00479	More houses, more family?s, more children at the local schools which are already becoming overcrowded
1.7	West of Sandiacre	School Capacity	S. Brailsford	Response-00598	If 1/2 the proposed houses has 1 child it puts a huge pressure on an already full school system where there is a waiting list to attend. Classes become bigger affecting the children from year 1 all through to the secondary stage. Many pre school nurseries in the area are already full to capacity with a waiting list so additional population will add to the pressure
1.7	West of Sandiacre	School Capacity	Sally Davies	Response-01294	Schools in this area have good reputations and do not need to have their capacity expanded and to lessen the quality of them.
1.7	West of Sandiacre	School Capacity	Sally Peake	Response-01893	The schools are already overflowing with immigrant children swelling numbers from social housing.
1.7	West of Sandiacre	School Capacity	Samantha Anne Whitney	Response-00757	Where will the children from these houses go to school? If every house has 2 children that's a extra 360 school spaces. Are there that many spare school places at Ladycross School, Cloudside School and Friesland School? I don't think there is. You can't build all these extra houses without the infrastructure such as schools, doctors, dentists etc in place. Everything is already over subscribed.
1.7	West of Sandiacre	School Capacity	Sam Buckland	Response-00600	The schools in the area are already at capacity, with no possibility of increasing. This will mean additional traffic on the roads, as children will need to be driven to alternative schools.
1.7	West of Sandiacre	School Capacity	Shannon moss	Response-00454	Within sandiacre their is both only 1 primary and juniors within catchment the rest you have to apply out of catchment, putting further pressures onto other areas for schools. We have 1 nursery and 2 preschools again with the increase in the 30 free hours being made form 9 months plus where are these children going to go?
1.7	West of Sandiacre	School Capacity	Sharon weston	Response-00440	Bad enough trying to get kids into schools as it is,let alone there safety going to and from school
1.7	West of Sandiacre	School Capacity	Sheila	Response-00587	Ladycross Infant School is already operating at or near capacity and cannot be easily expanded due to site constraints. The nearby Cloudside Academy is also under pressure. The proposed development would significantly increase demand for school places, and no concrete plans or funding commitments have been provided to address this issue. There will be even more parents driving their children on the school-run which will negatively impact Sandiacre.
1.7	West of Sandiacre	School Capacity	Simon Chambers	Response-00668	180 new homes will possibly mean 180 families moving to the area with only one school for each age group with in the towns boundaries, this will put extra pressure on those schools
1.7	West of Sandiacre	School Capacity	Sonny Bestwick	Response-00901	With children at both cloudside and Friesland, we as parents are constantly reminded of school place shortages without the added pressure of yet another 180 plus homes on the doorstep with still a peep to come from the councils about where the residents children will be educated when no extra schools at being planned
1.7	West of Sandiacre	School Capacity	Sophie	Response-00472	School all over Derbyshire are at full capacity, and families are already having to look for schools further away for their children to attend. Adding potentially 200/300 children to the already overpopulated schools in ridiculous
1.7	West of Sandiacre	School Capacity	Stephen Davies	Response-00214	I understand Cloudside Academy to be fully subscribed. Note in addition to this rush hour traffic in area severely impacted by parents dropping off and collecting children. Cloudside School is currently operating at full capacity and an additional 180 dwellings would undoubtedly bring more families to the area. Paragraph 95 states that it is important that a sufficient choice of school places is available to meet the needs of existing and new communities. Without forward planning and investment in additional classroom space this cannot be achieved
1.7	West of Sandiacre	School Capacity	Steve Bilbie	Response-00285	Schools haven?t got the capacity for the increase in children. Schools are already over subscribe.
1.7	West of Sandiacre	School Capacity	Stuart Pensom	Response-00049	School are all ready at breaking point. Not enough place
1.7	West of Sandiacre	School Capacity	Susan Heinke	Response-00468	Our schools are already full to capacity with too many children to teachers
1.7	West of Sandiacre	School Capacity	Thomas Ilett	Response-01088	I do not have children of school age and am therefore unsure of school capacity for the local schools. However I reiterate that parking and road safety are already significant problems and pose serious risks for Cloudside School. The proposed housing allocation will significantly worsen this, exacerbating already poor/illegal parking, traffic congestion and danger to children, parents and the public (as mentioned in road safety).
1.7	West of Sandiacre	School Capacity	Tina Mcinerney	Response-00954	Schools already over stretched
1.7	West of Sandiacre	School Capacity	Tony Weston	Response-00990	Our primary schools are already at capacity, and adding several hundred new homes will overload the system, leaving our children with limited educational resources
1.7	West of Sandiacre	School Capacity	Tracy Jones	Response-00436	The school and feeding secondary school is at over capacity
1.7	West of Sandiacre	School Capacity	Tracy Kerry-Cliff	Response-00801	Where is the infrastructure so that current schools, colleges etc aren't overran? This needs to be in place BEFORE any houses are built as immediately there will be children wanting school places that are not available.
1.7	West of Sandiacre	School Capacity	Tricia Herbert	Response-00944	Senior school in this area already at breaking point.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	School Capacity	Tyler Hobbs	Response-00879	Building 180 new homes on the greenbelt in Sandiacre would significantly impact local schools, particularly Cloudside Academy and Friesland School, both of which are already operating near or at capacity. Cloudside Academy currently has around 300 pupils enrolled. While the school has not been rated as "outstanding," it maintains a "good" Ofsted rating and offers a supportive learning environment. However, the addition of 180 homes would likely increase local demand for primary school places, potentially leading to oversubscription and larger class sizes. This could strain existing resources and impact the quality of education provided. Friesland School, the only secondary school in Sandiacre. Although specific data on its capacity is not readily available, the school's size suggests it is already operating at or near full capacity. An influx of new families would likely exacerbate this situation, leading to increased competition for places, potential overcrowding, and additional pressure on staff and facilities. The proposed development could also affect other nearby schools, such as Ladycross Infant School, which serves children aged 3-7. While specific enrollment numbers are not provided, the addition of 180 homes would likely increase demand for early years education in the area. An influx of families into the area would increase demand for school places?particularly at nearby primary and secondary schools?which could lead to oversubscription, larger class sizes, and reduced quality of education. If local schools are unable to expand due to space or funding limitations, some children may have to travel further afield for their education, putting additional pressure on transport networks and disrupting community cohesion. In summary, the proposed housing development in Sandiacre could place significant pressure on local schools, potentially leading to oversubscription, larger class sizes, and strained resources. Without adequate planning and investment in educational infrastructure, the quality of education for all students could be compromised.
1.7	West of Sandiacre	School Capacity	Vanessa Asbach	Response-00700	Schools are already having to have around 30+ children in their classes. If we have an additional influx there will potentially 40+ children per class, making work for teachers even harder and unfortunately impact learning for children more difficult. Teachers will be even less able to focus on children's needs to help them succeed in their learning journey.
1.7	West of Sandiacre	School Capacity	Verity Lamb	Response-01298	All local schools are full. Do you intend to build more?
	West of Sandiacre	School Capacity	Vickie Wright	Response-01552	There is already capacity issues in local schools. There is not enough school places to support another 180 new homes
1.7	West of Sandiacre	School Capacity	Vicky	Response-00485	Why destroy more green belt when there are houses empty!! We already have the local hotels filled with immigrants where does it end . Schools are at full capacity with local students plus immigrants
1.7	West of Sandiacre	School Capacity	Victoria Galpin-shrimpton	Response-01009	I have attached my objections as a list however, my main worry is the introduction of construction traffic and additional lorries and care near an already busy dangerous road near Cloudside Primary School. I have seen many near misses on this road and know it is just a matter of time before a child is injured and with an increase of further traffic it is only a matter of time. Therefore, I would urge you to reconsider adding further traffic to this congested area.
1.7	West of Sandiacre	School Capacity	Victoria Marriott	Response-00674	School - We only have two schools in sandiacre, one infant, one junior. My understanding is they're current both at capacity - assuming within the new development there will be a percentage of children, where will they go to school? How will you accommodate the, and future children from that development?
1.7	West of Sandiacre	School Capacity	Wayne Major	Response-00408	As a governor at Cloudside School, I wish to object to the proposed development on the grounds of insufficient local school capacity to accommodate the likely increase in pupil numbers. I am fully aware that Cloudside School is currently operating at capacity, and I understand that other nearby schools are in a similar position. While there is some indication that pupil numbers may fall in the future, we have yet to see any significant evidence of this locally, and any such changes would take time to materialise. An additional 180 dwellings would undoubtedly bring more families to the area, many with school-aged children. Without proper forward planning and investment in additional classroom space, local schools will be unable to provide the places required. This could result in children being allocated places far from their homes, creating further strain on transport infrastructure and undermining the principle of community-based education. This situation is contrary to Paragraph 95 of the National Planning Policy Framework (NPPF), which states that ?it is important that a sufficient choice of school places is available to meet the needs of existing and new communities? and that local authorities should take a proactive approach to ensuring this. I therefore urge the planning authority to ensure that any future development is matched by appropriate investment in education infrastructure, including the expansion of existing schools such as Cloudside, so that we are in a position to accommodate new pupils without impacting the quality of education provided. Until such assurances and plans are in place, I must object to this development on the basis that the local education system is not currently equipped to support it.
1.7	West of Sandiacre	School Capacity	William Marriott	Response-00676	School Capacity School - We only have two schools in sandiacre, one infant, one junior. My understanding is they're current both at capacity - assuming within the new development there will be a percentage of children, where will they go to school? How will you accommodate the, and future children from that development?
1.7	West of Sandiacre	Traffic Congestion	Aaron Locksley	Response-00711	Construction traffic will struggle to navigate the busy narrow streets, which the vital bus service struggles with already, often having to get out and knock on people's doors to ask them to move their vehicle, the bus doesn't even go up Cloudside Road. With the addition of 180-360 cars passing by these quiet roads multiple times a day, and the construction traffic, what are the plans for road maintenance?
1.7	West of Sandiacre	Traffic Congestion	Adam Shooter	Response-01925	As has been proven by various potholes and small sinkholes opening along Stanton Road our current infrastructure cannot handle current traffic levels let alone more. Traffic can already build on many streets due to car width streets.
1.7	West of Sandiacre	Traffic Congestion	Adrian Randall	Response-00463	The proposed location is totally unsuited to further development. The site is only accessed via several small roads at the end of a large estate, the final access road being the smallest. The local already congested roads will not be able to cope with more traffic from 180 new houses crammed into a small space.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	A Harby	Response-01684	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Aimee	Response-00952	Getting out of Sandiacre during rush hour in the morning is already difficult enough as it is. With all these additional homes it will get even worse. There's only a few roads out of Sandiacre and the main routes all have schools along them which make it very difficult to get out. There's long queues of traffic which mean i have to leave much earlier that I should have to just to get to work on time. All these additional homes will have people also needing to commute to work and school which will make the morning congestion unbearable.
1.7	West of Sandiacre	Traffic Congestion	Alexander Love	Response-00626	More congestion Rushy Lane
1.7	West of Sandiacre	Traffic Congestion	Alex Corns	Response-01151	I believe traffic to be the biggest issue; far too many vehicles already, even more now with the new development at Stanton. The roads up to Larch Drive and very narrow, steep, with tight bends. You do have to drive mostly on the other side of the road on cloudside road and there is a blind bend which people park on so you are turning without knowing what is coming the other way. If you encounter vehicles larger than you average car, you have to mount the pavement to get through, not ideal at all for the amount of houses being proposed, i assume more people walking up and down the hill. When it snows everyone struggles to get down or up the hill. People end up abandoning their vehicles. It is very tight for the buses, they have to mount the pavement regularly to get past parked vehicles.
1.7	West of Sandiacre	Traffic Congestion	Alex Lord	Response-00946	The roads around there already have parking issues and are tight to maneuver through [Stanton, Beech & Coronation] adding an entire housing estate that would have to pass through these roads, will increase congestion, and exceed the capacity for traffic on the road
1.7	West of Sandiacre	Traffic Congestion	Alice Cooper	Response-01721	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Alice Ilett	Response-00571	The area is already heavily congested and I see the i4 get stuck regularly because of the parking/traffic and general lack of infrastructure for the traffic we already have.
1.7	West of Sandiacre	Traffic Congestion	Ali Harrison	Response-00947	This proposed development is positioned off a very small access road that will become clogged with vehicles whilst being built and also after with residents cars
1.7	West of Sandiacre	Traffic Congestion	A Malinski	Response-00620	Any additional traffic heading for the motor way would only impact further on the already congested and at times dangerous numbers. No additional routes showing the traffic flow and therefore none given for comment!
1.7	West of Sandiacre	Traffic Congestion	Amanda Leech	Response-01625	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Amelia Loosemore	Response-00537	It will cause more traffic and congestion in the town, which is already a busy town
1.7	West of Sandiacre	Traffic Congestion	Amy Skinner	Response-01447	Traffic in and around the Sandiacre estates up to and including the roads surrounding the green belt land often suffer congestion. Cars are often parked along narrow streets that make it difficult for traffic to get through. This congestion would only get worse with the proposed changes, both during the work being carried out (heavy vehicles travelling to and from the site continually throughout the day) and once the development is complete. Even if each of the 180 households owned just one car that is still far too many to be travelling via Cloudside and Larch Drive. It is folly. This congestion would negatively impact both the residents already living in the area and those that would potentially be moving to the development. It is a logistical nightmare and I fear the consequences should any emergency vehicles need to gain access to any of the affected roads.
1.7	West of Sandiacre	Traffic Congestion	Anastasia Anthony	Response-01865	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic. NPPF Paragraph 11: Development should be refused if there is an impact on highway safety. A52 + B5010 get backed up as it is.
1.7	West of Sandiacre	Traffic Congestion	Andrew Bishop	Response-01186	We currently live on Town street and already the volume of traffic is excessive following the industrial site development at Stanton therefore anymore building in the area will only lead to further issues of congestion, road safety and emissions to residents of Sandiacre.
1.7	West of Sandiacre	Traffic Congestion	Andrew Davies	Response-01295	There is a danger that this will lead to congestion not only on Larch but also on Stanton Rd with implications for the junctions with Rushy Lane & Town St
1.7	West of Sandiacre	Traffic Congestion	Andrew Marvin	Response-00255	Traffic is already an issue , turning into Coronation Avenue and the bend going into Cloudside Road is shocking !! Based on the amount of houses and potential for an extra 250 cars causing more pollution and driving past Cloudside Road everyday is disgusting! 100% accidents will happen I have no idea how the construction traffic will navigate these roads !!!!!
1.7	West of Sandiacre	Traffic Congestion	Andrew Meadwell	Response-01654	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Andrew Solloway	Response-00958	Houses without new roads?
1.7	West of Sandiacre	Traffic Congestion	Andria Nylasi	Response-00672	The roads to access the site are narrow and winding and would cause major disruption getting up to the site. The main access road is also extremely narrow for heavy plant machinery and lorries causing difficulties for the residents to access and leave their property.
1.7	West of Sandiacre	Traffic Congestion	Andy Martin	Response-01761	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Angela Roberts	Response-00681	The area is already congested and more houses will make the situation worse.
1.7	West of Sandiacre	Traffic Congestion	Angela Whitehead	Response-00544	Access is restricted to the development and increases existing traffic issues in and around Sandiacre roads especially given the new Stanton Ironworks housing increase. No more traffic through Sandiacre

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Annabel Marriott	Response-00760	The roads around the site are already busy especially due to the amount of parked cars making it difficult to navigate around the roads. An increase in traffic will not help this situation. The main road (Stanton Road) is chaos when it's school times and when Sandiacre town football club is in use. Accidents will happen, people are forced to drive onto the pavements which is also of risk to pedestrians.
1.7	West of Sandiacre	Traffic Congestion	Anne Butler	Response-00385	Site access through the back streets of Sandiacre will be a nightmare for anyone living in that area of the town. As it is the narrow streets are difficult to negotiate with all the on road parking that goes on, because when the estate was built, people did not have the amount of cars they have now.
1.7	West of Sandiacre	Traffic Congestion	Anne Castledine	Response-00499	Stanton Road isn't wide enough for the traffic we have now. Often buses can't get through, and cars often drive on pavements to get through on school pick up and drop offs.
1.7	West of Sandiacre	Traffic Congestion	Anne Jenkins	Response-00350	The area proposed cannot support any construction traffic.
1.7	West of Sandiacre	Traffic Congestion	Annette Jones	Response-00961	Traffic congestion is already a problem getting to and from this area. I live on Chestnut Grove and there's not enough parking on the street as it is so parking on the pavement has become a norm. I have a driveway but getting off the drive because cars are parked at the front is a regular problem. What about the push chairs and mobility scooters nobody takes this into consideration. The school on Stanton Road causes parking and access issues to neighbouring streets. Commuting to work when it is school time or football club events has been a major issue and a 20 minute drive to work as to be planned carefully. The buses also have difficulty getting to and around the estate as accessibility is not always easy and because of the number of cars per home and space to manoeuvre or pull in is limited at times.
1.7	West of Sandiacre	Traffic Congestion	Ann Foxall	Response-00748	overloading already very busy roads through Sandiacre
1.7	West of Sandiacre	Traffic Congestion	Ann Harrison	Response-01602	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Anthony Ford	Response-01921	I already struggle to get out of my drive because of the traffic. Kings Road is a prime route for drivers. There has already been a tragic accident this year, additional cars will not make things easier or safer. It will increase traffic flow on Kings Road & impact adversely on our life on this road.
1.7	West of Sandiacre	Traffic Congestion	Anthony Pearson	Response-01760	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Anthony Smedlewick	Response-01877	I stay at my girlfriends house several times a week & struggle to get out of Taft Avenue now, without more traffic.
1.7	West of Sandiacre	Traffic Congestion	Antony M Ingram	Response-01626	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Antony Weston	Response-00438	Traffic along Coronation road is already congested due to parked cars, the bus struggles to get up on a daily basis also surrounding roads are very tight due to lack of off road parking, I live on Chestnut grove and we see refuse collectors and emergency services struggling to get up this and surrounding streets. Stanton road also sees congestion outside the school and football club. And you seriously want to add more misery on the roads to the established residents
1.7	West of Sandiacre	Traffic Congestion	April	Response-00469	One of the most immediate and pressing concerns with the development of a high-population state in our area is the inevitable increase in traffic congestion. Our current infrastructure is not designed to accommodate a significant surge in vehicular activity, and without substantial upgrades, residents will face longer commute times, increased air pollution, and a higher risk of accidents. Local roads and intersections, already experiencing periodic bottlenecks, will become overwhelmed, negatively impacting the daily lives of existing residents. Introducing thousands of new vehicles into the area without a comprehensive traffic management and public transportation plan will strain emergency response times and reduce overall quality of life.
1.7	West of Sandiacre	Traffic Congestion	A R Gregory	Response-01918	
1.7	West of Sandiacre	Traffic Congestion	Arleen Corns	Response-01146	The roads around Sandiacre are already in a terrible state and there are far too many vehicles traveling through, even more than ever due to the new development @ Stanton. Huge lorries thundering through a very small town. Sandiacre is called a town but is much smaller than say Long Eaton. The roads upto the proposed development are narrow, steep; they twist and turn with blind bends. The buses and other larger vehicles struggle around the streets, they often have to pull up and ask residents to move their vehicles or mount the pavement. At school opening and closing times it is utter bedlam with cars parked on pavements forcing other drives to pull out onto roads, driving blind as they cannot see what is coming. Also, if it snows is causes a big problem; if residents can get down they cant get back up. Lots of residents park on the road further down but if another potentially 300+ vehicles are trying to do the same, how will that work. There will be abandoned cars every where.
1.7	West of Sandiacre	Traffic Congestion	Ashley Cartlidge	Response-01423	There is already too much traffic in the area.
1.7	West of Sandiacre	Traffic Congestion	Awson Wheldon	Response-01649	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Barbara and John Morrell	Response-00509	I live on Beech Avenue which is already used heavily by traffic other than residents. It is also a bus route running every 20 minutes and there is a school on Stanton Road at the bottom of the Avenue. During school drop-off and pick-up times there are cars everywhere on the Avenue, including the pavements. Buses sometimes can't get down the avenue because of parked vehicles. Also cars cannot see to get onto Stanton Road because of vehicles parked on the pavements at the bottom. I have been concerned for some time about the amount of traffic, and the speed, on this avenue and am even more concerned now with the proposal to build these houses. Most homes now have 2 cars and this fact will generate far too many cars travelling along Beech Avenue. Beech Avenue was never intended to be the thoroughfare it is today and I fear for the safety of children especially, but adults as well in this residential area. I strongly oppose this proposal to build 180 houses on this land.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Barbara Michell	Response-01787	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Barbara Warton	Response-01886	Huge lorries using Derby Rd regularly. Infrastructure not adequate to take the amount of traffic, roads are ALWAYS being damaged. The roads around Sandiacre are already congested as it is. Fire engines, ambulances will have great difficulty accessing the needy.
1.7	West of Sandiacre	Traffic Congestion	Barry Partridge	Response-01778	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Ben Hollins	Response-01651	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	ben riley	Response-00607	Traffic congestion is already causing enough pollution and a danger to the surrounding school as it is. Adding 180 homes will only increase this.
1.7	West of Sandiacre	Traffic Congestion	Ben Snowdon	Response-00428	Traffic along Stanton Road and the surrounding streets is currently untenable. The busses struggle to get past especially on Stanton Road and I have nearly been run over by cars driving on the pavement to get past. Added traffic congestion will compound this situation.
1.7	West of Sandiacre	Traffic Congestion	Bethany Oakes	Response-00960	On a work day between 7.30 and 9am, it is already impossible to access the motorway in under 30 minutes. Rushy Lane cannot cope with any more traffic.
1.7	West of Sandiacre	Traffic Congestion	Beverley Gardner	Response-01692	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Beverley Green	Response-01686	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Bill Hartley	Response-01696	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Bill Meadwell	Response-00864	The area from Cloudside Road down to Town Street, Rushy Lane and beyond are congested at all times of the day. With the increasing amount of HGV traffic from the old Stanton site, it can take several minutes to get to Derby Road whichever route is taken. This is often due to the combination of parked vehicles and heavy traffic. Already the buses and dustbin lorries struggle to get through, and emergency services must have the same problem. The official figure is that each household will own an average of 1.2 cars, giving an extra approximately 220 vehicles from the development. These houses will need to be serviced by food deliveries, courier services etc, with only one route in and out of the site. The access from Larch Drive is narrow - without any parked cars it is difficult for two vehicles to pass side by side. With parked cars as well, it will be impossible.
1.7	West of Sandiacre	Traffic Congestion	Britta Solloway	Response-00959	Traffic going towards J25 Island a nightmare already
1.7	West of Sandiacre	Traffic Congestion	B T Duke	Response-01900	Roads not suitable for extra traffic. Dangerous for children.
1.7	West of Sandiacre	Traffic Congestion	B T Keen	Response-01735	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	c/o The Equalised Club	Response-01603	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Callum binnall	Response-00460	The traffic will be ridiculous around cloudside. Sandiacre is a small nit place and adding all these additional houses will surely congest the area. Most likely have more accident/hit and runs
1.7	West of Sandiacre	Traffic Congestion	C A Partridge	Response-01903	There are 2 roads up to the proposed area location and Beech Ave leading to Cloudside, these roads have very tight, sometimes blind areas. These roads are just not suitable for extra traffic. Sometimes the busses get stuck in snowy weather, traffic can not get up the hills. Bus services could not be extended. I have even slid in my car down the hill.
1.7	West of Sandiacre	Traffic Congestion	Caroline Blackmore	Response-00451	Sandiacre already has traffic congestion from Derby Road and Stanton with huge HGVs all day.
1.7	West of Sandiacre	Traffic Congestion	Caroline Driver	Response-00618	The roads are too narrow for current traffic, never mind an additional 700 vehicles per day. During school start and finish there is dangerous parking, roads reduced to single file. It is already dangerous for motorists and pedestrians often having to edge out blindly before any extra vehicles. The bus gets stuck regularly with the driver honking their horn and knocking on doors. The additional congestion that Stanton park will already cause on the main roads to the motorway will already leave us gridlocked in the estate and the queues back up into the estate causing hazards to pedestrians.
1.7	West of Sandiacre	Traffic Congestion	Caroline Roy	Response-00945	Surrounding roads won't be able to support the construction traffic, plus these roads are already congested and blocked enough with parked cars, let alone adding in all the cars for these new homes that will need to get through
1.7	West of Sandiacre	Traffic Congestion	Carol Marshall	Response-00736	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic. Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to residents for many years. The roads in Sandiacre are already congested with traffic coming from Stapleford which is in Nottinghamshire plus Stanton traffic also. A survey of traffic in Sandiacre is well over due.
1.7	West of Sandiacre	Traffic Congestion	Carol morrice	Response-00795	Cloudside road is a very small road and the extra volume of traffic going through there will be a nightmare
1.7	West of Sandiacre	Traffic Congestion	Carolyn Hallam	Response-00489	There is already far too much traffic in Sandiacre. The lorry parking in Stanton has already caused more huge lorries to travel through the local streets. This development will add misery and gridlock to the narrow streets of Sandiacre
1.7	West of Sandiacre	Traffic Congestion	Catherine Greenaway	Response-00429	The roads around the area, especially Beech Avenue and Coronation avenue cannot take the extra traffic, more so the construction vehicles. These avenues are not wide and buses already struggle to get through.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Catherine Richardson	Response-00531	The site proposed would be difficult to access. Too many parked cars on and off the pavement. A lot of people working from home now. Also heavy traffic and parking around the school on Stanton road is already a problem. The terrain is too steep and narrow for safe access especially HGV. Soon be a bad accident if this goes ahead
1.7	West of Sandiacre	Traffic Congestion	Charles Hopkinson	Response-01831	Traffic is already a problem in the area drivers park on the pavement to allow buses and large vehicles to pass on stanton road.the whole of sandiacre is gridlocked at times more homes mean more cars .how long would this development take if approved the wildlife would also suffer.
1.7	West of Sandiacre	Traffic Congestion	Charlotte Fry	Response-00583	The roads are already tight enough when people park either side and we already have buses coming past. It will become gridlocked and nobody will be able to get in and out their houses
1.7	West of Sandiacre	Traffic Congestion	Charlotte Hunter	Response-01376	This is a tiny road which is at the bottom of a bus route, cars will be struggling to pass as cars park on the road. therefore causing congestion.
1.7	West of Sandiacre	Traffic Congestion	C Holmes	Response-01620	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Chris Hume	Response-01373	Cars and vans are always parked on the paths on Coronation Ave, Cloudside Rd and Chestnut Grove making access difficult without additional housing. This problem extends to the whole area, Stanton road is often congested and the quality lorries on Town street is currently is a danger.
1.7	West of Sandiacre	Traffic Congestion	Chris Jones	Response-01718	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Chris O Connor	Response-01641	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Christian Rearson	Response-01763	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Christine Anderson	Response-00484	Extra traffic congestion which would happen with the proposed 180 new properties would be catastrophic to this area. We already struggle with small roads and vehicles such as 14 buses, ambulances cannot get through. Cars are parked on pavements and access is very limited.
1.7	West of Sandiacre	Traffic Congestion	Christine Gough	Response-00578	The bottom of Beech Ave is congested with traffic every day with school drop offs, buses struggle down Beech Avenue as it is and gets blocked . You cannot see the road when trying to pull out onto Stanton Road from Beech Avenue as there are so many cars parked . Some serious injury is going to happen soon and worrying it could be a child . Mobility scooters cannot get on the pavement with cars parked on them . The pollution is horrendous, the air is bad with cars and traffic and it?s worrying for people with Asthma and lung problems . Stanton Road is very busy . All these roads cannot cope now with the traffic so another 180 houses and even more cars is absolutely beyond madness .!0
1.7	West of Sandiacre	Traffic Congestion	Christine Ridgway	Response-00465	I have lived on Norbury Way for 27 years and worry that the proposed housing development will create more traffic from this part of Sandiacre, which will affect me able already struggling to cross the road to go to work and walk the dogs, due to more cars being on the road.
1.7	West of Sandiacre	Traffic Congestion	Claire binnall	Response-00459	The roads are already too busy on long Moor lane and town street I live on lawrence street and the lorry traffic is already dangerous and excessive
1.7	West of Sandiacre	Traffic Congestion	Clair Ellis	Response-00475	I live on Spencer Avenue and traffic is bad enough as it is. Extra traffic coming up this bus route to gain access to a new estate further up the hill will be unbearable.
1.7	West of Sandiacre	Traffic Congestion	Clare franks	Response-00498	Traffic in and around the sandiacre area is already poor. Parking on and around the schools is terrible as well as parking around the football club. Adding homes will only add to this. The motorway junction also suffers with congestion. Road surfaces are poorly maintained and this will only make it worse
1.7	West of Sandiacre	Traffic Congestion	Clare Green	Response-01751	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Cole Hawkins	Response-01714	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Colin Billington	Response-00227	Roads too narrow for access
1.7	West of Sandiacre	Traffic Congestion	Colin Cox	Response-01716	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Colin Marriott	Response-00686	Access to the site would be up Stanton Road, an already congested road. Then onto Coronation avenue, Cloudside Road and Larch Drive which is only just over 5 metres wide and totally unsuitable for heavy traffic
1.7	West of Sandiacre	Traffic Congestion	Collette Kenny	Response-00579	The Traffic on Stanton Road Especially weekdays during School hours is absolutely ridiculous.. Even the Buses struggle due to the Parking !!! We Don?t need Massive Lorries and Plant Machinery Hurting By The Roads are Not Designed For it
1.7	West of Sandiacre	Traffic Congestion	Connor Murfin	Response-00926	It is already congested as it is round that area, this allocation will make it even worse.
1.7	West of Sandiacre	Traffic Congestion	Corrina loosemore	Response-00589	180 cars extra Existing roads already struggling with extra traffic Busses have to drive on pavements
1.7	West of Sandiacre	Traffic Congestion	Courtney Bennett	Response-00593	There is already enough heavy traffic through the area of Sandiacre causing enough noise and air pollution that devalues the houses already in the area, causes damage to roads (such as potholes that are not repaired) and causes dust on the roads and in the air.
1.7	West of Sandiacre	Traffic Congestion	C Owen	Response-01917	The roads are not built for all the traffic it has at the moment, let alone the construction traffic and all the new homes with their vehicles.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Craig Freeman	Response-01561	It is already very congested to drive anywhere towards Larch Drive for the handful of cars that have to go this far back from Stanton Road. Increasing the volume of traffic these access roads would be dangerous and cause bottlenecks for all users. Often cars are already frequently driving onto pavements to avoid blockages and this will only increase causing singinifacnt danger to pedestrians and frustrations to drivers.
1.7	West of Sandiacre	Traffic Congestion	Craig Richards	Response-01638	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Craig Thims	Response-01765	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Cristina Jenkins	Response-01588	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	C Thompson	Response-01634	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	DAllen	Response-00525	Definitely more cars on the road which will affect traffic which is already congested due to fourway traffic lights in Sandiacre bridge
1.7	West of Sandiacre	Traffic Congestion	Dana	Response-01173	Will add to congestion at M1 roundabout
1.7	West of Sandiacre	Traffic Congestion	Daniel	Response-00545	The local roads at the top of the estate and surrounding avenues, are already narrow with kerbside parking on both sides. This significantly reduces the effective road width, leaving very little space for two-way traffic and emergency vehicle access. There is a particularly hazardous blind corner on cloud side road, creating an unsafe environment for both pedestrians and drivers. Introducing a large volume of new traffic will dramatically increase the risk of road traffic collisions. An additional 180 homes could conservatively result in over 300 additional vehicles (assuming an average of 1.7 cars per household), further congesting roads that were not designed for such capacity.
1.7	West of Sandiacre	Traffic Congestion	Daniel Downes	Response-01630	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Daniel Hands	Response-00057	To access the site would mean increased traffic on an already busy enclosed estate. The roads, layout and current number of cars per residency are already creating issues in and around the area, especially around peak school hours when there is often gridlock caused by the number vehicles trying to access or exit the estate. At weekends when residents use on street parking, this creates further issues as lorries and large vehicles struggle to navigate through. To increase the number of vehicles trying to access this site will only negatively impact residents and will create increased frustration and risk. The current bus route is often blocked as the streets are simply not wide enough to accommodate parked vehicles and larger vehicles such as buses. I dread to think what would happen if a fire engine were to try to gain access at these times.
1.7	West of Sandiacre	Traffic Congestion	Danielle Harrison	Response-00568	This is already a densely populated estate. I have witnessed the bus and ambulance crews, struggle to navigate the routes through the estate due to the volume of parked cars and lack of off-road parking. An additional 180 homes, each with multiple vehicles, is sure to add greater congestion and pollution.
1.7	West of Sandiacre	Traffic Congestion	Daniel Naylor	Response-00680	With 2300 homes approved for development in the 2022 Erewash core strategy in neighbouring kirk hallam and Stanton, and the currently developing industrial units in Stanton using Sandiacre and Stanton by dale as direct access to the m1, it would be absolute lunacy to building 180 new homes in Sandiacre to add to this, as sandiacre is absolute gridlock already at peak times without all these developments adding to it. Sandiacre and nearby villages in the current day suffers huge traffic gridlock during peak times and with the development of the industrials units in nearby Stanton currently in its infancy, it's a 100% certainty that the weight of industrial traffic will increase, much to the detriment to the people of sandiacres way of life in the coming years. With the Erewash core strategy (that includes the development of 1300 homes to be built on greenbelt land in neighbouring kirk hallam and a further 1000 houses to be built in Stanton) of March 2022 approved by the previous conservative led council, Sandiacre is already at further risk to bear the majority on the traffic from those developments as sandiacre and Stanton by dale are the direct routes for gaining access to the M1. If both these examples aren't bad enough for the residents of sandiacres impending doom regarding traffic gridlock, imagine my absolute shock and bewilderment when I heard of an extra 180 homes proposed to be built on the edge of a sandiacre housing estate, namely west sandiacre? For the reasons given above, I object to this development profusely, for many reasons which will follow but mainly for the sheer weight of traffic that sandiacre will already struggle to cope with, without an extra 180 extra homes to add to the problem. Sandiacre just doesn't have the road infrastructure to handle the extra traffic capacity as it already struggles today, as it serves as a direct route to the M1 from nearby towns and villages. I understand that local councils are under pressure to build more homes which in turn generates more council tax income, but to add to an already ongoing problem is unfair to the local residents and I plead with anybody in authority to put their concerns as high priority above all other issues. I have 20+ years' experience working alongside the construction industry, project managing the delivery of utilities to new developments, so I can say with all confidence that the access proposed for this new development is nothing short of logistical lunacy. This development if approved would struggle to commence as the vehicles required to deliver materials and machinery required to complete these developments would find it impossible to navigate the narrow local roads, with tight bends that would make it mathematically impossible for some long base vehicles to maneuver. I would also question the load bearing of the local roads as these were never built to take such heavy traffic, and the heavy vehicles required on a daily basis over several years during development would destroy the roads over and over. This area of sandiacre is a quiet area and as such, this has been a huge factor when families and elderly people choose to live here. The risk of harm from extra traffic would multiply, with this area taking heavy traffic not common in this area during development, then afterwards with 180 homes adding to the area permanently.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Darran and Emma Rea	Response-00597	The area is already congested, it is an active bus route where the bus does struggle at times to get around, even worse when it is winter. Parking is a nightmare already even with houses that have off road parking.
1.7	West of Sandiacre	Traffic Congestion	David Casey	Response-01608	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	David Cater	Response-01756	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	David Fry	Response-00596	The traffic through sandiacre is already too busy and causing problems
1.7	West of Sandiacre	Traffic Congestion	David Ruddock	Response-01776	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	David Thompson	Response-01324	Insufficient infrastructure for 180 homes
1.7	West of Sandiacre	Traffic Congestion	David Tindsley	Response-00515	I wish to object to the currently proposed vehicular access for this development. Based on the plans, the access appears to be significantly constrained. Even with the removal of trees/hedges and the construction of the highway over existing root zones which should be protected, the widest achievable opening is only 5.7 metres with the current gate being only 2.7m. This also assume they own the current land to achieve the 5.7m. A two-way road typically requires a width of 5.5 to 7.3 metres, plus space for a pedestrian footpath. Having measured the current road at the point near the gate, the actual road is only 5.4864m wide, which falls below the minimum required for a two-way road. If the existing footpaths are added to this measurement, the total width required to continue the existing footpath lines and the road itself is 9.04 m Therefore, even with the absolute minimum road width just after a bend, this proposal fails to allow for safe pedestrian access alongside vehicle movement. As a result, the development of 180 homes would leave residents without a safe pedestrian route in or out of the site. This conflicts with NPPF Paragraph 110, which requires developments to give priority to pedestrian and cycle movements and create places that are safe, secure and attractive for all users. Additionally, the route leading to the site from the main road consists of narrow residential streets, which are frequently lined with parked cars, both on the roads and on the pavements. The latter could cause significant accessibility and safety issues for people of limited or restricted mobility and parents with young children and pushchairs. The Sandiacre Neighbourhood Plan 2022-37, recently agreed following a referendum, clearly identifies many of these access roads as already being congested. There is existing evidence of buses getting stuck, particularly on Beech Avenue, indicating that large vehicles, especially construction traffic, would be unable to safely navigate these roads. I am also concerned that a fire engine, ambulance or any emergency vehicles, plus delivery vehicles, post office vans and supermarket/courier deliveries would struggle to access the site in a timely manner due to these same constraints, particularly where parked cars restrict manoeuvrability. This raises serious concerns regarding access for emergency services and the safe management of construction traffic, in conflict with NPPF Paragraph 111, which advises that development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety or the residual cumulative impacts on the road network would be severe. The proposed development will also increase the number of vehicles using these currently quiet roads. At present, drivers patiently wait for one another to pass parked vehicles. However, with significantly more traffic generated by 180 homes, the parked cars that currently cause little disruption are likely to create congestion and hazards for pedestrians. Current ONS statistics suggest that there are an average 1.29 cars for each household in the country. This would suggest an additional 232 for a development of 180 properties. However, given that only 10% of the development would be earmarked for ?affordable? housing, with the remainder (based on the developer?s other sites locally) likely to be 3, 4 and 5-bedroom houses, the expectation is the number of cars will be significantly higher. This runs counter to NPPF
1.7	West of Sandiacre	Traffic Congestion	David Tindsley	Response-00515	Paragraph 112, which stresses the need for developments to enable safe and suitable access for all users and to minimise conflicts between vehicles and pedestrians. Cloudside Road, the ONLY access to Larch Drive, is on a steep gradient. In snowy or icy conditions, it actually becomes impassable. It is never gritted (presumably one of the reasons being that the gritter lorries cannot access the road), and it relies on local residents to grit the road manually accessing a grit-box halfway up the road. For all of these reasons, I strongly object to the proposed vehicular access arrangement and urge the planning authority to reconsider a solution that ensures both safe pedestrian connectivity and appropriate vehicle access, without compromising the surrounding residential streets.
1.7	West of Sandiacre	Traffic Congestion	David Yeo	Response-01705	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Dawn Glennis Smith	Response-00510	Traffic congestion is already a problem in the existing area and would only get worse with the building of these houses.
1.7	West of Sandiacre	Traffic Congestion	Dean Bosworth	Response-01665	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Dean Lavelle	Response-01774	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Dean Michell	Response-01343	At school times the bottom of Beech Avenue is unsuitable already. Living on the corner of Beech Avenue I often see cars cutting the corner leaving on coming traffic to swerve. When a lot of people are parked on the road buses have problems getting down the Avenue.
1.7	West of Sandiacre	Traffic Congestion	Dean Peake-Whitehurst	Response-00488	The road system in the local village will not handle the increased volume of traffic and would be unfair on existing residents
1.7	West of Sandiacre	Traffic Congestion	Debra Michell	Response-01346	Living on the corner of Beech Avenue for over 30 years I have seen many accidents . From cars cutting corners, buses hitting cars and knocking down their own bus stops. This is our road is narrow so when car park on the road everyone as problems using our Avenue. Police have been to my home on a number of time and ask us to park on the pavement. A lot of the time it?s not our cars.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Debra Scully	Response-00288	The road leading up is not suitable for the volume of traffic that the site will bring to the area. The roads leading up to the site have large amounts of in road parking already meaning the roads are essentially single carriageway. The access way to the site cannot be widened due to existing properties. The practicalities of the build itself is hugely problematic due to the narrow access on approach roads. Huge Lorries will not be able to access the site.
1.7	West of Sandiacre	Traffic Congestion	Debs Washer	Response-00487	Increase to traffic, parking around this area is already hard
1.7	West of Sandiacre	Traffic Congestion	Denise bennett	Response-00030	Sandiacre already has substantial traffic through the centre - the valley is known for its high pollution already
1.7	West of Sandiacre	Traffic Congestion	Denise Creasey	Response-00786	It is very unsuitable for the access to be from Cloudside as the very considerable increase in traffic would make this very dangerous on roads which are already busy with parking on both sides of the roads. The increase in volume of traffic would further increase the existing problems. Furthermore, the use of Cloudside for heavy construction traffic with the noise, vibration and dirt would be environmentally detrimental to both residents and wildlife for many years. These problems would be made worse in bad winter weather.
1.7	West of Sandiacre	Traffic Congestion	Denise Lingard	Response-01759	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Dennis Watts	Response-01726	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Derek Morton	Response-01607	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Derrick Hunt	Response-00437	Access to Stanton road from either end is very restricted to hgv's for this development. Cloudside Infants school already causes ridiculous congestion on Stanton road. The only one way bus route through the estate is regularly held up or diverted due to the narrowness of the roads and would not be able to get anywhere this new estate. Coronation ave cloudside road and beech AVE are all narrow roads with vehicles parked all over now. Most houses now have 2 vehicles and a lot on this estate don't have off road parking
1.7	West of Sandiacre	Traffic Congestion	Destiny Jade-Blake	Response-01636	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Diane Jones	Response-00852	Sandiacre is already suffering from excess traffic accessing the A52 and M1. This will increase with the development of the Stanton site. Roads local to this proposal are totally inadequate for construction traffic.
1.7	West of Sandiacre	Traffic Congestion	Diane Mcmorrow	Response-00433	Traffic congestion is already a problem especially around school times 8.30 till 9am and 2.30 to 3pm Monday to Friday on Stanton Road Beech Avenue Elm Avenue and Spencer Road. It's also on a bus route and some drivers use it as a short cut from the M1 junction 25
1.7	West of Sandiacre	Traffic Congestion	Diane Meadwell	Response-00807	Access would be via Larch Avenue and along Cloudside Road, both of which are narrow and unsuitable for large numbers of vehicles. There is no other means of access. From Cloudside Road, traffic would only have the choice of turning left on to Maple Avenue and down Beech Avenue, or turning right and travelling along Coronation Avenue. Both of these roads are narrow and unsuitable for the additional traffic that this development would undoubtedly bring about. From there, traffic would either turn left towards Lenton Street/Town Street, or right along Stanton Road towards Rushy Lane. Both of these routes are already very congested, with queues forming for much of the day. Add to this the rapidly increasing number of lorries now being generated by the development of the Stanton land, and the roads that are already over used and in very poor condition will deteriorate further. Local residents are regularly reporting that they can take up to five minutes to get out of Church Lane and on to Lenton Street or Town Street. The junction at the bridge in Sandiacre is having to cope with more traffic than previously, with delays most of the day.
1.7	West of Sandiacre	Traffic Congestion	Diane Turner	Response-01744	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Donna Steele	Response-00781	I live on Larch Drive and the roads leading up to the proposed site are already full of cars parking, both Cloudside Ave and Larch Drive are very narrow roads and are not suitable for heavy Lorry's to access the site. Also once the houses are built this will put more pressure on the roads. Traffic is already a nightmare especially at school run times on Beech Ave and Stanton Road. The area is a beautiful quiet place which was one of the reasons moved here, this will all change if these houses are built.
1.7	West of Sandiacre	Traffic Congestion	Dorothy Deeprise	Response-00817	Traffic is bad now this will make it worse
1.7	West of Sandiacre	Traffic Congestion	D Pallett	Response-01627	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	D Simpson	Response-01712	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	E Cooper	Response-01923	Already too many parked cars for buses. Increase in traffic would cause more issues & worsen the already problematic issue.
1.7	West of Sandiacre	Traffic Congestion	Elaine Pickering	Response-00811	Sandiacre hasn't the infrastructure to cope the extra traffic
1.7	West of Sandiacre	Traffic Congestion	Eleanor Moseley	Response-00799	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Eleanor Newman	Response-00718	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Elisha Gunn	Response-00585	We already live close to busy roads adding additional cars will increase congestion and make the roads less safe for school children
1.7	West of Sandiacre	Traffic Congestion	Emily	Response-01880	Already too much traffic with the schools and HGV etc.
1.7	West of Sandiacre	Traffic Congestion	Emily Milnes	Response-00470	Traffic through Sandiacre already incredibly busy, further traffic will overload the roads

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Emma	Response-00492	Roads are hard to get up and down in that area as it is with added residence let alone the building work and vehicles they'll be using. This will cause a lot of traffic and difficulty to get up and down as the roads are narrow.
1.7	West of Sandiacre	Traffic Congestion	Emma Fox	Response-00230	The traffic is a nightmare as it is especially by the school. It means it's going to be even worse. At the moment larch drive is tight at the best of times and now with hundreds of extra cars it's going to be unbearable. We have also paid for this lifestyle, beautiful surroundings and now you are planning on building hundreds of houses which is now going to be damaged. I will not vote for this.
1.7	West of Sandiacre	Traffic Congestion	Emma Peterson	Response-00491	Traffic is bad now
1.7	West of Sandiacre	Traffic Congestion	Emma Ryan	Response-00503	There are already plenty of vehicles in and around Sandiacre. The amount of vehicles has gotten worse over the years, this will just further compound that.
1.7	West of Sandiacre	Traffic Congestion	Emma Wall	Response-00319	The roads are not suitable for a large amount of traffic. They're already breaking apart on Coronation Avenue which is where you propose access through and up into this new spot of land that you're calling grey belt which is in fact greenbelt. The traffic is already bad around the school area in Stanton Road. There's parking on either side of the road everywhere in the smaller roads such as Sycamore, Chestnut, Cloudside etc
1.7	West of Sandiacre	Traffic Congestion	Emma Wilson	Response-01222	Its horrific already at peak times at Sandiacre lights, putting in this many houses on top of all the additional lorries that will be there due to Stanton Park will make it 1000 times worse.
1.7	West of Sandiacre	Traffic Congestion	Esme Moss	Response-00592	Will contribute to additional traffic congestion, especially near the local schools which adds additional safety concerns to children.
1.7	West of Sandiacre	Traffic Congestion	Esther Cook	Response-01861	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Ewan Snowdon	Response-00766	The traffic congestion is already heavy at certain times of day, as a young driver it's very stressful and by building these new homes it will add further traffic and cause higher stress and anxiety when I'm trying to travel down to visit my dad and struggling to find a safe place to keep my car without having to worry about large Lorries and traffic causing damage to my car or forcing me to leave my car in a place that doesn't guarantee it's safety.
1.7	West of Sandiacre	Traffic Congestion	Fay Cresswell	Response-00701	Sandiacre West is already densely over run with traffic at peak times of the day. On Cloudside there are often people parked on the pavement causing it to be very difficult to get out of Chestnut Grove yesterday a van was parked on the corner and my husband had to inch forward to see then a car came driving round the corner from Maple making us have to reverse back into Chestnut Grove where vehicles were double parked. This was so dangerous and if it had been a van etc it would have struggled to reverse. There is a blind bend at the top of Cloudside turning right towards the proposed new development where vehicles park dangerously all ready. Further down the hill there is another blind corner in front of the Sandiacre Town Football Club and Scout hut which is particularly dangerous. When there's a match or event people park right up to the entrance both side of the CarPark down the road as far as Beech Avenue so if you come round the blind bend you instantly get obstruction and if a car decides to come the other way as it can't see you there's no option but to mount the curb which is outside the Primary school someone will get hurt.
1.7	West of Sandiacre	Traffic Congestion	Finlay Moss	Response-00588	There's a school nearby and there isn't enough infrastructure for the increased traffic this will create
1.7	West of Sandiacre	Traffic Congestion	Gail and Tony Orme	Response-00805	We already have to suffer HGV lorries 'constantly' driving through Sandiacre. Heavy traffic is a problem now let alone having an extra 20,000 extra vehicles a year !
1.7	West of Sandiacre	Traffic Congestion	Gail Berry	Response-01644	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Geoff Tindsley	Response-00755	I am a regular visitor to my father and step-mum?s house on Larch Drive and I wish to object to the currently proposed vehicular access for this development. 1. I am astonished that this even being considered by the council. The access itself appears to be significantly constrained. I would have thought that, even with the removal of trees/hedges by the access site, this would still be extremely narrow to allow for a 2-way road and footpaths. 2. My understanding is that a two-way road typically requires a width of 5.5 to 7.3 metres, plus space for a pedestrian footpath. My father has measured the current road at the point near the gate, and the actual road is only 5.487m wide, which falls below the minimum required for a two-way road. If the existing footpaths are added to this measurement, the total width required to continue the existing footpath lines and the road itself is 9.04, which appears to be significantly more than the available access width. 3. Therefore, even with the absolute minimum road width just after a bend, this proposal fails to allow for safe pedestrian access alongside vehicle movement. As a result, the development of 180 homes would leave residents without a safe pedestrian route in or out of the site. 4. I can confirm from personal experience that the route leading to the site from the main road consists of narrow residential streets, which are frequently lined with parked cars, both on the roads and on the pavements. The latter could cause significant accessibility and safety issues for people of limited or restricted mobility and parents with young children and pushchairs. I understand that the Sandiacre Neighbourhood Plan 2022-37, recently agreed following a referendum, clearly identifies many of these access roads as already being congested. 5. I believe there is existing evidence of buses getting stuck, particularly on Beech Avenue, indicating that large vehicles, especially construction traffic, would be unable to safely navigate these roads. 6. I am also concerned that a fire engine, ambulance, or any emergency vehicles, would struggle to access the site in a timely manner due to these same constraints, particularly where parked cars restrict manoeuvrability. This raises serious concerns regarding access for emergency services and the safe management of construction traffic. 7. The proposed development would inevitably increase the number of vehicles using these currently quiet roads. At present, drivers patiently wait for one another to pass parked vehicles. However, with significantly more traffic generated by 180 homes, the parked cars that currently cause little disruption are likely to create congestion and hazards for pedestrians. Current ONS statistics suggest that there are an average 1.29 cars for each household in the country. This would suggest an additional 232 for a development of 180 properties. However, given that only 10% of the development would be earmarked for ?affordable? housing, with the remainder (based on the developer?s other sites locally) likely to be 3, 4 and 5-bedroom houses, the expectation is the number of cars will be significantly higher. 8. Cloudside Road, is the ONLY access to Larch Drive, and is on a steep gradient. In snowy or icy conditions, it actually becomes impassable. It is never gritted (presumably one of the reasons being that the gritter lorries cannot access the road), and it relies on local residents to grit the road manually accessing a grit-box halfway up t
1.7	West of Sandiacre	Traffic Congestion	Geoff Tindsley	Response-00755	he road. For all of these reasons, I strongly object to the proposed vehicular access arrangement and urge the planning authority to reconsider a solution that ensures both safe pedestrian connectivity and appropriate vehicle access, without compromising the surrounding residential streets.
1.7	West of Sandiacre	Traffic Congestion	Georgia C	Response-01296	Traffic congestion is already atrocious in the local area, Sandiacre cross road lights being a key example.
1.7	West of Sandiacre	Traffic Congestion	Georgia Marvin	Response-00261	- I?m rather worried about how the traffic will be once the houses are built. There?s already enough cars parked on cloudside road without more cars, vans and Lorry?s been brought into the mix! I genuinely don?t know how construction will take place as cloudside road is the only access point?
1.7	West of Sandiacre	Traffic Congestion	Gill West	Response-01725	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Glyn Holner	Response-01697	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Gordon Bruce	Response-01455	Traffic is backed up for several hundred m from the cross road at Bostocks Lane/Derby Road towards Rushy Lane on a daily basis. The potential developments at West Hallam and Stanton will only make this problem worse. Adding potentially a hundred or more cars exiting that area of Sandiacre will only worsen this already problematic situation. The huge problem with lack of parking at Cloudside will also be worsened by adding 180 more homes. There is no dedicated parking so cars already park on the pavement as the road is too narrow for parking and busses, lorries etc This is putting lives at risk.
1.7	West of Sandiacre	Traffic Congestion	Gordon Daris	Response-01639	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Greg Cox	Response-01702	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Gregg Bartrum	Response-01591	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Greg Watts	Response-00733	The proposed number of houses would place unsustainable pressure on local infrastructure, including roads
1.7	West of Sandiacre	Traffic Congestion	Harriet Farnsworth	Response-01914	As a house of regular bus users, the extra traffic will make the already difficult bus route which regularly gets stuck will get worse with extra traffic.
1.7	West of Sandiacre	Traffic Congestion	Helen	Response-00883	The traffic in Sandiacre is already congested especially week days from 7:45 - 9:00 am and 15:00pm -18:00pm. This is going to cause more issues with HGVs entering and leaving site with deliveries etc
1.7	West of Sandiacre	Traffic Congestion	Helen Gillain	Response-00964	Roads are currently barely passable with vehicles parked either side, the roads could not cope with any more traffic

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Helen Richardson	Response-00432	I object to the proposed development of 108 new homes. My primary concern lies with the detrimental impact this will have on local traffic flow. The existing road infrastructure is not only poorly maintained but also lacks the capacity to absorb the additional traffic generated by this development. Without concrete plans and funding for significant road improvements and maintenance, this development will severely worsen existing congestion and further deteriorate the condition of our roads.
1.7	West of Sandiacre	Traffic Congestion	Helen Thompson	Response-01356	This area is already congested . It will make the roads less safe and more difficult for the bus to travel through. It is particularly difficult to navigate into and out of the junction of Church street and Town street/ Ilkeston road especially given the number of lorries coming from and to Stanton that have difficulty navigating the bend without using the other side of the road - more cars will increase the problems and safety issues. During building, lorries will add to the problems on already narrow streets. Have traffic studies been carried out ?
1.7	West of Sandiacre	Traffic Congestion	Helen whiteman	Response-00447	The traffic just getting in the heavy plant would be bad enough it is a very narrow access road and it would feel safe walking up the road with plant traffic and everything that goes with it. Plus if houses get built the extra traffic would cause considerable congestion on already well used roads
1.7	West of Sandiacre	Traffic Congestion	Ian	Response-00493	Sandiacre already has high level of traffic due to the town being a thoroughfare from the m1 and lorries from the nearby industrial park
1.7	West of Sandiacre	Traffic Congestion	Ian Bailey	Response-00505	The roads to and from are not suitable to accommodate this extra level of traffic
1.7	West of Sandiacre	Traffic Congestion	Ian herbert	Response-00939	180 homes is a significant increase in the daily traffic movements feeding out through stanton road to either rushy lane or church and the busy/dangerous junction with town street/lenton street.
1.7	West of Sandiacre	Traffic Congestion	Ian Steele	Response-00780	Sandiacre,stone clouds is a peaceful area,more traffic will ruin it for those already here
1.7	West of Sandiacre	Traffic Congestion	IAN TAYLOR	Response-00972	Traffic in the adjoining area and on Stanton Road in particular is already overloaded , particularly on school days. It will be impossible to provide adequate and safe access to the site given existing conditions. It has also been demonstrated that construction vehicles will have considerable difficulty in accessing the site during development.
			Ian telfer	Response-00991	Already takes me ages to get off stanton road in the mornings. When the stanton lorry park really gets going it will be 24/7 gridlocked
1.7	West of Sandiacre	Traffic Congestion	Ian Ward	Response-01628	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Irina Anthony	Response-01867	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Isabelle Love	Response-00529	Already issues with traffic in this area of Sandiacre, cars park all along roads as many houses do not have drives, increased traffic in this area will pose safety risks for pedestrians (particularly children). The bus already struggles in this area, further congestion will exasperate the issues. There will also be increased traffic down Rushy Lane once people take the back way through Sandiacre to gain access to the M1 & A52
1.7	West of Sandiacre	Traffic Congestion	Isobel Ball	Response-01092	West sandiacre is a quiet area. Many people walk their pets in the green areas or even just to clear their heads. I am also one of these people. My dad is buried not too far from these plans and i would hate for it to turn into a congested, dusty and polluted area. This many houses will absolutely rise traffic congestion, it will attract lorry?s and cranes, which will disrupt and pollute the area with noise, dust, litter and disruption. Many people live here with small children and dogs, and enjoy the quiet nature in which they live. These plans will heavily heavily disrupt that and it is simply unfair
1.7	West of Sandiacre	Traffic Congestion	J. E. Lord	Response-01601	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Jack Greatorex	Response-01731	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Jacob Whitt	Response-01748	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Jacqueline Marshall	Response-01436	Sandiacre is a heavily congested area due to the closeness of Junction 25 of the M1, the A52 a major highway linking Nottingham and Derby, Stanton along with the Stanton ironworks Development plans The traffic from the motorway turning on to Derby Road is already excessive due to the large number of Lorries on both Derby Road and Town Street. A road system that is unable to cope with it and a traffic light junction over the canal in the centre of our small town was declared by DCC as a failed junction in 2016/2017.
1.7	West of Sandiacre	Traffic Congestion	Jade Smith	Response-01783	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Jake Simpson	Response-00667	Roads are congested already without extra cars on the road
1.7	West of Sandiacre	Traffic Congestion	james goddard	Response-01204	Our roads a full of large holes, which are constantly appearing due to the volume off traffic, and are a danger to cyclists. Parking is dreadfull, with the current volume of parked cars on the roads causing delays to bus services, waste disposal and emergency services. -The addition of new housing in an already
1.7	West of Sandiacre	Traffic Congestion	James Meadwell	Response-01653	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	James Roberts	Response-01708	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	James Seward	Response-01683	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	James White	Response-01883	Traffic will be considerably worse throughout Sandiacre, particularly on Church Street.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Jane Dennett	Response-00965	The roads cannot support more heavy construction traffic . Or cars per household. The side roads are already awkward with parked cars. The fumes for Asthma sufferers will increase
1.7	West of Sandiacre	Traffic Congestion	Jane Elizabeth Tindsley	Response-00669	I wish to object to the currently proposed vehicular access for this development. Based on the plans, the access appears to be significantly constrained. Even with the removal of trees/hedges and the construction of the highway over existing root zones which should be protected, the widest achievable opening is only 5.7 metres with the current gate being only 2.7m. This also assume they own the current land to achieve the 5.7m. A two-way road typically requires a width of 5.5 to 7.3 metres, plus space for a pedestrian footpath. Having measured the current road at the point near the gate, the actual road is only 5.4864m wide, which falls below the minimum required for a two-way road. If the existing footpaths are added to this measurement, the total width required to continue the existing footpath lines and the road itself is 9.04m. Therefore, even with the absolute minimum road width just after a bend, this proposal fails to allow for safe pedestrian access alongside vehicle movement. As a result, the development of 180 homes would leave residents without a safe pedestrian route in or out of the site. This conflicts with NPPF Paragraph 110, which requires developments to give priority to pedestrian and cycle movements and create places that are safe, secure and attractive for all users. Additionally, the route leading to the site from the main road consists of narrow residential streets, which are frequently lined with parked cars, vans and lorries both on the roads and on the pavements. The latter could cause significant accessibility and safety issues for people of limited or restricted mobility and parents with young children and pushchairs. The Sandiacre Neighbourhood Plan 2022-37, recently agreed following a referendum, clearly identifies many of these access roads as already being congested. There is existing evidence of buses getting stuck, particularly on Beech Avenue, indicating that large vehicles, especially construction traffic, would be unable to safely navigate these roads. I am also concerned that a fire engine, ambulance or any emergency vehicles, plus delivery vehicles, post office vans and supermarket/courier deliveries would struggle to access the site in a timely manner due to these same constraints, particularly where parked cars restrict manoeuvrability. This raises serious concerns regarding access for emergency services and the safe management of construction traffic, in conflict with NPPF Paragraph 111, which advises that development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety or the residual cumulative impacts on the road network would be severe. The proposed development will also increase the number of vehicles using these currently quiet roads. At present, drivers patiently wait for one another to pass parked vehicles. However, with significantly more traffic generated by 180 homes, the parked cars that currently cause little disruption are likely to create congestion and hazards for pedestrians. Current ONS statistics suggest that there are an average 1.29 cars for each household in the country. This would suggest an additional 232 for a development of 180 properties. However, given that only 10% of the development would be earmarked for ?affordable? housing, with the remainder (based on the developer?s other sites locally) likely to be 3, 4 and 5-bedroom houses, the expectation is the number of cars will be significantly higher. This runs
1.7	West of Sandiacre	Traffic Congestion	Jane Elizabeth Tindsley	Response-00669	counter to NPPF Paragraph 112, which stresses the need for developments to enable safe and suitable access for all users and to minimise conflicts between vehicles and pedestrians. I am also concerned that the current proposal does not address the planned access required for construction traffic to deliver most of the materials to the site. In addition, I would imagine that these roads, which were built at least 30 years ago are not built to manage the load-bearing of the required transport for the development, and could potentially lead to serious road damage and possibly nearby properties. Cloudside Road, the ONLY access to Larch Drive, is on a steep gradient. In snowy or icy conditions, it actually becomes impassable. It is never gritted (presumably one of the reasons being that the gritter lorries cannot access the road), and it relies on local residents to grit the road manually accessing a grit-box halfway up the road. I have personal experience of having to abandon our car in snowy/icy conditions as I could not access all of Cloudside Road to get to Larch Drive. When this happened, I had to abandon the car on Maple Avenue during these winter periods. For all of these reasons, I strongly object to the proposed vehicular access arrangement and urge the planning authority to reconsider a solution that ensures both safe pedestrian connectivity and appropriate vehicle access, without compromising the surrounding residential streets.
1.7	West of Sandiacre	Traffic Congestion	Janet Edwards	Response-01906	This is already a problem & would certainly become worse.
1.7	West of Sandiacre	Traffic Congestion	Janet Whildes	Response-01869	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Jane Warton	Response-00662	there will be at least 20,000 vehicles a year in an area that is already congested. strain on parking.
1.7	West of Sandiacre	Traffic Congestion	Janice Taylor	Response-01743	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Janice West	Response-00989	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Janine Holmes	Response-01595	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Jason Deepprose	Response-00818	You need to get the cars off the roads.
1.7	West of Sandiacre	Traffic Congestion	Jason Harwood	Response-01667	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Jason Webb	Response-01637	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Jayne Rowley	Response-01279	The traffic in Sandiacre and Stanton by dale has already seen a noticeable increase in traffic with the Stanton Park development both cars and HGVs, making exiting the estate more difficult and causing regular delays. There is regular congestion at peak times especially with school traffic and those heading towards the most commonly used exits of the estate. A further 150-250 cars would further add to this congestion. The roads leading to the proposed development are narrow and not suitable for heavy volumes of traffic this increased traffic would cause a significant increase in congestion and the HGVs needing to access the site would further add to this problem. Cloudside Avenue is already blocked on a regular basis due to parking and the narrowness of the roads which frequently causes problems for those existing residents trying to pass. Also due to the same issues on neighbouring streets the bus frequently is unable to pass through without difficulty and has on occasion had to mount the pavements.
1.7	West of Sandiacre	Traffic Congestion	J Cates	Response-01750	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Jeanette O Connor	Response-01640	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Jeffrey Whittaker	Response-00594	The roads can not accommodate more traffic
1.7	West of Sandiacre	Traffic Congestion	Jenna Mitchell	Response-01407	Traffic is terrible already
1.7	West of Sandiacre	Traffic Congestion	Jennifer Bailey	Response-01857	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic. I am extremely concerned with the amount of extra traffic additional housing will create and generate. Cloudside Road is a narrow road with a tight bend which is already overly parked up with cars. Its not a suitable road to take that amount of traffic.
1.7	West of Sandiacre	Traffic Congestion	Jennifer Saville	Response-00516	Sandiacre already has a significant traffic problem which is already increasing due to the industrial building at Stanton. All traffic comes up Derby Road which is at times congested making the road dangerous, this road is also used by the majority of Friesland school children going to school and returning home. The roads up to the proposed site are narrow, winding and steep at times. It is difficult for cars to access, lorries would not be able to get up some roads. Buses are sometimes unable to access their route due to parked cars and would not be able to access any new build
1.7	West of Sandiacre	Traffic Congestion	Jennifer Tindsley	Response-00751	I am a regular visitor to my father and step-mum's house on Larch Drive and I wish to object to the currently proposed vehicular access for this development. 1. I am astonished that this even being considered by the council. The access itself appears to be significantly constrained. I would have thought that, even with the removal of trees/hedges by the access site, this would still be extremely narrow to allow for a 2-way road and footpaths. 2. My understanding is that a two-way road typically requires a width of 5.5 to 7.3 metres, plus space for a pedestrian footpath. My father has measured the current road at the point near the gate, and the actual road is only 5.487m wide, which falls below the minimum required for a two-way road. If the existing footpaths are added to this measurement, the total width required to continue the existing footpath lines and the road itself is 9.04, which appears to be significantly more than the available access width. 3. Therefore, even with the absolute minimum road width just after a bend, this proposal fails to allow for safe pedestrian access alongside vehicle movement. As a result, the development of 180 homes would leave residents without a safe pedestrian route in or out of the site. 4. I can confirm from personal experience that the route leading to the site from the main road consists of narrow residential streets, which are frequently lined with parked cars, both on the roads and on the pavements. The latter could cause significant accessibility and safety issues for people of limited or restricted mobility and parents with young children and pushchairs. I understand that the Sandiacre Neighbourhood Plan 2022-37, recently agreed following a referendum, clearly identifies many of these access roads as already being congested. 5. I believe there is existing evidence of buses getting stuck, particularly on Beech Avenue, indicating that large vehicles, especially construction traffic, would be unable to safely navigate these roads. 6. I am also concerned that a fire engine, ambulance, or any emergency vehicles, would struggle to access the site in a timely manner due to these same constraints, particularly where parked cars restrict manoeuvrability. This raises serious concerns regarding access for emergency services and the safe management of construction traffic. 7. The proposed development would inevitably increase the number of vehicles using these currently quiet roads. At present, drivers patiently wait for one another to pass parked vehicles. However, with significantly more traffic generated by 180 homes, the parked cars that currently cause little disruption are likely to create congestion and hazards for pedestrians. Current ONS statistics suggest that there are an average 1.29 cars for each household in the country. This would suggest an additional 232 for a development of 180 properties. However, given that only 10% of the development would be earmarked for 'affordable' housing, with the remainder (based on the developer's other sites locally) likely to be 3, 4 and 5-bedroom houses, the expectation is the number of cars will be significantly higher. 8. Cloudside Road, is the ONLY access to Larch Drive, and is on a steep gradient. In snowy or icy conditions, it actually becomes impassable. It is never gritted (presumably one of the reasons being that the gritter lorries cannot access the road), and it relies on local residents to grit the road manually accessing a grit-box halfway up t
1.7	West of Sandiacre	Traffic Congestion	Jillian Hildridge	Response-01721	he road. For all of these reasons, I strongly object to the proposed vehicular access arrangement and urge the planning authority to reconsider a solution that ensures both safe pedestrian connectivity and appropriate vehicle access, without compromising the surrounding residential streets.
1.7	West of Sandiacre	Traffic Congestion	Jenny Stephens	Response-01723	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Joanna hardy	Response-01304	As a resident of sandiacre I already have severe concerns about congestion, particularly from lorries and industrial vehicles, in the area. We already have too many large vehicles travelling through sandiacre. This number is increasing with the new development at the old stonton works. However increasing this problem even further with large scale housing construction in a relatively inaccessible area will just compound this issue. The roads of sandiacre are already congested with residents, local people dropping off school children, through traffic and lorries. The traffic levels have increase noticeably in the 6 years we have lived in the area and would increase to unmanageable levels if this proposed home building takes place. Not only in the short term but as on ongoing issue of more residents vehicles on narrow roads. Coronation avenue is being proposed as an access road for the development of this site. However there are major problems with road parking and the associated traffic congestion. Many of the homes in the area have no off road parking. The homes on the left at the bottom of Coronation avenue (1-9) have none, nor do the homes on ash Grove. As a result they all have to park on Coronation avenue. This causes congestion and makes it difficult for buses to traverse the road. Construction traffic would find it difficult to navigate. Also potentially causing damage to residents vehicles.
1.7	West of Sandiacre	Traffic Congestion	Joanne Guyatt	Response-01784	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Joanne Johnson	Response-00765	The extra traffic that this development will generate will add to the already busy roads, main and side. With a school in close proximity which is already dangerous at drop off and pick times due to parked cars, the extra traffic will not help the situation. Town Street, Ilkeston Road and Derby Road already have way too much traffic on them, especially big lorries which should not be allowed on our small roads that aren't designed for them. We need a J25a adding to the M1. Surely the construction traffic will be too big for the access on narrow residential roads not to mention they will no doubt be passing the school. Taken from a report on the Erewash.Gov site /files in 2010 Vehicular Traffic The intrusion of vehicular traffic ? particularly heavy goods traffic ? makes a substantial negative contribution to the character of Sandiacre Crossroads. In October 2010 it was found that 'the junction operates above capacity? and that traffic approaching from Town Street experiences the greatest ?degree of saturation? compared to traffic approaching in other directions (TPA, 2010).
1.7	West of Sandiacre	Traffic Congestion	Joanne Lambert	Response-00494	Traffic is already heavy through Sandiacre with the lorries from stanton using it as a through route to get to junction 25. 180 additional households will hugely impact the congestion on this already busy route.
1.7	West of Sandiacre	Traffic Congestion	Jodie Owen	Response-01688	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Jodie Shrive	Response-00601	Sandiacre is already overly congested especially during School hours for Cloudside school. Adding another 180 houses will mean families with at least one child per household adding to the congestion. The roads in this part of Sandiacre are NOT built for this much traffic, it will ruin our neighbourhood. More traffic will also increase the risk off accidents, Sandiacre is full of elderly people as well as Children and you will be putting them at risk should this go ahead.
1.7	West of Sandiacre	Traffic Congestion	Joe Sells	Response-01924	Building 180 homes will dramatically increase local traffic, causing congestion, longer commutes & reduce safety for school children.
1.7	West of Sandiacre	Traffic Congestion	Jo Gerhardt	Response-01286	Sandiacre is already densely populated. We simply don't have the infrastructure to be able to support the amount of traffic that the new development will bring. I live at the bottom of Starch Lane and the roads are teeming with HGV's; cars, vans etc. My Victorian house shakes as a result of HGV's especially when they going at speed. At the end of Starch Lane it really is quite hazardous and dangerous to cross the the road. It will be a matter of time before someone gets seriously hurt. The access to the proposed development is quite simply unsuitable for the envisaged amount of cars for the area. The small road network, steep hill and tight corners will be unsuitable for the amount of construction traffic and cars that will need access to the area.
1.7	West of Sandiacre	Traffic Congestion	John Gardner	Response-01694	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	John G Brown	Response-01752	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	John Hibbitt	Response-01855	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic. Traffic main concern. Concerned they may stop the i4 bus.
1.7	West of Sandiacre	Traffic Congestion	John Ledger	Response-01605	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	John Payne	Response-01785	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	John whiteman	Response-00450	Traffic is bad enough in sandiacre with more traffic if each house has two cars getting on to Stanton road via coronation Ave or beech Ave will be impossible and dangerous
1.7	West of Sandiacre	Traffic Congestion	Jon Burn	Response-01722	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Josh Williams	Response-01632	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	J Pearson	Response-01772	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	J Telfer	Response-01876	The traffic on Stanton Road is already mad. School site is dangerous & can't get out on Town Street or Rushy Lane.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Judith A Pulfer	Response-01863	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Judith Blackburn	Response-01928	The traffic congestion along Stanton Road and Coronation Avenue is becoming non-negational, double parking, even triple parking at times. It is difficult to cross Stanton Road at peak times especially to visit the local shops / post office. The bus drivers have a very difficult time on Stanton Road, Cloudside Road and Maple Avenue. Outside school - parking problems. Constant travelling by car for schools, doctors, hospital visits, shopping, and play areas.
1.7	West of Sandiacre	Traffic Congestion	Julie Hill	Response-01643	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Julie Taylor	Response-01503	The traffic around Sandiacre is already at breaking point especially around Beech Avenue, Stanton Road where Cloudside school and St. Giles park is without adding to it, some days you cant even get through, let alone emergency vehicles and buses so i dont know how extra construction traffic would manage and then extra cars.
1.7	West of Sandiacre	Traffic Congestion	JWest	Response-01874	Also the access to the new homes will be a cause for concern for safety and congestion on the only road off the new site down into Sandiacre.
1.7	West of Sandiacre	Traffic Congestion	Karen Alldread	Response-01868	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Karen Blain	Response-01732	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Karen Evans	Response-00523	It is difficult for cars and buses to use the surrounding roads at present, this will add to this.
1.7	West of Sandiacre	Traffic Congestion	Karen Harwood	Response-01668	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Karen Pitts	Response-00643	The local traffic is already at capacity. Damaged surfaces and poor road quality throughout Sandiacre. Quick fix road patching does not last giving us an ongoing worsening problems. 180 extra houses in this position will probably equate to 200 plus vehicles all adding to the congestion and serious pollution levels. Buses struggle to get around the route at the moment. The addition of all that extra traffic will have a serious effect on a vital public transport link that many, especially elderly people rely on.
1.7	West of Sandiacre	Traffic Congestion	Kathryn Lovatt	Response-00497	This proposal would greatly increase the volume of traffic on the many already congested roads in the local area. During peak hours, (for example commuting to and from work, school picks ups) congestion is already a problem particularly around the junction of Beech Avenue onto Stanton Road and Beech Avenue onto Maple Avenue. This proposal would significantly increase congestion around these areas and has an obvious potential health and safety impact. As a family residence on Cloudside Road, we are greatly concerned about the number of vehicles which would pass our property on route to the new housing development. Increased vehicle numbers would have a detrimental affect on air quality/pollution, noise levels and pedestrian safety - thus negatively impacting our quality of life. With 180 proposed new houses, with a average of 1.29 vehicles per property (ONS government stats), a conservative estimate of one journey ( to and from) a day equates to 464 additional vehicles passing our property everyday and when factoring in further journeys e.g. additional family journeys, taxis, trades people, delivery vans etc the more realistic number of vehicles passing our property would be around 764 a day (conservative estimate). The road width, particularly on Larch Drive and Cloudside Road is not suitable for accessing this proposed development. The sharp bend at the bottom of Cloudside (Hill) from Coronation Avenue is a blind spot and vehicles presently have difficulty already passing each other with the many parked cars on the hill. Similarly the sharp bend onto the top of Cloudside Road is also already difficult to negotiate and would be made much worse by the additional 700+ cars per day. Additionally the tight junction between Cloudside Road and Larch Drive is already difficult for any vehicles wishing to access Larch Drive and this proposal would greatly worsen the situation. The road infrastructure particularly around Beech Avenue, Coronation Avenue, Cloudside Road and Larch Drive would not be able to cope with the large number of huge construction vehicles that would pass by daily over a long period of time. It would cause not only noise, pollution and health and safety issues, but massive access and parking issues for current residents.
1.7	West of Sandiacre	Traffic Congestion	Kathryn Martin	Response-00527	Main roads already cannot handle rush hour traffic.
1.7	West of Sandiacre	Traffic Congestion	Katie Morrice	Response-00664	The proposed development will exacerbate the already existing traffic congestion around cloudside Road and it's surrounding roads. The road width at the top of the hill of cloudside Road does not accommodate 2 vehicles to turn simultaneously already which causes traffic build up. There is also a lot of on street parking throughout coronation avenue, maple avenue, cloudside Road and larch drive. Having an additional amount of cars come through these streets daily will further impede the flow of traffic, complicating car movement and potentially increasing the risk of accidents. Furthermore, there is a regular bus route through station Road, coronation avenue, maple avenue and Beech avenue. This route already has to avoid a lot of the on street parking around the area, having an increased traffic flow will cause a lot of congestion turning onto streets like cloudside Road where a bus stop is right at the bottom of it. It is very unsuitable for the access to be from Cloudside as the very considerable increase in traffic would make this very dangerous on roads which are already busy with parking on both sides of the roads. The increase in volume of traffic would further increase the exisisting problems. Furthermore, the use of Cloudside for heavy construction traffic with the noise, vibration and dirt would be environmentally detrimental to both residents and wildlife for many years. These problems would be made worse in bad winter weather. Access for emergency vehicles needs to be considered, its already difficult to navigate the roads due to the bends and narrow areas aswell as the multitude of cars parked on street.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Katie Robinson	Response-00943	At this stage the roads get smaller the higher you get up the estate - and this is the current proposed access to the build. At present most of the roads have cars either fully or partially parked on the pavements to ensure at least one side of the road is free and even then its sometimes not good enough. You are proposing 180 properties in a small area with tight roads. If we go on the average that each individual property will have at LEAST 1 car then that's an extra 180 cars if not more that will be servicing the top part of the estate. That's at least 1 journey to and from work, then add any school runs, extra activities and hobbies so it does not take a genius to work out that this will completely change the dynamic of the area and how busy it will be. The roads are safe to cross at the moment because despite being congested with parked cars its a quiet part of the estate however adding this amount of traffic will make things unsafe as well and as you are aware there is a school at the bottom of the estate also. Touching on this the roads are extremely busy at the bottom of the estate just with school runs - again this is just after a small and tight bend in the road which again with an increased volume of traffic would cause further safety concerns. Most of these concerns are also after the build - the roads are small and mostly on a hill towards the top where the build is proposed so the traffic for the build alone causing me huge amount of concerns over safety which large lorries and diggers needing to access the site.
1.7	West of Sandiacre	Traffic Congestion	Katrina	Response-00628	The access road would be unsuitable for the amount of lorries and construction workers to build the new estate and then with the extra cars that would be on the road after there would be massive congestion at rush hour and school opening and closing times as it is already hard to navigate especially when the 14 is driving down Beech Avenue.
1.7	West of Sandiacre	Traffic Congestion	Kelly Randall	Response-00591	Rushy Lane, a key route to M1 J25, already experiences significant congestion. Additional traffic would exacerbate existing issues. Alternative routes via Church Road and Town Street are similarly congested and hazardous. The proposed development relies on a single-lane cul-de-sac for access, with no realistic scope for widening. Has a full risk assessment been undertaken, and what mitigation strategies have been proposed?
1.7	West of Sandiacre	Traffic Congestion	Kelsey Green	Response-01666	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Kenneth Cooper	Response-01720	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Kenneth Spray	Response-00281	Sandiacre is already too congested. This will make things much worse
1.7	West of Sandiacre	Traffic Congestion	Kern-Paul Lewis	Response-01715	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Kerry Meadwell	Response-01655	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Kerry Smith	Response-01271	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Kerry stokes	Response-00769	I live at the bottom of Stanton road & already have issues with the volume of traffic & congestion on the road. More houses bringing more people & cars will only exacerbate this. I have trouble getting on & off my drive when cars park on the street, the busiest times are when there are functions on at the football club & school pick up & drop off. Buses often get stuck & have to manoeuvre several times to get round the corner of Stanton road when cars park on the street. Stanton road is a very busy road already with the commercial traffic coming to & from the motorway. We've had experience of big Lorrie?s getting stuck down Stanton road when they meet public buses coming in the opposite direction, this results in them mounting the kerb which is really dangerous for me & my children walking on the pavements. We already have congestion with various businesses around us which bring in bigger vehicles, the construction of the new houses will bring even more & block up the roads. In recent months the time it takes me to drive through Sandiacre to go to work is taking longer because of the build up of traffic coming on & off the motorway, mainly lorries heading for Stanton. I regularly queue on derby road for 15-20mins at a time. This will get worse bringing more cars & Lorrie?s into the area. We had one incident where a bus & lorry met on Stanton road & couldn?t get past one another so the bus had to mount the pavement & manoeuvre several times before they could move any where. I worry that big vehicles like ambulances & fire engines would struggle to navigate easily & as quickly as needed in an emergency. Time is of the essence in an emergency & I worry for all residents safety if we need these services & have even more traffic on the roads.
1.7	West of Sandiacre	Traffic Congestion	KH Taylor	Response-01663	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Kim	Response-00473	Traffic is already ridiculous with the extra hgv from stanton this is going to make it worse
1.7	West of Sandiacre	Traffic Congestion	Kimberley Selby	Response-00478	It's going to make the local streets so much busier with cars and traffic causing more noise pollution and ruining the quiet area.
1.7	West of Sandiacre	Traffic Congestion	Kim Helm	Response-00632	Large Lorrie?s delivering to the site. Each household will have at least 2 cars
1.7	West of Sandiacre	Traffic Congestion	Kim Larwood	Response-00645	Sandiacre is gridlocked. There has been too much development
1.7	West of Sandiacre	Traffic Congestion	Kirk Moss	Response-00439	Rushy Lane experiences significant delays most mornings, leading to major congestion issues. The canal bridge linking Sandiacre with Long Eaton and Stapleford is already a bottleneck. The Bulls Head island suffers from extreme congestion at peak hours. Derby Road is also severely impacted, with queues forming in all directions.
1.7	West of Sandiacre	Traffic Congestion	Kirsty	Response-00970	Roads are already difficult to navigate with parked cars

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Kirsty Handa	Response-00445	I believe building on this proposed site is going to be severely detrimental to traffic congestion. The access to the development is going to through an area only large enough for a car, let alone large vehicles such as ambulances, fire engines etc. This access will be for ONE vehicle at a time and unable to create a road alongside a pavement for safety. This is going to create a bottleneck effect with the amount of possible vehicles that will be using the site not just once the building has been completed but even more so when the building is happening. This is going to cause traffic jams in a quiet cul-de-sac area. What happens if someone parks badly, something goes wrong with the access or a car breaks down in the access, that is not safe for any resident especially for the proposed development, what will happen in an emergency? In addition to the access, the surroundings roads are not suitable or sustainable for the proposed development, the roads are already single file due to parking and tight corners, adding an additional 180 cars minimum (that is only 1 per household) travelling up and down the roads and as I stated, this is going to create bottle necks. The bus that services this area already gets stuck on many occasions due to parking and often has to knock on people's doors. Also the local primary school which is located on the main road out of this estate, this is also only single file in which cars have to travel single file a good 500m hoping and praying nothing comes the other way. I have known cars to mount the pavement on several occasions because they have got stuck, thus causing a risk to someone and especially a child but there is just no room and there is also blind corners everywhere. It really is not safe nor sustainable for an additional development in this area. There are no improvements that can be made for this to be sustainable in any way
1.7	West of Sandiacre	Traffic Congestion	Kirsty Meredith	Response-01462	The level of traffic that already uses Stanton Road, Coronation Avenue, Cloudside Road and Beech avenue is extremely high with access problems already occurring for buses and bin lorries. the narrow roads, tight bends and volume of parked cars is not equipped to add a further 180 houses that have no choice but to use these roads.
			K Reynolds	Response-01916	Which leads to pollution as below, and noise pollution.
1.7	West of Sandiacre	Traffic Congestion	Kristie Rugers	Response-01864	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic. Far too much congestion currently, this area will not be able to cope with such a development.
1.7	West of Sandiacre	Traffic Congestion	Kyle Jones	Response-01764	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	L A Keen	Response-01659	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Laura Hallam	Response-01711	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Laura Rawlins	Response-00500	Disagree
			Laura Thompson	Response-00702	It will drastically increase the number of vehicles going through the estate. Cause further disruption and congestion.
1.7	West of Sandiacre	Traffic Congestion	Laurence Luck	Response-01727	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Lauren Freeman	Response-01562	I live on Stanton Road and work in Long Eaton, often this 10 minute journey can take 30 minutes and most of that is spent trying to get out of Sandiacre - either along rushy lane, Sandiacre lights or from Steven's road onto Derby Road. Traffic is already heavy in the area, the idea of adding construction traffic to that and then new residents vehicles will surely only add to what is already a chaotic situation.
1.7	West of Sandiacre	Traffic Congestion	Lauren Rose	Response-01446	More houses = more traffic. Traffic is already a big issue in the local area with traffic queuing around the A52 / M1 junction and Bostocks Lane. I travel from Sandiacre to Derby via the Risley crossroads and can regularly get stuck in stationary traffic for upwards of 20 minutes. If there is an issue on either of the major roads this time can be increased. Increased traffic from heavy goods vehicles for the building of the proposed development would only add to this existing congestion. The additional vehicles belonging to each of the proposed new homes would further add to the already heavy traffic in the area.
1.7	West of Sandiacre	Traffic Congestion	Leah morral	Response-00712	I object to the plans to build on this site as traffic is already bad through our village especially outside of schools. Another 180 houses will be detrimental to adding to this. The access is ridiculous and the road is not wide enough.
1.7	West of Sandiacre	Traffic Congestion	Lee Wilcock	Response-01670	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Lesley Bruce	Response-01397	The proposal access through Larch Dr, which is in itself entirely inadequate for a property development, would channel traffic through the narrow roads of an older area of Sandiacre where residents' cars are already parked on both sides of the road. On Coronation Avenue, as one of many examples, residents on one side already park on the pavement. This congested situation would be exacerbated by extra construction traffic plus the cars 180 households would generate. Deliveries and busses already struggle for access. Have the council taken any account of the horrific congestion at the cross roads of Bostocks Lane/Derby Road? The traffic is frequently queuing along Rushy Lane almost as far as the junction with Stanton Road. This will be worsened by the proposed new properties at Stanton and West Hallam. Congestion would also be worsened by the need for lengthy infrastructure additions to services and utilities. The approaching roads would face severe and protracted disruption, loss of parking amenity for many months as meters of road width are needed to lay services. Children already walk to school on very narrow pavements that were never built to run alongside the volume of traffic that runs along Stanton Road and other roads in the area. A greater risk to life would be caused by the volume of construction traffic plus 200+ cars from new housing. There is no dedicated parking for Ladycross school, which forces parents and taxis to pull on to the pavement on Stanton Road. After the school drop off period ends, baby and toddler swimming sessions start at the Ladycross pool, so the congestion there is not brief. People also take the opportunities before and after school to use the post office and Costcutter shop on Stanton Road near the school, so the congestion periods are lengthened.
1.7	West of Sandiacre	Traffic Congestion	Lesley Carter	Response-00536	The access to the proposed site from Larch Drive is not suitable for construction vehicles or the amount of vehicles the proposed housing will bring in to the estate. The roads leading down to Derby Road, Stanton Road and Town Street have cars parked along them and there is a blind bend on Cloudside Road. It is already a nightmare trying to navigate through the narrow side streets to the main road. At school times it is almost impossible. There is also the buses and bin lorries to add to the congestion. Emergency vehicles would find it very difficult to get through quickly. There have been occasions when the bus cannot get through. Having only one access in and out of the proposed housing through narrow side streets is potentially dangerous.
1.7	West of Sandiacre	Traffic Congestion	Lesley Morral	Response-01920	Traffic on the main road especially around school drop off and pick up is extremely dangerous.
1.7	West of Sandiacre	Traffic Congestion	Lia Thims	Response-01766	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Lilly Stokes	Response-00767	When crossing the road I am very anxious and scared of the cars as they come really fast around the bends and come up onto the curb mounting the pavement when cars are parked along the streets at busy points of the day, as a young person this puts me off walking and enables me to feel safe when having to walk to school in the morning.
1.7	West of Sandiacre	Traffic Congestion	Linda Castledine-Davies	Response-00850	The proposal of 180 high density housing would, according to Government ONS figure give rise to approx 230 vehicles based on 1.29 being the average cars per household. There is a total lack of existing amenities or facilities and none are proposed resulting in a substantial increase of traffic for commuting and leisure activities. Just one journey a day would equate to 500+ resident vehicles traversing the existing roads. However these numbers would increase substantially with 2-3 trips for school runs, extra curriculum activities, shopping, visiting friend and families, general trips out and about. In fact every single requirement would entail a car journey for most people especially as the steepness of the terrain rules out walking or cycling for the majority. Add on visitors to the site/residents, taxis, couriers and deliveries, trades people and a realistic number per day is in excess of 700 vehicles going up and down the existing roads and that equates to over 19000 extra vehicles per year based solely on 250 working days. This is an unsustainable amount of vehicles for small twisting roads built in the 1980s. The entry and exit to this site is believed to be the narrow farm track at the top of Larch Drive which in itself is a small cul de sac of low density houses culminating in 6 bungalows. This track is insufficiently wide to accommodate this number of vehicles and also provide safety to foot traffic. To access Larch Drive vehicles are required to negotiate the extremely steep narrow hill leading from Stanton Road via Beech or Coronation Avenue (rises from 55 to 80m just from the church to the top of the hill) onto Cloudside Road that has two difficult blind bends and a multitude of parked cars. Making it single track for most of its length. The current bus (Barton buses) cannot venture onto Cloudside and has extreme difficulty getting up Coronation or down Beech. This can be borne out by Barton Buses. There is no question of public transport being able to access this proposed site. The traffic at peak times to the local school on Stanton Road is extremely high with cars parked every which way and where. This occurs throughout the day and has to be avoided during school time. There are also a considerable number of vehicles who park on these streets every day to visit the adjacent nature reserve, Stoney Clouds, as there is no public parking available. If this proposal went ahead there would be up to 5 years of heavy construction traffic traversing these roads from early morning to evening every day. The disruption to residents and wildlife would be great and unbearable. Personally my bedroom wall is right next to the proposed site access which will be dangerous and noisy. The pollution in this area because of its proximity to the M1 was one of the highest in the country, The M1 has recently been widened so is even busier plus heavy duty vehicles are much closer and congestion is still a problem during commuter hours. This all exacerbates the pollution problem and an additional 180 houses will worsen this. This is neither a practical or reasonable proposal to inflict this number of vehicles onto a small residential area.
1.7	West of Sandiacre	Traffic Congestion	Linda Oscroft	Response-01927	There is currently a problem on Stanton Road & Beech Ave at school times with on-pavement parking & driveways blocked. Friends, family, visitors & delivery people all have problems parking which are made worse in the case of heavy items & can only be made worse by these proposals.
1.7	West of Sandiacre	Traffic Congestion	Lindsay Wiseman	Response-00430	The roads currently are already narrow and congested with parking. Stanton Road and Beech Avenue have many parked cars and I have seen the bus unable to pass on two occasions this past year. The school drop off and the football club make the sharp bend near the pub dangerous as it is blind and this has meant on quite a few occasions cars have mounted the kerb to avoid collision. The idea that these roads would be able to support the access for a further 180 houses is ludicrous and dangerous.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Lindsey Rawlinson	Response-01624	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	LISA ANNE GILLIGAN-LEE	Response-00710	The proposed development would significantly exacerbate traffic congestion on narrow village roads, which are not designed to accommodate the volume and type of traffic that would result from both the construction phase and the permanent occupation of the new housing. The influx of heavy construction vehicles during development would pose safety risks to pedestrians, cyclists, and existing residents, as well as cause damage to rural road surfaces. Once completed, the new homes would generate a sustained increase in car journeys, further straining the limited infrastructure, leading to increased delays, noise, and pollution. This would fundamentally alter the character of the village and diminish the quality of life for both current and future residents. Adding hundreds of new homes significantly increases number of vehicles on already busy local village roads in Sandiacre which will lead to bottlenecks and slower journey times. There are various times that I will not venture into Sandiacre to visit friends; visit my hairdresser, due to the sheer amount of traffic congestion.
1.7	West of Sandiacre	Traffic Congestion	Lisa Heppell	Response-00878	There is already lots of traffic around the area including buses ,there is a school nearby and the shop has delivers through out the day
1.7	West of Sandiacre	Traffic Congestion	Lisa J Pearson	Response-01762	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Liz Woodhouse	Response-01584	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	L Mee	Response-01777	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Logan Fox	Response-00746	The roads are already narrow, and with lots of blind corners, I have seen many occasions where accidents have almost occurred. When driving inn the car with my parents, we repeatedly have to stop and reverse to allow other cars coming up or down. We cannot have more traffic coming up such a short road with all the tight turns and blind spots. Not safe for pedestrians. We also have 2 dogs, and increased traffic would make me very concerned, not only for my dogs when we are walking them, but all the other dog walkers around.
1.7	West of Sandiacre	Traffic Congestion	Lorraine Daly	Response-00495	Sandiacre already suffers from poor air quality due to heavy traffic and HGVs passing through the village and proximity to A52 and M1. We need these green spaces as "lungs".
1.7	West of Sandiacre	Traffic Congestion	Lorraine Hands	Response-00534	I cannot imagine the difficulties that would be incurred for residents on Larch and Cloudside if they had to deal with any construction traffic involved in building the proposed houses!
1.7	West of Sandiacre	Traffic Congestion	Louise dix	Response-00975	Traffic is already very heavy around the area and access to the site is through small street full of homes with cars parked on street so will be no access for material truck to access
1.7	West of Sandiacre	Traffic Congestion	Louise Felfoldt	Response-01733	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Louise Harper	Response-01571	This is a quiet cul de sac, more traffic on very steep roads that have very little traffic at the moment which gets very icy in the wintertime
1.7	West of Sandiacre	Traffic Congestion	Louise Harrison	Response-01719	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Louise Jacks	Response-01767	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Louise Libberton	Response-01693	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Louise Robinson	Response-00647	Traffic is already very congested in this area. Large numbers of car and industrial vehicles use this area to get to the M1, industrial areas and schools. An extra 180 cars (at least) will only add to the congestion. In particular, around Rushy lane and Town street where the queues are extremely long adding to pollution. Road infrastructure needs improvement first. Such as new access to M1 for the large number of industrial vehicles heading to the industrial sites. Passing schools and residential areas. Which is a massive safety concern.
1.7	West of Sandiacre	Traffic Congestion	Lucy johnson	Response-01369	Traffic through Sandiacre is bad enough at the moment, we don?t need to add any more cars and larger vehicles on the road. It?s not safe for our children!
1.7	West of Sandiacre	Traffic Congestion	lucy victoria garner	Response-00949	already very limited access along stanton road and gridlocked trying to get out of sandiacre in all directions at rushhour. Already unsafe around cloudside school with dangerous and inconsiderate parking and risks of safety of children at school start/end times. Very limited and poor residential access via access points to new developments. Significant risk of increased congestion on already poor road quality.
1.7	West of Sandiacre	Traffic Congestion	Luke Chein	Response-01779	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Luke Hinchley	Response-00699	Roads are already too narrow with parked cars, additional residential traffic and traffic caused by the build itself will be a huge inconvenience.
1.7	West of Sandiacre	Traffic Congestion	Lydia	Response-00480	The roads are not adequate for that number of additional houses. It will also have a detrimental affect on the wildlife.
1.7	West of Sandiacre	Traffic Congestion	Lynda Morton	Response-01606	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
	West of Sandiacre	Traffic Congestion	Lynsey Blackburn	Response-01227	There is already traffic congestion in this area, adding this development will have an added negative impact
1.7	West of Sandiacre	Traffic Congestion	Macie Brothwell	Response-01633	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Malcolm Dillon	Response-00722	Access to this proposed development is via narrow roads and footpaths with vehicles having to negotiate several junctions and ninety degree bends for up to one mile. Construction traffic will produce hazardous conditions, and pollution, for local residents and may lead to damage to the existing road structure. The addition of commuter traffic from this site would lead to a possible 360+ traffic miles per day disgorging onto, or leaving from, a difficult double, blind bend, small local road that is already struggling to cope with cars and increasingly heavy lorries. This condition will only increase with the current development of the industrial complex at Stanton.
1.7	West of Sandiacre	Traffic Congestion	Malcolm Fox	Response-00215	The roads leading into the area are already congested during peak times. Cloudside and Larch Drive are further congested with current residents and the addition of large vehicles for simple transport of materials is wholly unsuitable - disruption would be the norm in this neighborhood. Adding an additional 220 vehicles up and down these roads would result in vehicle collisions and simple traffic that cannot be sustained. This is the only access point/road in and the impact to all residents is simple not being considered. These roads have been designed to support the current residential numbers and adding 180 homes with an average of 1.2 vehicles per household is not smart planning, but simply ticking a box and disregarding and disrespecting the current people, tax payer, voters who live here is basically unacceptable. The plans state infrastructure support... How? These roads were designed as a cul-de-sac and are not suitable for the proposed additions.
1.7	West of Sandiacre	Traffic Congestion	Malcolm Riggs	Response-01680	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Malc Orbiston	Response-01673	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mandy Rait	Response-01587	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic. We already experience horrendous traffic with parked vehicles on Stanton Road and the traffic from the new houses would increase the usage. It would make it very dangerous to even cross the road.
1.7	West of Sandiacre	Traffic Congestion	Marcel Janovsky	Response-00481	Traffic problems
1.7	West of Sandiacre	Traffic Congestion	Mark Gough	Response-00888	Huge congestion on a daily basis due to the traffic up and down Stanton Road, Beech Ave, especially school drop offs at Cloudside School, double parking, and the shop on Stanton Road with the only post office in there in Sandiacre. Traffic from people using the post office. It's only going to get worse with 180 houses built on Stoney Clouds. Beech Avenue has lorries and traffic going up all times of the day, it's not a main road, the house shakes sometimes. Can't have the windows open in the summer due to the traffic noise.
1.7	West of Sandiacre	Traffic Congestion	Mark Leek	Response-01740	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	mark skelton	Response-01341	Already a very busy during peak times. School times etc. lots of cars leaving the estate. Only two roads in and out plus a bus route to Nottingham. Delivery Lorry's and shopping tescos etc.
1.7	West of Sandiacre	Traffic Congestion	Mark Thompson	Response-00750	Traffic is already too much in sandiacre and this world make this even worse
1.7	West of Sandiacre	Traffic Congestion	Mark Warton	Response-00693	An extra 20,000 plus vehicles a year on roads in and around Sandiacre
1.7	West of Sandiacre	Traffic Congestion	Marta McManus	Response-00646	Traffic in Sandiacre is awful already especially at rush hour. Many Lorry's come through Sandiacre and additional cars with these homes will affect traffic in and out of Sandiacre.
1.7	West of Sandiacre	Traffic Congestion	Martin Driver	Response-01387	Narrow streets, too many cars, school and football club traffic. Bus route which struggles to get through. General traffic from Stanton park is ridiculous in sandiacre. 100's of additional HGV's never mind all the employees going to work at the estate each day. Sandiacre is already gridlocked! NO MORE DEVELOPMENTS IN SANDIACRE!
1.7	West of Sandiacre	Traffic Congestion	Martin Ford	Response-01908	Traffic congestion increasing at the junction of Taft Ave.
1.7	West of Sandiacre	Traffic Congestion	Martin Hardy	Response-01413	As a resident of coronation avenue, sandiacre I have serious concern for access, congestion and the durability of the roads if the proposed construction is undertaken. We already have access and parking problems as many residents have to park on the road as they have no drives. This leads to problems for buses, bin lorries etc. Many construction lorries would increase the issue. Also once completed the increased residential traffic would also make the situation worse. As an engineer I am concerned that the roads leading from Stanton road to the proposed building site are not rated for heavy traffic or large vehicles. Many roads in the area are in bad shape and as such extra traffic would cause further damage to the roads and cost more money to repair.
1.7	West of Sandiacre	Traffic Congestion	Martyn Locker	Response-00903	There would be a single access road through an already congested estate, in which the local bus - a key lifeline for non-driving residents in this remote corner of Derbyshire - already struggles to navigate due to excessive parked cars. Without the addition of new houses, I've often experienced the bus threading the needle between precariously parked cars and oncoming traffic, often needing to use the pavement to manoeuvre through the estates. I've also experienced the bus completely unable to pass through the estate for over 20 minutes due to multiple vehicles parked too close together on opposite sides of the road near the local convenience store. With so many new houses I really fear the worst in terms of access. I have many elderly neighbours without computer access to complete this form, but they rely on that bus service for crucial health appointments as a single example.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Martyn Maxted	Response-00435	As far as I know, the only access to the proposed development site is via Larch Drive, which itself is accessed by Cloudside Road via Beech Avenue/Maple Avenue or Coronation Avenue, all via Stanton Road. I know there are pedestrian accesses to the horse fields from the bend in Cloudside Road and via the garage block at the top of Linden Grove, but both of these ?routes? would require demolition of existing buildings. All these roads are already narrow and fairly congested, particularly at school opening/closing times and during the evening/weekends when there is a higher volume of roadside parked vehicles. This proposed development would significantly further increase congestion.
1.7	West of Sandiacre	Traffic Congestion	Matt Bancroft	Response-00916	The existing access to the proposed site is wholly inadequate for the proposed number of houses. There are only around 30 houses currently beyond the chestnut grove turn and the road is already such that you have to reverse to pass oncoming traffic. Adding around 360 new cars to this is unsustainable.
1.7	West of Sandiacre	Traffic Congestion	Matt Hallam	Response-00476	Adding that many houses back 30 years ago there was a reason why they didnt build on it and now you will find that most households will have 1-2 cars per house which will mean 180 -360 cars minimum travelling through larch drive everyday. Currently you will most likely have 10 cars a day. This will hit everyone in the area hard. The access from larch is too narrow and you cannot fit 2 lanes plus pavements on either side
1.7	West of Sandiacre	Traffic Congestion	Matthew Buckland	Response-00615	The roads that lead to the site have a lot of parked cars at all times of the day, which would make it difficult for an additional 300 cars to navigate around (based on the average of 1.8 cars per house) During rush hour they are also significant queues along Derby Road and Town Street, which would be increased by the additional cars if the proposed build went ahead. Without significant investment there is currently no way construction traffic will be able to work on site safely and without adversely affecting local residents.
1.7	West of Sandiacre	Traffic Congestion	Maurice Mason	Response-01617	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Maxine Sutton	Response-00471	Sandiacre is a small village with small village roads. These roads are already congested and parking is a huge problem. The main road through the village goes over a small bridge over a canal. The traffic lights there are three way which means there are constantly long queues, and during rush hour it is horrendous. Adding 180 new homes will ensure it becomes grid locked for much of the week. The main junction is a three way traffic light bridge over the Erewash canal. This is always busy. The council have already approved new warehousing on the old Stanton Iron works site and the large lorries are only adding to the congestion. Some of them can hardly cope with the tight bends. All the extra traffic will put a dangerous burden on the already busy small roads, and the weight of all the extra Lorrie?s etc might damage the small bridges. If this project goes ahead a large sum would need to be put aside for improving the road network, and i doubt very much that this money really would be assigned to Sandiacre. If the plan to build these houses does go ahead there would also need to be a consideration of the type of people who are to live there. There must be a proper mix of affordable housing, starter homes and bungalows for the aging population. Just building four bedroom houses (which bring in the most profit) would be detrimental to the area.
1.7	West of Sandiacre	Traffic Congestion	M Dougle	Response-01749	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	M Eastwood	Response-01757	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Melanie	Response-00586	The area already suffers from significant traffic congestion, particularly along Rushy Lane in Risley, a key access route to Junction 25 of the M1. This congestion would be exacerbated by additional traffic from the proposed development. Furthermore, alternative routes such as Church Road and Town Street are already overburdened and unsafe due to narrow lanes, blind bends, and existing heavy goods vehicle (HGV) traffic. These roads are unsuitable for further traffic increases and present a serious safety risk. The proposed development would be accessible via a single entry point, which is highly inappropriate for a high-density housing estate. A comprehensive traffic impact assessment must be provided and independently reviewed.
1.7	West of Sandiacre	Traffic Congestion	Melanie Caumont	Response-01272	The proposed development will place significant additional pressure on already overstretched local roads. Larch Drive, the intended point of vehicular access, is a narrow residential street already suffering from persistent congestion, particularly during school drop-off and pick-up times. The average household in the area owns two to three cars, and on-street parking often renders the roads impassable to larger vehicles. Adding 180 homes?conservatively equating to 250?300 extra cars?will overwhelm the existing infrastructure. Congestion on nearby roads such as Cloudside Road and the junction with Derby Road already causes frequent delays and traffic hazards.
1.7	West of Sandiacre	Traffic Congestion	Melanie Howarth	Response-01621	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Michael Anderson	Response-00461	With 180 new homes being constructed I would suggest there would be around 400 extra vehicles belonging to the occupants of these houses. Plus the amount of service delivery vehicles such as vans lorries etc. that will be visiting this area. The roads adjacent to this area are which are essential to gain access are too narrow already which forces the people already living there to use pavements to park their vehicles. An example of this is the i4 bus route which at times struggles to continue on its journey because parked cars are blocking the road. With more traffic because of this suggested site will cause even more mayhem.
1.7	West of Sandiacre	Traffic Congestion	Michael Oscroft	Response-01926	There is currently a problem on Stanton Road & Beech Ave at school times with on-pavement parking & driveways blocked. Friends, family, visitors & delivery people all have problems parking which are made worse in the case of heavy items & can only be made worse by these proposals.
1.7	West of Sandiacre	Traffic Congestion	Mitchell Birkin	Response-01657	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Michelle Alsop	Response-01645	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Michelle Cox	Response-01724	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Michelle Ledger	Response-00815	i live on laburnum close to the site entrance, ben here 21 years, the increase in vehicles has gone up tenfold in my years here, most homes have 1 or 2 cars, the roads in the whole area are just too narrow as they are, if a car is parked on the street, any vehicle has to stop to let another past it, many cars especially on coronation avenue now park on the pavements due to the influx of traffic, there are alot of elderly and some disabled ppl in the area and having to go on the road to pass a car is unacceptable as it is people walking there dogs via the stoney cloud entrance - some people come in cars (as non locals use the stoney clouds too) and they park there cars down the side of my house on the corner of laburnum close/coronation avenue in which to do so, so parked vehicles has increased and this is also hard for residence to find parking at times, particularly weekends This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic. Disruption from heavy duty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. It would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Traffic Congestion	Michelle Wenham	Response-01650	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mick Helm	Response-00021	The site will be accessed by an extension to Larch Drive. Has anyone from the council actually been to Larch Drive? The road is barely wide enough for two cars and residents and visitors quite rightly park outside their house if their drive is full. How are large lorries full of building material supposed to access the site without causing damage? I'm afraid whoever approved this site works in the land of theory rather than practice! If they could be bothered to get out from behind their desk for a change they might find an on-site visit (with local residents) might provide a bit more truth than looking at a map on-line.
1.7	West of Sandiacre	Traffic Congestion	Mick Hughes	Response-01701	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mike Darnell	Response-00698	Poor accessibility and make this site reliant on car usage and go against any claim to make it sustainable travel. Stuck up a steep hill at the top of sandiacre. This will be a traffic congestion nightmare
1.7	West of Sandiacre	Traffic Congestion	Miss Garratt	Response-00905	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Miss R Cordon	Response-01648	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Misty McGrath	Response-01556	The access roads to the site are not appropriate for extra vehicles; it is already a difficult area with parking limitations which reduce access.
1.7	West of Sandiacre	Traffic Congestion	Mollie Snow	Response-01729	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Molly Newbold	Response-00486	This will cause additional traffic to Beech Avenue, could also lead to additional parked cars on our street Maple Avenue which already has enough.
1.7	West of Sandiacre	Traffic Congestion	Mr. Mark Lovatt	Response-00956	One of my main concerns is the access to the proposed site, particularly up the steep incline on Cloudside Road, the sharp turn to the right and the tight turn onto Larch Drive. Even during quieter times, it is difficult to navigate in the car. The one access point onto the proposed housing estate will exacerbate the problem even more. Larch Drive is far too narrow to be the only access to 180 houses. The large number of cars, vans, lorries etc which would use this narrow road (Larch Drive) would cause congestion and safety issues.
1.7	West of Sandiacre	Traffic Congestion	Mr & Mrs Turton	Response-01660	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mr A Monk	Response-01905	
1.7	West of Sandiacre	Traffic Congestion	Mr and Mrs R Skelton	Response-01274	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mr and Mrs Wright	Response-01275	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mr Colin Key	Response-01841	Only one narrow access point insufficiently wide for this number of vehicles (estimate 700+ a day based on ONS data) to enter and exit safely plus: heavy construction traffic and associated vehicles that will be required on site for 3-5 years. These local roads are steep, narrow and difficult to navigate and were not designed to cope with this volume of modern (bigger, heavier) vehicles, nor construction traffic. This number of additional vehicles will add yet more congestion to the already high volume of vehicles that currently use the area around Town Street, Stanton Road etc heading to and from the M1. To propose this, whilst knowing there will be an even more substantial increase in the near future from the new Stanton Industrial Park, is reprehensible. A full census is required especially at peak times to monitor current number of vehicles, type of vehicle and the associated pollution from exhaust, brake pads and tyres and this must be ongoing.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Mr David Ainsworth	Response-00621	The existing highways are not designed for such a high number of houses. 180 houses with an average of two cars per house with delivery vehicles and school runs - will equate to at least 900 journeys per day along the existing Cloudside Road. The road is not suitable for such heavy traffic. Not least the disruption and noise levels to existing residents but increased carbon monoxide air pollution effects on people's health. I am very concerned that service and emergency vehicles won't get easy access when needed as they already struggle to get round the two bends on Cloudside Road, often blocking the way for residents exit and entry. I am going to be delayed getting to and from work if this goes ahead due to congestion and I am needed on call 24/7. It is unacceptable when I am needed in a crisis not to be able to respond in a timely manner. Lives could be put at risk if I cannot exit Cloudside Road on time and with ease. I am also objecting because of other developments in Stanton are going to bring way too much volume of traffic to the streets in Sandiacre. I am concerned about road safety.
1.7	West of Sandiacre	Traffic Congestion	Mr Ivan Stevenson	Response-01875	A lot more traffic
1.7	West of Sandiacre	Traffic Congestion	Mr John Hickingbotham	Response-01431	The single point of access via Larch Drive is unsuitable, primarily due to Larch Drive itself only being accessible from Cloudside Road which is a narrow street constructed to standards deemed sufficient in the 1950s when motor vehicles were considerably smaller than nowadays. Even now, vehicles are frequently parked partially obstructing the narrow pavements creating difficulties for parents with prams and residents requiring the use of mobility scooters. Further development will only create additional traffic, exacerbate these issues and create severe residual cumulative impacts. There will also be significant issues regarding access by large delivery vehicles during the construction phase.
1.7	West of Sandiacre	Traffic Congestion	Mr K Gubb	Response-01838	Only one narrow access point insufficiently wide for this number of vehicles (estimate 700+ a day based on ONS data) to enter and exit safely plus: heavy construction traffic and associated vehicles that will be required on site for 3-5 years. These local roads are steep, narrow and difficult to navigate and were not designed to cope with this volume of modern (bigger, heavier) vehicles, nor construction traffic. This number of additional vehicles will add yet more congestion to the already high volume of vehicles that currently use the area around Town Street, Stanton Road etc heading to and from the M1. To propose this, whilst knowing there will be an even more substantial increase in the near future from the new Stanton Industrial Park, is reprehensible. A full census is required especially at peak times to monitor current number of vehicles, type of vehicle and the associated pollution from exhaust, brake pads and tyres and this must be ongoing.
1.7	West of Sandiacre	Traffic Congestion	Mr K Turton	Response-01706	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mr Luke	Response-01703	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mr P J Tanner	Response-01728	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mr R M Draper	Response-01856	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mr R Widdowson	Response-01734	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mr S. Haywood	Response-01585	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mrs Christina Pope	Response-00732	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mrs Donna C. Ball	Response-01594	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mrs Froggatt	Response-00449	Too much traffic travelling through Sandiacre already. The roads are not suitable for heavy traffic. Lots of the main roads are congested most of the day already. Moore vehicles will just enhance the problem
1.7	West of Sandiacre	Traffic Congestion	Mrs Griffin	Response-01698	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mrs J. Cooper	Response-01596	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic. Traffic would be increased on roads that are not suited to heavy duty construction vehicles. Residents having to cope with the noise and disturbance.
1.7	West of Sandiacre	Traffic Congestion	Mrs Jennifer Fry	Response-00581	The re is very limited access to the area which means traffic will build up
1.7	West of Sandiacre	Traffic Congestion	Mrs Joanne Thompson	Response-01690	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mrs J Reeder	Response-01909	Too many heavy vehicles using our road causing congestion at Taft Ave junction.
1.7	West of Sandiacre	Traffic Congestion	Mrs Lee Farabella	Response-01899	The existing road infrastructure is not designed to handle a sharp increase in vehicles.
1.7	West of Sandiacre	Traffic Congestion	Mrs Linda Cox	Response-01753	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mrs Luke	Response-01704	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mrs M. Rose	Response-01583	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Mrs Marie Draper	Response-01755	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic. I already find it difficult to get out of Kings Road onto Town Street because of heavy lorries and cars. This will prove more difficult if the building of houses is allowed on Stoney Clouds.
1.7	West of Sandiacre	Traffic Congestion	Mrs M Burke	Response-01887	Existing road infrastructure is not designed to handle a sharp increase of vehicles.
1.7	West of Sandiacre	Traffic Congestion	Mrs M Jones	Response-01884	The extra traffic
1.7	West of Sandiacre	Traffic Congestion	Mrs N Taylor	Response-01896	Existing road infrastructure is not designed to handle a large increase of traffic. Very narrow roads with sharp bends.
1.7	West of Sandiacre	Traffic Congestion	Mrs Rachel Coats	Response-01623	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mrs R Cordon	Response-01647	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mrs Rigby	Response-00641	This would increase the traffic on unsuitable roads by over 700 extra vehicles a day giving rise to an excess of 19,000 vehicles a road not suited to this volume of traffic. More disruption from heavy duty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. It would be added more Ware and Tare to the roads surfaces creating more poor road conditions needing repairing.
1.7	West of Sandiacre	Traffic Congestion	Mrs Shani Wainwright	Response-00754	The existing road infrastructure is not designed to be able to handle a very sharp increase in vehicle volume which a further 180 homes would bring. The increase in traffic of approx 700 vehicles a day on these already dangerous and over used narrow roads would be a living hell for residents. Bringing disruption, stress and a much reduced quality of life....in particular the noise, vibration, congestion, dirt and pollution from heavy construction vehicles initially and then additional cars thereafter. Especially at peak times the congestion would be life changing. These issues will all also impact the treasured wildlife in the area for many years to follow too. I live on Beech Ave and already there is a problem with cars parking everywhere at school times and buses getting stuck trying to go up the road. I expect to not be able to get off my drive at peak times especially, as due to the increased number of cars using the road in the future there will be a constant queue outside my house. This will be very distressing and cause much stress, plus the pollution from the queuing cars will be detrimental to my health. Sadly I see my quality of life diminishing sharply. 😞 This road is wholly unsuitable for construction vehicles and such an increased number of cars, it is quite frankly a very dangerous proposal....many children walk along Stanton Road and up Beech Ave to and from school, with there already being too many cars. So I'd dread to think what will happen if this proposal goes ahead.....very sad times indeed.
1.7	West of Sandiacre	Traffic Congestion	Mrs Sheila Hickingbotham	Response-01338	The centre of Sandiacre already suffers from acute traffic congestion at the traffic lights on the canal bridge and the addition of 180 new homes will only add to the problem. Stanton Road and the roads to the north of it already suffer from severe congestion especially at school times, resulting in frustration for residents and other road users especially buses and emergency vehicles. This edge of settlement site is distant from key services and will increase car dependence resulting in increased traffic both in the immediate vicinity and throughout the village as people access services and through routes.
1.7	West of Sandiacre	Traffic Congestion	Mrs Shirley Victoria Riggs	Response-01685	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mrs Susan Bantle	Response-01612	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mrs Turton	Response-01707	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Mrs Whittaker	Response-00595	There will be a significant increase in traffic, on roads which are already congested, causing issues for emergency services, and a danger to the children attending the local school
1.7	West of Sandiacre	Traffic Congestion	Nasim Rashid	Response-01103	Narrow roads tight access to sites. Potential access if vehicles parked on the road either side
1.7	West of Sandiacre	Traffic Congestion	Natalie Bentley	Response-01646	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Nicole Cooper	Response-01597	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Nigel Percy	Response-00524	The proposal will add significant traffic flow onto Church St and especially along Stanton Road. The bend at the top of Starch Lane and the School are particularly vulnerable pinch points
1.7	West of Sandiacre	Traffic Congestion	Nikki Vincent	Response-00688	Traffic and congestion is already causing huge problems in the local area. Heavy duty vehicles and additional cars on our local roads will only add to this already existing problem. This is particularly worrying when thinking about my children getting to/from school safely as at these times of the day is when traffic and congestion is at its worst. Stanton road is my biggest concern, due to the parked vehicles and blind corner, it is already an accident waiting to happen.
1.7	West of Sandiacre	Traffic Congestion	Normn McCrea	Response-01754	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Oliver Marriott	Response-00679	Traffic Congestion Traffic / congestion - Road safety/ access - My main concern is the suitability of the access to the proposed site it's a very narrow road with several sharp bends and a sharp incline. I use this road on a daily basis to collect my friend's son to take him to school. It's always a struggle to get up the road, I find it very hard to believe that any type of commercial lorry would be able to get up there safely. The bus route misses this area out for this very reason. It's an unsuitable access point for the proposed site not only for access but for the expected volume of traffic estimated to rise to 19,000 extra uses of vehicles. With the current condition of the roads with the amount of potholes I'm not sure the roads could sustain the volume/ weight. What plan is in place to prepare the roads for this extra traffic? During the winter the steep road can become inaccessible particularly for larger vehicles. I think you're underestimating the impact on the roads the extra traffic - initially created by the workforce then subsequently the new occupants will create.
1.7	West of Sandiacre	Traffic Congestion	Olivia Allen	Response-00520	This will create lots more traffic a much more built up area. Sandiacre is already a busy area anyway
1.7	West of Sandiacre	Traffic Congestion	Paige Walker	Response-01669	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Pamela Bassett	Response-00608	There is already too much traffic causing problems for the local area
1.7	West of Sandiacre	Traffic Congestion	Pam shepherd	Response-00453	Sandiacre is already heavy congested with traffic and the roads in poor condition this will cause chaos around the area
1.7	West of Sandiacre	Traffic Congestion	Pat Hardy	Response-01739	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Patricia Ancliff	Response-00948	It appears that access will use existing infrastructure through Sandiacre to use either Town Street, Stanton Road/ Rushy Lane or B5010 Derby Road to travel further. This route is already congested and Town Street/ Derby Road busy with heavy goods vehicles. HS2 bridge parts; railway tracks and Ward Recycling vehicles to name a few. With the Stanton Development this route will be polluting, dangerous and unsustainable. Adding more vehicles without major infrastructure plans ( Junction 25A?) is short sighted and to the detriment of Sandiacre residents and beyond.
1.7	West of Sandiacre	Traffic Congestion	Paula Darnell	Response-00665	The traffic is already very bad around stanton road and the hundreds of extra cars that this development would be coming out of coronation avenue would have a massive detrimental impact. Already the queuing outside the school leading on to church drive and spencer avenue is so bad, heaven knows how it would be then. Also leading on to busy lane and town street
1.7	West of Sandiacre	Traffic Congestion	Paula Luck	Response-01710	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Paula Sims	Response-01687	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Paul Randall	Response-00131	Significant congestion is already present on Rushy Lane in Risley. This is a main route to M1 J25. Extra traffic here is unwelcome. Additionally the other route out of this estate is Church Road and Town Street - again severely congested at time, and also dangerous due to HGVs and blind narrow bends. Infrastructure includes access? access to the site via a single lane cul-de-sac. How has this been risk assessed? What does the traffic assessment for the area show? How can this access be widened when there is no scope to do so? This will be the ONLY road access to the new estate? The road system is barely able to cope with the existing houses. Cloudside Road is already regularly blocked to all but cars due to parking and the narrow roads. It would be impractical for building access to be made via Larch Drive as vehicles larger than a delivery van would be unable to access. Vehicles are currently parked fully on the pavement in order to maintain access, and if this was ever to be made illegal, would make the area impassable. An extra 100-200 vehicles using the existing road system, especially at peak times, is hard to imagine. Practically, most of the vehicles exist the estate via either Stanton Road westbound, or Church Street eastbound. The Stanton Road exit at peak times feeds congestion due to Junction 25, especially along Rushy Lane. More vehicles accessing J25 will make the situation worse. Attached are a couple of dash cam videos showing the typical traffic issues, including of an i4 bus using the pavement to pass vehicles. These videos are from 13/05/2025 around 8am.
1.7	West of Sandiacre	Traffic Congestion	Paul Vleeton	Response-01770	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	paul wheeldon	Response-00582	Traffic in the area is already horrendous adding to it will only exacerbate the situation
1.7	West of Sandiacre	Traffic Congestion	Paul Wilkes	Response-00599	The roads and access points cannot sustain the extra traffic and pollution caused by the development. We are not happy
1.7	West of Sandiacre	Traffic Congestion	Peter Anthony	Response-01866	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Peter brown	Response-00671	There's far too much traffic in sandiacre already it's an absolute nightmare
1.7	West of Sandiacre	Traffic Congestion	Peter Nicholls	Response-01622	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Pete West	Response-01700	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Phil Creasey	Response-01342	The proposed development will exacerbate the already existing traffic congestion around cloudside Road and it's surrounding roads. The road width at the top of the hill of cloudside Road does not accommodate 2 vehicles to turn simultaneously already which causes traffic build up. There is also a lot of on street parking throughout coronation avenue, maple avenue, cloudside Road and larch drive. Having an additional amount of cars come through these streets daily will further impede the flow of traffic, complicating car movement and potentially increasing the risk of accidents. Furthermore, there is a regular bus route through station Road, coronation avenue, maple avenue and Beech avenue. This route already has to avoid a lot of the on street parking around the area, having an increased traffic flow will cause a lot of congestion turning onto streets like cloudside Road where a bus stop is right at the bottom of it. It is very unsuitable for the access to be from Cloudside as the very considerable increase in traffic would make this very dangerous on roads which are already busy with parking on both sides of the roads. The increase in volume of traffic would further increase the existing problems. Furthermore, the use of Cloudside for heavy construction traffic with the noise, vibration and dirt would be environmentally detrimental to both residents and wildlife for many years. These problems would be made worse in bad winter weather.
1.7	West of Sandiacre	Traffic Congestion	Philip Mason	Response-00239	Cloudside Road is a narrow road with several parked cars along it and is only suitable for traffic travelling in one direction causing you to pull to the side to let oncoming cars pass, An extra 180 homes with at least one car per household travelling up and down it several times a day is not feasible, The road is not suitable for any more extra traffic, It would become a massive bottleneck.
1.7	West of Sandiacre	Traffic Congestion	Philip Reed	Response-01449	Local roads, particularly those leading to main commuting routes, are not designed to support a sudden increase in traffic volume. This will lead to longer journey times, increased air pollution from idling vehicles, and greater wear and tear on infrastructure, all of which will negatively affect residents' quality of life.
1.7	West of Sandiacre	Traffic Congestion	P Sandes	Response-01682	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Rachel Crossley	Response-01661	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Rachel Skelton	Response-01241	As a resident of Beech Avenue traffic up the road will rise dramatically as one of 2 ways to the new proposed site. There are already issues with busses struggling to get down the road and significant congestion at school drop off and pick times for cloudside. There are already parking issues causing dangers for children entering or leaving the school that need to be addressed and this will only make it more congested and dangerous.
1.7	West of Sandiacre	Traffic Congestion	R Barratt	Response-01664	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Rcahel Sharp	Response-00652	There is already traffic congestion on the main roads in Sandiacre - Sandiacre crossroad traffic lights (particularly with the Lidl store), Rushy Lane traffic lights. There is already substantial HGV through traffic from the Stanton industrial estate with the increased pollution they cause. Family members used to live on Town Street and there was always grime from the HGV traffic inside and outside the house. The roads of the estate which would lead to the development have parked cars from the houses with and without drives making access difficult. Stanton Road is also particularly bad at the post office/shop, at school drop off and pick up time and also at Sandiacre Town Football club bend. Buses and lorries struggle to navigate the roads. I live on Coronation Avenue and use the i4 bus frequently and this is a regular occurrence. The high density of the proposed development will add considerably to what is already a congested area.
1.7	West of Sandiacre	Traffic Congestion	Rebecca Longmuir	Response-00253	The roads are already narrow and have lots of double parked cars. This is already a nightmare and congestion occurring regularly. Adding more housing will NOT help.
1.7	West of Sandiacre	Traffic Congestion	Rhiannon Lowater	Response-01592	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	R Hibbitt	Response-01862	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic. Horrendous as it is now.
1.7	West of Sandiacre	Traffic Congestion	Richard Broughton	Response-01352	There is bound to be a considerable increase in traffic in this residential area. Both during construction and when residents move in
1.7	West of Sandiacre	Traffic Congestion	Richard Chambers	Response-00745	This will make the centre of Sandiacre even more congested than it is already
1.7	West of Sandiacre	Traffic Congestion	Richard Deeprose	Response-00816	This development will add to traffic congestion.
1.7	West of Sandiacre	Traffic Congestion	Richard Haines	Response-01674	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Richard Jenkins	Response-00264	The area is heavily congested by residential traffic and already a major headache for the bus companies. The roads accessing the general area are already overloaded with HGV due to the substantial industrial development on the Stanton Ironworks site. It has taken me up to an hour to travel the 1 1/4 miles to M1 junction 25 from my house in Sandiacre. More traffic, whether HGV during the building stage or residential after the proposed development is finished is madness. Stanton Road has long been a bottleneck for traffic. It is an important bus route for travel to both Nottingham and Derby, and thus a major lifeline for many residents in the area. It has regular deliveries by lorries up to and including 44 tonne articulated lorries. Staggered school times from the several local schools mean a lot of traffic in the area over multiple periods. Weekends mean increased traffic for school activities and for the Sandiacre Town (very popular). football club on Stanton Road. All of the above means traffic issues, elevated levels of pollution including microparticulate from tyre and brake wear, and physical risks to child safety. THEN, add in 180 additional households, which, according to government statistics will potentially mean some 20,000 additional vehicle movements per annum from this proposed development, all of which will have to use Stanton Road. From a personal perspective, I do drive when I have to, and it is a nightmare for me to get out onto Stanton Road from Elm Avenue except at quiet times. That is BEFORE the addition of 180 new households in the area. What then? What studies has EBC carried out with regard to traffic density in the area?
1.7	West of Sandiacre	Traffic Congestion	Richard Marriott	Response-00675	Traffic Congestion Traffic / congestion - Road safety/ access - My main concern is the suitability of the access to the proposed site it's a very narrow road with several sharp bends and a sharp incline. I use this road on a daily basis to collect my friend's son to take him to school. It's always a struggle to get up the road, I find it very hard to believe that any type of commercial lorry would be able to get up there safely. The bus route misses this area out for this very reason. It's an unsuitable access point for the proposed site not only for access but for the expected volume of traffic estimated to rise to 19,000 extra uses of vehicles. With the current condition of the roads with the amount of potholes I'm not sure the roads could sustain the volume/ weight. What plan is in place to prepare the roads for this extra traffic? During the winter the steep road can become inaccessible particularly for larger vehicles. I think you're underestimating the impact on the roads the extra traffic - initially created by the workforce then subsequently the new occupants will create.
1.7	West of Sandiacre	Traffic Congestion	Richard Naylor	Response-00066	There is too much traffic in this area and access to the land, especially during the build phase, will be horrendous.
1.7	West of Sandiacre	Traffic Congestion	Richard Shrimpton	Response-01301	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic. Disruption from heavy duty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. It would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Traffic Congestion	Rob Lowe	Response-01768	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Roger Day	Response-00023	There are few job opportunities in Sandiacre and hence those potential new residents would have to drive to work in all probability increasing traffic in an already crowded road system.
1.7	West of Sandiacre	Traffic Congestion	Roger Farnsworth	Response-01910	As a house of regular bus users, the extra traffic will make the already difficult bus route which regularly gets stuck will get worse with extra traffic.
1.7	West of Sandiacre	Traffic Congestion	Roger Fleck	Response-01083	The quiet cul de sac that is proposed to be the only access to the site of 180 houses is not wide enough to accommodate the extra traffic and construction lorries. The roads leading up to the access are also narrow and consist of tight bends that would make it nearly impossible for large lorries etc to access safely. There are many occasions that meeting another vehicle on these bends have nearly caused a bump as 2 cars are not able to pass at the same time.
1.7	West of Sandiacre	Traffic Congestion	Rosemarie Gough	Response-00997	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Roy Drew	Response-01614	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Ruby Sharp	Response-00886	There is already traffic congestion on the main roads in Sandiacre especially at the Rushy Lane traffic lights. On Tuesday 6th May at 7:30am it took me half an hour to get from Coronation Avenue to the J25 roundabout. There had not been any accidents or roadworks causing this, just the sheer amount of vehicles especially HGVs coming from Stanton. This made me late for work. There is already substantial HGV through traffic from the Stanton industrial estate with the increased pollution they cause. As this industrial estate develops, the number of HGVs coming through Sandiacre will increase and so will the congestion. The roads of the estate which would lead to the development have parked cars from the houses with and without drives making access difficult. Stanton Road is also particularly bad at the post office/shop, at school drop off and pick up time and also at Sandiacre Town Football club bend. Buses and lorries struggle to navigate the roads. I live on Coronation Avenue and use the i4 bus frequently and this is a regular occurrence. The high density of the proposed development will add considerably to what is already a congested area.
1.7	West of Sandiacre	Traffic Congestion	Ryan Selby	Response-00479	There will be more traffic congestion with the extra houses if they were built, the added traffic on these roads, they weren't designed for this originally.
1.7	West of Sandiacre	Traffic Congestion	S. Brailsford	Response-00598	Traffic congestion is already at a dangerous level in this area and in the surrounding close area. Buses are sometimes at a standstill due to the congestion too and this can be fact checked. Even if each of the proposed houses only had 1 car per household (instead of the predominant 2 cars per household), this would add unsustainable pressure to an already overly congested area. This in turn would add to the air pollution in this area.
1.7	West of Sandiacre	Traffic Congestion	S. Jones	Response-01615	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
	West of Sandiacre	Traffic Congestion	Sally Davies	Response-01294	Sandiacre has many traffic problems already. The site has limited access and there will be loss of open lland.
1.7	West of Sandiacre	Traffic Congestion	Samantha Anne Whitney	Response-00757	Having lived on Chestnut Grove for the first 35 of my life I've seen the struggles with traffic on these roads. It's a nightmare for buses and dustbins to get up onto the estate, they often get stuck. If you need to drive past Cloudside School in the mornings or afternoons it's a accident waiting to happen, I'm actually surprised a child hasn't been killed on Stanton Road, there's car's parked everywhere when the school is opening and closing. It's just not safe and adding more traffic is going to end in tragedy. When there's snow in Winter you can't get up either Cloudside Road or Chestnut Grove as it's too steep and the cars just slide down, bearing in mind to access the new development you will have to go via Cloudside Road or Chestnut Grove. You're proposing 180 new houses, so say every house has 2 cars that make just 2 journeys up and down the estate everyday to get to work and back, that's an extra 720 cars up and down Cloudside Road. Have any of you actually been and looked at that road? It's absolutely unbelievable that you think that is ok. Have you seen how congested that road already is? In reality the traffic will be more as I've only accounted for work journeys not social and pleasure! What about all the machinery that's needed to build the houses? Are you going to transport that up Cloudside Road too? We already have parking problems on the estate without adding anymore cars or traffic. It's not possible to build because of all the access problems, if you visited the estate or lived here, you would see that on a daily basis.
1.7	West of Sandiacre	Traffic Congestion	Samantha Whildes	Response-01270	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Sam Buckland	Response-00600	The roads that lead to the site have a lot of parked cars at all times of the day, which would make it difficult for an additional 300 cars to navigate around (based on the average of 1.8 cars per house) During rush hour they are also significant queues along Derby Road and Town Street, which would be increased by the additional cars if the proposed build went ahead.
1.6a	West of Sandiacre	Traffic Congestion	Sam Fleck	Response-00821	Based on plans the access appears to be significantly constrained. The widest achievable opening is only 5.7 metres with the gate only being 2.7 metres. This assumes they own the current land to achieve the 5.7metres. Narrow roads on the residential streets leading up to the site Frequent bus/bin lorries getting stuck already indicates that large construction traffic would be unsafe. Development will significantly increase the number of vehicles using quiet roads. At present residents are aware of the current highway constraints and wait patiently for one another to pass parked vehicles however with traffic from another 180 house the parked cars that currently cause little disruption are likely to create congestion . The traffic along stanton road and rushy lane is already extremely heavy especially during rush hour and school drop off and pick up times. The amount of vehicles already trying to access the M1 alongside the industrial traffic from stanton cause huge delays and puts pressure on the roads leading to the slip road. Another 180 house on average 360 cars will just exasperate the already growing problem
1.7	West of Sandiacre	Traffic Congestion	Sam Greateorex	Response-01695	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Sandra Cooke	Response-01613	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Sarah Favell	Response-00038	It is already busy enough on the roads in sandiacre and surrounding areas, the children walking to Friesland and nearby schools already have enough to contend with the amount of HGV that pass through the village plus the amount of pollution they must cause.
1.7	West of Sandiacre	Traffic Congestion	Sarah Harrison	Response-01658	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	S Bryne	Response-01677	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Sebastian Roberts	Response-01675	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Shanead Ligton	Response-01689	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Shannon moss	Response-00454	With 180 houses being built and the national average of cars being around 1.2 that means an additional 180+ cars on the road per day, multiple times per day once built. Let alone the transport of materials, diggers etc, we live on clouside road and the bends round here are not fit for purpose for two cars. The local infrastructure is already at its limits. Roads in the area are in severe disrepair, and public services?such as dental clinics, GP surgeries, and schools?are already overburdened. Introducing a large-scale development will exacerbate these issues, leading to longer waiting times, increased congestion, and overall deterioration of public resources. Without substantial investment in infrastructure and services, this development will create an unsustainable and hazardous living environment. Unmanageable Traffic, Poor Road Conditions, and Impassable Streets for Heavy Machinery Traffic congestion in the surrounding areas is already unbearable during peak periods. Adding more residents through this development would require massive infrastructure upgrades, which are already desperately needed. Rushy Lane experiences significant delays most mornings, leading to major congestion issues. The canal bridge linking Sandiacre with Long Eaton and Stapleford is already a bottleneck, frequently causing long queues and frustration for commuters. The Bulls Head island, connecting Sandiacre to Ilkeston, suffers from extreme congestion at peak hours, causing widespread disruption. Derby Road is also severely impacted, with queues forming in all directions due to poor road conditions and high traffic volumes. Additionally, the existing bus route that services Sandiacre already struggles to navigate the streets due to their narrowness, particularly towards the upper sections near the proposed development site. If a standard public bus finds it difficult to pass through these areas, it raises serious concerns about how heavy-duty machinery, such as cranes, concrete lorries, and grab hire trucks, would even begin to manoeuvre through these constricted roads. Even standard cars often struggle to navigate the tighter sections, meaning construction traffic would likely cause further congestion, damage to road surfaces, and an increase in safety hazards for pedestrians and existing road users. Let alone how services would be able to get around such tight roads ie fire engine, ambulances etc when the only access available is larch drive which again is not built for 2 cars
1.7	West of Sandiacre	Traffic Congestion	Shannon Robinson	Response-01635	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Sharon Grant	Response-00219	The roads upto larch drive are very narrow. Many cars park on the road, at times you have to mount the pavement to get past. that?s just the cars, the lorrie?s and buses often have to knock on doors to get residents to move their cars; same goes on the surrounding streets. In the morning and afternoon when the schools are open/closing it?s utter mayhem. You are pulling out blind as the cars are parked actually on the pavement. In the morning going to work; the roads are at a standstill.
1.7	West of Sandiacre	Traffic Congestion	sharon thornhill	Response-00448	sandiacre already carries an inordinate amount of traffic and this would increase it again. the roads around the proposed site aren?t wide enough as it is and i?d worry if emergency vehicles could get to homes in time. the refuse lorrie?s sometimes have trouble collecting. the roads surrounding just simply aren?t made for extra traffic
1.7	West of Sandiacre	Traffic Congestion	Sharon weston	Response-00440	Traffic is horrendous at the best of times,stanton Rd cannot take anymore traffic,ie school times,and the football club extra parking,buses getting stuck cus of traffic,refuse collectors not emptying bins,cars have to park on paths as no room on rds absolutely shocking
1.7	West of Sandiacre	Traffic Congestion	Shaun Green	Response-01773	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Sheila	Response-00587	The area already suffers from significant traffic congestion, particularly along Rushy Lane in Risley, a key access route to Junction 25 of the M1. This congestion would be exacerbated by additional traffic from the proposed development. Furthermore, alternative routes such as Church Road and Town Street are already overburdened and unsafe due to narrow lanes, blind bends, and existing heavy goods vehicle (HGV) traffic. These roads are unsuitable for further traffic increases and present a serious safety risk. The proposed development would be accessible via a single entry point, which is highly inappropriate for a high-density housing estate. A comprehensive traffic impact assessment must be provided and independently reviewed. There will be an alarming and detrimental amount of traffic increase once the Lorry Park development - Old Stanton Ironworks land is complete.
1.7	West of Sandiacre	Traffic Congestion	Sheila Payne	Response-01782	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Sian Knox	Response-01679	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Simon Chambers	Response-00668	There is far too much traffic coming through Stanton Road already. Furthermore, with the commercial build now commenced at the old Stanton iron works , the increase in traffic through town street will reach crazy levels. The approach / access road is completely inadequate for the construction contractors vehicles.
1.7	West of Sandiacre	Traffic Congestion	S Leek	Response-01737	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Sonny Bestwick	Response-00901	It is already a very tight estate with lots of parked cars and limited acces
1.7	West of Sandiacre	Traffic Congestion	Sonya Birkin	Response-01656	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Sophie	Response-00472	Sandiacre is gridlocked a lot of the time anyway. This could add another 300+ card to the area. Let alone the pollution etc
1.7	West of Sandiacre	Traffic Congestion	Sophie Bennett	Response-01631	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Sophie Farnsworth	Response-01913	As a house of regular bus users, the extra traffic will make the already difficult bus route which regularly gets stuck will get worse with extra traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Stephen Barlow	Response-01808	This new proposal has come as a shock to us. It will make our street an access road to the site and as there is only Beech Avenue and Coronation Avenue to use for access, will create chaos. Having a school on Station Road also creates a volume of traffic and congestion at times in the day and then there is the added complications of the bus route. I witness the bus get stuck on my road weekly due to double parking and not being able to get through.
1.7	West of Sandiacre	Traffic Congestion	Stephen Davies	Response-00214	Existing access to both Cloudside Road and Larch Drive severely affected by park cars not helped by sharp bends. Further issues with bus access for i4 route as a whole on all routes from Sandiacre due to parked vehicles. Access for emergency vehicles such as fire service currently very difficult. Larch Drive 5.45m wide + 1.8m pavement either side; these are below recommended minimums conflicting with paragraph 110 which requires developments to give priority to pedestrian and cycle movements (typical 2 way road requires 5.5 to 7.3m + 1.8-2m pedestrian access either side) It should be noted that the ownership of even the existing access is unclear in any event, notwithstanding the unacceptable width constraint noted above There is existing evidence of buses getting stuck on i4 route due to parked vehicles and general road layout; this is also likely to cause issues for emergency vehicle access and also for construction traffic. Paragraph 111 advises that a development should not proceed if it causes unacceptable impact on highway safety or the cumulative impact on the road network would be severe Paragraph 112 stresses the need for developments to enable safe & suitable access for all users and to minimise conflicts between vehicles and pedestrians. EBC Neighbourhood Plan page 65 clearly shows all routes up to the proposed access point to already have a high level of on street parking which can only be exasperated by 180 additional new homes
1.7	West of Sandiacre	Traffic Congestion	Stephen Sacker	Response-01598	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Steve Bilbie	Response-00285	I strongly object to this development on the grounds of an unacceptable volume of traffic through an inadequate access and narrow roads leading to the site. Having been a councillor for Sandiacre some 26 years traffic congestion has been a constant problem. This proposal is for an area that cannot cope with existing levels of traffic and pollution let alone a substantial increase.
1.7	West of Sandiacre	Traffic Congestion	Steven Wiseman	Response-00452	The roads around the area are already busy. With more properties having 2 or more vehicles, more and more vehicles are parked on the road especially Coronation Avenue making passing difficult. Stanton Road in the morning is usually full of parked cars making passing dangerous especially towards the blind bend. With added vehicles around the area this will only get worse and become more dangerous.
1.7	West of Sandiacre	Traffic Congestion	Steve Whittaker	Response-01781	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Stuart Pensom	Response-00049	Traffic though sandiacre is a joke has been for years.
1.7	West of Sandiacre	Traffic Congestion	Sue Harrison	Response-01629	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Susan Hales	Response-00212	This area is not suitable for yet more traffic. Assuming every home will have at least 1 car, this will add 200+ vehicles negotiating already contested roads.
1.7	West of Sandiacre	Traffic Congestion	Susan Heinke	Response-00468	Traffic is already more than Sandiacre can handle without adding to it
1.7	West of Sandiacre	Traffic Congestion	Susanne Beaven	Response-01618	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Sylvia Plampin	Response-00624	Regular parking on pavements, double parking, parking on blind bends. At school drop off/pick up cars are double parked, parked across pavements, the i4 bus is often unable to manoeuvre safely, and regularly gets stuck.
1.7	West of Sandiacre	Traffic Congestion	Tamara Partridge	Response-01780	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Tara Marshall	Response-01890	
1.7	West of Sandiacre	Traffic Congestion	Tarnya Hinman	Response-01786	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Thomas Ilett	Response-01088	Traffic congestion has already been highlighted as an issue within Sandiacre, particularly the impact of increased HGV traffic passing through the village centre (specifically Town Street and Derby Road) on infrastructure largely unchanged since the 1950s/60s. Aside from increased HGV traffic, increased general traffic is also expected as a result of planned growth for employment and residential uses particularly around Stanton. Chapter 19, paragraphs 177 and 178 of the Sandiacre Neighbourhood Plan reference these traffic concerns as well as it being a common theme highlighted to Dr Adam Thompson MP. Chapter 19, paragraph 179 of the Sandiacre Neighbourhood Plan states 'Reducing the traffic congestion in the parish is an aspirational policy?it is the matter of greatest concern to local residents and as part of its on-going work, the Parish Council will continue to lobby the Borough and County Council to address significant transport issue?. The proposed housing allocation is likely to increase traffic congestion. As such, despite the Parish Council?s lobbying, the proposed housing allocation seeks to exacerbate ?the matter of greatest concern to local residents? demonstrating complete disregard of the Sandiacre Neighbourhood Plan and Sandiacre's residents. Chapter 19 of the Sandiacre Neighbourhood Plan also considers parking congestion within Sandiacre. Map 12 highlights Coronation Avenue, Linden Grove and Chestnut Grove as ?Examples of areas with limited residential parking which has a negative effect on the local area?. These three streets are next to the proposed housing allocation. The National Travel Survey 2022 (National Travel Survey 2022: Household car availability and trends in car trips - GOV.UK) highlights 34% of UK households have access to two or more cars or vans with 45% having access to one car or van. As such, the proposed housing allocation would likely exacerbate parking congestion, particularly prevalent in the residential area closest to the proposed housing allocation. The traffic congestion highlighted above, has the potential to be dangerous. In its current state, the congestion in Sandiacre and notably the streets mentioned is bad enough to potentially prevent emergency vehicles accessing properties and streets. This risk will be significantly increased should the proposed housing development go ahead, resulting in an outright dangerous situation, within the context of traffic congestion.
1.7	West of Sandiacre	Traffic Congestion	Tim Derbyshire	Response-01681	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Tim Gough	Response-00996	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Toby Moran	Response-01769	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Tom Ball	Response-01672	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Toni hopkins	Response-00539	Already over parking issues creating poor access for buses and emergency service
1.7	West of Sandiacre	Traffic Congestion	Tony Price	Response-00977	It's busy enough already in Sandiacre without the added burden this will place on already overwhelmed resources.
1.7	West of Sandiacre	Traffic Congestion	Tony Weston	Response-00990	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Tracey Howe	Response-01860	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic. I have 2 jobs; carer and hairdresser and I frequent the area regularly - my clients are elderly. Personally, I have trouble getting through the estate especially school times its a nightmare to park at best of times, the area already feels insufficient for the residence as it is for parking / access, I've also seen the i4 bus have trouble at Beech Avenue and Coronation Road getting about.
1.7	West of Sandiacre	Traffic Congestion	Tracey Hughes	Response-01699	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Tracy Jones	Response-00436	We are currently overwhelmed with congestion without adding to it
1.7	West of Sandiacre	Traffic Congestion	Tracy Kerry-Cliff	Response-00801	The congestion (already bad at times) this will cause will be tremendous, and the traffic hold ups, accidents etc will be massively increased. The whole community (and it is a community) will be lost with the influx of an extra 20,000 vehicles.
1.7	West of Sandiacre	Traffic Congestion	Trevor Rowston	Response-01678	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Tricia Herbert	Response-00944	Traffic on Church street and Stanton Road is already at breaking point most of the day and the roads leading up to this development are definatley not suitable for the amount of construction traffic needed before any house are occupied
1.7	West of Sandiacre	Traffic Congestion	Try church	Response-00033	The roads up to and around Larch Drive are too narrow and too tight corners for heavy traffic. Disturbance to neighbours and wildlife will be totally unacceptable
1.7	West of Sandiacre	Traffic Congestion	Tyler Hobbs	Response-00879	The proposed plan for 180 houses on the greenbelt land would place unsustainable pressure on local through roads such as Cloud Side Road and Larch Drive, which are already narrow, overcrowded, and ill-equipped to handle a significant increase in traffic. These roads were not designed to accommodate the volume of vehicles that would come with an additional 180 homes, and any increase would likely worsen congestion, create safety risks for pedestrians and cyclists, and lead to longer journey times for residents. The narrow layout and limited capacity of these routes make them unsuitable for high traffic flow, particularly during peak hours, school runs, and emergency situations. Without major infrastructure upgrades?which could further disrupt the area?this development would severely compromise road safety and quality of life for existing residents.
1.7	West of Sandiacre	Traffic Congestion	Vanessa Asbach	Response-00700	Traffic is already bad in this area. It is highly unsafe for the children at school times, not to mention the amount of cars parked all across the roads to drop children off or pick them up. Additional homes and therefore cars are going to impact those times even further and result in more unnecessary danger

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Traffic Congestion	Verity Lamb	Response-01298	If each house has two cars minimum the additions to the roads at commuting time alone will make a miserable situation even worse
1.7	West of Sandiacre	Traffic Congestion	Vickie Wright	Response-01552	The existing road infrastructure is not designed to handle the sharp increase in vehicle volume that over 180 new homes would bring. This development could mean hundreds of additional cars using already congested local roads, especially during peak hours. I leave for work at 8am every week day and struggle to get onto the main routes like town street.
1.7	West of Sandiacre	Traffic Congestion	Vicky	Response-00485	Why destroy more green belt when there are houses empty!! We already have the local hotels filled with immigrants where does it end Sandiacre is already a cut through to Stanton and we are adding more congestion
1.7	West of Sandiacre	Traffic Congestion	Victoria Abraham	Response-01652	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Victoria Galpin-shrimpton	Response-01009	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic. Disruption from heavy duty construction vehicles, their noise, vibration and dirt would be detrimental to residents and wildlife for many years. It would be dangerous to residents property during icy weather conditions.
1.7	West of Sandiacre	Traffic Congestion	Victoria Greatorex	Response-01730	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Victoria Marriott	Response-00674	Traffic / congestion - Road safety/ access - My main concern is the suitability of the access to the proposed site It?s a very narrow road with several sharp bends and a sharp incline. I use this road on a daily basis to collect my friend?s son to take him to school. It?s always a struggle to get up the road, I find it very hard to believe that any type of commercial lorry would be able to get up there safely. The bus route misses this area out for this very reason. It?s an unsuitable access point for the proposed site not only for access but for the expected volume of traffic estimated to rise to 19,000 extra uses of vehicles. With the current condition of the roads with the amount of potholes I?m not sure the roads could sustain the volume/ weight. What plan is in place to prepare the roads for this extra traffic? During the winter the steep road can become inaccessible particularly for larger vehicles. I think you?re underestimating the impact on the roads the extra traffic - initially created by the workforce then subsequently the new occupants will create. My main concern is the suitability of the access to the proposed site. It?s an unsuitable access point for the proposed site not only for access but for the expected volume of traffic estimated to rise to 19,000 extra uses of vehicles. With the current condition of the roads with the amount of potholes I?m not sure the roads could sustain the volume/ weight. What plan is in place to prepare the roads for this extra traffic? During the winter the steep road can become inaccessible particularly for larger vehicles. I think you?re underestimating the impact on the roads of the extra traffic - initially created by the workforce then subsequently the new occupants will create.
1.7	West of Sandiacre	Traffic Congestion	Vivien Davis	Response-01582	This would increase traffic on unsuitable and dangerous roads by over 700 vehicles a day giving rise to an excess of 19,000 vehicles a year on roads not suited to this volume of traffic.
1.7	West of Sandiacre	Traffic Congestion	Wayne Major	Response-00408	I wish to object to the currently proposed vehicular access for this development. Based on the plans, the access appears to be significantly constrained. Even with the removal of trees and the construction of the highway over existing root zones which should be protected the widest achievable opening is only 5.7 metres with the current gate being only 2.7m. This also assume they own the current land to achieve the 5.7m. A two-way road typically requires a width of 5.5 to 7.3 metres, plus space for a pedestrian footpath. Therefore even with the absolute minimum road width just after a bend this proposal fails to allow for safe pedestrian access alongside vehicle movement. As a result, the development of 180 homes would leave residents without a safe pedestrian route in or out of the site. This conflicts with NPPF Paragraph 110, which requires developments to give priority to pedestrian and cycle movements and create places that are safe, secure and attractive for all users. Additionally, the route leading to the site from the main road consists of narrow residential streets, which are frequently lined with parked cars. There is existing evidence of buses getting stuck, indicating that large vehicles including construction traffic would be unable to safely navigate these roads. I am also concerned that a fire engine or ambulance would struggle to access the site in a timely manner due to these same constraints, particularly where parked cars restrict manoeuvrability. This raises serious concerns regarding access for emergency services and the safe management of construction traffic, in conflict with NPPF Paragraph 111, which advises that development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety or the residual cumulative impacts on the road network would be severe. The proposed development will also increase the number of vehicles using these currently quiet roads. At present, drivers patiently wait for one another to pass parked vehicles. However, with significantly more traffic generated by 180 homes, the parked cars that currently cause little disruption are likely to create congestion and hazards for pedestrians. This runs counter to NPPF Paragraph 112, which stresses the need for developments to enable safe and suitable access for all users and to minimise conflicts between vehicles and pedestrians. For all of these reasons, I strongly object to the proposed vehicular access arrangement and urge the planning authority to reconsider a solution that ensures both safe pedestrian connectivity and appropriate vehicle access, without compromising the surrounding residential streets.

During the winter the steep road can become inaccessible particularly for larger vehicles. I think you're underestimating the impact on the roads the extra traffic - initially created by the workforce then subsequently the new occupants will create.
1.7	West of Sandiacre	Traffic Congestion	Zack Snowdon	Response-00764	The traffic on Stanton Road which leads to the area being developed is already incredibly backed up and there is too much traffic parked on the road which causes buses to have to mount the kerb near pedestrians walking including myself on the pavement which makes me feel unsafe and puts me off walking.
1.7	West of Sandiacre	Traffic Congestion	Zoe Hughes	Response-01919	Road not designed for through route/access. Very steep/narrow. No passing places & only one car's width due to parking on Cloudside Road.
1.7	West of Sandiacre	Type of Housing	A Harby	Response-01684	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Aimee	Response-00952	We don't need any more properties in Sandiacre being lost to house illegal migrants. We already have many properties owned by private landlords that are being leased to Serco to house these people. Further housing should not be given to these people. It's putting the residents of Sandiacre at great risk of sexual assault, violence and terrorism.
			Alexander Love	Response-00626	Social housing, already housing ex convicts at the old red lion pub
1.7	West of Sandiacre	Type of Housing	Alice Cooper	Response-01721	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Alice Ilett	Response-00571	We were told that the houses were being built on greenbelt as we were in need of social housing and there wasn't anywhere else. To then find out there was an alternative site behind Lidl that was proposed and they won't all be used for social housing. There's so many empty houses and alternatives that should be prioritised for this. The development isn't for "social housing needs" it's to make developers rich.
1.7	West of Sandiacre	Type of Housing	Amanda Leech	Response-01625	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Anastasia Anthony	Response-01865	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Andrew Marvin	Response-00255	Be nice to know what the type of housing is Yes 10% affordable so what are the other houses going to be ??????
			Andrew Meadwell	Response-01654	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Andria Nylasi	Response-00672	House prices will be too expensive for local young people, as only 10% is being considered for social housing.
			Andy Martin	Response-01761	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Anne Castledine	Response-00499	It's green belt land, there are other brown areas more suitable.
1.7	West of Sandiacre	Type of Housing	Anne Jenkins	Response-00350	Houses would overwhelm the bungalows already built on Tarch Avenue
1.7	West of Sandiacre	Type of Housing	Annette Jones	Response-00961	How high are these houses supposed to be? Bungalows are not suitable if you are getting older as the hills are too steep and will have to depend on a car or other transport. Will they accommodate the need for average two cars per household? Will they just be houses with a drive and no garden so further impact on the environment? Other areas within Sandiacre should be considered closer to amenities and easier access to transport.
1.7	West of Sandiacre	Type of Housing	Ann Harrison	Response-01602	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Anthony Pearson	Response-01760	High density housing is preposterous not in keeping with current housing.

1.7	West of Sandiacre	Type of Housing	ben riley	Response-00607	It's been described as dense housing. Not only would you be removing beautiful scenic landscape, you'll be replacing it with awful looking brick and tarmac.
1.7	West of Sandiacre	Type of Housing	Beverley Gardner	Response-01692	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Beverley Green	Response-01686	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Bill Hartley	Response-01696	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	B T Keen	Response-01735	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	c/o The Equalised Club	Response-01603	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Callum binnall	Response-00460	A thousand reasons why we don't want anymore housing.
1.7	West of Sandiacre	Type of Housing	Caroline Blackmore	Response-00451	We don't want more social housing thank you.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Type of Housing	Caroline Driver	Response-00618	There is no transparency about what the proposed housing is for. I saw Angela Rayner admitting on TV that most of her 1.5 million homes will go to immigrants. In a professional capacity I have met many unvetted illegal migrants from the hotels in long eaton and the vast majority that I met were rude, entitled, misogynistic and aggressive. I am already horrified that they are walking the streets with my children in the local area, never mind housing them at the top of my street. Please publish an exact breakdown of what you intend the housing to be used for. I have written to councillor Curtis Howard more than once asking this question which he is refusing to answer.
1.7	West of Sandiacre	Type of Housing	Carol Marshall	Response-00736	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Carolyn Hallam	Response-00489	Why are there so few affordable homes being built. The comment of spending money outside the build area is dependent upon other factors? Just a loophole to get out of doing so
1.7	West of Sandiacre	Type of Housing	Catherine Greenaway	Response-00429	What type of houses are being built, will they be council houses or private? Or will they be used for the immigrants currently in hotels?
1.7	West of Sandiacre	Type of Housing	Catherine Richardson	Response-00531	180 houses being built in the proposed area would be like sardines in a tin. All crammed together right next to the M1
1.7	West of Sandiacre	Type of Housing	Charlotte Hunter	Response-01376	This type of housing isn't environmentally friendly and will impact the local nature. Including the endangered hedgehog.
1.7	West of Sandiacre	Type of Housing	C Holmes	Response-01620	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Chris Hume	Response-01373	The antisocial behaviour in the area is bad now, this development will add to the problem centering the problem in an area that has an elderly population, police are never seen in this area there will be no more officers to police the social housing
1.7	West of Sandiacre	Type of Housing	Chris Jones	Response-01718	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Chris O Connor	Response-01641	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Christian Rearson	Response-01763	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Christine Gough	Response-00578	The proposed building on Stoney will I imagine be type of housing will be all cramped together ? No gardens , no where for the children to play, no where for birds and wildlife . No space for community for the people , nothing good for well being . This can cause social problems , more noise and more traffic parking problems . It doesn't matter if it's social housing , private homes , affordable homes , 180 homes will cause more problems because we don't have the right inferstructure to warrant the building of these homes
1.7	West of Sandiacre	Type of Housing	Claire binnall	Response-00459	Unaffordable housing not for the masses just to try and keep up on one of your many election promises that you usually break
1.7	West of Sandiacre	Type of Housing	Clare Green	Response-01751	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Cole Hawkins	Response-01714	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Colin Cox	Response-01716	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Colin Marriott	Response-00686	The site is not suitable for this amount of properties. No details of what the properties would be like.
1.7	West of Sandiacre	Type of Housing	Courtney Bennett	Response-00593	The majority of the new build houses don't have gardens or adequate green spaces. These houses need to be detached or semi detached and all have mandatory gardens with trees that are legally not allowed to be removed as well as plants, grass verges so that the wildlife in the area can still attempt to have a home and some quality of life. There are already so many empty houses in the area that can be repurposed, reused and recycled because of the unaffordable housing crisis. Why don't we reuse and recycle what we already have instead of killing a green space.
1.7	West of Sandiacre	Type of Housing	Craig Richards	Response-01638	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Craig Thims	Response-01765	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Cristina Jenkins	Response-01588	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	C Thompson	Response-01634	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Daniel	Response-00545	Who exactly is this housing for? To my understanding this is part of the government scheme to build a million new homes, but the houses here are mostly privately owned, is this new social homing? who is living there exactly? While affordable housing is important, clustering large numbers of social homes in one area with a class disparity without proper infrastructure or amenities risks creating social imbalance and strain on local services.
1.7	West of Sandiacre	Type of Housing	Daniel Downes	Response-01630	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Daniel Hands	Response-00057	The current desirability of the area is largely due to type and scope of houses that make up the surrounding area. Maple avenue for example is made up largely of self build and small development properties which offer a wide range and variation on sizes and layouts. Where as the ex council houses that make up the majority of housing in the area offer larger gardens good sized rooms and potential future development for occupiers. These ideals are not seen in modern developments where space is at a premium and housing is built for profit and to maximise budgets. I think the type of housing would need to accommodate families and meet the same desirabilities offered by the current housing stock in the area.
1.7	West of Sandiacre	Type of Housing	Danielle Harrison	Response-00568	We live across from Norbury Way in Sandiacre which is testament to the issues caused by social housing allocations. Alcohol and drug addiction is rife. Yesterday I called the police to remove a knife stashed in undergrowth. This is already a blight on the local crime rates with anti social behaviour, as police records support. If you add any more social housing be prepared for the local community to suffer the consequences
1.7	West of Sandiacre	Type of Housing	Darran and Emma Rea	Response-00597	The housing won't be in keeping with the area, currently we have semi detached, terraced and detached housing with good back gardens and spaced out, the new development will be crammed in, limited parking to maximise how many houses they can build
1.7	West of Sandiacre	Type of Housing	David Casey	Response-01608	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	David Cater	Response-01756	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	David Ruddock	Response-01776	High density housing is preposterous not in keeping with current housing.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Type of Housing	David Tindsley	Response-00515	I wish to object to the proposed development on the grounds that it does not appear to be in accordance with the local Neighbourhood Plan, particularly in terms of housing scale, type, and density. The Sandiacre Neighbourhood Plan 2022 -2037, developed in consultation with the local community to guide appropriate and sustainable development. This plan sets clear expectations that new development should reflect the character of the area, including the type and density of housing, and should be proportionate to the existing built environment. A proposal for 180 dwellings on this site would represent a significant increase in density compared to the surrounding area. It would result in a development that appears out of scale and out of keeping with the established residential character. Such a large number of homes in a single location also risks undermining the carefully considered planning policies agreed through the Neighbourhood Plan process. This conflicts with Paragraph 15 of the National Planning Policy Framework (NPPF), which recognises the legal status of Neighbourhood Plans and supports giving local communities the power to shape development in their area. It also contradicts Paragraph 127, which states that developments should be sympathetic to local character and align with the expectations set out in local design guides or codes. Restricting the number of ?affordable? houses to just 10% appears to conflict with the Sandiacre Neighbourhood Plan, which recommends (para. 145) that ?the Parish diversify its housing mix, increasing the number of 1-2 bedroom dwellings to balance out the high proportion of 3+bedroom dwellings on offer and ensure that both younger households and downsizing older people have a broader range of options than they do at present?. I suspect that to include a higher percentage of affordable housing would make this a much less viable and lucrative development for the developer.
1.7	West of Sandiacre	Type of Housing	David Yeo	Response-01705	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Dean Bosworth	Response-01665	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Dean Lavelle	Response-01774	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Dean Michell	Response-01343	To many house already in sandiacre.
1.7	West of Sandiacre	Type of Housing	Debra Scully	Response-00288	Unable to comment as no plans seen as yet
1.7	West of Sandiacre	Type of Housing	Debs Washer	Response-00487	There is no need for any more social housing and green belt to be used for this purpose, use some of the empty buildings and bring them back to life.
1.7	West of Sandiacre	Type of Housing	Denise Creasey	Response-00786	The high density housing is not in keeping with the current housing.
1.7	West of Sandiacre	Type of Housing	Denise Lingard	Response-01759	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Dennis Watts	Response-01726	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Derek Morton	Response-01607	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Derrick Hunt	Response-00437	There are no specifics as far as I am aware as to what is actually being proposed in terms of bungalows 2beds 3 beds 4 beds etc
1.7	West of Sandiacre	Type of Housing	Destiny Jade-Blake	Response-01636	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Diane Jones	Response-00852	No houses on this site.
1.7	West of Sandiacre	Type of Housing	Diane Mcmorrow	Response-00433	Don't want the house were a village bursting at the seems we don't have the infrastructure to support additional homes
1.7	West of Sandiacre	Type of Housing	Diane Turner	Response-01744	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	D Pallett	Response-01627	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	D Simpson	Response-01712	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Eleanor Moseley	Response-00799	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Eleanor Newman	Response-00718	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Emma Ryan	Response-00503	There just does not need to be another 180 homes added to Sandiacre. It's completely ludicrous.
1.7	West of Sandiacre	Type of Housing	Emma Wall	Response-00319	The only type of housing I object to is having housing on that piece of land
1.7	West of Sandiacre	Type of Housing	Esther Cook	Response-01861	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Ewan Snowdon	Response-00766	The density of housing is a real concern. Having so many houses crammed in so close to each other will lead to overcrowding and a poor quality of life and poor living standards.
1.7	West of Sandiacre	Type of Housing	Fay Cresswell	Response-00701	There would be far too many houses in a small area at the moment the estate is Semi detached and detached properties with some bungalows so the new properties would have to be small close to each other and not in keeping with the area
1.7	West of Sandiacre	Type of Housing	Gail Berry	Response-01644	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Geoff Tindsley	Response-00755	I wish to object to the proposed development on the grounds that it does not appear to be in accordance with the local Neighbourhood Plan, particularly in terms of housing scale, type, and density. 1. A proposal for 180 dwellings on this site would represent a significant increase in density compared to the surrounding area. It would result in a development that appears out of scale and out of keeping with the established residential character. Such a large number of homes in a single location also risks undermining the carefully considered planning policies agreed through the Neighbourhood Plan process. 2. Restricting the number of ?affordable? houses to just 10% appears to conflict with the Neighbourhood Plan, which recommends (para. 145) that ?the Parish diversify its housing mix, increasing the number of 1-2 bedroom dwellings to balance out the high proportion of 3+bedroom dwellings on offer and ensure that both younger households and downsizing older people have a broader range of options than they do at present?. I suspect that to include a higher percentage of affordable housing would make this a much less viable and lucrative development for the developer.
1.7	West of Sandiacre	Type of Housing	Georgia C	Response-01296	New builds on developments such as these are renowned for not meeting standards and will not be standing in a hundred years. We have perfectly good buildings in existence as is, which if require work/investment will continue to stand the test of time as they have done for many years.
1.7	West of Sandiacre	Type of Housing	Georgia Marvin	Response-00261	Sandiacre is a relatively quiet town. I'll be interested to know what kind of families this housing scheme will bring.

1.7	West of Sandiacre	Type of Housing	Helen Gillain	Response-00964	High density housing is out of character in this area
1.7	West of Sandiacre	Type of Housing	Helen whiteman	Response-00447	The type of housing is not at all going to enhance the area they will be slums within years and the new houses will not be fit for purpose
1.7	West of Sandiacre	Type of Housing	Ian	Response-00493	Probably tasteless.....
1.7	West of Sandiacre	Type of Housing	Ian herbert	Response-00939	180 house is just way too dense. perhaps a very limited number of presige family homes might be viable
1.7	West of Sandiacre	Type of Housing	IAN TAYLOR	Response-00972	The numbers and density of the proposed housing units are inconsistent with the density of the existing residential area.
1.7	West of Sandiacre	Type of Housing	Ian Ward	Response-01628	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Irina Anthony	Response-01867	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Isabelle Love	Response-00529	180 houses in that stretch of home is an appealing proposal. We have all seen the state of new builds - no gardens to even TRY and relieve the issue of removing further greenbelt. New builds are often ugly, uniform copies of each other with the only objective for greedy developers being how many they can stuff into and already overstuffed area!! People cannot afford these atrocious houses either, meaning they will likely attract people from outside the area, resulting in the local population looking to buy in the same situation, except now the area is worse with too many people in it. There?s also the issue of devaluing the existing homes in this area, when people no longer want to buy them with the area being so congested.
1.7	West of Sandiacre	Type of Housing	J. E. Lord	Response-01601	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Jack Greateorex	Response-01731	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Jacob Whitt	Response-01748	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Jade Smith	Response-01783	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	James Meadwell	Response-01653	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	James Roberts	Response-01708	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	James Seward	Response-01683	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	James White	Response-01883	Poor quality plots, no doubt houses will be stacked on top of each other.
1.7	West of Sandiacre	Type of Housing	Jane Dennett	Response-00965	Don't agree to any
1.7	West of Sandiacre	Type of Housing	Jane Elizabeth Tindsley	Response-00669	I wish to object to the proposed development on the grounds that it does not appear to be in accordance with the local Neighbourhood Plan, particularly in terms of housing scale, type, and density. The Sandiacre Neighbourhood Plan 2022 -2037, developed in consultation with the local community to guide appropriate and sustainable development. This plan sets clear expectations that new development should reflect the character of the area, including the type and density of housing, and should be proportionate to the existing built environment. A proposal for 180 dwellings on this site would represent a significant increase in density compared to the surrounding area. It would result in a development that appears out of scale and out of keeping with the established residential character. Such a large number of homes in a single location also risks undermining the carefully considered planning policies agreed through the Neighbourhood Plan process. This conflicts with Paragraph 15 of the National Planning Policy Framework (NPPF), which recognises the legal status of Neighbourhood Plans and supports giving local communities the power to shape development in their area. It also contradicts Paragraph 127, which states that developments should be sympathetic to local character and align with the expectations set out in local design guides or codes. Restricting the number of ?affordable? houses to just 10% appears to conflict with the Sandiacre Neighbourhood Plan, which recommends (para. 145) that ?the Parish diversify its housing mix, increasing the number of 1-2 bedroom dwellings to balance out the high proportion of 3+bedroom dwellings on offer and ensure that both younger households and downsizing older people have a broader range of options than they do at present?. I suspect that to include a higher percentage of affordable housing would make this a much less viable and lucrative development for the developer.
1.7	West of Sandiacre	Type of Housing	Janet Whildes	Response-01869	High density housing is preposterous not in keeping with current housing.

1.7	West of Sandiacre	Type of Housing	John Payne	Response-01785	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	John whiteman	Response-00450	The type of house does not lend itself to nice housing
1.7	West of Sandiacre	Type of Housing	Jon Burn	Response-01722	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Josh Williams	Response-01632	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	J Pearson	Response-01772	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Judith A Pulfer	Response-01863	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Julie Hill	Response-01643	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Karen Alldread	Response-01868	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Karen Blain	Response-01732	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Karen Harwood	Response-01668	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Kathryn Martin	Response-00527	180 houses too dense, it should reflect character of surrounding area
1.7	West of Sandiacre	Type of Housing	Katie Robinson	Response-00943	On the report it is listed as being high density housing. It doesn't match what currently is built or anything else on the estate. It would dramatically change the look and feel to the whole estate. The estate is currently a local, quiet friendly place to live but building such a large amount or properties will change this - it will no longer be quiet and will become much busier just down to the sheer volume of closely built houses. I also have concerns about how close they would come to my property as my property backs onto the proposed site - how overlooked my property would suddenly become?
1.7	West of Sandiacre	Type of Housing	Kelly Randall	Response-00591	With no detailed plans available, the housing mix remains unknown. The proposed density of 38 dwellings per hectare is significantly higher than the local average (22 per hectare) and would result in an isolated, high-density development with inadequate access.
1.7	West of Sandiacre	Type of Housing	Kelsey Green	Response-01666	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Kenneth Cooper	Response-01720	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Kern-Paul Lewis	Response-01715	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Kerry Meadwell	Response-01655	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Kerry Smith	Response-01271	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	KH Taylor	Response-01663	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Kimberley Selby	Response-00478	It's probably going to be for people on benefits or immigrants which could possibly bring the crime rate up in the area and making the area feel unsafe for those that live there already.
1.7	West of Sandiacre	Type of Housing	Kim Helm	Response-00632	The houses that are proposed will be unaffordable for most
1.7	West of Sandiacre	Type of Housing	Kirk Moss	Response-00439	The proposal appears to serve a profit-driven agenda rather than meet genuine local housing needs. There is no clear evidence that the type and volume of housing planned align with what the local community requires.
1.7	West of Sandiacre	Type of Housing	Kirsty Handa	Response-00445	This development will destroy the view both from the nearby properties and from the nature reserve
1.7	West of Sandiacre	Type of Housing	Kristie Rugers	Response-01864	High density housing is preposterous not in keeping with current housing.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
	West of Sandiacre	Type of Housing	Kyle Jones	Response-01764	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	L A Keen	Response-01659	High density housing is preposterous not in keeping with current housing.
	West of Sandiacre	Type of Housing	Laura Hallam	Response-01711	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Laurence Luck	Response-01727	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Lauren Rose	Response-01446	New housing is characterless, soul-less and simply would not fit with the current local area aesthetic. High-density housing is also often built quickly, poorly and not to a high standard.
1.7	West of Sandiacre	Type of Housing	Lee Wilcock	Response-01670	High density housing is preposterous not in keeping with current housing.
1.6a	West of Sandiacre	Type of Housing	Lesley Bruce	Response-01397	I see in the plan that affordable housing is needed, but that the council note that if the developer can not build affordable houses, a payment can be made to the council in lieu. This sounds underhand, and highly irregular to me. Either a chosen developer builds what is needed, or they do not get the job in my opinion, otherwise they are building for their own profit, not for the good of the community. No housing of any sort would be good for this overstretched community with inadequate roads and infrastructure.
1.7	West of Sandiacre	Type of Housing	Lia Thims	Response-01766	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Linda Castledine-Davies	Response-00850	High density style housing is not in keeping with the existing properties or character of the area, It will have a severe detrimental effect of wildlife as previously stated, It will impact the skyline and views. Residents of high density areas rely more on public transit and walking for transportation but will find it difficult because of the terrain. This is high density housing small cramped boxes crammed together with no thought or innovation on design build to reduce number required or aesthetically pleasing to the existing landscape and skyline. Higher density living raises concerns about existing residents quality of life. It will impact on their environment with issues like noise pollution, overcrowding, lack of green spaces, and limited privacy. Over subscribed schools, doctors and public services, environmental degradation, perhaps social issues such as increased crime rates and reduced quality of life. At present this is a low density mix of properties. More people will require more food, water, energy, and other resources all of which will be sourced either by external travel or couriers so yet more vehicles and pollution.
1.7	West of Sandiacre	Type of Housing	Lindsey Rawlinson	Response-01624	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	LISA ANNE GILLIGAN-LEE	Response-00710	In many developments, affordable housing is poorly integrated or separated from the rest of the estate, creating divisions and undermining community cohesion. Any inclusion should be balanced, well-designed, and equitable?ensuring it blends seamlessly with the rest of the neighbourhood in both appearance and access to facilities.
1.7	West of Sandiacre	Type of Housing	Lisa J Pearson	Response-01762	High density housing is preposterous not in keeping with current housing.
	West of Sandiacre	Type of Housing	Liz Woodhouse	Response-01584	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	L Mee	Response-01777	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Logan Fox	Response-00746	not sure what housing is being built
1.7	West of Sandiacre	Type of Housing	Lorraine Daly	Response-00495	"Affordable housing" is highly unlikely to be affordable for those on minimum or living wage.
	West of Sandiacre	Type of Housing	Lorraine Hands	Response-00534	Why can't money be better spent on restoring some now empty properties in the area!!
1.7	West of Sandiacre	Type of Housing	Louise Felfoldl	Response-01733	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Louise Harper	Response-01571	The type of housing will need to be quite multi story to get 180 houses on the site, this will impact me greatly with excess noise, dust and the sheer expense of housing at the moment, our children have little or no hope of buying there our homes, how many types of housing will there be, the plot seems to be not capable of 180 houses ?
1.7	West of Sandiacre	Type of Housing	Louise Harrison	Response-01719	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Louise Jacks	Response-01767	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Louise Libberton	Response-01693	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Lucy Johnson	Response-01369	Adding 180 houses to a very small area of land, is just plain stupid! New build houses are getting worse and worse as it is! It's not worth destroying our land!
1.7	West of Sandiacre	Type of Housing	lucy victoria garner	Response-00949	currently 77 houses for sale in sandiacre ranging from £80-700K to suit a range of options. Also 397 within a 1 mile radius as per Rightmove website. No indication there is no options for housing in the local area and no indication that another 180 houses are required.
1.6a	West of Sandiacre	Type of Housing	Luke Chein	Response-01779	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Lynda Morton	Response-01606	High density housing is preposterous not in keeping with current housing.
	West of Sandiacre	Type of Housing	Macie Brothwell	Response-01633	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Malcolm Dillon	Response-00722	Currently there is very little information on the type of housing proposed for this development. High density housing has been linked to this proposal. This would be totally inappropriate for the location of this proposed development. The social benefits of the proposed development is very niggardly and this is a worry. Profit and speed are possibly the overriding considerations for both the developer and the council. This concern needs to be addressed.
1.6a	West of Sandiacre	Type of Housing	Malcolm Fox	Response-00215	I can only assume the housing would be similar to other estates being built outside the immediate area. But to be honest, the lack of information provided by the council has been nothing but unsupportive. I cannot comment as I have not seen, been provided or had the opportunity to review the proposed plans.
1.7	West of Sandiacre	Type of Housing	Malcolm Riggs	Response-01680	High density housing is preposterous not in keeping with current housing.
1.6a	West of Sandiacre	Type of Housing	Malc Orbiston	Response-01673	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Mandy Rait	Response-01587	High density housing is preposterous not in keeping with the surrounding neighbourhood!

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Type of Housing	Mark Gough	Response-00888	Any type of housing is going to be horrendous on this proposed site . For a start , right next to the motorway ? who?s going to want to live there , the noise , pollution . Three storey houses all crammed together , with no gardens , overlooking residents in Sycamore cres, Chestnut Grove, Larch, Cloudside Road , that?s not going to go down well , people have a right to privacy. It will devalue the price of the houses of people that have bought their homes after years of working hard . If they wanted to sell and move on it will be harder . The 180 houses will be crammed together , too many houses in that space , this will cause tension and noise , which in return will probably cause anti social behaviour, causing more problems and added work load for the police . Even if the houses are terraced , small ones, there will be problems for car parking , and of course access.
1.7	West of Sandiacre	Type of Housing	Mark Leek	Response-01740	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	mark skelton	Response-01341	Not too sure on the homes or how they are going to be heated. Not sure on how to removed drainage away either.
1.7	West of Sandiacre	Type of Housing	Martin Driver	Response-01387	Ridiculous trying to squeeze 180 house on a field. Whoever suggested this site should be ashamed!
1.7	West of Sandiacre	Type of Housing	Martyn Locker	Response-00903	Of course, the type of housing will determine the types of residents that will be moving into them. Is there a chance that these houses will be bought by landlords and rented to tenants? Is there a chance that they'll be council houses provided to low income / unemployed families that may be susceptible to increasing crime and drug usage in the community? Given that 180 houses are planned for such a small area, it?s clearly not going to be lovely detached properties that are likely to attract wealth and growth to the area. Without knowing the type of housing that?s planned, it?s hard to know what to expect, and you have to consider all possibilities and the long-term impact this will have on the area.
1.7	West of Sandiacre	Type of Housing	Matt Bancroft	Response-00916	The density and number of houses is not in keeping with the local surrounding areas
1.7	West of Sandiacre	Type of Housing	Matthew Buckland	Response-00615	If I had any confidence that the vast majority of the proposed houses wouldn't immediately be sold as rental properties then I'd probably be more supportive, however the likelihood is, is that they will be bought and rented out at ridiculous prices. There are currently allegedly 1500 properties empty in the region - and 700000 in the UK as a whole - make use of them rather than building more poorly built properities in areas where the infrastructure is struggling.
1.7	West of Sandiacre	Type of Housing	Maurice Mason	Response-01617	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Maxine Sutton	Response-00471	The site would have to have a range of housing in keeping with the village. There would need to be affordable housing, starter homes,, family homes and plenty of bungalows for the aging population.
1.7	West of Sandiacre	Type of Housing	M Dougle	Response-01749	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	M Eastwood	Response-01757	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Melanie	Response-00586	No detailed plans have been provided on the proposed types of housing. Without this information, it is impossible to assess the suitability or need for the development in relation to the local housing strategy.
1.7	West of Sandiacre	Type of Housing	Melanie Caumont	Response-01272	The plan proposes only 10% affordable homes on-site, with a vague commitment to off-site affordable housing. This fails to address local needs meaningfully and raises concerns that the development is profit-driven rather than community-focused. A more balanced housing mix, should be considered.
1.7	West of Sandiacre	Type of Housing	Melanie Howarth	Response-01621	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Michell Birkin	Response-01657	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Michelle Alsop	Response-01645	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Michelle Cox	Response-01724	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Michelle Wenham	Response-01650	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Mick Hughes	Response-01701	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Mike Darnell	Response-00698	Large estates type buildings are so out of character for this area where traditional type housing are. Wrong place to cram estates up here on the edge of a nature reserve. Getting building trucks and amenities up here to build would be dangerous and totally devastating to the nature reserve
1.7	West of Sandiacre	Type of Housing	Miss Garratt	Response-00905	High density housing is preposterous not in keeping with current housing.

	West of Sandiacre	Type of Housing	S. Jones	Response-01615	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Sally Davies	Response-01294	This housing is not needed. There are lots of empty homes in the area.
1.7	West of Sandiacre	Type of Housing	Samantha Anne Whitney	Response-00757	This land isn't suitable for any type of housing due to access and where it's situated. There are better places to build if you're adamant you're going to build extra housing.
1.7	West of Sandiacre	Type of Housing	Samantha Whildes	Response-01270	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Sam Fleck	Response-00821	Housing type: I wish to object to the proposed development on the grounds that it does not appear to be in accordance with the local Neighbourhood Plan, particularly in terms of housing scale, type, and density. The area currently benefits from a Neighbourhood Plan, developed in consultation with the local community to guide appropriate and sustainable development. This plan sets clear expectations that new development should reflect the character of the area, including the type and density of housing, and should be proportionate to the existing built environment. A proposal for 180 dwellings on this site would represent a significant increase in density compared to the surrounding area. It would result in a development that appears out of scale and out of keeping with the established residential character. Such a large number of homes in a single location also risks undermining the carefully considered planning policies agreed through the Neighbourhood Plan process. This conflicts with Paragraph 15 of the National Planning Policy Framework (NPPF), which recognises the legal status of Neighbourhood Plans and supports giving local communities the power to shape development in their area. It also contradicts Paragraph 127, which states that developments should be sympathetic to local character and align with the expectations set out in local design guides or codes. In light of the above, I believe the proposal in its current form fails to comply with the Neighbourhood Plan and should be reconsidered. A reduced number of homes, designed in a way that respects the established form and layout of the community, would be far more appropriate for this site.
1.7	West of Sandiacre	Type of Housing	Sam Greatorex	Response-01695	High density housing is preposterous not in keeping with current housing.

1.7	West of Sandiacre	Type of Housing	Sonya Birkin	Response-01656	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Sophie Bennett	Response-01631	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Stephen Davies	Response-00214	180 additional properties in this location entirely inappropriate. Even EBC claim 5,000 affordable homes in are required but set only 10% requirement for this development? A proposal for 180 dwellings on this site would represent a significant increase in density compared to the surrounding area. It would result in a development that appears out of scale and out of keeping with the established residential character. Such a large number of homes in a single location also risks undermining the carefully considered planning policies agreed through the Neighbourhood Plan process. This conflicts with Paragraph 15 of the National Planning Policy Framework (NPPF), which recognises the legal status of Neighbourhood Plans and supports giving local communities the power to shape development in their area. It also contradicts Paragraph 127, which states that developments should be sympathetic to local character and align with the expectations set out in local design guides or codes
1.7	West of Sandiacre	Type of Housing	Stephen Sacker	Response-01598	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Steve Bilbie	Response-00285	House are not suitable here at all.
1.7	West of Sandiacre	Type of Housing	Steve Whittaker	Response-01781	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Stuart Pensom	Response-00049	Any going to be social housing
1.7	West of Sandiacre	Type of Housing	Sue Harrison	Response-01629	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Susanne Beaven	Response-01618	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Sylvia Plampin	Response-00624	To fit 180 houses on the site, these will have to be small, cramped and I doubt will have adequate parking.
			Tamara Partridge	Response-01780	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Tarnya Hinman	Response-01786	High density housing is preposterous not in keeping with current housing.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Type of Housing	Thomas Ilett	Response-01088	The housing allocation is at the top of an incline, comparative to Sandiacre. This would also make the housing allocation inappropriate as the Sandiacre Neighbourhood Plan highlights the need for housing for the elderly and sheltered housing (Chapter 17, paragraph 142, 144, 145 and 146). A proposed housing allocation 20 ? 60m higher than much of the rest of Sandiacre would be inappropriate for sheltered housing or housing for the elderly due to access difficulties.
1.7	West of Sandiacre	Type of Housing	Tim Derbyshire	Response-01681	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Tim Gough	Response-00996	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Toby Moran	Response-01769	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Tom Ball	Response-01672	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Tony Weston	Response-00990	High density housing is preposterous not in keeping with current housing. The proposed housing lacks plans for sustainable infrastructure, such as green roofs or solar energy, which goes against the increasing demand for eco-friendly living options. Building large estates can lead to social fragmentation, as new arrivals may not integrate into the existing community, reducing neighbourhood cohesion and identity.
1.7	West of Sandiacre	Type of Housing	Tracey Howe	Response-01860	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Tracey Hughes	Response-01699	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Trevor Rowston	Response-01678	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Try church	Response-00033	The housing will not be affordable to the people who need it.
1.7	West of Sandiacre	Type of Housing	Tyler Hobbs	Response-00879	The project is likely to consist largely of standard, market-rate housing?typically three- or four-bedroom family homes?which raises several concerns. Firstly, this type of housing may not meet the actual needs of the local community, such as affordable homes for young people, first-time buyers, or downsizing options for older residents. If the development prioritizes profit over genuine housing need, it risks pricing out local people and doing little to address real housing shortages. Additionally, large-scale family housing brings with it a high demand for schools, healthcare, parking, and transport?services that are already stretched in the area. Without a balanced mix of property types and tenures, including genuinely affordable and social housing, the development could exacerbate existing inequalities and fail to serve the long-term interests of the community.
1.7	West of Sandiacre	Type of Housing	Vicky	Response-00485	Why destroy more green belt when there are houses empty!! We already have the local hotels filled with immigrants where does it end
1.7	West of Sandiacre	Type of Housing	Victoria Abraham	Response-01652	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Victoria Galpin-shrimpton	Response-01009	high density housing is preposterous not in keeping with current housing
1.7	West of Sandiacre	Type of Housing	Victoria Greatorex	Response-01730	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Victoria Marriott	Response-00674	Type of Housing - Much of the houses within sandiacre are period properties, how do you intend to comply with the look and feel of the houses so they blend in? It is the highest density of housing of all the proposals and will give rise for concern for future phases. Have you not considered other more suitable sites for this housing? Ones that aren't on a nature reserve.
1.7	West of Sandiacre	Type of Housing	Vivien Davis	Response-01582	High density housing is preposterous not in keeping with current housing.
1.7	West of Sandiacre	Type of Housing	Wayne Major	Response-00408	I wish to object to the proposed development on the grounds that it does not appear to be in accordance with the local Neighbourhood Plan, particularly in terms of housing scale, type, and density. The area currently benefits from a Neighbourhood Plan, developed in consultation with the local community to guide appropriate and sustainable development. This plan sets clear expectations that new development should reflect the character of the area, including the type and density of housing, and should be proportionate to the existing built environment. A proposal for 180 dwellings on this site would represent a significant increase in density compared to the surrounding area. It would result in a development that appears out of scale and out of keeping with the established residential character. Such a large number of homes in a single location also risks undermining the carefully considered planning policies agreed through the Neighbourhood Plan process. This conflicts with Paragraph 15 of the National Planning Policy Framework (NPPF), which recognises the legal status of Neighbourhood Plans and supports giving local communities the power to shape development in their area. It also contradicts Paragraph 127, which states that developments should be sympathetic to local character and align with the expectations set out in local design guides or codes. In light of the above, I believe the proposal in its current form fails to comply with the Neighbourhood Plan and should be reconsidered. A reduced number of homes, designed in a way that respects the established form and layout of the community, would be far more appropriate for this site.
1.7	West of Sandiacre	Type of Housing	William Marriott	Response-00676	Type of Housing Type of Housing - Much of the houses within sandiacre are period properties, how do you intend to comply with the look and feel of the houses so they blend in? It is the highest density of housing of all the proposals and will give rise for concern for future phases. Have you not considered other more suitable sites for this housing? Ones that aren't on a nature reserve.
1.7	West of Sandiacre	Wildlife / Biodiversity	Aaron Locksley	Response-00711	There is no doubt wildlife of the neighboring Stoney Clouds nature reserve will be affected. I personally am pragmatic and see the dire need for new houses, but what are the mitigating factors? Will there be a large green space left between the housing plots and nature reserve? What noise restrictions could be put in place?
1.7	West of Sandiacre	Wildlife / Biodiversity	Adam Shooter	Response-01925	Existing green belt land is critical to maintaining biodiversity which has been suffering across the UK for decades. The land also serves as a corridor connecting green areas that support biodiversity. The M1 has limited crossing points between green spaces, I expect removal of just one as this proposes would cause lasting impact to healthy biodiversity of the area.
1.7	West of Sandiacre	Wildlife / Biodiversity	Adrian Randall	Response-00463	The site is existing green belt next to a local beauty spot, higher density housing than already exists in the area. We need to protect and cherish our green belt, not build on it!
1.7	West of Sandiacre	Wildlife / Biodiversity	A Harby	Response-01684	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Wildlife / Biodiversity	Aimee	Response-00952	There's not many green belt areas left in this area and if planning is approved here it will open the gates to further destruction of green belt land. We need to protect the green belt as it homes thousands of plants, animals and insects. Once it is lost to housing, it's lost forever. There's birds of prey and bats in this area that need green areas to roost and to find food.
	West of Sandiacre	Wildlife / Biodiversity	Alexander Love	Response-00626	Wildlife will be destroyed
1.7	West of Sandiacre	Wildlife / Biodiversity	Alex Corns	Response-01151	The built environment is described as a major contributor to biodiversity loss and climate change due to the large volume of resources consumed by the construction industry. The built environment presents a serious threat to the protection of biodiversity if an urgent action towards a more sustainable built environment across the globe is not implemented. The Built Environment rarely considers the connection between the biodiversity and human wellbeing when delivering infrastructure and housing projects; little attention is paid to the integration of the relevant biodiversity strategies for sustainable urban development.
1.7	West of Sandiacre	Wildlife / Biodiversity	Alex Lord	Response-00946	I would like to protect the wildlife that still lives here, as that wildlife reserve is the main livable area for a lot of birds/ hedgehogs & otters. It is lovely walk and an important part of our community, especially for dog walkers
1.7	West of Sandiacre	Wildlife / Biodiversity	Alice Cooper	Response-01721	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
1.7	West of Sandiacre	Wildlife / Biodiversity	Alice Ilett	Response-00571	The greenbelt and stoney clouds in general is home to so much wildlife. Once it's gone we've lost it forever, I have beautiful memories of walking on stoney clouds to see the horses and wildlife as a child and it upsets me that my daughter won't have the same experience. There's so many alternative places to build but please please leave our beloved greenbelt alone. It means a lot to a lot of people.
1.7	West of Sandiacre	Wildlife / Biodiversity	Ali Harrison	Response-00947	Stoney Clouds is a beautiful nature reserve with a multitude of biodiversity and wildlife that needs protecting, not disturbed or destroyed by a huge building development!!
1.7	West of Sandiacre	Wildlife / Biodiversity	Amanda Leech	Response-01625	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
1.7	West of Sandiacre	Wildlife / Biodiversity	Amelia Loosemore	Response-00537	Building here will mean less green land. The nature needs protecting. Children need somewhere to play. This is a little bit of green area where I walk my dogs.
1.7	West of Sandiacre	Wildlife / Biodiversity	Amy Cray	Response-01223	This is a nature reserve!
1.7	West of Sandiacre	Wildlife / Biodiversity	Amy Skinner	Response-01447	The green belt land and the adjacent Stoney Clouds nature reserve is home to a plethora of native flora and fauna. It is a sanctuary for many species of birds and mammals such as buzzards, kestrels, foxes, badgers, moles, shrews and rabbits not to mention the countless, vital, pollinators that thrive there. Even if the proposed plans didn't directly impinge upon Stoney Clouds itself, there is no way that the works wouldn't have a hugely negative impact on the wildlife and biodiversity in Stoney Clouds and the green belt area. The noise, disruption and destruction of natural habitats would be catastrophic for the many animals that call the land their home. There are far too few green spaces left as it is. Furthermore, it would be detrimental to the people that regularly visit in order to be around nature. It is good for our mental health and well-being.
1.7	West of Sandiacre	Wildlife / Biodiversity	Anastasia Anthony	Response-01865	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat. Presence of bluebells in the wood warrants a classification of 'ancient' (Gloves et al 2009). Would probably frighten Stoney Clouds wildlife away.
1.7	West of Sandiacre	Wildlife / Biodiversity	Andrew Davies	Response-01295	This could be easily effected as it is an area of wildlife
1.7	West of Sandiacre	Wildlife / Biodiversity	Andrew Marvin	Response-00255	Stoneyclouds is lovely 180 houses and people will have a massive impact on the area and wildlife !!!!!!! Again disgusting
1.7	West of Sandiacre	Wildlife / Biodiversity	Andrew Meadwell	Response-01654	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
1.7	West of Sandiacre	Wildlife / Biodiversity	Andria Nyilasi	Response-00672	The wildlife in the immediate and the surrounding area of Stoney clouds would be directly impacted by the building, the longevity of the project, the noise and air pollution, not to mention the new population living on the site and all that brings with it. The land could never be returned to what it was and species using the Stoney cloud nature reserve may leave or be wiped out.
1.7	West of Sandiacre	Wildlife / Biodiversity	Andy Martin	Response-01761	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
1.7	West of Sandiacre	Wildlife / Biodiversity	Angela Roberts	Response-00681	Stones clouds nature reserve is a very special place. I visit regularly to enjoy the environment and nature. I believe there are bats there. I used to see bats in my garden before the Longmoor lane development but not any more. Please don't destroy more habitat .
1.7	West of Sandiacre	Wildlife / Biodiversity	Angela Whitehead	Response-00544	Inevitably it will destroy the birds and fauna
1.7	West of Sandiacre	Wildlife / Biodiversity	Anne Butler	Response-00385	Any impingement on to the stoney clouds site, including the children in these 300 houses using it as a playground will be detrimental to the wildlife there.
1.7	West of Sandiacre	Wildlife / Biodiversity	Anne Castledine	Response-00499	The variety of wild life is amazing, I've watched foxes playing and the different types of birds, including buzzards and sparrow hawks, blue tits and coal tits, robins to name just afew.
1.7	West of Sandiacre	Wildlife / Biodiversity	Anne Jenkins	Response-00350	Stoney clouds is a wonderful facility which supports many types of wildlife and offers a natural environment for us to enjoy
1.7	West of Sandiacre	Wildlife / Biodiversity	Annette Jones	Response-00961	We should protect the existing wildlife and continue to encourage old and new species. Having lived in the same area all my life and seeing what happened when the new housing was built previously it has taken many years to correct or never be able to replace. Do we not learn what impact this can have.
1.7	West of Sandiacre	Wildlife / Biodiversity	Ann Foxall	Response-00748	spoiling a nature reserve/ beauty spot
1.7	West of Sandiacre	Wildlife / Biodiversity	Ann Harrison	Response-01602	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
1.7	West of Sandiacre	Wildlife / Biodiversity	Anthony Ford	Response-01921	It is a lovely walk through & round the horse field to get to the golf course. An escape of natural beauty & biodiversity.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
1.7	West of Sandiacre	Wildlife / Biodiversity	Anthony Pearson	Response-01760	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
			Anthony Smedlewick	Response-01877	We go up there to see all the different animals up there, it's lovely.
1.7	West of Sandiacre	Wildlife / Biodiversity	Antony M Ingram	Response-01626	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
			A R Gregory	Response-01918	
1.7	West of Sandiacre	Wildlife / Biodiversity	Arleen Corns	Response-01146	If you take away the green belt up near Larch drive the wildlife will suffer, there are many creatures living up there, foxes, badgers, snakes, bats, owls and numerous birds. I have identified over 30 different types using an app, of which some are rare such as an Eurasian Siskin.
			Ashley Cartlidge	Response-01423	Wildlife is being squeezed and we cannot simply say that it can just all live in the nature reserves.
1.7	West of Sandiacre	Wildlife / Biodiversity	Awson Wheldon	Response-01649	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
1.7	West of Sandiacre	Wildlife / Biodiversity	Barbara and John Morrell	Response-00509	The area proposed for this new development of houses is a haven for wildlife and any development on this site would have a profound impact on those animals and birds. The area is very much used by local people to enjoy the wildlife it has and there are very few places left in this locality to enjoy such pleasures.
1.7	West of Sandiacre	Wildlife / Biodiversity	Barbara Michell	Response-01787	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
			Barbara Warton	Response-01886	Where will they go?
1.7	West of Sandiacre	Wildlife / Biodiversity	Barry Partridge	Response-01778	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
1.7	West of Sandiacre	Wildlife / Biodiversity	Ben Hollins	Response-01651	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
1.7	West of Sandiacre	Wildlife / Biodiversity	ben riley	Response-00607	We cherish the area. It's why we moved here so we could take walks with out children on the green belt. Please don't remove any of it. Once you begin to remove it, you'll carry on building on the green belt
			Ben Snowdon	Response-00428	This is an area of natural beauty and has many different types of plants, animals and birds that would all be affected.
1.7	West of Sandiacre	Wildlife / Biodiversity	Bethany Oakes	Response-00960	The area being built on is currently a haven for wildlife, including foxes, badgers and squirrels.
			Beverley Gardner	Response-01692	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
1.7	West of Sandiacre	Wildlife / Biodiversity	Beverley Green	Response-01686	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
1.7	West of Sandiacre	Wildlife / Biodiversity	Bill Hartley	Response-01696	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
1.7	West of Sandiacre	Wildlife / Biodiversity	B T Duke	Response-01900	Very concerned.
1.7	West of Sandiacre	Wildlife / Biodiversity	B T Keen	Response-01735	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
1.7	West of Sandiacre	Wildlife / Biodiversity	c/o The Equalised Club	Response-01603	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
			Callum binnall	Response-00460	Sandiacre has countless beautiful areas and you'll be destroying a massive part of the animals habitat, plus moving all the horses from there home!
1.7	West of Sandiacre	Wildlife / Biodiversity	C A Partridge	Response-01903	There is a lot of wildlife on the site including bats, horses, birds of prey.
			Caroline Blackmore	Response-00451	Obvious one you're trying to build on green belt it'll have a knock on effect to Stony Clouds. Why do you want to take away green belt land. That parcel of land also buffers the motorway
1.7	West of Sandiacre	Wildlife / Biodiversity	Caroline Driver	Response-00618	Stoney Clouds nature reserve is not big enough already. We walk there regularly and see the diverse habitat that the proposed area of building protects from immediate impact. In the last month I have seen 3 dead hedgehogs on the road. I have seen owls (one owl decapitated my pet rabbit). My next door neighbour has fox den in their garden with cubs every spring (have them all on camera). Likely in gardens due to loss of habitat already. This loss should not be exacerbated further.
1.7	West of Sandiacre	Wildlife / Biodiversity	Caroline Roy	Response-00945	This area is a fantastic space for wildlife, from birds of prey to bees. We should be encouraging more spaces like these - not destroying them
1.7	West of Sandiacre	Wildlife / Biodiversity	Carol Marshall	Response-00736	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat. Disruption from heavy dusty construction vehicles, their noise, vibration and dirt would be detrimental to wildlife for many years
			Carolyn Hallam	Response-00489	Building on greenbelt will definitely affect wildlife and biodiversity. Once it has been destroyed, it can't be put back. Animals live there because it's good habitat. Once they are displaced they will probably die. Putting up bird and bat boxes several years later, if at all, is useless
1.7	West of Sandiacre	Wildlife / Biodiversity	Catherine Richardson	Response-00531	I have personally seen kestrels,buzzards,owls,badgers,hedgehog,foxes and many butterflies and other insects. Also many small birds would be affected by this site going ahead
			Charlie Marvin	Response-00256	Our wildlife and nature should be protected as it has for many years without obstruction
1.7	West of Sandiacre	Wildlife / Biodiversity	Charlotte Fry	Response-00583	We should be protecting our wildlife and not building homes on their homes that were there to begin with.

PolicyRef	Consultation Site	Response Category	Name of Responder	Response ID	Detail
	West of Sandiacre	Wildlife / Biodiversity	Charlotte Hunter	Response-01376	Hedgehogs, an endangered species will be impacted by this in a GREEN BELT area.
1.7	West of Sandiacre	Wildlife / Biodiversity	C Holmes	Response-01620	This site of approx. 13 acres has a diverse habitat for all of our native species, flora and fauna. Its close proximity to Stoney Clouds Nature Reserve would impact dramatically on all wildlife many of which are already struggling with loss of habitat.
1.7	West of Sandiacre	Wildlife / Biodiversity	Chris Hume	Response-01373	I live on Chestnut Grove, we have Bats, hedgehogs, Robbins, Bluetits, Sparrow Halks, Peregrine Falcon visiting as the food source is wood pigeon. We would lose all of the visiting wildlife in our garden if the building went ahead
